## AURVTN2009 Clean vehicle engine and engine compartment

### Modification History

Release	Comment
Release 1	<p>Replaces AURV231786BA Wash/clean vehicle engine and engine compartment</p> <p>Unit code updated to meet policy requirements</p> <p>Minor changes to unit title</p> <p>Reference to OHS legislation replaced with new WHS legislation</p> <p>Licensing statement added to unit descriptor</p>

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit of competency covers the skills and knowledge required to wash/clean vehicle engine, engine compartment and components.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>The unit includes identification and confirmation of work requirements, preparation for work, washing/cleaning and drying of vehicle engine, engine compartment and components, and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
--------------------------------	---

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine work requirements, including method, material and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal protection needs are observed throughout the work.</p> <p>1.4. Material for work is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the work.</p>
2. Wash/clean engine and components	<p>2.1. Tooling and equipment are selected and used according to workplace methods and customer requirements.</p> <p>2.2. Cleaning/protection agents are selected and used according to workplace methods, engine component/system material type and product manufacturer/component supplier recommended applications.</p> <p>2.3. Engine and components are washed and cleaned according to workplace/customer and product manufacturer/ component supplier prescribed methods and procedures.</p> <p>2.4. Washing/cleaning is completed without causing damage to component or system.</p> <p>2.5. Engine and components are washed and cleaned according to industry standards/regulations/guidelines, WHS requirements, legislation and enterprise procedures/ policies.</p> <p>2.6. Cleaning/protection agents are stored according to manufacturer/component supplier recommendations and regulatory requirement.</p>
3. Wash/clean engine compartment and components	<p>3.1. Tooling and equipment are selected and used according to workplace methods and customer requirements.</p> <p>3.2. Cleaning/protection agents are selected and used according to workplace methods, engine component/system material type and product</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>manufacturer/component supplier recommended applications.</p> <p>3.3.Engine compartment and components are washed and cleaned according to workplace/customer and product manufacturer/component supplier prescribed methods and procedures.</p> <p>3.4.Washing/cleaning is completed without causing damage to component or system.</p> <p>3.5.Engine compartment and components are washed and cleaned according to industry standards/regulations/ guidelines, WHS requirements, legislation and enterprise procedures/policies.</p> <p>3.6.Cleaning/protection agents are stored according to manufacturer/component supplier recommendations and regulatory requirements.</p>
4. Dry engine, compartment and components	<p>4.1.Drying processes and equipment are selected and used according to workplace methods and customer requirements.</p> <p>4.2.Engine, compartment and components are dried according to workplace/customer and product manufacturer/ component supplier/system prescribed methods and procedures.</p> <p>4.3.Engine, compartment and components are dried according to industry standards/regulations/guidelines, WHS requirements, legislation and enterprise procedures/ policies.</p> <p>4.4.Drying is completed without causing damage to component or system.</p> <p>4.5.Engine and components/systems are inspected and tested to ensure normal operation after the washing and drying process.</p>
5. Clean up work area and maintain equipment	<p>5.1.Material that can be reused is collected and stored.</p> <p>5.2.Waste material is removed following workplace and environmental procedure.</p> <p>5.3.Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>5.4.Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>5.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications</p>

ELEMENT	PERFORMANCE CRITERIA
	and worksite procedures. 5.6.Tooling is maintained in accordance with workplace procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for washing a vehicle engine, compartment and components
- identifying safety precautions
- identifying recommended washing and engine/compartment/ component protection agents, applications and procedures
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- reading and interpreting product labels/directions
- listening and following verbal instructions
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use mathematical ideas and techniques to complete measurements and estimate material requirements required for the work, including measuring and mixing cleaning/protection fluids
- use workplace technology related to the washing/cleaning of engines and engine compartments, including the use of measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental requirements for storage, handling and disposal of substances
- material safety data sheets
- electrical/electronic system/component protection methods
- air intake and fuel component protection methods
- cleaning/protection agents and their recommended applications
- washing/cleaning procedures for engine, compartment and components

**REQUIRED SKILLS AND KNOWLEDGE**

- drying procedures for engine, engine compartment and components
- engine and system/component inspection and test procedures prior to hand over
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- observing environment protection requirements
- a range of engine cleaning tasks
- selecting and using materials and equipment
- protecting electrical/electronic components
- protecting air intake and fuel components
- washing/cleaning engine, engine compartment and components.

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to the washing/cleaning of engine and engine compartment
  - equipment, hand and power tooling appropriate to the washing/cleaning of engines and engine compartments
  - activities covering mandatory task requirements
  - specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.

**EVIDENCE GUIDE**

- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.
- Assessment may be applied under project-related conditions and require evidence of process.
- Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
- It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.
- Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Methods

Methods are to include:

- manual or machine assisted washing
- engine and components washing
- engine compartment and components washing
- engine and component drying

#### Critical precautions

Critical precautions include:

- adequate protection of electrical and electronic components, air induction inlets and fuel components during the washing and drying process

#### WHS

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:

- protective clothing and equipment
- use of tooling and equipment
- workplace environment and safety
- handling of material
- use of firefighting equipment
- enterprise first aid
- hazard control and hazardous material and substances

#### Personal protective equipment

Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices

#### Safe operating procedures

Safe operating procedures are to include, but are not limited to:

- operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and

<b>RANGE STATEMENT</b>	
	mechanical lifting and shifting, working in proximity to others and worksite visitors
<b>Emergency procedures</b>	<p>Emergency procedures related to this unit are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• emergency shutdown and stopping of equipment</li> <li>• extinguishing fires</li> <li>• enterprise first aid requirements</li> <li>• worksite evacuation</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine work requirements, including method, material and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal protection needs are observed throughout the work.</p> <p>1.4. Material for work is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the work.</p>
2. Wash/clean vehicle underbody, units and system components	<p>2.1. Tooling and equipment are selected and used according to workplace methods and customer requirements.</p> <p>2.2. Cleaning agents are selected and used according to workplace methods, vehicle underbody, unit and component material type and product manufacturer/component supplier recommended applications.</p> <p>2.3. Vehicle underbody, units and system components are washed and cleaned according to workplace/customer and product manufacturer/component supplier prescribed methods and procedures.</p> <p>2.4. Washing/cleaning is completed without causing damage to component or system.</p> <p>2.5. Vehicle underbody, units and system components are washed and cleaned according to industry standards/regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p> <p>2.6. Cleaning agents are stored according to manufacturer/component supplier recommendations and regulatory requirement.</p>
3. Dry vehicle underbody, units and system components	<p>3.1. Drying processes and equipment are selected and used according to workplace methods and customer requirements.</p> <p>3.2. Vehicle underbody, units and system components are dried according to workplace/customer and product manufacturer/component supplier/system prescribed methods and procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.3.Drying is completed without causing damage to component or system.</p> <p>3.4.Vehicle underbody, units and system components are dried according to industry standards/regulations/guidelines, WHS requirements, legislation and enterprise procedures/ policies.</p> <p>3.5.Vehicle units and system components are inspected and tested to ensure normal operation after the washing and drying process.</p>
4. Clean up work area and maintain equipment	<p>4.1.Material that can be reused is collected and stored.</p> <p>4.2.Waste material is removed following workplace and environmental procedure.</p> <p>4.3.Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4.Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>4.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.6.Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for washing a vehicle underbody, units and system components
- identifying safety precautions
- identifying recommended washing agents, applications and procedures
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- reading and interpreting product labels/directions
- listening and following verbal instructions
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use mathematical ideas and techniques to complete measurements and estimate material requirements required for the work, including measuring and mixing cleaning fluids
- use workplace technology related to the washing/cleaning of vehicle underbodies, including the use of measuring equipment, computerised technology and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental requirements for storage, handling and disposal of substances
- material safety data sheets
- electrical/electronic system/component protection methods
- air intake and fuel component protection methods
- cleaning agents and their recommended applications
- washing/cleaning procedures for vehicle underbody, units and system components
- drying procedures for vehicle underbody, unit and system components

**REQUIRED SKILLS AND KNOWLEDGE**

- unit and system/component inspection and test procedures prior to hand-over
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- range of vehicle underbody washing tasks:
  - protecting electrical/electronic component
  - protecting air intake and fuel component
  - selecting and using material and equipment
  - washing/cleaning vehicle underbody, units and system components
- observing environment protection requirements.

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to the washing/cleaning of vehicle underbodies
  - equipment, hand and power tooling appropriate to the washing/cleaning of vehicle underbodies
  - activities covering mandatory task requirements
  - specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.

**EVIDENCE GUIDE**

- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.
- Assessment may be applied under project-related conditions and require evidence of process.
- Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
- It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.
- Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Methods

Methods are to include:

- manual or machine assisted washing
- vehicle underbody washing
- vehicle units and system component washing
- vehicle unit and system component drying

#### Critical precautions

Critical precautions include:

- adequate protection of electrical, electronic and fuel components, and air induction inlets during the washing and drying process

#### WHS

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:

- protective clothing and equipment
- use of tooling and equipment
- workplace environment and safety
- handling of material
- use of firefighting equipment
- enterprise first aid
- hazard control and hazardous material and substances

#### Personal protective equipment

Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices

#### Safe operating procedures

Safe operating procedures are to include, but are not limited to:

- operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including method, material and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal protection needs are observed throughout the work.</p> <p>1.4. Material for replacement is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Remove rear vision mirrors	<p>2.1. Mirrors are removed using approved methods, tooling and equipment.</p> <p>2.2. Removal is completed without causing damage to component or system.</p> <p>2.3. Removal activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
3. Install rear vision mirrors	<p>3.1. Rear vision mirrors are installed using approved methods, material, tooling and equipment.</p> <p>3.2. Installation is completed without causing damage to component or system.</p> <p>3.3. Installation activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste and scrap are removed following workplace and environmental procedures.</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
	4.6.Tooling is maintained in accordance with workplace procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for removing and installing windscreen located rear vision mirrors
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to calculate time, apply accurate measurements, calculate material requirements and establish quality checks
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology related to the removal and installation of rear vision mirrors, including the use of measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS and environmental regulations/requirements, equipment, material and personal safety requirements
- material safety data sheets
- use of tooling and equipment
- types of materials and their application
- removal and installation procedures for windscreen located rear vision mirrors
- roadworthy regulations relating to rear vision mirrors
- enterprise quality procedures
- work organisation and planning processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- removing and installing a range of rear vision mirrors.

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to the removal and installation of rear vision mirrors
  - equipment, hand and power tooling appropriate to the removal and installation of rear vision mirrors
  - activities covering mandatory task requirements
  - specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the automotive industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.
- Assessment may be applied under project-related

**EVIDENCE GUIDE**

	<p>conditions and require evidence of process.</p> <ul style="list-style-type: none"><li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li><li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li><li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li></ul>
--	---

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Methods

Methods are to include:

- visual, mechanical and physical examinations
- removal and installation/refitting of mirrors

#### WHS requirements

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:

- protective clothing and equipment
- use of tooling and equipment
- workplace environment and safety
- handling of material
- use of fire fighting equipment
- enterprise first aid
- hazard control and hazardous material and substances

#### Personal protective equipment

Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices

#### Safe operating procedures

Safe operating procedures are to include, but are not limited to:

- operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors

#### Emergency procedures

Emergency procedures related to this unit are to include, but are not limited to:

- emergency shutdown and stopping of equipment
- extinguishing fires

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• enterprise first aid requirements</li> <li>• worksite evacuation</li> </ul>
<b>Environmental requirements</b>	<p>Environmental requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• waste management, noise, dust and clean-up management</li> </ul>
<b>Quality requirements</b>	<p>Quality requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• regulations, including Australian standards</li> <li>• internal company quality policies and standards</li> <li>• enterprise operations and procedures</li> </ul>
<b>Statutory/regulatory authorities</b>	<p>Statutory/regulatory authorities may include:</p> <ul style="list-style-type: none"> <li>• federal, state/territory and local authorities administering Acts, regulations and codes of practice</li> </ul>
<b>Tooling and equipment</b>	<p>Tooling and equipment may include:</p> <ul style="list-style-type: none"> <li>• hand tooling and special equipment for removal and installation/refitting</li> </ul>

## AURVTN2030 Service air compressors and air lines

### Modification History

Release	Comment
Release 1	Replaces AURT222170A Service air compressors and air lines Unit code updated to meet policy requirements Reference to OHS legislation replaced with new WHS legislation Licensing statement added to unit descriptor

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit covers competence to carry out air compressor, pressure regulator and air line servicing appropriate to operation of air equipment and spray guns within the body repair sector.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>The unit includes identification and confirmation of work requirement, preparation for work, servicing of air compressors, servicing of air lines and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work involves air compressor regulator, water trap and lines for use of spray painting equipment associated with the vehicle body repair industry.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
--------------------------------	---

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. <b>Prepare for work</b>	1.1. Work instructions are used to determine job requirements, including method and material type 1.2. Job specifications are read and interpreted 1.3. WHS requirements, including personal protection needs, are observed throughout the work 1.4. Materials are selected and inspected for quality 1.5. Hand, power tooling and safety equipment are identified and checked for safe use 1.6. Procedures are determined to minimise waste material 1.7. Procedures are identified for maximising energy efficiency while completing job
2. <b>Service air compressor</b>	2.1. Information is accessed and interpreted from manufacturer/component supplier specifications 2.2. Service is carried out using approved methods and equipment, according to specifications relative to the plant/system 2.3. Service operations are completed within established industry guidelines 2.4. Air compressor is serviced without causing damage to component or system 2.5. Workplace documentation is completed and dealt with relevant to service outcomes 2.6. Servicing activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies
3. <b>Service pressure regulators and air lines</b>	3.1. Information is accessed and interpreted from manufacturer/component supplier specifications 3.2. Service is carried out using approved methods and equipment, according to specifications relative to the plant/system 3.3. Service operations are completed within established industry guidelines 3.4. Pressure regulators and air lines are serviced without causing damage to component or system 3.5. Servicing activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies
4. <b>Clean up work area and maintain</b>	4.1. Material that can be reused is collected and stored

ELEMENT	PERFORMANCE CRITERIA
<b>equipment</b>	<p>4.2.Waste and scrap is removed following workplace procedure</p> <p>4.3.Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures</p> <p>4.4.Unserviceable equipment is tagged and faults identified in accordance with workplace procedures</p> <p>4.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures</p> <p>4.6.Tooling is maintained in accordance with workplace procedures</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for servicing air compressors, pressure regulators and air lines
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to servicing of air compressors and air lines, including use of specialist tooling, measuring equipment, use of communication devices and reporting/documenting of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- types of air compressors and principles of operation
- construction and operation of air compressors, air lines and regulators
- plant safety requirements and inspection procedures
- service procedures/filters/demisting air
- lubricants and/or fluids
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- selecting and using relevant tooling and equipment
- identification of application, purpose and operating principles
- conducting inspection, servicing and operational testing in accordance with workplace and manufacturer/component supplier specifications
- servicing pressure regulators and air lines to workplace and manufacturer/component supplier requirements
- completing workplace/equipment documentation

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints

Assessment is to comply with regulatory requirements, including Australian Standards

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to servicing of air compressors and air lines
- equipment, hand and power tooling appropriate to servicing of air compressors and air lines
- activities covering mandatory task requirements
- specifications and work instructions

#### Method of assessment

Assessment must satisfy endorsed assessment guidelines of

**EVIDENCE GUIDE**

	<p>the automotive industry's RS&amp;R Training Package</p> <p>Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge</p> <p>Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce integration of key competencies</p> <p>Assessment may be applied under project-related conditions and require evidence of process</p> <p>Assessment must confirm a reasonable inference that competence is able not only to be satisfied under particular circumstance, but is able to be transferred to other circumstances</p> <p>It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. <b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Servicing**

Servicing to include fluids, filters, adjustments and operational testing, visual inspections and records

<b>RANGE STATEMENT</b>	
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of material, use of fire fighting equipment, enterprise first aid, hazard control and hazardous material and substances
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering applicable acts, regulations and codes of practice
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power tooling, specialist tooling for removal/adjustment, testing equipment, greasing

<b>RANGE STATEMENT</b>	
	equipment, air operated equipment and measuring equipment
<b>Materials</b>	Materials may include engine oils, gear oils, moving parts lubricants and cleaning materials
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>• safe work procedures related to servicing of air compressors and air lines</li> <li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li> <li>• engineer's design specifications and instructions</li> <li>• organisation work specifications and requirements</li> <li>• instructions issued by authorised enterprise or external persons</li> <li>• Australian Standards</li> </ul>

-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1. Prepare to test air compressors/components</b>	1.1. Nature and scope of work requirements are identified and confirmed 1.2. WHS requirements, including individual State/Territory regulatory requirements and personal protection needs are observed throughout the work 1.3. Procedures and information such as workshop manuals and specifications, and tooling required, are sourced 1.4. Method options are analysed and those most appropriate to the circumstances are selected and prepared 1.5. Technical and/or operating pressures for testing air compressors/components are sourced and support equipment is identified and prepared 1.6. Warnings in relation to working with compressed air are observed
<b>2. Test compressor systems and analyse results</b>	2.1. Methods for the system test are implemented in accordance with workplace procedures and manufacturer/component supplier specifications 2.2. Results are compared with manufacturer/component supplier specifications to indicate compliance or non-compliance 2.3. Results are documented with evidence and supporting information and recommendation(s) made 2.4. Report is forwarded to persons for action in accordance with workplace procedures
<b>3. Prepare to service, repair and replace compressors and components</b>	3.1. WHS requirements, including individual State/Territory regulatory requirements and personal protection needs are observed throughout the work 3.2. Procedures and information required are identified and sourced 3.3. Technical and tool requirements for service, repair or replacement are identified and support equipment is identified and prepared
<b>4. Carry out service, repair and replacement</b>	4.1. Methods for the service, repair and replacement are implemented in accordance with workplace procedures and manufacturer/component supplier specifications

ELEMENT	PERFORMANCE CRITERIA
	4.2.Adjustments made during the service, repair or replacement are in accordance with manufacturer/ component supplier specifications
5. <b>Prepare vehicle for use or storage</b>	5.1.Service, repair or replacement schedule documentation is completed 5.2.Final inspection is made to ensure protective guards, safety features and cowlings are in place 5.3.Final inspection is made to ensure work is to workplace expectations 5.4.Vehicle is cleaned for use or storage to workplace expectations 5.5.Job card is processed in accordance with workplace procedures

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- apply research and interpretive skills sufficient to locate, interpret and apply manufacturer/component supplier procedures, workplace policies and procedures
- apply analytical skills required for identification and analysis of technical information
- apply plain English literacy and communication skills in relation to dealing with customers and team members
- apply questioning and active listening skills for example when obtaining information from customers
- apply oral communication skills sufficient to convey information and concepts to customers
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring one's own performance
- interact effectively with other persons both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to correctly calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to the servicing, repair and replacement of air compressor systems, including the use of specialist tooling and equipment, measuring equipment, computerised technology and communication devices and the reporting/documenting of results

#### Required knowledge

A working knowledge of:

- WHS and environmental regulations/requirements, equipment, material and personal safety requirements
- dangers of working with compressor equipment
- identification of application, purpose and operation
- identification of component parts to include physical, fluid, gases and heat generation
- types and layout of service/repair manuals (hard copy and electronic)
- air compressor system testing procedures

**REQUIRED SKILLS AND KNOWLEDGE**

- service, repair and replacement procedures
- enterprise quality procedures
- work organisation and planning processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence in this unit signifies ability to transfer competence to changing circumstances and to respond to unusual circumstances in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- accurately interpreting test results
- identification of application, purpose and operating principles
- conducting inspection, servicing and operational testing in accordance with workplace and manufacturer/ component supplier specifications
- application of full repair sequence as per the Range Statement to an air compressor relative to the qualification being sought
- completing service, repair or replacement of air compressor and associated components within workplace timeframes
- vehicle is presented to customer in compliance with workplace requirements

#### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints

Assessment is to comply with regulatory requirements, including Australian Standards

The following resources should be made available:

- workplace location or simulated workplace
- material relevant to the service and repair of air compressor systems
- equipment, hand and power tooling appropriate to the

<b>EVIDENCE GUIDE</b>	
	<p>service and repair of air compressor systems</p> <ul style="list-style-type: none"> <li>• activities covering mandatory task requirements</li> <li>• specifications and work instructions</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including job sheets, test procedures and manufacturer/ component supplier specifications.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal protection needs, are observed throughout the work.</p> <p>1.4. Units/components to be disassemble and tested are identified.</p> <p>1.5. Hand, power tooling and safety equipment are identified and checked for safe use.</p> <p>1.6. Procedures are determined to minimise waste material/ components.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Disassemble units/ components	<p>2.1. Component to be disassembled is identified from customer or enterprise information.</p> <p>2.2. Methods for disassembling components are determined according to enterprise policies and procedures and manuals/specifications.</p> <p>2.3. Components are disassembled and tolerances/wear checked against manufacturer/component supplier specifications.</p> <p>2.4. Decision to retain/replace/repair/adjust/service component is determined according to enterprise policies and procedures.</p>
3. Clean and test units/ components	<p>3.1. Cleaning procedure is determined from manufacturer/ component supplier specifications and in accordance with enterprise policies and procedures.</p> <p>3.2. Component is cleaned using procedures, material, tooling and equipment.</p> <p>3.3. Component is tested for operation and future use.</p>
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste and scrap is removed following workplace procedures.</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>identified in accordance with workplace procedures.</p> <p>4.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.6.Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for disassembling and testing vehicle units/components
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to complete tests, measurements and assessment of unit/component serviceability required for the work
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology related to the disassembly and testing of vehicle units/components, including the use of specialist tooling and equipment, measuring equipment, computerised technology and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS cleaning materials, equipment, material and personal safety requirements
- component disassembling procedures
- types and layout of service/repair manuals (hard copy and electronic)
- cleaning material procedures
- industry codes of practice
- tooling and equipment safety requirements
- component checking/testing procedures
- manual handling methods
- testing procedures and techniques
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- following specifications to disassemble units/ components
- cleaning and testing the operation of units/components.

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - material relevant to the disassembling and testing of vehicle units/components
  - equipment, hand and power tooling appropriate to the disassembling and testing of vehicle units/components
  - activities covering mandatory task requirements
  - specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry's Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also

**EVIDENCE GUIDE**

	<p>reinforce the integration of key competencies.</p> <ul style="list-style-type: none"><li>• Assessment may be applied under project-related conditions and require evidence of process.</li><li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li><li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li><li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li></ul>
--	--

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Methods

Methods are to include:

- disassembling of removed units/components
- checking, repairing/replacing worn/damaged parts
- cleaning units/components
- testing assembled units/components for operation

#### WHS

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:

- protective clothing and equipment
- use of tooling and equipment
- workplace environment and safety
- handling of material
- use of firefighting equipment
- enterprise first aid
- hazard control and hazardous material and substances

#### Personal protective equipment

Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices

#### Safe operating procedures

Safe operating procedures are to include, but are not limited to:

- operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors

#### Emergency procedures

Emergency procedures related to this unit are to

<b>RANGE STATEMENT</b>	
	<p>include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• emergency shutdown and stopping of equipment</li> <li>• extinguishing fires</li> <li>• enterprise first aid requirements</li> <li>• worksite evacuation</li> </ul>
<b>Environmental requirements</b>	<p>Environmental requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• waste management, noise, dust and clean-up management</li> </ul>
<b>Quality requirements</b>	<p>Quality requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• regulations, including Australian standards</li> <li>• internal company quality policies and standards</li> <li>• enterprise operations and procedures</li> </ul>
<b>Statutory/regulatory authorities</b>	<p>Statutory/regulatory authorities may include:</p> <ul style="list-style-type: none"> <li>• federal, state/territory and local authorities administering Acts, regulations and codes of practice</li> </ul>
<b>Tooling and equipment</b>	<p>Tooling and equipment may include:</p> <ul style="list-style-type: none"> <li>• hand tooling, power tooling, testing equipment, pullers, extractors, presses, steam cleaners, detergent cleaners (including high-pressure units), chemical baths, kerosene baths, parts washers, compressors, air guns and cleaning and testing tooling, material and equipment</li> </ul>
<b>Materials</b>	<p>Materials may include:</p> <ul style="list-style-type: none"> <li>• spare parts, lubricants and fluids and cleaning materials</li> </ul>

## AURVTN3012 Install vehicle sunroofs

### Modification History

Release	Comment
Release 1	Replaces AURV324431A Install vehicle sunroofs Unit code updated to meet policy requirements Reference to OHS legislation replaced with new WHS legislation Licensing statement added to unit descriptor

### Unit Descriptor

Unit descriptor	<p>This unit covers the competence required to install sunroofs in vehicles/craft/machines.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	--

### Application of the Unit

Application of the unit	<p>The unit includes identification and confirmation of work requirement, preparation for work, fabrication of templates, marking out and cutting of panels, preparation of cut edges, installation of vehicle sunroofs and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
-------------------------	--

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including method, materials and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including dust and fume collection, breathing apparatus, eye and ear personal protection needs are observed throughout the work.</p> <p>1.4. Material for repair is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Measure, mark out and fabricate template	<p>2.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>2.2. Suitable materials are selected and template is fabricated to shape and size.</p> <p>2.3. Fabricating, measuring and marking out activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
3. Mark out, cut panels/trim and prepare cut edges	<p>3.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>3.2. Template is used to mark out areas to be cut.</p> <p>3.3. Panels/trim are cut using approved methods and equipment in accordance with specifications.</p> <p>3.4. Panels/trim are prepared in readiness for installing sunroof.</p> <p>3.5. Panels are reinforced to comply with manufacturer/ component supplier requirements, Australian Design Rules and structural requirements.</p> <p>3.6. Work is completed without causing damage to any component or system.</p> <p>3.7. Marking out, cutting and preparation activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
4. Install sunroof	<p>4.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>4.2.Sunroof is installed to specifications.</p> <p>4.3.Installation is achieved without causing damage to any component or system.</p> <p>4.4.Installed sunroof is checked for operation and leak tested.</p> <p>4.5.All installation and checking is performed according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p> <p>4.6.Workplace and equipment documentation is completed in accordance with worksite requirements.</p>
5. Clean up work area and maintain equipment	<p>5.1.Material that can be reused is collected and stored.</p> <p>5.2.Waste and scrap are removed following workplace and environmental procedures.</p> <p>5.3.Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>5.4.Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>5.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>5.6.Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- apply research and interpretive skills sufficient to locate, interpret and apply manufacturer/component supplier procedures, workplace policies and procedures
- apply analytical skills required for identification and analysis of technical information
- apply plain English literacy and communication skills in relation to dealing with customers and team members
- apply questioning and active listening skills for example when obtaining information from customers
- apply oral communication skills sufficient to convey information and concepts to customers
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring one's own performance
- interact effectively with other persons both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to installation of vehicle sunroofs, including the use of specialist tooling, measuring equipment and communication devices and the reporting/ recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- technical information
- sunroof installation procedures
- measuring procedures
- template fabrication techniques
- cutting procedures (panels and trim)
- panel reinforcing methods
- work organisation and planning processes

**REQUIRED SKILLS AND KNOWLEDGE**

- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying vehicle protection methods
- measuring, marking out and fabricating templates to specification
- preparing and installing a minimum of three sunroofs to specification
- completing workplace and equipment records.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to installation of vehicle sunroofs
- equipment, hand and power tooling appropriate to installation of vehicle sunroofs
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of

- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to paint-less dent repair, including the use of specialist tooling, measuring equipment and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- types of dents and materials appropriate to paint-less dent repair
- paint-less dent repair methods and techniques
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying vehicle protection methods
- completing paint-less dent repairs for a minimum of two unstretched shallow dents (minimum dimensions of 30mm x 5mm)
- completing workplace/equipment records.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to paint-less dent repair
- equipment, hand and power tooling appropriate to paint-less dent repair
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.

**EVIDENCE GUIDE**

	<ul style="list-style-type: none"> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. ## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements including method, material and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including dust and fume collection, breathing apparatus, eye and ear personal protection needs are observed throughout the work.</p> <p>1.4. Material for repair is selected appropriate to application.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Carry out metal panel beating repairs	<p>2.1. Correct information is accessed and interpreted from manufacturer/component supplier specifications.</p> <p>2.2. Components are repaired using approved methods and equipment in accordance with manufacturer/component supplier specifications.</p> <p>2.3. Where repair of components includes disturbance to electrical, mechanical, air conditioning systems or trim, authorised assistance is sought where required.</p> <p>2.4. Repairs are carried out to pre-paint condition.</p> <p>2.5. Repair activities are carried out according to industry regulations/guidelines, WHS legislation, statutory legislation and enterprise procedures/policies.</p> <p>2.6. Repairs are checked to specification and workplace/equipment records are completed to site requirements.</p>
3. Carry out metal panel split repairs	<p>3.1. Correct information is accessed and interpreted from manufacturer/component supplier specifications.</p> <p>3.2. Components are repaired using approved methods and equipment in accordance with manufacturer/component supplier specifications.</p> <p>3.3. Where repair of components includes disturbance to electrical, mechanical, air conditioning systems or trim, authorised assistance is sought where required.</p> <p>3.4. Repairs are carried out to pre-paint condition.</p> <p>3.5. Repair activities are carried out according to industry</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>regulations/guidelines, WHS legislation, statutory legislation and enterprise procedures/policies.</p> <p>3.6.Repairs are checked to specification and workplace/equipment records are completed to site requirements.</p>
4. Carry out metal heat shrinking operations	<p>4.1. Correct information is accessed and interpreted from manufacturer/component supplier specifications.</p> <p>4.2. Components are repaired using approved methods and equipment in accordance with manufacturer/component supplier specifications.</p> <p>4.3. Where repair of components includes disturbance to electrical, mechanical, air conditioning systems or trim, authorised assistance is sought where required.</p> <p>4.4. Repair activities are carried out according to industry regulations/guidelines, WHS legislation, statutory legislation and enterprise procedures/policies.</p> <p>4.5. Repairs are checked to specification and workplace/equipment records are completed to site requirements.</p>
5. Clean up work area and maintain equipment	<p>5.1. Material that can be reused is collected and stored.</p> <p>5.2. Waste and scrap is removed following workplace and environmental procedure.</p> <p>5.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>5.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>5.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and site procedures.</p> <p>5.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- apply research and interpretive skills sufficient to locate, interpret and apply manufacturer/component supplier specifications, workplace policies and procedures
- apply analytical skills required for identification and analysis of technical information
- apply plain English literacy and communication skills in relation to dealing with customers and team members
- apply questioning and active listening skills for example when obtaining information from customers
- apply oral communication skills sufficient to convey information and concepts to customers)
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring own performance
- interact effectively with other people both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to correctly calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to repair of body panels including use of specialist tooling, measuring equipment, use of communication devices and reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- technical information
- metal material types and stress limits
- panel beating and split panel repair methods and techniques
- heat shrinking methods and techniques
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others in associated areas
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying panel beating repair procedures to industry standard
- applying split-panel repair procedures to industry standard
- applying heat shrinking procedures to industry standard
- applying vehicle protection methods
- completing workplace/equipment records.

#### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated automotive site.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- material relevant to repair of body panels
- equipment, hand and power tooling appropriate to repair of body panels
- activities covering mandatory task requirements
- specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the Automotive Industry's RS&R Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.

**EVIDENCE GUIDE**

	<ul style="list-style-type: none"> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions (real or simulated) and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Methods**

- Methods include metal panel beating, heat shrinking and panel split repair.
- Methods should be applied under normal operating conditions.

**WHS**

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise WHS policies and procedures. This may include protective clothing and equipment,

<b>RANGE STATEMENT</b>	
	use of tooling and equipment, workplace environment and WHS, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous material and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but not limited to conduct of operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and site visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and site evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include but not be limited to regulations including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State and Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power tooling and equipment, templates, welding equipment, heat shrinking equipment, vehicle protection, special tooling and lifting equipment.
<b>Materials</b>	Materials may include welding consumables and cleaning material.

<b>RANGE STATEMENT</b>	
<b>Communications</b>	Communications are to include but not be limited to verbal and visual instructions and fault reporting and may include site specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	Sources of information/documents may include: <ul style="list-style-type: none"><li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li><li>• safe work procedures related to repair of body panels</li><li>• regulatory/legislative requirements pertaining to Automotive industry including Australian Design Rules</li><li>• engineers design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>

## AURVTN3015 Repair body panels using metal finishing techniques

### Modification History

Release	Comment
Release 1	Replaces AURV326266BA Repair body panels (metal finishing) Unit code updated to meet policy requirements Minor changes to unit title Reference to OHS legislation replaced with new WHS legislation Licensing statement added to unit descriptor

### Unit Descriptor

Unit descriptor	<p>This unit covers the competence required to carry out metal finishing, incorporating heat shrinking, to repair body panels. This unit does not cover aluminium panels.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	--

### Application of the Unit

Application of the unit	<p>The unit includes identification and confirmation of work requirement, preparation for work, repair and checking of body panels and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
-------------------------	---

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including method, materials and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including dust and fume collection, breathing apparatus, eye and ear personal protection needs are observed throughout the work.</p> <p>1.4. Material for repair is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Carry out metal finishing	<p>2.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>2.2. Components are repaired using approved methods and equipment in accordance with manufacturer/component supplier specifications.</p> <p>2.3. Where repair of components includes disturbance to electrical, mechanical, air conditioning systems or trim, authorised assistance is sought.</p> <p>2.4. Repair activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p> <p>2.5. Repairs are checked to specification and workplace/ equipment records are completed to worksite requirements.</p>
3. Carry out heat shrinking operations	<p>3.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>3.2. Components are repaired using approved methods and equipment in accordance with manufacturer/component supplier specifications.</p> <p>3.3. Where repair of components includes disturbance to electrical, mechanical, air conditioning systems or trim, authorised assistance is sought.</p> <p>3.4. Repair activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p> <p>3.5. Repairs are checked to specification and workplace/</p>

ELEMENT	PERFORMANCE CRITERIA
	equipment records are completed to worksite requirements.
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste and scrap is removed following workplace and environmental procedures.</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- apply research and interpretive skills sufficient to locate, interpret and apply manufacturer/component supplier procedures, workplace policies and procedures
- apply analytical skills required for identification and analysis of technical information
- apply plain English literacy and communication skills in relation to dealing with customers and team members
- apply questioning and active listening skills for example when obtaining information from customers
- apply oral communication skills sufficient to convey information and concepts to customers
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring one's own performance
- interact effectively with other persons both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to metal finishing of body panels, including the use of specialist tooling, measuring equipment and communication devices and the reporting/ recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- technical information
- material types and stress limits
- heat shrinking methods and techniques
- metal finishing methods and techniques
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying vehicle protection methods
- completing metal finishing panel repair covering a minimum of:
  - a panel being, a guard, quarter or door
  - with a minimum thickness of 7mm
  - having style linings and pressings; and
  - a split of 250mm minimum length
- completing workplace/equipment records.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to metal finishing of body panels
- equipment, hand and power tooling appropriate to metal finishing of body panels
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.

**EVIDENCE GUIDE**

	<ul style="list-style-type: none"> <li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Panel repair</b>	Panel repair (metal finishing) covers file finishing in metals using no fillers to repair split/tear and dents.
<b>Panels</b>	Panels are of mild steel construction.

<b>RANGE STATEMENT</b>	
<b>Repair methods</b>	Repair methods are to include panel stripping and preparation, heat shrinking, welding, hand dolly planishing and file finishing.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.

**RANGE STATEMENT****Tooling and equipment**

Tooling and equipment may include hand tooling, power tooling and equipment, templates, metal welding equipment, heat shrinking equipment, vehicle protection, specialist tooling and lifting equipment.

**Materials**

Materials may include filling materials, welding consumables and cleaning materials.

**Communications**

Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.

**Information/documents**

Sources of information/documents may include:

- verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches
- safe work procedures related to metal finishing of body parts
- regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules
- engineer's design specifications and instructions
- organisation work specifications and requirements
- instructions issued by authorised enterprise or external persons
- Australian Standards.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including method, materials and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including dust and fume collection, breathing apparatus, eye and ear personal protection needs are observed throughout the work.</p> <p>1.4. Material for repair is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Carry out repairs using body fillers	<p>2.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>2.2. Protective equipment appropriate to repair activities is used.</p> <p>2.3. Components are repaired using approved methods and equipment in accordance with manufacturer/component supplier specifications.</p> <p>2.4. Repairs are carried out to pre-paint condition.</p> <p>2.5. Repair activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p> <p>2.6. Repair is checked in accordance with workplace and manufacturer/component supplier requirements.</p> <p>2.7. Workplace/equipment documentation is completed and dealt with relevant to repair outcomes.</p>
3. Clean up work area and maintain equipment	<p>3.1. Material that can be reused is collected and stored.</p> <p>3.2. Waste and scrap is removed following workplace and environmental procedure.</p> <p>3.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>3.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>3.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.6.Tooling is maintained in accordance with workplace procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for repairing body panels incorporating filler materials
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to repair of body panels, including the use of specialist tooling, measuring equipment, computerised technology and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- technical information
- material types and stress limits
- types of body filler and their application
- body filler repair procedures and techniques
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying vehicle protection methods
- completing body filler repair procedures for at least one vehicle panel with the following minimum repair requirements/specifications:
  - panel to incorporate style line and pressings
  - a dent of a minimum of 400mm
  - a filling requirement of a maximum depth of 3mm over 75% of the repair area
- completing workplace/equipment documentation.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to repair of body panels
- equipment, hand and power tooling appropriate to repair of body panels
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training

**EVIDENCE GUIDE**

	<p>Package.</p> <ul style="list-style-type: none"> <li>Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li> <li>Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>Assessment may be applied under project related conditions and require evidence of process.</li> <li>Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Panel repair (filler)**

Panel repair (filler) covers restoration of the panel to original shape and contour by metal straightening techniques and application of fillers.

**Defects**

Defects include split/tear and dents.

<b>RANGE STATEMENT</b>	
<b>Repair fillers</b>	Repair fillers may be two-pack polyester and polystyrene types.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.

<b>RANGE STATEMENT</b>	
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power tooling and equipment, templates, welding equipment, vehicle protection, specialist tooling and lifting equipment.
<b>Materials</b>	Materials may include filling materials and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"><li>• verbal or written and graphical instructions, repair quotations, signage, work schedules/plans/ specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li><li>• safe work procedures related to repair of body panels</li><li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>

### Modification History

Release	Comment
Release 1	<p>Replaces AURV326266DA air body panels/components (thermoplastic)</p> <p>Unit code updated to meet policy requirements</p> <p>Minor changes to unit title</p> <p>Reference to OHS legislation replaced with new WHS legislation</p> <p>Licensing statement added to unit descriptor</p>

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit covers the competence required to carry out repairs on interior or exterior thermoplastic panels and components.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>The unit includes identification and confirmation of work requirement, preparation for work, repair of body panels, checking of outcomes and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
--------------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including method, materials and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including dust and fume collection, breathing apparatus, eye and ear personal protection needs are observed throughout the work.</p> <p>1.4. Material for repair is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Repair plastic panel/ component	<p>2.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>2.2. Protective equipment appropriate to repair activities is used.</p> <p>2.3. Components are repaired using approved methods and equipment in accordance with manufacturer/component supplier specifications.</p> <p>2.4. Where repair of components includes disturbance to electrical, mechanical, air conditioning systems or trim, authorised assistance is sought.</p> <p>2.5. Repairs are carried out up to pre-paint condition.</p> <p>2.6. Repair activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p> <p>2.7. Repair is checked in accordance with workplace and manufacturer/component supplier requirements.</p> <p>2.8. Workplace/equipment documentation is completed and dealt with relevant to repair outcomes.</p>
3. Clean up work area and maintain equipment	<p>3.1. Material that can be reused is collected and stored.</p> <p>3.2. Waste and scrap is removed following workplace and environmental procedure.</p> <p>3.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>3.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>3.6.Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for repairing plastic body panels
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to repair of thermoplastic body panels/components, including the use of specialist tooling, measuring equipment, computerised technology and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- technical information
- plastic material types and stress limits
- plastic panel/component repair procedures and techniques
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- identifying and selecting repair techniques
- completing a minimum of plastic panel repair using both bonding and welding and, including:
  - a body panel incorporating flange and contour with a split of 200mm
  - a body electrical ornament
  - an interior panel
- completing workplace/equipment documentation.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to repair of thermoplastic body panels/components
- equipment, hand and power tooling appropriate to repair of thermoplastic body panels/components
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training

**EVIDENCE GUIDE**

	<p>Package.</p> <ul style="list-style-type: none"> <li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Plastics</b>	Plastics may be rigid, semi-rigid or flexible.
<b>Thermoplastic repairs</b>	Thermoplastic repair covers splits/tears and dents.
<b>Repair methods</b>	Repair methods are to include straightening and

<b>RANGE STATEMENT</b>	
	realigning, welding, bonding and filling.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power tooling and equipment, templates, butane

<b>RANGE STATEMENT</b>	
	welder, airless welding torch, heat air supply tool, vehicle protection, specialist tooling and lifting equipment.
<b>Materials</b>	Materials may include glues, bonding agents and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"><li>• verbal or written and graphical instructions, repair quotations, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li><li>• safe work procedures related to repair of thermoplastic body panels/components</li><li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including method, materials and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including dust and fume collection, breathing apparatus, eye and ear personal protection needs are observed throughout the work.</p> <p>1.4. Material for repair is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Carry out structural straightening and realigning procedures	<p>2.1. Information is accessed and interpreted from manufacturer/component supplier specifications.</p> <p>2.2. Protective equipment appropriate to repair activities is used.</p> <p>2.3. Components are straightened and realigned using approved methods and equipment in accordance with manufacturer/ component supplier specification.</p> <p>2.4. Where straightening and realigning of components includes disturbance to electrical, mechanical, air conditioning systems or trim, authorised assistance is sought.</p> <p>2.5. Repair activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
3. Carry out welded panel replacement procedures	<p>3.1. Information is accessed and interpreted from manufacturer/component supplier specifications.</p> <p>3.2. Protective equipment appropriate to repair activities are used.</p> <p>3.3. Components are replaced using approved methods and equipment in accordance with manufacturer/component supplier specification.</p> <p>3.4. Where replacement of components includes disturbance to electrical, mechanical, air conditioning systems or trim, authorised assistance is sought.</p> <p>3.5. Replacement activities are carried out according to industry regulations/guidelines, WHS legislation, and</p>

ELEMENT	PERFORMANCE CRITERIA
	enterprise procedures/policies.
4. Carry out body panel measuring procedures	<p>4.1.Information is accessed and interpreted from manufacturer/component supplier specifications.</p> <p>4.2.Components are measured using approved methods and equipment in accordance with manufacturer/component supplier specification.</p> <p>4.3.Measuring activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p> <p>4.4.Workplace/equipment documentation is completed and dealt with relevant to repair outcomes.</p>
5. Clean up work area and maintain equipment	<p>5.1.Material that can be reused is collected and stored.</p> <p>5.2.Waste and scrap is removed following workplace and environmental procedure.</p> <p>5.3.Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>5.4.Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>5.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>5.6.Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for repairing/replacing structurally damaged components
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to repair and replacement of structurally damaged panels, including the use of specialist tooling, measuring equipment, computerised technology and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- technical information
- hydraulic straightening and realigning procedures and techniques
- body panel measuring procedures and techniques
- panel replacement procedures and techniques
- manual handling procedures
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying vehicle protection procedures
- completing hydraulic straightening and aligning procedures to manufacturer/component supplier and workplace requirements
- completing repair/replacement operations for a minimum of three different jobs, which are to include one door skin and one quarter panel
- completing workplace/equipment documentation.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to repair and replacement of structurally damaged panels
- equipment, hand and power tooling appropriate to repair and replacement of structurally damaged panels
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training

**EVIDENCE GUIDE**

	<p>Package.</p> <ul style="list-style-type: none"> <li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Structural damage**

Structural damage to rails and skirts, boot floors, chassis rails, inner wheel arches, turrets, bulkheads / fire wall, front & rear hinge pillars, combination inner and outer sill/pillar panels.

<b>RANGE STATEMENT</b>	
<b>Repair/replacement methods</b>	<p>Repair/replacement methods are to include:</p> <ul style="list-style-type: none"> <li>• welding (oxy acetylene, MIG, TIG and spot)</li> <li>• heat shrinking, panel split repair, metal finishing, body filling</li> <li>• hydraulic forming, minor sectional repair, welded panel replacement, measuring and alignment techniques.</li> </ul>
<b>WHS</b>	<p>WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.</p>
<b>Personal protective equipment</b>	<p>Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.</p>
<b>Safe operating procedures</b>	<p>Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.</p>
<b>Emergency procedures</b>	<p>Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.</p>
<b>Environmental requirements</b>	<p>Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.</p>
<b>Quality requirements</b>	<p>Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.</p>

<b>RANGE STATEMENT</b>	
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power tooling and equipment, including hydraulic push-pull, templates, welding equipment (which may include arc, oxy acetylene, MIG and TIG), measuring equipment/devices (tape measures, trammel gauges, mechanical/electronic underbody and jiggling), vehicle protection, specialist tooling and equipment.
<b>Materials</b>	Materials may include welding consumables and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"><li>• verbal or written and graphical instructions, repair quotations, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li><li>• safe work procedures related to repair and replacement of structurally damaged panels</li><li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>

## AURVTN3019 Repair and replace structural damage by riveting

### Modification History

Release	Comment
Release 1	<p>Replaces AURV326366BA Repair/replace structural damage (riveting)</p> <p>Unit code updated to meet policy requirements</p> <p>Minor changes to unit title</p> <p>Reference to OHS legislation replaced with new WHS legislation</p> <p>Licensing statement added to unit descriptor</p>

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit covers the competence required to carry out structural repairs using straightening and realigning, panel replacement and body panel manual measuring procedures.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>The unit includes identification and confirmation of work requirement, preparation for work, and application of structural straightening and realign, panel replacement riveting procedures and techniques, inspection and measuring of outcomes and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
--------------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including method, materials and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including dust and fume collection, breathing apparatus, eye and ear personal protection needs are observed throughout the work.</p> <p>1.4. Material for repair is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Carry out structural straightening and realigning procedures	<p>2.1. Information is accessed and interpreted from manufacturer/component supplier specifications.</p> <p>2.2. Protective equipment appropriate to repair activities used.</p> <p>2.3. Components are straightened and realigned using approved methods and equipment in accordance with manufacturer/component supplier specification.</p> <p>2.4. Where straightening and realigning of components includes disturbance to electrical, mechanical, air conditioning systems or trim, authorised assistance is sought.</p> <p>2.5. Repair activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
3. Carry out riveted panel replacement procedures	<p>3.1. Information is accessed and interpreted from manufacturer/component supplier specifications.</p> <p>3.2. Protective equipment appropriate to repair activities are used.</p> <p>3.3. Components are replaced using approved riveting methods and equipment in accordance with manufacturer/ component supplier specification.</p> <p>3.4. Where replacement of components includes disturbance to electrical, mechanical, air conditioning systems or trim, authorised assistance is sought.</p> <p>3.5. Replacement activities are carried out according to industry regulations/guidelines, WHS legislation, and</p>

ELEMENT	PERFORMANCE CRITERIA
	enterprise procedures/policies.
4. Carry out body panel measuring procedures	<p>4.1.Information is accessed and interpreted from manufacturer/component supplier specifications.</p> <p>4.2.Components are measured using approved methods and equipment in accordance with manufacturer/component supplier specification.</p> <p>4.3.Measuring activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p> <p>4.4.Workplace/equipment documentation is completed and dealt with relevant to repair outcomes.</p>
5. Clean up work area and maintain equipment	<p>5.1.Material that can be reused is collected and stored.</p> <p>5.2.Waste and scrap is removed following workplace and environmental procedure.</p> <p>5.3.Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>5.4.Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>5.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>5.6.Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for repairing/replacing structurally damaged components
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to repair and replacement of structurally damaged panels, including the use of specialist tooling, measuring equipment, computerised technology and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- technical information
- hydraulic straightening and realigning procedures and techniques
- body panel measuring procedures and techniques
- riveting procedures and techniques
- assembly replacement techniques
- manual handling procedures
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying vehicle protection procedures
- completing hydraulic straightening and aligning procedures to manufacturer/component supplier and workplace requirements
- completing repair/replacement operations for a minimum of three different jobs which are to include one radiator support assembly and one skirt and rail assembly
- completing workplace/equipment documentation.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to repair and replacement of structurally damaged panels
- equipment, hand and power tooling appropriate to repair and replacement of structurally damaged panels
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training

**EVIDENCE GUIDE**

	<p>Package.</p> <ul style="list-style-type: none"> <li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Structural damage**

Structural damage is to include radiator support assemblies, skirt and rail assemblies and bulkheads.

**Repair/replacement methods**

Repair/replacement methods are to include:

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• heat shrinking, panel split repair, metal finishing, body filling</li> <li>• hydraulic forming, minor sectional repair, welded panel replacement, measuring and alignment techniques.</li> </ul>
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of

<b>RANGE STATEMENT</b>	
	practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power tooling and equipment, including hydraulic push/pull, templates, riveting equipment, measuring equipment/devices (tape measures, trammel gauges, mechanical/electronic underbody and jiggling), vehicle protection, specialist tooling and equipment.
<b>Materials</b>	Materials may include rivets and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, repair quotations, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>• safe work procedures related to repair and replacement of structurally damaged assemblies</li> <li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li> <li>• engineer's design specifications and instructions</li> <li>• organisation work specifications and requirements</li> <li>• instructions issued by authorised enterprise or external persons</li> <li>• Australian Standards.</li> </ul>

## AURVTN3020 Replace major welded panels

### Modification History

Release	Comment
Release 1	Replaces AURV326367B Replace major welded panels Unit code updated to meet policy requirements Reference to OHS legislation replaced with new WHS legislation Licensing statement added to unit descriptor

### Unit Descriptor

Unit descriptor	<p>This unit covers the competence required to carry out welded panel and panel section replacement.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	---

### Application of the Unit

Application of the unit	<p>The unit includes identification and confirmation of work requirement, preparation for work, removal, replacement and alignment of welded panels and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
-------------------------	--

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including method, materials and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including dust and fume collection, breathing apparatus, eye and ear personal protection needs are observed throughout the work.</p> <p>1.4. Material for repair is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Remove welded panels/panel sections	<p>2.1. Information is accessed and interpreted from manufacturer/component supplier specifications.</p> <p>2.2. Protective equipment appropriate to repair activities is used.</p> <p>2.3. Components are removed using approved methods and equipment in accordance with manufacturer/component supplier specification.</p> <p>2.4. Where removal of components includes disturbance to electrical, mechanical, air conditioning systems or trim, authorised assistance is sought.</p> <p>2.5. Removal activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
3. Replace and align welded panel/panel sections	<p>3.1. Information is accessed and interpreted from manufacturer/component supplier specifications.</p> <p>3.2. Protective equipment appropriate to repair activities is used.</p> <p>3.3. Components are replaced and aligned using approved methods and equipment in accordance with manufacturer/ component supplier specifications.</p> <p>3.4. Where replacement of components includes disturbance to electrical, mechanical, air conditioning systems or trim, authorised assistance is sought.</p> <p>3.5. Replacements are carried out to pre-paint condition.</p> <p>3.6. Replacement and alignment activities are carried out according to industry regulations/guidelines, WHS</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>legislation, and enterprise procedures/policies.</p> <p>3.7.Workplace/equipment documentation is completed and dealt with relevant to work outcomes.</p>
4. Clean up work area and maintain equipment	<p>4.1.Material that can be reused is collected and stored.</p> <p>4.2.Waste and scrap is removed following workplace and environmental procedures.</p> <p>4.3.Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4.Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>4.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.6.Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for replacing welded panels and panel sections
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to replacement of major welded panels, including the use of specialist tooling, welding systems, measuring equipment, computerised technology and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- technical information
- types of metal materials
- major welded panel replacement procedures and techniques
- manual handling procedures
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- completing replacement of a minimum of three major panels to manufacturer/component supplier and workplace requirements, including one rail and skirt and one centre pillar and sill panel assembly
- completing panel alignment to manufacturer/component supplier and workplace requirements
- completing workplace/equipment documentation.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to replacement of major welded panels
- equipment, hand and power tooling appropriate to replacement of major welded panels
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of

**EVIDENCE GUIDE**

	<p>underpinning knowledge.</p> <ul style="list-style-type: none"> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Major welded panels**

Major welded panels include radiator support panels, quarter panels, beaver panels, outer sill panels, outer pillar panels, door skins and turret skins.

**Replacement methods**

Replacement methods are to include:

- welding (oxy acetylene, MIG, TIG and spot)
- heat shrinking, hydraulic forming, welded

<b>RANGE STATEMENT</b>	
	panel replacement, measuring and alignment techniques.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling,

<b>RANGE STATEMENT</b>	
	power tooling and equipment, including hydraulic push pull, heating and welding equipment which may include arc, oxy acetylene, MIG, TIG, measuring equipment and/or systems, vehicle protection, specialist tooling and equipment.
<b>Materials</b>	Materials may include welding consumables and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"><li>• verbal or written and graphical instructions, repair quotations, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li><li>• safe work procedures related to replacement of major welded panels</li><li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>

ELEMENT	PERFORMANCE CRITERIA
	<p>with manufacturer/component supplier specifications and worksite procedures.</p> <p>3.5.Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for body repair using lead wiping
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to lead wiping repair of body components, including the use of specialist tooling, measuring equipment and communication devices and the reporting/ recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental protection requirements
- material types (metals, plastics, fibreglass, etc.)
- technical information
- filling materials, procedures and techniques
- waste product disposal procedures
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying vehicle protection methods
- applying environmental procedures
- completing lead wiping operations which are, at a minimum to include repairing small dents vertically and repairing a joint with vertical and horizontal planes to manufacturer/component supplier and workplace requirements
- completing workplace/equipment documentation.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to lead wiping repair of body components
- equipment, hand and power tooling appropriate to lead wiping repair of body components
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training

**EVIDENCE GUIDE**

	<p>Package.</p> <ul style="list-style-type: none"> <li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. ## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<ul style="list-style-type: none"><li>1.1. Work instructions are used to determine the job requirements, including method, materials and equipment.</li><li>1.2. Job specifications are read and interpreted.</li><li>1.3. WHS requirements, including dust and fume collection, breathing apparatus, eye and ear personal protection needs are observed throughout the work.</li><li>1.4. Material for repair is selected.</li><li>1.5. Equipment and tooling are identified and checked for safe and effective operation.</li><li>1.6. Procedures are determined to minimise waste material.</li><li>1.7. Procedures are identified for maximising energy efficiency while completing the job.</li></ul>
2. Perform vehicle measuring	<ul style="list-style-type: none"><li>2.1. Measurement of the vehicle is completed without causing damage to any component or system.</li><li>2.2. Equipment selected for vehicle measuring is to vehicle manufacturer/component supplier specifications.</li><li>2.3. Equipment used for vehicle measuring is prepared and adjusted in accordance with equipment manufacturer/ component supplier specification.</li><li>2.4. Vehicle is prepared and, installed/located on the equipment in accordance with equipment manufacturer/component supplier instructions.</li><li>2.5. Nature and extent of misalignment is determined using approved measuring methods.</li><li>2.6. Results of measurements of vehicle alignment are documented accurately and completely.</li><li>2.7. Measuring activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</li></ul>
3. Rectify body and underframe misalignment	<ul style="list-style-type: none"><li>3.1. Equipment selected for rectification of alignment is to vehicle manufacturer/component supplier specification.</li><li>3.2. Equipment used for rectification of alignment is prepared and adjusted in accordance with equipment manufacturer/ component supplier specification.</li><li>3.3. Vehicle to be aligned is prepared and, installed/located on the alignment equipment in</li></ul>

ELEMENT	PERFORMANCE CRITERIA
	<p>accordance with equipment manufacturer/component supplier instructions.</p> <p>3.4. Hydraulic repair equipment is prepared and attached using equipment manufacturer/component supplier approved methods.</p> <p>3.5. Hydraulic repair equipment is operated using approved methods and techniques.</p> <p>3.6. Alignment of item is reinstated to manufacturer/component supplier specification and tolerances.</p> <p>3.7. Rectifying of body and underframe misalignment is completed without causing damage to any component or system.</p> <p>3.8. Reinstatement activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste and scrap is removed following workplace and environmental procedures.</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for vehicle body measurement and alignment repair
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to measure and repair body misalignment, including the use of specialist tooling, measuring equipment, computerised technology and communication devices and the reporting/recording of results
- 

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- manufacturer/component supplier specifications
- measurement methods/techniques and procedures
- alignment methods/repair techniques and procedures
- removal and replacement procedures
- tooling and equipment, including welding and heating equipment
- manual handling techniques
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- repairing a range of vehicle body misalignments, including measuring, welding, sectional repair and application of hydraulic repair equipment
- completing activities within workplace timeframes
- completion of workplace records.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to measuring and repair of body misalignment
- equipment, hand and power tooling appropriate to measuring and repair of body misalignment
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of

**EVIDENCE GUIDE**

	<p>underpinning knowledge.</p> <ul style="list-style-type: none"> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Methods**

Methods are to include:

- visual, mechanical and physical examination
- measurements in conjunction with alignment equipment, including identification of under-body damage, sway, sag and/or twist
- heating, hydraulic reforming, sectional repair, including a range of joins e.g. staggered and traffic authority approved methods

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• panel beating, welding, mechanical fastening, riveting, metal cutting</li> <li>• removal and replacement of mechanical, suspension, steering transmissions, etc.</li> </ul>
<b>Component types</b>	Components types may include in situ panels, double panels, box panels, sill panels, chassis, frames, turrets, mono construction, high-stress steels and plastic body panels.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and

<b>RANGE STATEMENT</b>	
	procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power tooling and equipment, heating and welding equipment, including oxy acetylene, arc, MIG, TIG, lifting and hydraulic push/pull equipment, measuring systems/ equipment (jigging systems) and vehicle alignment bench, including a range of clamping and anchoring procedures/ methods.
<b>Materials</b>	Materials may include welding and fastening materials, repair consumables and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>• safe work procedures related to measuring and repair of body misalignment</li> <li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li> <li>• engineer's design specifications and instructions</li> <li>• organisation work specifications and requirements</li> <li>• instructions issued by authorised enterprise or external persons</li> <li>• Australian Standards.</li> </ul>

## AURVTN3023 Remove and replace adhesive bonded panels and structures

### Modification History

Release	Comment
Release 1	<p>Replaces AURV326964A Remove and replace adhesive bonded panels and structures</p> <p>Unit code updated to meet policy requirements</p> <p>Reference to OHS legislation replaced with new WHS legislation</p> <p>Licensing statement added to unit descriptor</p>

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit covers the competence required to replace body panels and structures with new or repaired parts, using an adhesive bonding attachment method.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>The unit includes identification and confirmation of work requirement, preparation for work, removal, replacement and refitting of adhesive bonded panels and structures and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
--------------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including method, materials and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including dust and fume collection, breathing apparatus, eye and ear personal protection needs are observed throughout the work.</p> <p>1.4. Material for attachment is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Remove and replace body panels and structures	<p>2.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>2.2. Replacement components meet specifications for dimensions, materials and functional capability.</p> <p>2.3. Components and ancillary fittings are refitted using approved adhesive bonding methods, materials and equipment.</p> <p>2.4. Sealant is selected and applied according to the manufacturer/component supplier specification for type, method of application and thickness.</p> <p>2.5. Where there is a potential disturbance to electrical, mechanical, electronic or other systems, assistance is sought.</p> <p>2.6. Removal and replacing/refitting of body panels and structures is completed without causing damage to any component or system.</p> <p>2.7. Replacement activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p> <p>2.8. Workplace/equipment documentation is completed and dealt with relevant to work outcome.</p>
3. Clean up work area and maintain equipment	<p>3.1. Material that can be reused is collected and stored.</p> <p>3.2. Waste and scrap is removed following workplace and environmental procedure.</p> <p>3.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>workplace procedures.</p> <p>3.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>3.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>3.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for removing and replacing vehicle adhesive bonded body panels and structures
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to removal and replacement of adhesive bonded panels and structures, including the use of specialist tooling, measuring equipment and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- protection procedures for electrical/electronic systems and equipment
- engineering structural requirements
- removal and replacement procedures for bonded body panels and structures
- sealant selection and application
- adhesive bonding techniques, materials and application
- use of tooling and equipment
- manual handling techniques
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- protecting electrical/electronic equipment and systems
- selecting and applying replacement/refitting procedures for bonded panels and structures
- completing removal and replacement of a minimum of three bonded panels/structures, including one turret and one door skin.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to removal and replacement of adhesive bonded panels and structures
- equipment, hand and power tooling appropriate to removal and replacement of adhesive bonded panels and structures
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and

**EVIDENCE GUIDE**

	<p>accuracy of performance together with application of underpinning knowledge.</p> <ul style="list-style-type: none"> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Panels</b>	Panels may include turrets, boot floors, firewalls, skirt and rails, front and side panels, door skirts and quarter panels.
<b>Measurement</b>	Measurement includes mechanical, electronic, dedicated and non-dedicated jiggling systems.
<b>Removal and replacement</b>	Removal and replacement methods are to include

<b>RANGE STATEMENT</b>	
<b>methods</b>	adhesive bonding, resistant spot welding, clamping and cleaning.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.

<b>RANGE STATEMENT</b>	
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power tooling and equipment, clamping equipment, welding equipment, curing/drying equipment, templates and lifting equipment, sealing and adhesive equipment.
<b>Materials</b>	Materials may include sealants and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"><li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li><li>• safe work procedures related to removal and replacement of adhesive bonded panels and structures</li><li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including method, material and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including personal protection needs are observed throughout the work.</p> <p>1.4. Materials for repair are selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Inspect and test vehicle body component seals for leaks	<p>2.1. Information is accessed and applied in accordance with vehicle/component manufacturer/component supplier specifications.</p> <p>2.2. Inspection and testing, including those for water and dust leaks and wind noise, follow industry accepted procedures.</p> <p>2.3. Inspection and testing procedures are carried out in accordance with manufacturer/component supplier specifications.</p> <p>2.4. Inspection and testing are completed without causing damage to vehicle section, system or component.</p> <p>2.5. Activities are carried out according to industry regulations/ guidelines, WHS, legislation and enterprise procedures/ policies.</p>
3. Install, repair and/or replace vehicle body component seals	<p>3.1. Information is accessed and applied in accordance with vehicle/component manufacturer/component supplier specifications.</p> <p>3.2. Fittings, tooling and equipment are used.</p> <p>3.3. Installation, repairs and replacement procedures are carried out in accordance with manufacturer/component supplier specifications.</p> <p>3.4. Work is completed without causing damage to vehicle section, system or component.</p> <p>3.5. Activities are carried out according to industry regulations/ guidelines, WHS, legislation and enterprise procedures/ policies.</p> <p>3.6. Workplace equipment documentation is completed</p>

ELEMENT	PERFORMANCE CRITERIA
	and processed to enterprise/manufacture/component supplier requirements.
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste and scrap is removed following workplace and environmental procedures.</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for installing vehicle body component seals
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to the installation of vehicle body component seals, including the use of specialist tooling, measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- technical information
- types of vehicle body component seals
- types of adhesives and their application
- dismantling and assembling vehicle components
- vehicle body seal securing methods and procedures
- manufacturer/component supplier/company policies
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- inspecting and testing vehicle body component seals
- installing, repairing and replacing a range of vehicle body component seals to manufacturer/component supplier and workplace requirements
- completing workplace/equipment records.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- material relevant to the installation of vehicle body component seals
- equipment, hand and power tooling appropriate to the installation of vehicle body component seals
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of

**EVIDENCE GUIDE**

	<p>underpinning knowledge.</p> <ul style="list-style-type: none"> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project-related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. ## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including method, materials and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including dust and fume collection, breathing apparatus, eye and ear personal protection needs are observed throughout the work.</p> <p>1.4. Material for repair is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Remove corroded body panels and/or structural components or sections	<p>2.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>2.2. Panels and/or structural components or sections are removed with out causing damage to vehicle.</p> <p>2.3. Repairable/reusable body sections are determined according to general industry repair methods.</p> <p>2.4. Where removal of components includes disturbance to electrical, mechanical, air conditioning systems or trim, authorised assistance is sought.</p> <p>2.5. Repair activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
3. Carry out body component/panel repairing and reforming procedures	<p>3.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>3.2. Repair material is selected in accordance with the industries general repair requirements and vehicle manufacturer/component supplier specifications.</p> <p>3.3. Components are measured using approved methods and equipment in accordance with manufacturer/component supplier specification.</p> <p>3.4. Components, panels and/or sections are repaired using approved methods and equipment in accordance with manufacturer/component supplier specification.</p> <p>3.5. Components, panels and/or sections are manufactured and reformed to suit vehicle contour</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>and measurement requirements.</p> <p>3.6. Where repair of components includes disturbance to electrical, mechanical, air conditioning systems or trim, authorised assistance is sought.</p> <p>3.7. Repair activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
<p>4. Replace body panels and structural components or sections</p>	<p>4.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>4.2. Components are replaced using approved methods and equipment in accordance with manufacturer/component supplier specification.</p> <p>4.3. Replaced panels/components are checked for compliance with specification.</p> <p>4.4. Where replacement of components includes disturbance to electrical, mechanical, air conditioning systems or trim, authorised assistance is sought.</p> <p>4.5. Replacement activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p> <p>4.6. Workplace/equipment documentation is completed and processed to enterprise/manufacturer/component supplier requirements.</p>
<p>5. Clean up work area and maintain equipment</p>	<p>5.1. Material that can be reused is collected and stored.</p> <p>5.2. Waste and scrap is removed following workplace and environmental procedure.</p> <p>5.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>5.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>5.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>5.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for repairing body corrosion damage
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to repair of corroded panels and components, including the use of specialist tooling, measuring equipment, computerised technology and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- technical information
- body panel/component measuring procedures
- corrosion repair methods and procedures, including panel/panel section replacement and panel/component manufacture and forming
- welding techniques
- manual handling procedures
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying vehicle protection procedures
- completing body corrosion repair, including panel and section replacement and panel/component repairing and forming
- completing body panel/component manual measuring
- completing workplace/equipment documentation.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to repair of corroded panels and components
- equipment, hand and power tooling appropriate to repair of corroded panels and components
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and

**EVIDENCE GUIDE**

	<p>accuracy of performance together with application of underpinning knowledge.</p> <ul style="list-style-type: none"> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Corrosion repairs**

Types of corrosion repairs include:

- radiator support panels and sections
- front skirt section
- door skins
- sill panels and section
- beaver panel replacement.

<b>RANGE STATEMENT</b>	
<b>Panel repair methods</b>	Panel repair methods are to include grinding, thermal heating and cutting, welding (oxy acetylene, MIG, TIG and spot), heat shrinking, metal finishing, body filling, forming, panel replacement and precision measurement.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities

<b>RANGE STATEMENT</b>	
	administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power tooling and equipment, templates, welding equipment (arc, oxy acetylene, MIG, TIG and spot), measuring equipment/ devices, vehicle protection, specialist tooling and equipment.
<b>Materials</b>	Materials may include welding consumables, adhesives and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"><li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li><li>• safe work procedures related to repair of corroded panels and components</li><li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>

## AURVTN3026 Repair aluminium body panels (finishing)

### Modification History

Release	Comment
Release 1	<p>Replaces AURV327466AA Repair aluminium body panels (finishing)</p> <p>Unit code updated to meet policy requirements</p> <p>Reference to OHS legislation replaced with new WHS legislation</p> <p>Licensing statement added to unit descriptor</p>

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit covers the competence required to carry out repairs of aluminium panels applying finishing and heat shrinking techniques.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>The unit includes identification and confirmation of work requirement, preparation for work, repair and checking of body panels and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including method, materials and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including dust and fume collection, breathing apparatus, eye and ear personal protection needs are observed throughout the work.</p> <p>1.4. Material for repair is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Carry out finishing	<p>2.1. Information is accessed and interpreted from manufacturer/component supplier specifications.</p> <p>2.2. Components are repaired using approved methods and equipment in accordance with manufacturer/component supplier specification.</p> <p>2.3. Where repair of components includes disturbance to electrical, mechanical, air conditioning systems or trim, authorised assistance is sought.</p> <p>2.4. Repair activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p> <p>2.5. Repairs are checked to specification and workplace/equipment records are completed to worksite requirements.</p>
3. Carry out heat shrinking operations	<p>3.1. Information is accessed and interpreted from manufacturer/component supplier specifications.</p> <p>3.2. Components are repaired using approved methods and equipment in accordance with manufacturer/component supplier specification.</p> <p>3.3. Where repair of components includes disturbance to electrical, mechanical, air conditioning systems or trim, authorised assistance is sought.</p> <p>3.4. Repair activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p> <p>3.5. Repairs are checked to specification and workplace/</p>

ELEMENT	PERFORMANCE CRITERIA
	equipment records are completed to worksite requirements.
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste and scrap is removed following workplace and environmental procedure.</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- apply research and interpretive skills sufficient to locate, interpret and apply manufacturer/component supplier procedures, workplace policies and procedures
- apply analytical skills required for identification and analysis of technical information
- apply plain English literacy and communication skills in relation to dealing with customers and team members
- apply questioning and active listening skills for example when obtaining information from customers
- apply oral communication skills sufficient to convey information and concepts to customers
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring one's own performance
- interact effectively with other persons both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to aluminium finishing of body parts, including the use of specialist tooling, measuring equipment and communication devices and the reporting/ recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- technical information
- material types and stress limits
- heat shrinking methods and techniques
- aluminium finishing methods and techniques
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying vehicle protection methods
- completing finishing repair of a panel containing a split of 250mm
- completing workplace/equipment records.

#### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to aluminium finishing of body parts
- equipment, hand and power tooling appropriate to aluminium finishing of body parts
- activities covering mandatory task requirements
- specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with

**EVIDENCE GUIDE**

	<p>questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</p> <ul style="list-style-type: none"> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Panel repair (aluminium finishing)</b>	Panel repair (aluminium finishing) covers finishing of aluminium panels using no fillers to repair splits/tears and dents.
<b>Panels</b>	Panels are of aluminium construction.
<b>Repair methods</b>	Repair methods are to include panel stripping and preparation, heat shrinking, welding (TIG and MIG), annealing, planishing and file finishing.
<b>WHS</b>	WHS requirements are to be in accordance with

<b>RANGE STATEMENT</b>	
	legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power tooling and equipment, templates, welding equipment, heat shrinking equipment, vehicle protection, specialist tooling and lifting

<b>RANGE STATEMENT</b>	
	equipment.
<b>Materials</b>	Materials may include welding consumables, filling materials and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>• safe work procedures related to finishing of aluminium body panels</li> <li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li> <li>• engineer's design specifications and instructions</li> <li>• organisation work specifications and requirements</li> <li>• instructions issued by authorised enterprise or external persons</li> <li>• Australian Standards.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including method, materials and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including dust and fume collection, breathing apparatus, eye and ear personal protection needs are observed throughout the work.</p> <p>1.4. Material for repair is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Carry out repairs using fillers	<p>2.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>2.2. Protective equipment appropriate to repair activities is used.</p> <p>2.3. Components are repaired using approved methods and equipment in accordance with manufacturer/component supplier specification.</p> <p>2.4. Repairs are carried out to pre-paint condition.</p> <p>2.5. Repair activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p> <p>2.6. Repair is checked in accordance with workplace and manufacturer/component supplier requirements.</p> <p>2.7. Workplace/equipment documentation is completed and dealt with relevant to repair outcomes.</p>
3. Clean up work area and maintain equipment	<p>3.1. Material that can be reused is collected and stored.</p> <p>3.2. Waste and scrap is removed following workplace and environmental procedure.</p> <p>3.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>3.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>3.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.6.Tooling is maintained in accordance with workplace procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for repairing aluminium body panels incorporating filler materials
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to repair of body panels, including the use of specialist tooling, measuring equipment, computerised technology and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- technical information
- material types and stress limits
- types of body filler and their application
- body filler repair procedures and techniques
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying vehicle protection methods
- completing body filler repair procedures for at least one simulated vehicle panel with the following minimum repair requirements/specifications:
  - the panel to incorporate style line and pressings
  - a dent of a minimum of 400mm
  - a filling requirement of a maximum depth of 3mm over 75% of the repair area
- completing workplace/equipment documentation.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to repair of aluminium body panels
- equipment, hand and power tooling appropriate to repair of aluminium body panels
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training

**EVIDENCE GUIDE**

	<p>Package.</p> <ul style="list-style-type: none"> <li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment must satisfy the endorsed assessment.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Panel repair (filler)**

Panel repair (filler) covers the restoration of the aluminium panel to original shape and contour by metal straightening techniques and application of fillers.

<b>RANGE STATEMENT</b>	
<b>Defects</b>	Defects include split/tear and dents.
<b>Repair fillers</b>	Repair fillers may be two-pack polyester and polystyrene types.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of

<b>RANGE STATEMENT</b>	
	practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power tooling and equipment, templates, welding equipment, vehicle protection, specialist tooling and lifting equipment.
<b>Materials</b>	Materials may include filling materials and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, repair quotations, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>• safe work procedures related to repair of aluminium body panels</li> <li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li> <li>• engineer's design specifications and instructions</li> <li>• organisation work specifications and requirements</li> <li>• instructions issued by authorised enterprise or external persons</li> <li>• Australian Standards.</li> </ul>

## AURVTN3028 Identify and repair high strength steel components

### Modification History

Release	Comment
Release 1	New unit of competency

### Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes required to locate, identify and repair high strength steel (HSS), including advanced and ultra-high strength steel components in motor vehicles.</p> <p>Work involves identifying HSS components, confirming recommended repair procedure of original equipment manufacturer (OEM), selecting repair procedures and recommended welding method, removing and replacing HSS components, completing and testing processes, and clean-up and documentation.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	--

### Application of the Unit

Application of the unit	<p>Work applies to repair technicians who apply repair techniques to damaged vehicles in line with OEM-recommended procedures and industry codes of practice.</p> <p>Work is carried out according to OEM and industry codes of practice.</p>
-------------------------	---

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Locate, interpret and understand OEM-recommended repair processes for HSS	1.1.OEM repair processes and those of other recommended industry agencies are sourced using the internet or repair manuals 1.2.OEM repair processes and specifications are read and incorporated into the development of a repair plan 1.3.OEM-recommended <b>repair procedures</b> and workplace and industry codes of practice are followed 1.4.Personal protective equipment (PPE) is located and used correctly 1.5.Recommended repair <b>equipment</b> is located and checked for correct operation
2. Repair or replace HSS components	2.1.Sections not subject to repair are protected, using approved methods and equipment 2.2.HSS sections to be repaired are removed using recommended removal methods and equipment 2.3.Damaged surfaces are restored to a condition suitable for the fitting of replacement HSS components 2.4.Vehicle measuring and jiggging equipment is used to locate the replacement HSS component correctly according to OEM specifications 2.5.Protection of OEM surface coatings is maintained or reapplied 2.6.Replacement HSS components are aligned and secured within OEM tolerances 2.7.HSS components are repaired according to industry regulations, <b>statutory and regulatory authority</b> guidelines, <b>Workplace Health and Safety (WHS) requirements</b> and workplace procedures and policies
3. Weld HSS components	3.1.Recommended welding equipment is located and checked for correct operation in a repair environment 3.2.Sample welds are conducted, inspected and destruction tested 3.3.HSS components are refitted using recommended repair methods, materials and equipment 3.4.Recommended welding techniques are used and welds are inspected for defects 3.5.HSS repairs are completed without causing damage to other components or systems 3.6.Grinding procedures are followed according to OEM and weld material specifications

4. Clean up work area and maintain equipment	<p>4.1. Work area is cleaned and tidied according to workplace procedures</p> <p>4.2. Waste and scrap materials are removed following workplace and <i>environmental requirements</i> and procedures</p> <p>4.3. Tools and equipment are checked and faulty items are identified and tagged</p> <p>4.4. Equipment maintenance activities are completed according to workplace and manufacturer specifications</p>
5. Finalise HSS repair processes	<p>5.1. Repair <i>information and documents</i> are completed and filed according to workplace policy</p> <p>5.2. Repair and welding <i>quality requirements</i> are checked against OEM specifications and workplace quality standards</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to:
  - follow recommended repair procedure
  - follow workplace verbal instructions
- literacy skills to:
  - understand quality procedures
  - read and follow information in written job instructions, specifications, standard operating procedures, charts, lists, drawings and other reference documents
  - obtain and record required OEM repair procedures and parts
- numeracy skills to interpret vehicle repair measuring equipment
- planning and organising skills to:
  - plan repair requirements and follow OEM repair specification
  - identify risk factors and take action to minimise them
  - follow workplace verbal instructions
- self-management skills to:
  - select and use appropriate repair equipment, materials, processes and procedures
  - recognise own limitations and seek advice
  - follow workplace policies and documentation, such as OEM repair procedures and industry codes of practice
- teamwork skills to apply knowledge of own role to complete activities efficiently to support team activities and tasks
- technical skills to use workplace tools and equipment relating to identifying and repairing HSS, including removal, alignment and welding methods
- technology skills to use the internet to collect information on OEM repair processes

#### Required knowledge

- WHS regulations and requirements relevant to HSS repair and replacement
- OEM recommended repair procedures and quality processes
- HSS recommended tools and equipment, including welding equipment
- personal protective equipment
- types and location of HSS components
- manufacturer and vehicle specifications and measurements
- body and panel alignment methods, techniques and procedures
- bonding, riveting and welding methods and procedures
- manual-handling techniques
- work organisation and planning processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria and required skills and knowledge.

A person who demonstrates competency in this unit must be able to:

- identify and repair HSS components
- observe safety procedures and requirements
- communicate effectively with others involved
- select OEM-recommended repair methods and techniques
- complete HSS repairs in a systematic manner
- apply vehicle protection methods
- conduct recommended welding, bonding and riveting procedures
- inspect and test welds
- complete quality and workplace documentation.

##### Context of, and specific resources for assessment

Competency is to be assessed in the workplace or a simulated workplace environment that accurately reflects performance in a real workplace setting.

Assessment is to occur:

- using standard workplace practices and procedures
- following safety requirements
- applying environmental constraints.

Assessment is to comply with relevant:

- regulatory requirements
- Australian standards
- industry codes of practice.

The following resources must be made available for the assessment of this unit:

- workplace location or simulated workplace
- materials and information relevant to HSS repairs
- equipment, and hand and power tools appropriate to HSS

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

- repairs
- OEM specifications
  - work instructions.

### Method of assessment

Assessment must satisfy the endorsed Assessment Guidelines of this Training Package.

Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with the application of required skills and knowledge.

Assessment methods must be by direct observation of tasks and include questioning on required skills and knowledge to ensure correct interpretation and application.

Competence in this unit may be assessed in conjunction with other units which together form part of a holistic work role.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate the needs of diverse clients.

Assessment processes and techniques must be culturally sensitive and appropriate to the language, literacy and numeracy capacity of the candidate and the work being performed.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Repair procedures</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• under-body or frame measurements</li> <li>• alignment equipment</li> <li>• jiggling systems</li> <li>• pre-repair activities</li> <li>• hydraulic reforming</li> <li>• sectional repair (other than at factory seams)</li> <li>• partial replacement at factory seams</li> <li>• visual and physical examination</li> <li>• panel beating</li> <li>• use of heat monitoring equipment</li> <li>• spot welding</li> <li>• MIG brazing</li> <li>• MIG welding</li> <li>• mechanical fastening</li> <li>• riveting</li> <li>• metal cutting</li> <li>• bonding</li> <li>• removing and replacing mechanical units</li> <li>• removing and replacing suspension, steering, transmissions and other assemblies and components.</li> </ul>
<p><b><i>Equipment</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• vehicle alignment and jiggling systems</li> <li>• hand tools</li> <li>• power tools</li> <li>• heating equipment</li> <li>• heat monitoring equipment</li> <li>• welding equipment</li> <li>• lifting equipment</li> <li>• hydraulic push and pull equipment</li> <li>• measuring systems</li> <li>• clamping and anchoring systems.</li> </ul>
<p><b><i>Statutory and regulatory authorities</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• federal, state or territory, and local authorities administering Acts</li> <li>• Australian Design Rules</li> <li>• codes of practice</li> </ul>

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

	<ul style="list-style-type: none"> <li>• Australian standards.</li> </ul>
<b><i>Workplace health and safety requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• workplace and personal safety</li> <li>• first aid equipment</li> <li>• equipment safety</li> <li>• safe handling of material</li> <li>• safe use of tools and equipment</li> <li>• hazard control, including control of hazardous materials and toxic substances</li> <li>• use of personal protective clothing</li> <li>• use of fire-fighting equipment.</li> </ul>
<b><i>Environmental requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• measures to reduce pollution</li> <li>• waste management</li> <li>• noise control</li> <li>• dust control</li> <li>• clean-up management.</li> </ul>
<b><i>Information and documents</i></b> may include:	<ul style="list-style-type: none"> <li>• verbal and written documents</li> <li>• graphical instructions</li> <li>• OEM specifications</li> <li>• work bulletins</li> <li>• material safety data sheets (MSDS)</li> <li>• diagrams and sketches</li> <li>• safe work procedures</li> <li>• regulatory and legislative requirements</li> <li>• Australian Design Rules</li> <li>• engineer's design specifications and instructions</li> <li>• workplace specifications and requirements</li> <li>• instructions issued by authorised workplace or external persons</li> <li>• Australian standards.</li> </ul>
<b><i>Quality requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• OEM-recommended repair procedures and regulations</li> <li>• Australian standards</li> <li>• internal workplace quality policies</li> <li>• workplace operational policies and procedures.</li> </ul>

## AURVTN3029 Set up and operate universal measuring systems

### Modification History

Release	Comment
Release 1	New unit of competency

### Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes required to measure vehicle chassis misalignment, and set up and use a universal measuring system for vehicle chassis and body component repairs. The operator will be able to set up, operate and obtain measurements at pre- and post-repair intervals.</p> <p>The unit involves identifying and confirming work requirements and preparing for work.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	--

### Application of the Unit

Application of the unit	<p>Work applies to measuring vehicle upper and under-body in three dimensions. It involves the application of skills and knowledge required in using the measuring equipment, including clean-up and documentation at a body repair technician level.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p> <p>Work is carried out according to original equipment manufacturer (OEM) specifications and recommended procedures, and industry codes of practice. Vehicles may include passenger vehicles, heavy vehicle trucks, buses and commercial vehicles.</p>
-------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine job requirements	<p>1.1.Job specifications and requirements are interpreted and determined from job sheets and work instructions</p> <p>1.2.Appropriate workplace health and safety (WHS) practices are identified according to <b>WHS, legislative</b> and <b>workplace requirements</b></p> <p>1.3.Measurement equipment <b>information</b> is interpreted for correct set-up and operation</p> <p>1.4.Vehicle chassis specifications are obtained from OEM or other recognised industry agencies</p>
2. Plan and prepare work	<p>2.1.OEM processes and specifications are read and incorporated into the development of a repair plan</p> <p>2.2.Vehicle specifications and recommended repair procedures are sourced using the internet or repair manuals</p> <p>2.3.Equipment and <b>resources</b> are checked for OEM compliance</p> <p>2.4.Relevant set-up procedures, repair plans, drawings and reference texts are followed according to job instructions</p> <p>2.5.Work is planned to include equipment set-up and operation to specifications and workplace procedures</p> <p>2.6.Work area is prepared according to WHS, legislative and workplace requirements</p> <p>2.7.Potential hazards are identified and prevention measures selected according to workplace procedures</p>
3. Conduct work	<p>3.1.Equipment set-up activities are completed without causing damage to workplace property, vehicles, systems or components</p> <p>3.2.Measuring system is secured and adjusted to vehicle according to equipment manufacturer recommended procedures</p> <p>3.3.Vehicle measurements are taken in three dimensions and repairs are carried out according to OEM procedures and workplace quality procedures</p>
4. Clean up work area and maintain equipment	<p>4.1.Waste and scrap are removed following workplace and environmental requirements and procedures</p> <p>4.2.Equipment and work area are cleaned and inspected for serviceable condition according to workplace procedures</p> <p>4.3.Faulty equipment is identified and tagged according to workplace policy</p> <p>4.4.Maintenance activities are completed according to manufacturer and component specifications and workplace procedures</p>

	4.5.Measuring equipment is maintained and stored according to workplace procedures
5. Finalise measurement processes	<p>5.1.Pre- and post-repair measurement readings that comply with OEM specifications, industry and workplace <i>standards</i> are recorded</p> <p>5.2.Vehicle dimensions are recorded for customer, insurance and workplace evidence</p> <p>5.3.Work completion details are finalised according to workplace procedures</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to follow workplace verbal instructions
- initiative and enterprise skills to recognise a workplace problem or potential problem and take action
- learning skills to identify sources of information, assistance and expert knowledge to expand skills and understanding
- literacy skills to:
  - read and follow information in written job instructions, specifications, standard operating procedures, charts, lists, drawings and other reference documents
  - obtain and record vehicle specifications and repair procedures
  - document pre- and post-vehicle measuring results
- numeracy skills to interpret, calculate vehicle measuring equipment
- planning and organising skills to:
  - plan measuring equipment set-up
  - plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed on time
  - identify risk factors and take action to minimise them
- problem-solving skills to:
  - refer problems outside area of responsibility to appropriate person
  - seek information and assistance as required to solve problems
- self-management skills to:
  - select and use appropriate universal measuring equipment and tools
  - recognise own limitations and seek advice
  - follow workplace policies and documentation, such as industry codes of practice and procedures
- technical skills to:
  - use workplace tools and equipment relating to the set-up and operation of universal measuring systems
  - use universal measuring equipment correctly
- teamwork skills to apply knowledge of own role to complete activities efficiently to support team activities and tasks

#### Required knowledge

- relevant workplace health and safety and environmental regulations and workplace policies and procedures
- workplace technical documentation covering procedures, specifications, schedules and work plans or equivalent

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

- workplace quality system documentation covering instructions, procedures, performance indicators and review processes or equivalent
- environmental protection requirements relating to the disposal of waste material
- established communication channels and protocols
- problem-identification and resolution techniques
- procedures for operating universal measuring equipment
- universal measuring equipment safety requirements

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria and required skills and knowledge.

A person who demonstrates competency in this unit must be able to:

- comply with relevant legislation, regulations, standards, codes of practice and established safe practices and workplace policies and procedures for managing personal work priorities
- maintain working knowledge of current work systems and practices
- apply, within scope of own role, the requirements of the job or work role:
  - set up and operate universal measuring systems
  - measure upper and under-body
  - measure three dimensions
  - measure diamond and twist damage
  - effectively apply problem-solving techniques
- interpret and communicate equipment operational information
- employ safe work practices
- conduct pre- and post-vehicle measuring processes
- use universal measuring system and relevant tools and equipment.

##### Context of, and specific resources for assessment

Competency is to be assessed in the workplace or a simulated workplace environment that accurately reflects performance in a real workplace setting.

Assessment is to occur:

- using standard workplace practices and procedures
- following safety requirements
- applying environmental constraints.

Assessment is to comply with relevant:

- regulatory requirements
- Australian standards

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

- industry codes of practice.
- The following resources must be made available for the assessment of this unit:
- safe work environment
  - OEM specification
  - universal measuring equipment
  - workplace or simulated measuring activity
  - hand tools.

### Method of assessment

Assessment must satisfy the endorsed Assessment Guidelines of this Training Package.

Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with the application of required skills and knowledge.

Assessment methods must be by direct observation of tasks and include questioning on required skills and knowledge to ensure correct interpretation and application.

Competence in this unit may be assessed in conjunction with other units which together form part of a holistic work role.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate the needs of diverse clients.

Assessment processes and techniques must be culturally sensitive and appropriate to the language, literacy and numeracy capacity of the candidate and the work being performed.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Workplace health and safety requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• legislation and regulations</li> <li>• workplace safety policies and procedures</li> <li>• use of personal protective equipment and clothing</li> <li>• use of fire-fighting equipment</li> <li>• first aid equipment</li> <li>• hazard and risk control and elimination</li> <li>• systems covering the use of hazardous materials and substances</li> <li>• manual-handling procedures, including for lifting and carrying.</li> </ul>
<p><b><i>Legislative requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• applicable legislation and regulations, including those relating to:             <ul style="list-style-type: none"> <li>• award and enterprise agreements</li> <li>• duty of care</li> <li>• employee relations</li> <li>• environment protection</li> <li>• industrial relations.</li> </ul> </li> </ul>
<p><b><i>Workplace requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• environmental management: waste disposal, recycling and re-use guidelines</li> <li>• emergency and evacuation procedures</li> <li>• legal obligations</li> <li>• maintenance and storage procedures</li> <li>• WHS requirements</li> <li>• policies and procedures relating to own role and responsibility</li> <li>• procedures for using universal measuring equipment</li> <li>• instruction manuals</li> <li>• quality assurance guidelines</li> <li>• quality and continuous improvement processes and standards</li> <li>• recording and reporting guidelines.</li> </ul>
<p><b><i>Information</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• OEM-recommended repair specifications</li> <li>• workplace operating procedures</li> <li>• customer requirements</li> <li>• industry codes of practice</li> <li>• legislation.</li> </ul>

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Resources</i></b> may include:	<ul style="list-style-type: none"> <li>• measuring equipment set-up specifications</li> <li>• hand tools</li> <li>• identification of OEM chassis attachment points</li> <li>• job sheets</li> <li>• overhead measuring system</li> <li>• laser measuring system</li> <li>• trammel bar</li> <li>• parallel gauges</li> <li>• mechanical measuring system</li> <li>• computer-aided measuring system</li> <li>• tape measure</li> <li>• working drawings</li> <li>• work instructions</li> <li>• workplace supervisor or trainer</li> <li>• workplace or simulated workplace.</li> </ul>
<b><i>Standards</i></b> may include:	<ul style="list-style-type: none"> <li>• industry regulations and guidelines</li> <li>• OEM repair guidelines</li> <li>• OEM vehicle specifications</li> <li>• industry codes of practice</li> <li>• WHS legislation</li> <li>• workplace quality procedures.</li> </ul>

## AURVTN3031 Conduct major sectional repairs

### Modification History

Release	Comment
Release 1	Replaces AURV326708A Carry out major sectional repair Performance Criteria and Range Statement updated to reflect repairs to vehicle body skirt and rails

### Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes required to carry out sectional repairs and replacement operations on vehicles with major damage, including structural components, rails and pillars.</p> <p>The unit involves identifying and confirming work requirements, preparing for work, selecting the repair method, removing damaged components, repairing damaged sections and components, replacing and aligning new or repaired components, and undertaking completion processes, including clean-up and documentation.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	---

### Application of the Unit

Application of the unit	<p>Work applies to vehicle body repair technicians conducting body or component repairs to a range of vehicles, including light vehicles, commercial vehicles, heavy vehicles, and agricultural and recreational vehicles.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
-------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including method, materials and equipment</p> <p>1.2. <b>Workplace health and safety (WHS) requirements</b> and <b>personal protective equipment (PPE)</b> needs are observed throughout the work</p> <p>1.3. <b>Materials</b> for repair are selected</p> <p>1.4. <b>Tools and equipment</b> are identified and checked for safe and effective operation</p> <p>1.5. Procedures are determined to minimise waste material and maximise energy efficiency while completing the job</p> <p>1.6. Workplace <b>communication</b> policies are followed</p>
2. Perform major sectional repairs	<p>2.1. Sections not subject to repair are protected using approved methods and equipment</p> <p>2.2. Damaged sections are removed using approved methods and equipment</p> <p>2.3. Damaged surfaces are restored to a condition suitable for the fitting of new sections</p> <p>2.4. Replacement sections are aligned and secured according to original equipment manufacturer (OEM) specification</p> <p>2.5. Sections are refitted using approved <b>repair methods</b>, materials and equipment</p> <p>2.6. Sealant is selected and applied according to manufacturer and component supplier specification for type, application method and sealant thickness</p> <p>2.7. <b>Major sectional repairs</b> are completed without causing damage to other components or systems</p> <p>2.8. Removal and fitting activities are carried out according to industry regulations, <b>statutory and regulatory authorities'</b> guidelines, WHS legislation, and workplace policies and procedures</p>
3. Clean up work area and maintain equipment	<p>3.1. Material that can be reused is collected and stored according to workplace sustainability practices</p> <p>3.2. Waste and scrap are removed following workplace and <b>environmental requirements</b> and procedures</p> <p>3.3. <b>Equipment</b> and work area are cleaned and inspected for serviceable condition according to workplace procedures</p> <p>3.4. Faulty equipment is identified and tagged according to workplace policy</p> <p>3.5. Maintenance activities are completed according to manufacturer and component supplier specifications and</p>

	workplace procedures 3.6.Tools are maintained according to workplace procedures
4. Finalise repair processes	4.1.Repair <i>information and documents</i> are completed according to workplace policies and procedures 4.2.Repair <i>quality requirements</i> are checked against manufacturer and workplace quality standards

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to follow workplace verbal instructions
- initiative and enterprise skills to recognise a workplace problem or potential problem and take action
- learning skills to identify sources of repair information, assistance and expert knowledge, to expand skills, knowledge and understanding
- literacy skills to:
  - understand quality procedures
  - read and follow information in written job instructions, specifications, standard operating procedures, charts, lists, drawings and other reference documents
  - obtain and record required repair procedures and parts
- numeracy skills to interpret vehicle repair measuring equipment
- planning and organising skills to:
  - plan repair requirement and follow job repair specification
  - plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed on time
  - identify risk factors and take action to minimise them
- problem-solving skills to:
  - refer problems outside area of responsibility to appropriate person
  - seek information and assistance as required to solve problems
- self-management skills to:
  - select and use appropriate repair equipment, materials, processes and procedures
  - recognise own limitations and seek advice
  - follow workplace policies and documentation, such as manufacturer specification, industry codes of practice and workplace procedures
- teamwork skills to apply knowledge of own role to complete activities efficiently to support team activities and tasks
- technical skills to use workplace tools and equipment relating to major sectional repairs, including the use of specialist tools
- technology skills to:
  - operate body repair equipment
  - use technology to collect and provide information on repair processes

#### Required knowledge

- workplace repair equipment
- OEM-recommended repair procedures

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

- personal protective equipment
- types of steels and repair characteristics
- sectional repair procedure to skirt, rail or pillar
- manufacturer and component supplier specifications
- procedures for the correct use of tools and equipment
- alignment methods techniques and procedures
- welding and attachment procedures
- bonding and sealant methods and procedures
- vehicle or component protection procedures

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria and required skills and knowledge.

A person who demonstrates competency in this unit must be able to:

- observe safety procedures and requirements
- apply vehicle or component protection methods
- access repair information and identify approved sectioning method and location
- select the repair method most appropriate to the circumstances
- complete major sectional repairs which, at a minimum, are to sectionalise a skirt, rail or pillar section or equivalent
- complete workplace and equipment documentation.

##### Context of, and specific resources for assessment

Competency is to be assessed in the workplace or a simulated workplace environment that accurately reflects performance in a real workplace setting.

Assessment is to occur:

- using standard workplace practices and procedures
- following safety requirements
- applying environmental constraints.

Assessment is to comply with relevant:

- regulatory requirements
- Australian standards
- industry codes of practice.

The following resources must be made available for the assessment of this unit:

- workplace location or simulated workplace
- materials relevant to major sectional repair
- equipment, hand and power tools appropriate to major sectional repair
- vehicle specifications and work instructions.

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Method of assessment**

Assessment must satisfy the endorsed Assessment Guidelines of this Training Package.

Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with the application of required skills and knowledge.

Assessment methods must be by direct observation of tasks and include questioning on required skills and knowledge to ensure correct interpretation and application.

Competence in this unit may be assessed in conjunction with other units which together form part of a holistic work role.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate the needs of diverse clients.

Assessment processes and techniques must be culturally sensitive and appropriate to the language, literacy and numeracy capacity of the candidate and the work being performed.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Workplace health and safety requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• correct use of tools and equipment</li> <li>• first aid equipment</li> <li>• equipment safety</li> <li>• safe handling of material</li> <li>• hazard control, including control of hazardous materials and toxic substances</li> <li>• personal safety</li> <li>• use of fire-fighting equipment</li> <li>• workplace environment</li> <li>• workplace safety.</li> </ul>
<b><i>Personal protective equipment:</i></b>	<ul style="list-style-type: none"> <li>• is that prescribed under legislation, regulations, codes of practice, and workplace policies and practices</li> <li>• may include: <ul style="list-style-type: none"> <li>• dust and fume collection equipment</li> <li>• breathing apparatus</li> <li>• eye protection</li> <li>• hearing protection</li> <li>• personal protective clothing</li> <li>• safety footwear.</li> </ul> </li> </ul>
<b><i>Materials</i></b> may include:	<ul style="list-style-type: none"> <li>• cleaning materials</li> <li>• sealants</li> <li>• welding consumables.</li> </ul>
<b><i>Tools and equipment</i></b> may include:	<ul style="list-style-type: none"> <li>• clamps and anchoring devices</li> <li>• hand tools</li> <li>• heating and welding equipment, including oxy-acetylene, MIG and TIG</li> <li>• lifting and hydraulic push and pull equipment</li> <li>• measuring system</li> <li>• power tools and equipment</li> <li>• vehicle alignment jiggling systems.</li> </ul>
<b><i>Communication</i></b> may include:	<ul style="list-style-type: none"> <li>• faults reporting</li> <li>• OEM-recommended repair procedures</li> <li>• repair plans and instructions</li> </ul>

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

	<ul style="list-style-type: none"> <li>• verbal instructions</li> <li>• visual instructions</li> <li>• workplace instructions</li> <li>• written instructions.</li> </ul>
<b><i>Repair methods</i></b> may include:	<ul style="list-style-type: none"> <li>• under-body or frame measurements</li> <li>• alignment equipment</li> <li>• jiggling systems</li> <li>• pre-repair activities</li> <li>• hydraulic reforming</li> <li>• sectional repair</li> <li>• visual and physical examination</li> <li>• panel beating</li> <li>• welding</li> <li>• mechanical fastening</li> <li>• riveting</li> <li>• metal cutting</li> <li>• bonding</li> <li>• removal and replacement of:               <ul style="list-style-type: none"> <li>• mechanical units</li> <li>• suspension, steering, transmissions and other assemblies and components</li> </ul> </li> <li>• heating</li> <li>• metal finishing</li> <li>• filling.</li> </ul>
<b><i>Major sectional repairs</i></b> may include:	<ul style="list-style-type: none"> <li>• body rails</li> <li>• body pillars</li> <li>• radiator support</li> <li>• double panel section</li> <li>• box section panels</li> <li>• sill panels</li> <li>• quarter panels</li> <li>• vehicle chassis or frame</li> <li>• turrets</li> <li>• high stress steel (HSS) sections.</li> </ul>

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Statutory and regulatory authorities</i></b> may include:	<ul style="list-style-type: none"> <li>• federal, state or territory, and local authorities administering Acts</li> <li>• Australian Design Rules</li> <li>• industry codes of practice.</li> </ul>
<b><i>Environmental requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• waste management</li> <li>• noise control</li> <li>• dust control</li> <li>• clean-up management.</li> </ul>
<b><i>Equipment</i></b> may include:	<ul style="list-style-type: none"> <li>• hand tools</li> <li>• power tools and equipment</li> <li>• heating equipment</li> <li>• welding equipment, including MIG, TIG and SPOT</li> <li>• lifting equipment</li> <li>• hydraulic push and pull equipment</li> <li>• measuring system</li> <li>• vehicle alignment bench</li> <li>• clamping and anchoring systems</li> <li>• bonding and sealant.</li> </ul>
<b><i>Information and documents</i></b> may include:	<ul style="list-style-type: none"> <li>• verbal or written job sheets and work orders</li> <li>• graphical instructions</li> <li>• work schedules, plans and specifications</li> <li>• workplace and vehicle manuals and bulletins</li> <li>• material safety data sheets (MSDS)</li> <li>• diagrams and sketches</li> <li>• safe work procedures</li> <li>• regulatory and legislative requirements</li> <li>• Australian Design Rules</li> <li>• OEM specifications</li> <li>• engineer's design specifications and instructions</li> <li>• workplace specifications and quality requirements</li> <li>• Australian standards.</li> </ul>
<b><i>Quality requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• OEM quality specifications</li> <li>• industry codes of practice</li> <li>• workplace quality and operations procedures.</li> </ul>

## AURVTN3035 Apply original equipment manufacturer repair procedures

### Modification History

Release	Comment
Release 1	New unit of competency

### Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes required to locate and apply original vehicle equipment manufacturer (OEM) recommended repair procedures, The unit involves body repair of high strength steel (HSS) components, vehicle painting, vehicle glazing and vehicle trimming repair processes.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	--

### Application of the Unit

Application of the unit	<p>The unit applies to the auto body repair sector, including vehicle body repair of HSS components.</p> <p>Repairs or modifications are conducted by repair technicians in an automotive repair environment of passenger vehicles, commercial vehicles, heavy vehicles, agricultural plant and equipment, and recreational vehicles.</p>
-------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Locate, interpret and apply OEM-recommended repair procedure	1.1. <b><i>OEM-recommended repair procedure</i></b> is sourced using the internet or repair manuals 1.2. OEM repair procedure and specifications are read and applied to vehicle repairs 1.3. <b><i>Vehicle design specifications</i></b> are interpreted 1.4. Industry standards and safety requirements are interpreted and followed 1.5. <b><i>Tools and equipment</i></b> required to carry out tasks are sourced and checked prior to use
2. Ensure compliance with OEM repair and vehicle specifications	2.1. Vehicle specifications, engineering drawings and working drawings are identified and referred to 2.2. Relevant OEM repair procedures are checked to ensure compliance with industry <b><i>quality standards</i></b> 2.3. Repair procedures are reviewed to ensure OEM requirements and guidelines are met 2.4. Non-compliance of repairs is identified 2.5. <b><i>Workplace policies and procedures</i></b> are followed and maintained

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to:
  - communicate instructions from job specification sheets
  - communicate OEM-recommended repair procedures
- initiative and enterprise skills to recognise a workplace problem or potential problem and take action
- learning skills to identify sources of OEM information, assistance and expert knowledge to expand skills, knowledge and understanding
- literacy skills to:
  - read and interpret quality procedures
  - read and follow information in written job instructions, specifications, standard operating procedures, charts, lists, drawings and other reference documents
  - obtain and record required repair procedures and parts
- numeracy skills to interpret and calculate OEM repair measurements
- planning and organising skills to:
  - plan repair requirements and follow repair specification
  - plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed on time
  - identify risk factors and take action to minimise them
- problem-solving skills to:
  - refer problems outside area of responsibility to appropriate person and suggest possible causes
  - seek information and assistance as required to solve problems
- self-management skills to:
  - select and use appropriate OEM-recommended repair equipment, materials, processes and procedures
  - recognise own limitations and seek advice
  - follow workplace policies and documentation, such as industry codes of practice and procedures
- teamwork skills to apply knowledge of own role to complete activities efficiently to support team activities and tasks
- technical skills to use workplace tools and equipment relating to OEM-recommended repair procedure, including:
  - specialist tools
  - measuring equipment
- technology skills to:

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

- operate computer software and equipment
- use technology to collect and provide information on OEM-recommended repair processes

**Required knowledge**

- workplace health and safety (WHS) regulations needed to carry out work in a manner that ensures:
  - the safety of people
  - equipment cost minimisation
- waste avoidance policies, procedures and practices
- environmental protection relating to the disposal of waste material
- processes for operating IT systems
- problem-identification and resolution techniques
- workplace policies and procedures relating to OEM repair procedures
- quality standards as they relate to OEM repair procedures
- inspection techniques, including observation and written reports

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria and required skills and knowledge.

A person who demonstrates competency in this unit must be able to:

- source, interpret and apply manufacturer specifications and repair guidelines
- apply OEM-recommended repair procedures in an auto body context, which must include vehicle body repair, vehicle painting, vehicle glazing and vehicle trimming repair processes
- apply vehicle manufacturer specifications and guidelines, and information from engineering designs and drawings, to vehicle repairs
- review vehicle design compliance.

##### Context of, and specific resources for assessment

Competency is to be assessed in the workplace or a simulated workplace environment that accurately reflects performance in a real workplace setting.

Assessment is to occur:

- using standard workplace repair practices and procedures
- following safety requirements
- following OEM repair procedures
- applying environmental constraints.

Assessment is to comply with relevant:

- regulatory requirements
- Australian standards
- industry standards and codes of practice.

The following resources must be made available for the assessment of this unit:

- IT systems
- vehicle specification details
- OEM specifications and engineering designs and drawings
- workplace policies and procedures

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

- workplace tools and repair equipment.

**Method of assessment**

Assessment must satisfy the endorsed Assessment Guidelines of this Training Package.

Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with the application of required skills and knowledge.

Assessment methods must be by direct observation of tasks and include questioning on required skills and knowledge to ensure correct interpretation and application.

Competence in this unit may be assessed in conjunction with other units which together form part of a holistic work role.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate the needs of diverse clients.

Assessment processes and techniques must be culturally sensitive and appropriate to the language, literacy and numeracy capacity of the candidate and the work being performed.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>OEM-recommended repair procedures</i></b> may include:	<ul style="list-style-type: none"> <li>• repair to vehicle body or component damage</li> <li>• refinishing of paint surface</li> <li>• replacement of vehicle glazing</li> <li>• repairs to trimmed components</li> <li>• repair sequence</li> <li>• selection of repair consumables</li> <li>• compliance with OEM-recommended procedure.</li> </ul>
<b><i>Vehicle design specifications</i></b> may include:	<ul style="list-style-type: none"> <li>• OEM engineering designs and drawings</li> <li>• Australian Design Rules</li> <li>• industry codes of practice</li> <li>• OEM-recommended repair procedures</li> <li>• vehicle repair manuals</li> <li>• vehicle specification sheets.</li> </ul>
<b><i>Tools and equipment</i></b> may include:	<ul style="list-style-type: none"> <li>• workplace tools and equipment</li> <li>• specialised tools for body repair</li> <li>• computers.</li> </ul>
<b><i>Quality standards</i></b> may include:	<ul style="list-style-type: none"> <li>• complying with OEM repair procedures</li> <li>• establishing and maintaining product and component repair specifications and tolerances</li> <li>• identifying and rectifying non-conforming parts or products</li> <li>• identifying, minimising and eliminating defects</li> <li>• complying with vehicle repair process or procedure</li> <li>• complying with inspection systems</li> <li>• complying with OEM vehicle specifications.</li> </ul>
<b><i>Workplace policies and procedures</i></b> may include:	<ul style="list-style-type: none"> <li>• environment and sustainability</li> <li>• vehicle repair and vehicle specifications</li> <li>• manufacturer specifications and industry codes of practice</li> <li>• WHS requirements</li> <li>• workplace quality policies and procedures</li> <li>• OEM repair standards</li> <li>• recording and reporting procedures.</li> </ul>

## AURVTN4032 Determine vehicle damage and recommended repair procedures

### Modification History

Release	Comment
Release 1	<p>Replaces AURV465116A Determine vehicle damage and recommended repair procedures</p> <p>Unit code updated to meet policy requirements</p> <p>Reference to OHS legislation replaced with new WHS legislation</p> <p>Licensing statement added to unit descriptor</p>

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit identifies the competence required to inspect a vehicle for damage and recommend repair action.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>The unit includes identification and confirmation of work requirement, preparation for work, inspection, determination of repair requirements, preparation of a written report, including repair recommendations and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
--------------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<ul style="list-style-type: none"><li>1.1. Work instructions are used to determine the job requirements, including job sheets and inspection procedures.</li><li>1.2. Job specifications are read and interpreted.</li><li>1.3. WHS requirements, including personal protection needs, are observed throughout the work.</li><li>1.4. Vehicle to be inspected is identified.</li><li>1.5. Procedures are determined to minimise inspection time.</li></ul>
2. Inspect vehicle to determine cause and extent of damage	<ul style="list-style-type: none"><li>2.1. Inspection is carried out according to industry regulations/ guidelines, WHS legislation, and enterprise procedures/ policies.</li><li>2.2. Repair methods that conform to vehicle manufacturer/ component supplier, insurance company, enterprise and statutory guidelines are identified and recommended.</li><li>2.3. Inspection is completed without causing damage to workplace, property or vehicle.</li></ul>
3. Prepare a written damage repair report	<ul style="list-style-type: none"><li>3.1. Written damage inspection report is prepared with sufficient information to enable preparation of repair quotation, including repair options.</li><li>3.2. Damage inspection report is appropriate to type of damage sustained.</li><li>3.3. Damage report refers to repair requirements identified, including in-house and sublet requirements.</li><li>3.4. Damage report is prepared and presented according to industry and enterprise guidelines/requirements.</li></ul>
4. Clean up work area and maintain equipment	<ul style="list-style-type: none"><li>4.1. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</li><li>4.2. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</li><li>4.3. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</li><li>4.4. Tooling is maintained in accordance with workplace procedures.</li></ul>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for determining vehicle damage and recommending repair procedures
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to complete tests, measurements and assessment of unit/component serviceability required for the work
- use pre-checking and inspection techniques to anticipate planning and scheduling problems, avoid wastage of time and components)
- use workplace technology related to recommending repair procedures, including the use of measuring equipment, computerised technology and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- industry records and how to maintain them
- written communications and report writing
- vehicle inspection, damage assessment and test procedures
- vehicle inspection procedures
- industry standards
- work organisation and planning processes
- enterprise quality processes.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- for a range of vehicles:
- assessing damage accurately without damage or injury to tooling, equipment and persons
- recommending repair action
- preparing a written repair report.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite,

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints,

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to vehicle inspection procedures
- equipment, hand and power tooling appropriate to vehicle inspection procedures
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package,

Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge,

**EVIDENCE GUIDE**

	<p>Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies,</p> <p>Assessment may be applied under project related conditions and require evidence of process,</p> <p>Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances,</p> <p>It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements,</p> <p>Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role,</p>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Methods**

Methods are to include:

- inspection
- measurement
- partial dismantling
- completion of written report.

**WHS**

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This

<b>RANGE STATEMENT</b>	
	may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.

**RANGE STATEMENT****Information/documents**

Sources of information/documents may include:

- vehicle manufacturer/component supplier specifications, written enterprise procedures, insurance company reports, product manufacturer/component supplier specifications and customer report.
- safe work procedures related to vehicle inspection procedures.
- regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules.
- engineer's design specifications and instructions.
- organisation work specifications and requirements.
- instructions issued by authorised enterprise or external persons.
- Australian Standards.

## **AURVTN5034 Evaluate and select bodywork materials, equipment and processes**

### **Modification History**

Release	Comment
Release 1	Replaces AURT577394A Evaluate and select bodywork materials, equipment and processes Unit code updated to meet policy requirements Reference to OHS legislation replaced with new WHS legislation Licensing statement added to unit descriptor

### **Unit Descriptor**

<b>Unit descriptor</b>	<p>This unit covers the competence to research and evaluate the full range of bodywork materials, equipment and processes and to select that most appropriate for each particular specified application taking into account evolving technology and market needs.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	--

## Application of the Unit

<b>Application of the unit</b>	<p>This unit covers the work involved in evaluating and selecting the materials, equipment and processes required for the bodywork operations.</p> <p>The unit applies to those with responsibility for resource coordination and leadership of others individually and in teams.</p>
--------------------------------	---

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine bodywork requirements	1.1. Requirements for bodywork activities are identified. 1.2. A framework and rating system is developed to facilitate comparisons of cost/benefits and other qualitative properties of materials, equipment and processes.
2. Gather data and specifications	2.1. Current best practice and future trends for undertaking bodywork are assessed to establish comparisons and benchmarks. 2.2. Steps required for bodywork processes are identified and flow charts produced, where necessary. 2.3. Specifications are identified to match each bodywork process. 2.4. Consultations are conducted with staff and management to identify additional or altered specifications. 2.5. Materials, tooling, and/or equipment requirements for the bodywork are identified and documented. 2.6. Existing materials, equipment and stock on hand is evaluated to match requirements of the proposed processes. 2.7. WHS requirements to provide safe work systems for the materials, equipment and processes are identified. 2.8. Data is compiled and documented.
3. Evaluate materials, equipment and processes against requirements	3.1. Materials are assessed for required quality, finish and conformity to standards. 3.2. Equipment options are identified. 3.3. Materials, equipment and processes are selected based on comparisons of performance, cost and specifications compared to the prepared rating system. 3.4. Processes are documented to enterprise and industry standards.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- research, collect, organise and understand information related to bodywork materials and equipment, including technical, regulatory, environmental and safety requirements.
- communicate ideas and information to enable clarification of the requirements, coordination of work with managers/supervisors, workers and customers, coordinated evaluation of options and reporting of outcomes.
- plan and organise activities, including the systematic identification, research and evaluation of options
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity.
- use mathematical ideas and techniques to model the options and statistically compare results and potentials.
- create and apply systematic problem-solving techniques which will anticipate variables and cater for evaluations and comparisons.
- use the full scope of available workplace technology related to bodywork materials and equipment and to their analysis and evaluation.

#### Required knowledge

- industry sector developments and trends in terms of materials and equipment.
- company or equivalent business policies and plans, including forecast systems and products.
- company bodywork, market, work systems and existing equipment.
- legislative requirements of the bodywork activities.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<ul style="list-style-type: none"> <li>• Locate, interpret and apply information.</li> <li>• Apply safety requirements throughout the work sequence, including the use of personal protective clothing and equipment.</li> <li>• Lead others and work effectively to improve production quality and outcomes.</li> <li>• Evaluate materials, equipment and bodywork processes considering:               <ul style="list-style-type: none"> <li>• materials and equipment currently available</li> <li>• materials and equipment innovations and potential</li> <li>• equipment capabilities and availabilities</li> <li>• workforce availabilities and capabilities</li> <li>• cost benefit analysis (or equivalent).</li> </ul> </li> <li>• Identify the impact of decisions in terms of commercial, environmental and safety risks.</li> <li>• Encourage participation of staff in the planning of work activities and changes.</li> </ul>
<b>Context of, and specific resources for assessment</b>	<p>Assessment may occur on the job or in a workplace simulated facility with process equipment, materials, work instructions and deadlines.</p> <p>Access to a full range of current and emerging bodywork technology information.</p>
<b>Method of assessment</b>	<p>Assessment methods must confirm consistency of performance over time and in a range of workplace contexts.</p> <p>Assessment should be by direct observation of tasks and questioning on underpinning knowledge.</p> <p>Assessment should be conducted over time and may be in conjunction with assessment of other units of competence.</p> <p>Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</p>
<b>Guidance information for</b>	

**EVIDENCE GUIDE****assessment****Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Unit context**

- WHS requirements include legislation, vehicle industry regulations, safety management systems, hazardous substances and dangerous goods code, and safe operating procedures.
- Work is carried out in accordance with legislative obligations, Australian Design Rules, environmental legislation, health regulations, manual handling procedures and organisation insurance requirements.
- Work requires individuals to demonstrate research, analytical, judgement and problem-solving skills in the diagnosis of faults.
- Materials and equipment options are to include those in general service in the industry and those identified as emerging technology.

**Workplace environment**

- The function is undertaken in accordance with established enterprise procedures and practices may include requirements recommended by manufacturer/component supplier.
- Customers or suppliers may be internal or external.

**Machines/equipment**

Machines/equipment may include:

- any machine typically used in the bodyworks industry
- microprocessor or computer controlled machines.

<b>RANGE STATEMENT</b>	
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation, regulations and enterprise policies and practices.
<b>Information and procedures</b>	<ul style="list-style-type: none"> <li>• Sector trade journals and related publications.</li> <li>• Work procedures/instructions.</li> <li>• Manufacturer/component supplier specifications and instructions.</li> <li>• Standard forms of workplace process and procedure.</li> <li>• Organisation work specifications and requirements.</li> <li>• Australian Design Rules.</li> <li>• Legislation/regulations/national and industry codes and practices relevant to the product.</li> <li>• Australian Standards and quality procedures.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including job sheets, material types, colour, quality and quantity.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal protection needs, breathing apparatus and full body protection, are observed throughout the work.</p> <p>1.4. Materials are selected and inspected for quality.</p> <p>1.5. Hand, power tooling and safety equipment are identified and checked for operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Determine paint removal procedure	<p>2.1. Paint removal procedures are determined considering the type of finish material and the effects of processes on components in accordance with industry standard practices and customer requirements.</p> <p>2.2. Activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
3. Remove paint	<p>3.1. Tooling, equipment and/or material are used according to type of paint to be removed, product manufacturer/ component supplier recommendations and industry/ workplace practices and procedures.</p> <p>3.2. Protective clothing and equipment are used during all stages of the removal process.</p> <p>3.3. The environment for the removal of paint conforms to requirements for extraction of fumes and cleanliness.</p> <p>3.4. Removal activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste material is removed and disposed of or stored according to statutory and workplace procedure.</p> <p>4.3. Equipment is cleaned as by manufacturer/component supplier and/or workplace policy and procedures.</p> <p>4.4. Work area is cleaned and inspected for serviceable</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>condition in accordance with workplace procedures.</p> <p>4.5. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>4.6. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.7. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for applying paint removal methods
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to apply paint and complete tests and assessment required for the work
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology related to the application of paint removal methods, including the use of specialist tooling and equipment, measuring equipment, communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS cleaning materials, equipment, material and personal safety requirements
- environmental protection requirements/material disposal and storage requirements
- material safety data sheets
- types of refinishing materials
- paint removal processes and materials
- paint removal procedures, tooling and equipment
- work organisation and planning processes
- enterprise quality procedures

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying protection methods
- applying environmental procedures
- determining the paint removal process
- removing paint (chemically and mechanically).

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - material relevant to the application of paint removal methods
  - equipment, hand and power tooling appropriate to the application of paint removal methods
  - activities covering mandatory task requirements
  - specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.

**EVIDENCE GUIDE**

- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.
- Assessment may be applied under project-related conditions and require evidence of process.
- Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
- It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.
- Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Methods

Methods are to include:

- chemical substances
- mechanical means
- protection of body/trim components
- polishing and detailing of surfaces

#### WHS

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:

- protective clothing and equipment
- use of tooling and equipment
- workplace environment and safety
- handling of material
- use of firefighting equipment
- enterprise first aid
- hazard control and hazardous material and substances

#### Personal protective equipment

Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices

#### Safe operating procedures

Safe operating procedures are to include, but are not limited to:

- operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors

#### Emergency procedures

Emergency procedures related to this unit are to include, but are not limited to:

- emergency shutdown and stopping of

<b>RANGE STATEMENT</b>	
	equipment <ul style="list-style-type: none"> <li>• extinguishing fires</li> <li>• enterprise first aid requirements</li> <li>• worksite evacuation</li> </ul>
<b>Environmental requirements</b>	Environmental requirements are to include, but are not limited to: <ul style="list-style-type: none"> <li>• waste management, noise, dust and clean-up management</li> </ul>
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to: <ul style="list-style-type: none"> <li>• regulations, including Australian standards</li> <li>• internal company quality policies and standards</li> <li>• enterprise operations and procedures</li> </ul>

Procedures are determined to minimise waste materials.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Prepare vehicle body surfaces by masking	<p>2.1. Surfaces to be refinished are cleaned of contaminants.</p> <p>2.2. Components and ancillary fittings that can be affected by the refinishing process are protected and/or removed, tagged and stored securely.</p> <p>2.3. Surfaces adjacent to the surfaces to be refinished are protected using approved masking methods and materials.</p> <p>2.4. Preparation is completed without causing damage to component or system.</p> <p>2.5. Masking procedures are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p> <p>2.6. Waste materials are disposed of in accordance with statutory and enterprise requirements.</p>
3. Clean up work area and maintain equipment	<p>3.1. Materials that can be reused are collected and stored.</p> <p>3.2. Waste and scrap is removed following workplace procedures.</p> <p>3.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>3.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>3.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.6.Tooling is maintained in accordance with workplace procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for masking
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to apply masking material required for the work
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology related to carrying out masking procedures, including the use of specialist tooling and equipment, measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS regulations/requirements, equipment, material and personal safety requirements
- cleaning agents
- masking materials and procedures
- technical information
- vehicle safety requirements
- operating procedure of equipment
- masking procedures
- work organisation and planning processes
- enterprise quality procedures

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying vehicle protection methods
- completing the masking of a range of materials and surfaces.

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian Standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to carrying out masking procedures
  - equipment, hand and power tooling appropriate to carrying out masking procedures
  - activities covering mandatory task requirements
  - specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	1.1. Work instructions are used to determine job requirements, including method and material type. 1.2. Job specifications are read and interpreted. 1.3. Workplace health and safety (WHS) requirements, including personal protection needs, are observed throughout the work. 1.4. Materials are selected and inspected for quality. 1.5. Hand, power tooling and safety equipment are identified and checked for operation. 1.6. Procedures are determined to minimise waste material. 1.7. Procedures are identified for maximising energy efficiency while completing the job.
2. Prepare paint for spray gun(s)	2.1. Information is accessed and interpreted from manufacturer/ component supplier specifications. 2.2. Paints are mixed to conform to specification for type and colour, viscosity and temperature. 2.3. A test card is used for comparison of colour and texture. 2.4. Preparation activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies. 2.5. Paint is prepared without causing damage to component or system. 2.6. Waste materials are stored and/or disposed of in accordance with statutory and enterprise requirements.
3. Prepare spray gun(s) for spraying	3.1. Information is accessed and interpreted from manufacturer/ component supplier specifications. 3.2. Preparation, maintenance and adjustment of spray painting equipment conforms to requirements of manufacturer/component supplier specifications. 3.3. Preparation activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies. 3.4. Spray guns are prepared without causing damage to component or system.
4. Clean up work area and maintain equipment	4.1. Material that can be reused is collected and stored. 4.2. Waste and scrap is removed following workplace

ELEMENT	PERFORMANCE CRITERIA
	<p>procedures.</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for preparing spray painting material and equipment
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to calculate time, apply accurate measurements, calculate material requirements and establish quality checks
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology related to the preparation of spray painting material and equipment, including the use of specialist tooling, measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS cleaning materials, equipment, material and personal safety requirements
- environmental protection requirements
- material storage, handling and disposal/material safety data sheets
- types of paints, including acrylic lacquers, solids, clear over base, air dry and polyurethane, and two component systems
- paint application methods
- spray guns and their application
- manufacturer/component supplier specifications for spray gun set-up and maintenance
- equipment preparation procedures
- paint mixing techniques
- paint drying methods
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying environmental procedures
- preparing automotive paint to specifications
- preparing spray guns and associated equipment to manufacturer/component supplier requirements.

#### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian Standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - material relevant to the preparation of spray painting material and equipment
  - equipment, hand and power tooling appropriate to the preparation of spray painting material and equipment
  - activities covering mandatory task requirements
  - specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.

**EVIDENCE GUIDE**

- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.
- Assessment may be applied under project-related conditions and require evidence of process.
- Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
- It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.
- Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Methods

Methods are to include:

- spray gun techniques
- various spraying techniques
- drying procedures
- paint mixing methods
- paint straining methods
- paint thinning methods

#### WHS

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:

- protective clothing and equipment
- use of tooling and equipment
- workplace environment and safety
- handling of material
- use of firefighting equipment
- enterprise first aid
- hazard control and hazardous material and substances

#### Personal protective equipment

Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices

#### Safe operating procedures

Safe operating procedures are to include, but are not limited to:

- operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors

#### Emergency procedures

Emergency procedures related to this unit are to

## AURVTP2004 Apply fundamental colour matching techniques

### Modification History

Release	Comment
Release 1	Replaces AURV229803AA Apply fundamental colour matching techniques  Unit code updated to meet policy requirements  Reference to OHS legislation replaced with new WHS legislation  Licensing statement added to unit descriptor

### Unit Descriptor

Unit descriptor	<p>This unit of competency covers the skills and knowledge required to colour match paints using a colour mix test card.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	---

### Application of the Unit

Application of the unit	Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.
-------------------------	--

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	1.1. Work instructions are used to determine job requirements, including method and material type. 1.2. Job specifications are read and interpreted. 1.3. Workplace health and safety (WHS) requirements, including personal protection needs, are observed throughout the work. 1.4. Materials are selected and inspected for quality. 1.5. Hand, power tooling and safety equipment are identified and checked for operation. 1.6. Procedures are determined to minimise waste material. 1.7. Procedures are identified for maximising energy efficiency while completing the job.
2. Mix paint colours	2.1. Mixing is performed using the appropriate method and/or system. 2.2. Paint is mixed without causing damage to component or system. 2.3. Mixing activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.
3. Prepare colour test card and perform visual matching test	3.1. Test card is prepared in the prescribed manner, to enable a visual comparison between matched and original paints. 3.2. Visual matching tests are performed and findings noted. 3.3. Matched and original paint comparisons are made and, if necessary, paint is remixed for further matching, prior to application. 3.4. Activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.
4. Clean up work area and maintain equipment	4.1. Material that can be reused is collected and stored. 4.2. Waste and scrap is removed following workplace procedure. 4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures. 4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures. 4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures. 4.6. Tooling is maintained in accordance with workplace procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for fundamental paint matching techniques
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to use equipment required for the work
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology related to the application of colour matching techniques, including the use of specialist tooling and equipment, measuring equipment, computerised technology and communication devices and the reporting/documenting of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental protection requirements
- material safety data sheets
- paint mixing techniques/mixing machines and systems set-up and operation
- colour codes and formulations/location
- fundamental colour mixing, matching and checking techniques
- work organisation and planning processes
- enterprise quality procedures

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying environmental procedures
- applying paint mixing procedures
- applying fundamental colour matching techniques.

#### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - material relevant to the application of colour matching techniques
  - equipment, hand and power tooling appropriate to the application of colour matching techniques
  - activities covering mandatory task requirements
  - specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with

**EVIDENCE GUIDE**

	<p>questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</p> <ul style="list-style-type: none"><li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li><li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li><li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li></ul>
--	--

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Methods

Methods are to include:

- spray gun techniques
- various spraying techniques
- drying procedures
- paint mixing methods
- paint straining methods
- paint thinning methods

#### WHS

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:

- protective clothing and equipment
- use of tooling and equipment
- workplace environment and safety
- handling of material
- use of fire fighting equipment
- enterprise first aid
- hazard control and hazardous material and substances

#### Personal protective equipment

Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices

#### Safe operating procedures

Safe operating procedures are to include, but are not limited to:

- operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors

#### Emergency procedures

Emergency procedures related to this unit are to

<b>RANGE STATEMENT</b>	
	<p>include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• emergency shutdown and stopping of equipment</li> <li>• extinguishing fires</li> <li>• enterprise first aid requirements</li> <li>• worksite evacuation</li> </ul>
<b>Environmental requirements</b>	<p>Environmental requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• waste management, noise, dust and clean-up management</li> </ul>
<b>Quality requirements</b>	<p>Quality requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• regulations, including Australian standards</li> <li>• internal company quality policies and standards</li> <li>• enterprise operations and procedures</li> </ul>
<b>Statutory/regulatory authorities</b>	<p>Statutory/regulatory authorities may include:</p> <ul style="list-style-type: none"> <li>• federal, state/territory and local authorities administering Acts, regulations and codes of practice</li> </ul>
<b>Tooling and equipment</b>	<p>Tooling and equipment may include:</p> <ul style="list-style-type: none"> <li>• tinting machines</li> <li>• microfiche</li> <li>• scales</li> <li>• air-operated agitators</li> <li>• hand paddles</li> <li>• mixing banks</li> <li>• spray gun stem strainers</li> <li>• funnel strainers</li> <li>• mesh strainers</li> <li>• vacuum paint strainers,</li> <li>• viscosity measuring equipment</li> <li>• high-volume low-pressure spray guns</li> <li>• gravity feed spray guns</li> <li>• suction feed spray guns</li> <li>• pressure regulators</li> <li>• air compressors</li> <li>• spray booths</li> </ul>

## AURVTP2005 Apply rust prevention and sound deadening materials

### Modification History

Release	Comment
Release 1	<p>Replaces AURV230203A Apply rust prevention and sound deadening materials</p> <p>Unit code updated to meet policy requirements</p> <p>Reference to OHS legislation replaced with new WHS legislation</p> <p>Licensing statement added to unit descriptor</p>

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit of competency covers the skills and knowledge required to apply special treatment material, such as rust prevention and sound deadening substances, to vehicle body component parts.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>The unit includes identification and confirmation of work requirements, preparation for work, preparation of surfaces for rust prevention and sound deadening treatment, application of special treatment materials, and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
--------------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including method and material type.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal protection needs, are observed throughout the work.</p> <p>1.4. Materials are selected and inspected for quality.</p> <p>1.5. Hand, power tooling and safety equipment are identified and checked for operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Prepare surfaces for rust prevention and sound deadening materials	<p>2.1. Surfaces are cleaned and dried to enable the rust prevention and sound deadening material to adhere.</p> <p>2.2. Surfaces are prepared without causing damage to component or system.</p> <p>2.3. Preparation activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
3. Apply special treatments and/or materials	<p>3.1. The environment for the application of special treatments or material conforms to requirements for temperature, extraction of fumes and cleanliness.</p> <p>3.2. Special treatments and/or materials are applied as per manufacturer/component supplier recommendations.</p> <p>3.3. Special treatments or materials are dried using approved methods and equipment, as necessary.</p> <p>3.4. Application is completed without causing damage to component or system.</p> <p>3.5. Application of special treatments or materials is completed within established industry guidelines.</p> <p>3.6. The finished product meets specifications for mechanical fastening and/or application for coverage depth, and texture, and is contaminant free.</p> <p>3.7. Application activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste material is disposed of and/or stored in accordance with statutory and enterprise</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>requirements.</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for the application of rust prevention and sound deadening materials
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to calculate time, apply accurate measurements, calculate material requirements and establish quality checks
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology related to the application of rust prevention and sound deadening materials, including the use of specialist tooling and equipment, measuring equipment, computerised technology and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental procedures/material storage and disposal requirements
- material safety data sheets
- protective coatings and their use
- application methods
- brushes and spray guns
- spray gun/heat gun and brush techniques
- paint drying methods
- work organisation and planning processes
- enterprise quality procedures

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- observing environmental procedures
- preparing and applying a range of rust prevention and sound deadening materials
- drying rust prevention and sound deadening materials.

#### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - material relevant to the application of rust prevention and sound deadening materials
  - equipment, hand and power tooling appropriate to the application of rust prevention and sound deadening materials
  - activities covering mandatory task requirements
  - specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of

**EVIDENCE GUIDE**

	<p>underpinning knowledge.</p> <ul style="list-style-type: none"><li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li><li>• Assessment may be applied under project-related conditions and require evidence of process.</li><li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li><li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li><li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li></ul>
--	---

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Methods

Methods are to include:

- spray gun/heat gun techniques
- drying techniques
- hand brushing techniques
- mixing, thinning, matching and spraying techniques
- mechanical fastening techniques

#### Rust prevention and sound deadening materials

Rust prevention and sound deadening materials may include:

- spray-on sound deadening materials
- mechanically fastened sound deadening materials
- under-body sealers
- joint and seam sealants
- paint protection, rust protection and upholstery protection

#### WHS

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:

- protective clothing and equipment
- use of tooling and equipment
- workplace environment and safety
- handling of material
- use of firefighting equipment
- enterprise first aid
- hazard control and hazardous material and substances

#### Personal protective equipment

Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices

<b>RANGE STATEMENT</b>	
<b>Safe operating procedures</b>	<p>Safe operating procedures are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors</li> </ul>
<b>Emergency procedures</b>	<p>Emergency procedures related to this unit are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>emergency shutdown and stopping of equipment</li> <li>extinguishing fires</li> <li>enterprise first aid requirements</li> <li>worksite evacuation</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	1.1. Work instructions are used to determine job requirements, including method and material type. 1.2. Job specifications are read and interpreted. 1.3. Workplace health and safety (WHS) requirements, including personal protection needs, are observed throughout the work. 1.4. Materials are selected and inspected for quality. 1.5. Hand, power tooling and safety equipment are identified and checked for operation. 1.6. Procedures are determined to minimise waste material. 1.7. Procedures are identified for maximising energy efficiency while completing the job.
2. Prepare vehicle surfaces for painting	2.1. Information is accessed and interpreted from manufacturer/component supplier specifications. 2.2. Surfaces adjacent to the surfaces to be painted are protected using approved methods and material. 2.3. Surfaces to be painted are cleaned of contaminants. 2.4. Components and ancillary fittings that can be affected by the painting process are protected and/or removed and stored securely. 2.5. Surfaces to be painted are prepared using approved methods, material and equipment. 2.6. Unrecorded damage to surfaces and ancillary equipment is noted and reported to persons. 2.7. Surface preparation activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies. 2.8. Waste material is disposed of in accordance with statutory and enterprise requirements.
3. Apply primers	3.1. Components and ancillary fittings that can be affected by application processes are protected and/or removed and stored safely. 3.2. Primers/primer surfaces are applied using approved methods, materials and equipment. 3.3. Application activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies. 3.4. Work is completed without causing damage to any

ELEMENT	PERFORMANCE CRITERIA
	component or system.
4. Prepare primed surface for refinishing	<p>4.1.Surfaces to be refinished are prepared using approved methods, materials and equipment.</p> <p>4.2.Preparation activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p> <p>4.3.Work is completed without causing damage to any component or system.</p> <p>4.4.Waste materials are disposed of in accordance with statutory and enterprise requirements.</p>
5. Clean up work area and maintain equipment	<p>5.1.Material that can be reused is collected and stored.</p> <p>5.2.Waste and scrap is removed following workplace procedure.</p> <p>5.3.Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>5.4.Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>5.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>5.6.Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to calculate time, apply accurate measurements, calculate material requirements and establish quality checks
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology, including the use of specialist tooling and equipment, measuring equipment, computerised technology and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental protection requirements/material disposal and storage requirements
- material safety data sheets
- cleaning materials
- preparation methods
- industry codes of practice
- primer/paint application methods, including rolling
- rubbing down procedures
- enterprise quality procedures
- work organisation and planning processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- cleaning and masking the areas/equipment for paint repairs
- removing components and ancillary fittings for protection
- applying primers to manufacturer/component supplier specifications.

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to the preparation of vehicle components for paint repairs
  - equipment, hand and power tooling appropriate to the preparation of vehicle components for paint repairs
  - activities covering mandatory task requirements
  - specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail,

**EVIDENCE GUIDE**

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Components</b>	<p>Vehicle components to be prepared are to include:</p> <ul style="list-style-type: none"> <li>• in-situ panels</li> <li>• doors</li> <li>• plastic components</li> <li>• glasswork</li> <li>• bonnets</li> </ul>
<b>Preparation</b>	<p>Preparation may include:</p> <ul style="list-style-type: none"> <li>• internal and external trim</li> <li>• accessories</li> <li>• lights</li> <li>• rubber seals</li> <li>• protective strips</li> <li>• decals</li> <li>• striping</li> </ul>
<b>Preparation methods</b>	<p>Preparation methods are to include:</p> <ul style="list-style-type: none"> <li>• adhesive bonding</li> <li>• sanding (wet and dry)</li> <li>• masking</li> <li>• surface preparation</li> <li>• chemical cleaning</li> <li>• priming</li> <li>• paint touch-up</li> </ul>
<b>WHS</b>	<p>WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:</p> <ul style="list-style-type: none"> <li>• protective clothing and equipment</li> <li>• use of tooling and equipment</li> <li>• workplace environment and safety</li> <li>• handling of material</li> <li>• use of fire fighting equipment</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• enterprise first aid</li> <li>• hazard control and hazardous material and substances</li> </ul>
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices
<b>Safe operating procedures</b>	<p>Safe operating procedures are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors</li> </ul>
<b>Emergency procedures</b>	<p>Emergency procedures related to this unit are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• emergency shutdown and stopping of equipment</li> <li>• extinguishing fires</li> <li>• enterprise first aid requirements</li> <li>• worksite evacuation</li> </ul>
<b>Environmental requirements</b>	<p>Environmental requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• waste management, noise, dust and clean-up management</li> </ul>
<b>Quality requirements</b>	<p>Quality requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• regulations, including Australian standards</li> <li>• internal company quality policies and standards</li> <li>• enterprise operations and procedures</li> </ul>
<b>Statutory/regulatory authorities</b>	<p>Statutory/regulatory authorities may include:</p> <ul style="list-style-type: none"> <li>• federal, state/territory and local authorities administering Acts, regulations and codes of practice</li> </ul>
<b>Tooling and equipment</b>	<p>Tooling and equipment may include:</p> <ul style="list-style-type: none"> <li>• hand tooling</li> <li>• power tooling</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"><li>• cleaning equipment</li><li>• adhesive equipment</li><li>• spray painting equipment</li><li>• rubbing down equipment</li><li>• paint rollers</li><li>• hand touch-up equipment</li></ul>
<b>Materials</b>	Materials may include: <ul style="list-style-type: none"><li>• paint primers and cleaning materials</li></ul>
<b>Communications</b>	Communications are to include, but are not limited to: <ul style="list-style-type: none"><li>• verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers</li></ul>
<b>Information/documents</b>	Sources of information/documents may include: <ul style="list-style-type: none"><li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets (MSDS), diagrams or sketches</li><li>• safe work procedures related to the preparation of vehicle components for paint repair</li><li>• regulatory/legislative requirements pertaining to automotive painting and finishing</li><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian standards</li></ul>

## AURVTP2007 Apply paint touch-up techniques

### Modification History

Release	Comment
Release 1	Replaces AURV230449A Apply paint touch-up techniques Unit code updated to meet policy requirements Reference to OHS legislation replaced with new WHS legislation Licensing statement added to unit descriptor

### Unit Descriptor

Unit descriptor	<p>This unit of competency covers the skills and knowledge required to prepare equipment and apply materials for paint touch-up or minor repairs.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	--

### Application of the Unit

Application of the unit	<p>The unit includes identification and confirmation of work requirements, preparation for work, preparation of equipment for application of material for paint touch-up, and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
-------------------------	--

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including method and material type.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal protection needs, are observed throughout the work.</p> <p>1.4. Materials are selected and inspected for quality.</p> <p>1.5. Hand, power tooling and safety equipment are identified and checked for operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Prepare equipment	<p>2.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>2.2. Preparation is carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
3. Prepare and apply materials	<p>3.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>3.2. Preparation and application of materials is carried out in accordance with manufacturer/component supplier specifications.</p> <p>3.3. Preparation and application of materials is carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste and scrap is removed following workplace procedure.</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for the preparation and use of equipment and material for paint touch-up techniques
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to use equipment and mix material required for the work
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology related to the preparation and use of equipment and material for paint touch-up techniques, including the use of specialised tooling and equipment, measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental protection requirements/material disposal and storage
- material safety data sheets
- industry code of practice
- the types, applications and preparation processes for paints
- paint mixing procedures
- spraying equipment procedures
- equipment/material safety requirements
- hand painting procedures, including rolling
- application procedures
- work organisation and planning processes

**REQUIRED SKILLS AND KNOWLEDGE**

- enterprise quality procedures

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- preparing a range of equipment
- preparing a range of materials
- the completion of touch-up painting for a range of circumstances, including the use of spray equipment and brushes
- applying a range of touch-up materials.

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - material relevant to the preparation and use of equipment and material for paint touch-up techniques
  - equipment, hand and power tooling appropriate to the preparation and use of equipment and material for paint touch-up techniques
  - activities covering mandatory task requirements
  - specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.

**EVIDENCE GUIDE**

- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.
- Assessment may be applied under project-related conditions and require evidence of process.
- Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
- It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.
- Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Application systems and equipment

Application systems and equipment are to include:

- spray gun techniques
- drying techniques
- paint mixing
- paint rolling
- paint straining
- paint thinning
- paint matching
- buffing and polishing

#### Materials

Materials are to include:

- oil-based paints
- water-based paints
- synthetic paints
- vinyl paints,
- undercoats
- lacquers
- enamels
- paint thinners and paint reducers

#### WHS

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:

- protective clothing and equipment
- use of tooling and equipment
- workplace environment and safety
- handling of material
- use of firefighting equipment
- enterprise first aid
- hazard control and hazardous material and substances

<b>RANGE STATEMENT</b>	
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to: <ul style="list-style-type: none"> <li>operational risk assessment and treatments associated with toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors</li> </ul>
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to: <ul style="list-style-type: none"> <li>emergency shutdown and stopping of equipment</li> <li>extinguishing fires</li> <li>enterprise first aid requirements</li> <li>worksite evacuation</li> </ul>
<b>Environmental requirements</b>	Environmental requirements are to include, but are not limited to: <ul style="list-style-type: none"> <li>waste management, noise, dust and clean-up management</li> </ul>
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to: <ul style="list-style-type: none"> <li>regulations, including Australian Standards</li> <li>internal company quality policy and standards</li> <li>enterprise operations and procedures</li> </ul>
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include: <ul style="list-style-type: none"> <li>federal, state/territory and local authorities administering Acts, regulations and codes of practice</li> </ul>
<b>Tooling and equipment</b>	Tooling and equipment may include: <ul style="list-style-type: none"> <li>spray guns</li> <li>air pressure regulators</li> <li>air compressors</li> <li>personal protective equipment</li> <li>spray booths</li> </ul>

<b>RANGE STATEMENT</b>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine work requirements, including method, material and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal protection needs are observed throughout the work.</p> <p>1.4. Material for work is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the work.</p>
2. Clean vehicle body exterior paint	<p>2.1. Tooling and equipment are selected and used according to workplace methods and customer requirements.</p> <p>2.2. Materials are selected according to vehicle finish type, workplace methods and paint manufacturer/component supplier recommendations.</p> <p>2.3. Materials are used and stored according to manufacturer/ component supplier recommendations and regulatory requirement.</p> <p>2.4. Vehicle body exterior finish is cleaned according to workplace and industry/product manufacturer/component supplier prescribed methods and procedures.</p> <p>2.5. Cleaning is completed without causing damage to component or system.</p> <p>2.6. Vehicle body exterior paint is cleaned according to industry standards/regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
3. Polish vehicle body exterior paint	<p>3.1. Tooling and equipment are selected and used according to workplace methods and customer requirements.</p> <p>3.2. Materials are selected according to vehicle finish type, workplace methods and paint manufacturer/component supplier recommendations.</p> <p>3.3. Materials are used and stored according to manufacturer/ component supplier recommendations</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>and regulatory requirements.</p> <p>3.4.Vehicle body exterior paint is polished according to workplace, and industry/product manufacturer/component supplier prescribed methods and procedures.</p> <p>3.5.Polishing is completed without causing damage to component or system.</p> <p>3.6.Vehicle body exterior finish is polished according to industry standards/regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
4. Clean up work area and maintain equipment	<p>4.1.Material that can be reused is collected and stored.</p> <p>4.2.Waste material is removed following workplace and environmental procedure.</p> <p>4.3.Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4.Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>4.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.6.Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for vehicle cleaning and polishing
- identifying safety precautions
- identifying recommended applications and procedures
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- reading and interpreting product labels/directions
- listening and following verbal instructions
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to calculate time, apply accurate measurements, calculate material requirements and establish quality checks
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology related to cleaning and polishing vehicle exterior paint, including the use of measuring equipment and communication devices and the reporting/ documenting of results

#### Required knowledge

Required knowledge includes:

- WHS and environmental regulations/requirements, equipment, material and personal safety requirements
- environmental requirements for storage, handling and disposal of substances
- material safety data sheets
- cleaning agents and their recommended applications
- polishing agents and their recommended applications
- cleaning and polishing procedures for vehicle body exterior finish
- enterprise quality procedures
- work organisation and planning processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- selecting and using material and equipment
- cleaning and polishing of a range of vehicle body exterior paints.

#### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to cleaning and polishing vehicle exterior paint
  - equipment, hand and power tooling appropriate to cleaning and polishing vehicle exterior paint
  - activities covering mandatory task requirements
  - specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also

**EVIDENCE GUIDE**

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Methods

Methods are to include:

- manual or machine assisted cleaning and polishing

#### WHS requirements

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:

- protective clothing and equipment
- use of tooling and equipment
- workplace environment and safety
- handling of material
- use of firefighting equipment
- enterprise first aid
- hazard control and hazardous material and substances

#### Personal protective equipment

Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices

#### Safe operating procedures

Safe operating procedures are to include, but are not limited to:

- operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors

#### Emergency procedures

Emergency procedures related to this unit are to include, but are not limited to:

- emergency shutdown and stopping of equipment
- extinguishing fires

<b>RANGE STATEMENT</b>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine <i>job requirements</i>, including required method of application, and type of film-wrapping material and equipment</p> <p>1.2. <i>Workplace health and safety (WHS) requirements</i> are identified and followed</p> <p>1.3. Film wrapping and other necessary <i>materials</i> are selected</p> <p>1.4. <i>Tools and equipment</i> are identified, checked and used correctly</p> <p>1.5. Application procedures are determined to minimise mistakes and waste and maximise energy efficiency while completing the job</p> <p>1.6. Vehicle panel surface is assessed for quality</p>
2. Measure and cut film-wrapping materials	<p>2.1. Film supplier specifications are accessed and interpreted</p> <p>2.2. Measurement, cutting and template production are performed according to film supplier specifications, industry regulations and guidelines, WHS requirements, <i>statutory and regulatory authority requirements</i>, and workplace procedures</p> <p>2.3. Surfaces are measured, material patterns and templates are produced, and cut is made without causing damage to vehicle body surface</p> <p>2.4. Workplace documents are completed relevant to film size cutting and application outcomes</p>
3. Prepare vehicle surface and apply film-wrapping material	<p>3.1. Surface is prepared using approved methods, materials and equipment, according to the specifications of film-wrapping material</p> <p>3.2. Film-wrapping materials are applied according to supplier specifications and <i>quality requirements</i></p> <p>3.3. Film-wrapping applications are inspected and tested according to suppliers' recommended procedures</p> <p>3.4. Film-wrapping applications are completed without causing damage to vehicle and according to industry regulations and guidelines, WHS requirements and workplace policies and procedures</p> <p>3.5. Workplace documents are completed</p>
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored according to workplace sustainability practices</p> <p>4.2. Waste and scrap are removed following workplace and <i>environmental procedures</i></p> <p>4.3. Equipment and work area are cleaned and inspected for</p>

	<p>serviceable condition according to workplace procedures</p> <p>4.4.Faulty equipment is identified and tagged according to workplace requirements</p> <p>4.5.Workplace <i>emergency procedures</i> are identified and followed when required</p> <p>4.6.Tools are maintained according to workplace procedures</p>
--	--

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to follow work instructions
- initiative and enterprise skills to recognise a workplace problem or potential problem and take action
- learning skills to identify sources of information, assistance and expert knowledge to expand skills, knowledge and understanding
- literacy skills to read and follow information in written job instructions, specifications, standard operating procedures, charts, lists, drawings and other reference documents
- numeracy skills to measure and calculate film-wrapping materials
- planning and organising skills to:
  - plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed on time
  - plan film-wrapping application following job specification
  - identify risk factors and take action to minimise them
- problem-solving skills to refer problems outside area of responsibility to appropriate person and suggest possible causes
- self-management skills to:
  - select and use appropriate film-wrapping products, materials, processes and procedures
  - recognise own limitations and seek advice
  - follow workplace policies and documentation, such as codes of practice
- technical skills to use film-wrapping specialist tools and equipment
- technology skills to use tools and equipment to collect and provide information on film-wrapping processes

#### Required knowledge

- industry codes of practice relating to vehicle body film wrapping
- WHS, environmental and emergency requirements and procedures
- automotive film wrapping application techniques
- workplace policies and procedures and quality requirements relating to film wrapping
- procedures for the correct use of film wrapping tools and equipment

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria and required skills and knowledge.

A person who demonstrates competency in this unit must be able to:

- observe safety procedures and requirements
- select methods and techniques appropriate to film-wrapping application
- clean surfaces before and after applying film wrapping
- measure and cut film templates and material templates
- apply film to a range of motor vehicle body shapes
- follow film supplier specifications
- follow workplace procedures.

#### Context of, and specific resources for assessment

Competency is to be assessed in the workplace or a simulated workplace environment that accurately reflects performance in a real workplace setting.

Assessment is to occur:

- using standard workplace practices and procedures
- following safety requirements
- applying environmental constraints.

Assessment is to comply with relevant:

- regulatory requirements
- Australian standards
- industry codes of practice
- film supplier specifications.

The following resources must be made available for the assessment of this unit:

- workplace location or simulated workplace
- materials relevant to the preparation of surfaces and the application of film wrapping materials
- film wrapping material

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

- specialised tools and equipment
- hand and power tools
- specifications and work instructions.

**Method of assessment**

Assessment must satisfy the endorsed Assessment Guidelines of this Training Package.

Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with the application of required skills and knowledge.

Assessment methods must be by direct observation of tasks and include questioning on required skills and knowledge to ensure correct interpretation and application.

Competence in this unit may be assessed in conjunction with other units which together form part of a holistic work role.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate the needs of diverse clients.

Assessment processes and techniques must be culturally sensitive and appropriate to the language, literacy and numeracy capacity of the candidate and the work being performed.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Job requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• identification of material and work requirements</li> <li>• preparation of film-wrapping materials</li> <li>• measuring and cutting of vehicle film-wrapping materials</li> <li>• preparation of surfaces</li> <li>• application of vehicle film wrapping</li> <li>• cutting of patterns and templates to suit vehicle body shapes</li> <li>• film-wrapping application and job completion processes</li> <li>• clean-up</li> <li>• documentation.</li> </ul>
<p><b><i>Workplace health and safety requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• dust and fume collection</li> <li>• personal protective clothing and equipment, such as:               <ul style="list-style-type: none"> <li>• eye protection</li> <li>• personal protective clothing</li> <li>• safety footwear</li> </ul> </li> <li>• safe use of tools and equipment</li> <li>• safe handling of material</li> <li>• use of fire-fighting equipment</li> <li>• workplace first aid procedures</li> <li>• hazard control, including control of hazardous materials and toxic substances.</li> </ul>
<p><b><i>Materials</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• film-wrapping materials</li> <li>• patterns</li> <li>• templates</li> <li>• cleaning fluids</li> <li>• cleaning cloths</li> <li>• hand tools</li> <li>• scrapers</li> <li>• cleaning solutions.</li> </ul>
<p><b><i>Tools and equipment</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• hot-air gun</li> <li>• hand tools</li> <li>• scrapers</li> <li>• plastic squeegees</li> <li>• cutting and special application tools.</li> </ul>

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Statutory and regulatory authority requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• federal, state or territory, and local authorities administering Acts</li> <li>• regulations and industry codes of practice.</li> </ul>
<b><i>Quality requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• regulations, including Australian standards</li> <li>• industry standards</li> <li>• supplier-recommended application procedures</li> <li>• supplier specifications</li> <li>• workplace quality policy.</li> </ul>
<b><i>Environmental procedures</i></b> may include:	<ul style="list-style-type: none"> <li>• waste management</li> <li>• noise control</li> <li>• dust and fume collection</li> <li>• clean-up management.</li> </ul>
<b><i>Emergency procedures</i></b> may include:	<ul style="list-style-type: none"> <li>• emergency shutdown</li> <li>• extinguishing fires</li> <li>• workplace first aid requirements</li> <li>• worksite evacuation.</li> </ul>

## AURVTP2026 Carry out basic airbrush application techniques

### Modification History

Release	Comment
Release 1	<p>Replaces AURV232208A Carry out fundamental airbrush application techniques</p> <p>Unit code updated to meet policy requirements</p> <p>Minor changes to unit title</p> <p>Reference to OHS legislation replaced with new WHS legislation</p> <p>Licensing statement added to unit descriptor</p>

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit of competency covers the skills and knowledge required to carry out fundamental airbrush application techniques on a variety of substrates.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>The unit includes identification and confirmation of work requirements, preparation for work, application of materials and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
--------------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including job sheets, material type, colour, quality and quantity.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal protection needs, breathing apparatus and full body protection, are observed throughout the work.</p> <p>1.4. Materials are selected and inspected for quality.</p> <p>1.5. Hand tooling and safety equipment are identified and checked for operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Identify common types of airbrush used, describe their operating principles, cleaning and maintenance procedures	<p>2.1. Airbrush types, main parts and functions are identified and described.</p> <p>2.2. Correct cleaning and maintenance procedures are described and demonstrated.</p>
3. Apply airbrush techniques over prepared stencils	<p>3.1. Surfaces are prepared for airbrush application.</p> <p>3.2. Prepared stencil mediums are airbrushed over to produce flat wash, graded wash, dimensional effects and geometric shapes.</p> <p>3.3. Accurate visual texture, light and shade on given subject matter is achieved.</p>
4. Produce designs and illustrations with one colour using airbrush graduation techniques	<p>4.1. Controlled straight and curved work using airbrush graduation techniques is carried out.</p> <p>4.2. Shading patterns and designs are produced using airbrush graduation techniques.</p>
5. Prepare a substrate ready to accept a clear top coat	<p>5.1. Correct abrasives to carry out substrate preparation for clear top coat finishes are identified and selected.</p> <p>5.2. Correct cleaning and drying procedures in relation to sludge removal is carried out.</p> <p>5.3. Preparation of the surface to accept clear top coats using solvent cleaners and tack rags is carried out.</p>
6. Apply clear top coat	<p>6.1. Refinishing materials are applied without causing</p>

ELEMENT	PERFORMANCE CRITERIA
refinishing materials by spray gun	<p>damage to any component or system.</p> <p>6.2.The finish produced meets specifications for, texture, depth and gloss and is contaminant-free.</p> <p>6.3.Surface refinishing is completed within approved timeframes.</p> <p>6.4.Application activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
7. Clean up work area and maintain equipment	<p>7.1.Material that can be reused is collected and stored.</p> <p>7.2.Waste material is removed and disposed of or stored according to statutory and workplace procedure.</p> <p>7.3.Spray equipment is cleaned as specified by manufacturer/ component supplier and/or workplace policy and procedures.</p> <p>7.4.Work area is cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>7.5.Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>7.6.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>7.7.Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- apply research and interpretive skills to locate, interpret and apply manufacturer/component supplier procedures, workplace policies and procedures
- apply analytical skills required for the identification and analysis of technical information
- apply oral communication skills sufficient to convey information and concepts to customers
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring one's own performance
- interact effectively with other persons both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to the removal, replacement, fitting and testing of components/accessories, including the use of specialist tooling and equipment, measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental protection requirements/substance disposal and storage requirements
- material safety data sheets (MSDS)
- types of paints used for airbrushing
- types and main parts of airbrush
- types of masking and stencil mediums
- types of clear coat refinishing materials
- application methods
- types of spray guns

**REQUIRED SKILLS AND KNOWLEDGE**

- airbrush operation (spraying techniques)
- spray gun operation (spraying techniques)
- spray gun cleaning methods
- work organisation and planning processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- preparing a surface ready to accept colour coats airbrushed applications
- demonstrating custom graphic techniques including, pictorial reproduction, highlighting, special effects
- preparing clear top coat paint refinishing materials
- applying clear top coat refinishing materials.

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials required for the application of fundamental airbrush designs
  - clear top coat refinishing materials
  - equipment, hand and power tooling appropriate to application of refinishing materials
  - activities covering mandatory task requirements
  - specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed Assessment

**EVIDENCE GUIDE**

	<p>Guidelines of the Automotive Industry Retail, Service and Repair Training Package.</p> <ul style="list-style-type: none"><li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li><li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li><li>• Assessment may be applied under project related conditions and require evidence of process.</li><li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li><li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li><li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li></ul>
--	---

## Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Airbrush types</b>	<p>Airbrush types may include:</p> <ul style="list-style-type: none"> <li>• single action</li> <li>• double action</li> <li>• gravity feed</li> <li>• side feed</li> </ul>
<b>Airbrush main parts</b>	<p>Airbrush main parts may include:</p> <ul style="list-style-type: none"> <li>• air cap</li> <li>• fluid needle</li> <li>• fluid tip</li> <li>• fluid and adjustment screw</li> <li>• air valve</li> <li>• gun body</li> <li>• fluid needle packing gland</li> <li>• trigger</li> <li>• spreader adjustment valve</li> </ul>
<b>Airbrush techniques</b>	<p>Airbrush techniques may include:</p> <ul style="list-style-type: none"> <li>• stencilling techniques</li> <li>• graduation techniques</li> </ul>
<b>Refinishing materials</b>	<p>Refinishing materials may include:</p> <ul style="list-style-type: none"> <li>• acrylic base coats</li> <li>• water-based and acrylic lacquers</li> <li>• paint reducers</li> </ul>
<b>Refinishing methods</b>	<p>Refinishing methods include:</p> <ul style="list-style-type: none"> <li>• air brush/spray gun selection</li> <li>• equipment protection and maintenance methods</li> <li>• various spraying techniques</li> <li>• drying procedures</li> <li>• paint mixing</li> <li>• compound polishing</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>detailing of surfaces</li> </ul>
<b>WHS requirements</b>	<p>WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:</p> <ul style="list-style-type: none"> <li>protective clothing and equipment</li> <li>use of tooling and equipment</li> <li>workplace environment and safety</li> <li>handling of materials</li> <li>use of firefighting equipment</li> <li>enterprise first aid</li> <li>hazard control and hazardous materials and substances</li> </ul>
<b>Personal protective equipment</b>	<p>Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and practices</p>
<b>Safe operating procedures</b>	<p>Safe operating procedures are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors</li> </ul>
<b>Emergency procedures</b>	<p>Emergency procedures related to this unit are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>emergency shutdown and stopping of equipment</li> <li>extinguishing fires</li> <li>enterprise first aid requirements</li> <li>worksite evacuation</li> </ul>
<b>Environmental requirements</b>	<p>Environmental requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>waste management, noise, dust and clean-up management</li> </ul>
<b>Quality requirements</b>	<p>Quality requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>regulations, including Australian standards</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• internal company quality policies and standards</li> <li>• enterprise operations and procedures</li> </ul>
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include: <ul style="list-style-type: none"> <li>• federal, state/territory and local authorities administering Acts, regulations and codes of practice</li> </ul>
<b>Tooling and equipment</b>	Tooling and equipment may include: <ul style="list-style-type: none"> <li>• various air brushes, spray guns, air pressure regulators, air compressors, spray booths, baking ovens, heating and lighting systems, strainers, measuring sticks and safety equipment</li> </ul>
<b>Materials</b>	Materials may include: <ul style="list-style-type: none"> <li>• templates</li> <li>• masking medium</li> <li>• stencils</li> <li>• tac rags</li> <li>• polishing buffs and pads</li> <li>• cleaning solvents</li> <li>• compounds, glazes and cleaning materials</li> </ul>
<b>Communications</b>	Communications are to include, but are not limited to: <ul style="list-style-type: none"> <li>• verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers</li> </ul>
<b>Information/documents</b>	Sources of information/documents may include: <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, MSDS, diagrams or sketches</li> <li>• safe work procedures related to application of colour and clear coat refinishing materials</li> <li>• regulatory/legislative requirements pertaining to automotive painting and finishing</li> <li>• engineer's design specifications and instructions</li> </ul>

**RANGE STATEMENT**

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including job sheets, material type, colour, quality and quantity.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal protection needs, are observed throughout the work.</p> <p>1.4. Materials are selected and inspected for quality.</p> <p>1.5. Hand tooling and safety equipment are identified and checked for operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Determine design, layout, colours and graphics	<p>2.1. Type of design and layout determined in accordance with project brief.</p> <p>2.2. Selection of colours and graphics determined in accordance with project brief.</p> <p>2.3. Clarify specifications, parameters or constraints of the brief in consultation with relevant colleagues.</p> <p>2.4. Correctly identify the resources required for the graphic design, including work space, materials, tools and equipment.</p> <p>2.5. Develop draft sketch of design layout using selected tools/ equipment and materials.</p> <p>2.6. Draft design layout sketch incorporates agreed design elements for approximate size, colour and graphic preferences.</p>
3. Refine design, layout, colours and graphics and develop a working plan	<p>3.1. Draft design layout amended to suit client's requirements.</p> <p>3.2. Appropriate colour combinations and effects for pictorial reproduction mediums and equipment to produce various designs are specified.</p> <p>3.3. Develop working plan for the design layout incorporating accurate sizing, colour samples and specifying the number of overlays and stencils required.</p>
4. Prepare stencils	<p>4.1. Stencil material is selected appropriate for the type of graphic design to be applied.</p> <p>4.2. Quality and size of stencil material are checked for</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>conformance to job specifications and suitability of equipment used.</p> <p>4.3.Design is applied to stencil material by; freehand drawing, photography/projector and/or computer-aided printing and/or cutting methods.</p> <p>4.4.Stencil cutting instruments are selected according to job specifications.</p> <p>4.5.In the case of computer-aided stencil cutting equipment; the equipment is set up and the stencil material is positioned in plotter according to manufacturer/supplier specifications.</p> <p>4.6.Stencil material is cut and weeded according to manufacturer/supplier specifications in such a way as to avoid excessive waste.</p> <p>4.7.Before mounting or applying the stencil to the work-piece, it is checked for conformance to job specifications and appropriate action is taken.</p>
5. Specify mediums to be applied to paint surfaces to create a variety of different visual effects	<p>5.1.Substrates, backgrounds, materials and equipment used for creation of a range of visual effects are identified.</p> <p>5.2.Accurate visual texture, light and shade on given subject matter is defined.</p> <p>5.3.Requirements to achieve special effects for selected illustrations/graphics are specified, including:</p> <p>5.3.1. highlighting, reflection, and transparency techniques</p> <p>5.3.2. texture simulations, including; stone, liquid, leather, metal, fish scales and marbling</p> <p>5.3.3. 3D effects, to create visual realism</p> <p>5.3.4. tribal/Indigenous art styles.</p> <p>5.4.Appropriate colours to the given subject, achieving correct tones and tonal order are selected and specified.</p> <p>5.5.Lines, shapes, dots, patterns and illustrations to be produced using freehand techniques with the assistance of shields, templates and/or stencils are specified.</p> <p>5.6.Appropriate backgrounds, colour combinations and the effectiveness of colour are identified and applied.</p>
6. Clean up work area and maintain equipment	<p>6.1.Material that can be reused is collected and stored.</p> <p>6.2.Waste material is removed and disposed of or stored according to statutory and workplace procedure.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>6.3. Work area is cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>6.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>6.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>6.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- apply research and interpretive skills to locate, interpret and apply manufacturer/component supplier procedures, workplace policies and procedures
- apply analytical skills required for the identification and analysis of technical information
- apply oral communication skills sufficient to convey information and concepts to customers
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring one's own performance
- interact effectively with other persons both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to the removal, replacement, fitting and testing of components/accessories, including the use of specialist tooling and equipment, measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental protection requirements/substance disposal and storage requirements
- computer-aided design software and hardware
- material safety data sheets (MSDS)
- pictorial and graphical reproduction
- special effects techniques
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- preparing draft graphic design layouts according to client's brief
- preparing a working plan for the application of the graphic design - specifying accurate sizing, colour samples and the number of overlays
- develop and prepare stencils to create special effects to given illustrations/graphics, including:
- highlighting, reflection, and transparency techniques
- texture simulations, including 'Ebola virus', stone, liquid, leather, metal, fish scales and marbling
- 3D effects, to create visual realism
- tribal/indigenous art styles
- applying environmental procedures.

#### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials and equipment required for the development of graphic designs and layouts

**EVIDENCE GUIDE**

	<ul style="list-style-type: none"><li>• activities covering mandatory task requirements</li><li>• specifications and work instructions.</li></ul>
<b>Method of assessment</b>	<ul style="list-style-type: none"><li>• Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.</li><li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li><li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li><li>• Assessment may be applied under project related conditions and require evidence of process.</li><li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li><li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li><li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li></ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### **Fundamental custom graphic techniques**

Fundamental custom graphic techniques include:

- pictorial reproduction
- highlighting
- reflective and transparency techniques
- texture simulation
- metal, stone and liquid simulations
- leather simulation
- chrome simulation
- marbling

#### **Graphic designs and layouts**

Graphic designs and layouts may be created by:

- freehand or with the aid of computer-aided design, printing and plotting equipment and/or photographic and projection equipment

#### **WHS requirements**

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:

- protective clothing and equipment
- use of tooling and equipment
- workplace environment and safety
- handling of materials
- use of firefighting equipment
- enterprise first aid
- hazard control and hazardous materials and substances

#### **Personal protective equipment**

Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and practices

#### **Safe operating procedures**

Safe operating procedures are to include, but are not limited to:

- operational risk assessment and treatments

<b>RANGE STATEMENT</b>	
	associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to: <ul style="list-style-type: none"> <li>• emergency shutdown and stopping of equipment</li> <li>• extinguishing fires</li> <li>• enterprise first aid requirements</li> <li>• worksite evacuation</li> </ul>
<b>Environmental requirements</b>	Environmental requirements are to include, but are not limited to: <ul style="list-style-type: none"> <li>• waste management, noise, dust and clean-up management</li> </ul>
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to: <ul style="list-style-type: none"> <li>• regulations, including Australian standards</li> <li>• internal company quality policies and standards</li> <li>• enterprise operations and procedures</li> </ul>
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include: <ul style="list-style-type: none"> <li>• federal, state/territory and local authorities administering Acts, regulations and codes of practice</li> </ul>
<b>Tooling and equipment</b>	Tooling and equipment may include: <ul style="list-style-type: none"> <li>• manual stencil cutting equipment</li> <li>• computer-aided printing equipment</li> <li>• computer-aided stencil cutting equipment</li> <li>• photographic and projection equipment</li> <li>• safety equipment</li> </ul>
<b>Materials</b>	Materials may include: <ul style="list-style-type: none"> <li>• shields</li> <li>• templates</li> <li>• stencils</li> <li>• masking medium</li> <li>• pin-stripping materials</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• tac rags</li> <li>• cleaning solvents</li> <li>• compounds, glazes and cleaning materials</li> </ul>
<b>Communications</b>	<p>Communications are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers</li> </ul>
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, MSDS, diagrams or sketches</li> <li>• safe work procedures related to application of colour and clear coat refinishing materials</li> <li>• regulatory/legislative requirements pertaining to automotive painting and finishing</li> <li>• engineer's design specifications and instructions</li> <li>• organisation work specifications and requirements</li> <li>• instructions issued by authorised enterprise or external persons</li> <li>• Australian standards</li> </ul>

## AURVTP3010 Prepare spray booths and paint drying equipment

### Modification History

Release	Comment
Release 1	Replaces AURV329549A Prepare spray booths and paint drying equipment Unit code updated to meet policy requirements Reference to OHS legislation replaced with new WHS legislation Licensing statement added to unit descriptor

### Unit Descriptor

Unit descriptor	<p>This unit covers the competence required for the preparation of paint drying equipment, such as spray booths, ovens and infra-red drying equipment.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	---

### Application of the Unit

Application of the unit	<p>The unit includes identification and confirmation of work requirement, preparation for work, the preparation of spray booths, the preparation of paint drying equipment and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
-------------------------	---

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including method and material type.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including personal protection needs, are observed throughout the work.</p> <p>1.4. Materials are selected and inspected for quality.</p> <p>1.5. Hand, power tooling and safety equipment are identified and checked for use.</p> <p>1.6. Procedures are determined to minimise waste time.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Prepare spray booth and drying equipment	<p>2.1. Information is accessed and interpreted from manufacturer/component supplier specifications.</p> <p>2.2. Protective clothing and equipment appropriate to preparation process are used.</p> <p>2.3. Preparation, maintenance and adjustment of spray booth and drying equipment conforms to requirements of manufacturer/component supplier specifications.</p> <p>2.4. Drying equipment is prepared without causing damage to any component or system.</p> <p>2.5. Preparation activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
3. Clean up work area and maintain equipment	<p>3.1. Material that can be reused is collected and stored.</p> <p>3.2. Waste and scrap is removed following workplace procedure.</p> <p>3.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>3.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>3.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>3.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for preparing spray booth and paint drying equipment
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to use equipment for the work
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use workplace technology related to preparation of spray booths and drying equipment, including the use of specialist tooling, measuring equipment and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- types of spray booths and drying equipment
- paint drying methods
- equipment preparation procedures
- manufacturer/component supplier specifications for equipment set up and maintenance
- environmental protection requirements
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including job sheets, material type, colour, quality and quantity.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including personal protection needs, breathing apparatus and full body protection, are observed throughout the work.</p> <p>1.4. Materials are selected and inspected for quality.</p> <p>1.5. Hand tooling and safety equipment are identified and checked for operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Apply solid acrylic enamel refinishing materials by spray gun	<p>2.1. The environment for application of refinishing materials conforms to requirements for temperature, extraction of fumes and cleanliness.</p> <p>2.2. Refinishing materials are applied at manufacturer/component supplier recommended intervals using approved methods.</p> <p>2.3. Refinishing materials are dried using approved methods and equipment.</p> <p>2.4. Paint film surface faults are removed using compounds, polishes and glazes.</p> <p>2.5. Refinishing materials are applied without causing damage to any component or system.</p> <p>2.6. The finish produced meets specifications for colour, texture, depth and gloss and is contaminant-free, blending into the surrounding surfaces.</p> <p>2.7. Surface refinishing is completed within approved timeframes.</p> <p>2.8. Application activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
3. Identify paint faults, causes and rectification procedures	<p>3.1. Paint faults are identified according to industry and workplace procedures.</p> <p>3.2. Paint fault causes are determined according to industry and workplace procedures.</p> <p>3.3. Rectification procedures are determined according to fault and type of finish material, industry standard</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>practices and workplace requirements.</p> <p>3.4. Identification of faults and rectification are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
<p>4. Rectify and touch up paint faults of solid (two component system) paint materials</p>	<p>4.1. Materials to restore paintwork to as-new condition are determined from industry and manufacturer/component supplier standards.</p> <p>4.2. Damaged paintwork is rectified to blend with existing paintwork on vehicle.</p> <p>4.3. All rectification operations are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p> <p>4.4. Paint faults are rectified without causing damage to any component or system.</p>
<p>5. Clean up work area and maintain equipment</p>	<p>5.1. Material that can be reused is collected and stored.</p> <p>5.2. Waste material is removed and disposed of or stored according to statutory and workplace procedures.</p> <p>5.3. Spray equipment is cleaned according to manufacturer/ component supplier and/or workplace policy and procedures.</p> <p>5.4. Work area is cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>5.5. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>5.6. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>5.7. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for applying solid acrylic enamel refinishing materials (two component system)
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to application of solid acrylic enamel refinishing materials, including the use of specialist equipments, measuring equipment and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental protection requirements/substance disposal and storage requirements
- material safety data sheets
- types of solid acrylic enamel refinishing materials (two component system)
- paint surface fault identification and rectification procedures
- drying methods for solid acrylic enamel refinishing material (two component system)
- paint application methods
- types of spray guns
- spray gun operation (spraying techniques)
- spray gun cleaning methods
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- preparing solid acrylic enamel (two component system) paint
- applying solid acrylic enamel refinishing materials (two component system)
- identifying paint faults and determining rectification procedures
- rectifying paint faults
- applying environmental procedures.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to application of solid acrylic enamel refinishing materials
- equipment, hand and power tooling appropriate to application of solid acrylic enamel refinishing materials
- activities covering mandatory task requirements
- specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training

<b>EVIDENCE GUIDE</b>	
	<p>Package.</p> <ul style="list-style-type: none"> <li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Refinishing materials</b>	Refinishing materials include solid acrylic enamels, hardeners and reducers.
<b>Refinishing methods</b>	Refinishing methods include spray gun selection equipment protection methods, various spraying techniques, drying procedures, paint mixing,

<b>RANGE STATEMENT</b>	
	compound polishing and detailing of surfaces.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include various spray guns, air pressure regulators, air compressors,

RANGE STATEMENT	
	spray booths, baking ovens, heating and lighting systems, strainers, ford cup, measuring sticks and safety equipment.
<b>Materials</b>	Materials may include polishing buffs and pads, rags, tac rags, solvents, compounds, glazes and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	Sources of information/documents may include: <ul style="list-style-type: none"><li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li><li>• safe work procedures related to application of solid acrylic enamel refinishing materials</li><li>• regulatory/legislative requirements pertaining to automotive painting and finishing</li><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including job sheets, material type, colour, quality and quantity.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including personal protection needs, breathing apparatus and full body protection, are observed throughout the work.</p> <p>1.4. Materials are selected and inspected for quality.</p> <p>1.5. Hand tooling and safety equipment are identified and checked for operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Identify paint faults, causes and rectification procedures	<p>2.1. Paint faults are identified according to industry and workplace procedures.</p> <p>2.2. Paint fault causes are determined according to industry and workplace procedures.</p> <p>2.3. Rectification procedures are determined according to fault and type of finish material according to industry standard practices and workplace requirements.</p> <p>2.4. Identification and determination activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
3. Apply air dry and polyurethane enamel refinishing materials by spray gun	<p>3.1. The environment for application of refinishing materials conforms to requirements for temperature, extraction of fumes and cleanliness.</p> <p>3.2. Refinishing materials are applied at manufacturer/component supplier recommended intervals using approved methods.</p> <p>3.3. Refinishing materials are dried using approved methods and equipment.</p> <p>3.4. Refinishing materials are applied without causing damage to any component or system.</p> <p>3.5. The finish produced meets specifications for colour, texture, depth and gloss and is contaminant-free.</p> <p>3.6. Surface refinishing is completed within approved timeframes.</p> <p>3.7. Application activities are carried out according to industry regulations/guidelines, WHS legislation, and</p>

ELEMENT	PERFORMANCE CRITERIA
	enterprise procedures/policies.
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste material is removed and disposed of or stored according to statutory and workplace procedure.</p> <p>4.3. Spray equipment is cleaned as specified by manufacturer/ component supplier and/or workplace policy and procedures.</p> <p>4.4. Work area is cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.5. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>4.6. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.7. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for applying air dry and polyurethane enamel refinishing materials
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to application of air dry and polyurethane enamel refinishing materials, including the use of specialist equipment, measuring equipment and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental protection requirements/substance disposal and storage requirements
- material safety data sheets
- types of air dry and polyurethane enamel refinishing materials
- application methods
- paint surface fault identification and rectification procedures
- drying methods for air dry and polyurethane enamel refinishing material
- types of spray guns
- spray gun operation and spraying techniques
- spray gun cleaning methods
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- preparing air dry and polyurethane enamel paint
- applying a range of air dry and polyurethane enamel refinishing materials
- identifying paint faults and determining rectification faults
- rectifying faults
- applying environmental procedures.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards. The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to application of air dry and polyurethane enamel refinishing materials
- equipment, hand and power tooling appropriate to application of air dry and polyurethane enamel refinishing materials
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and

**EVIDENCE GUIDE**

	<p>accuracy of performance together with application of underpinning knowledge.</p> <ul style="list-style-type: none"> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Paint types**

Paint types are to include air dry synthetic enamels, enamel additives, two-pack polyurethane acrylic enamels, urethane additives and paint reducers.

**Methods**

Methods are to include:

- spray gun selection, various spraying

<b>RANGE STATEMENT</b>	
	<p>techniques, drying procedures, paint mixing</p> <ul style="list-style-type: none"> <li>• polishing and detailing of surfaces.</li> </ul>
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.

<b>RANGE STATEMENT</b>	
<b>Tooling and equipment</b>	Tooling and equipment may include various spray guns, air pressure regulators, air compressors, spray booths, baking ovens, heating and lighting systems, strainers, masking equipment and safety equipment.
<b>Materials</b>	Materials may include rags, tac rags, cleaning solvents and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"><li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li><li>• safe work procedures related to application of air dry and polyurethane enamel refinishing materials</li><li>• regulatory/legislative requirements pertaining to automotive painting and finishing</li><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>

## AURVTP3013 Prepare substrate for refinishing

### Modification History

Release	Comment
Release 1	Replaces AURV329649A Prepare substrate for refinishing Unit code updated to meet policy requirements Reference to OHS legislation replaced with new WHS legislation Licensing statement added to unit descriptor

### Unit Descriptor

Unit descriptor	<p>This unit covers the competence required to prepare substrates for refinishing. The preparation of plastic/composite materials for refinishing is not addressed in this unit.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	---

### Application of the Unit

Application of the unit	<p>The unit includes identification and confirmation of work requirement, preparation for work, removal of surface rust/ scale, application of primers and sealers, the preparation of the surface for refinishing and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
-------------------------	---

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	1.1. Work instructions are used to determine the job requirements, including method and material type. 1.2. Job specifications are read and interpreted. 1.3. WHS requirements, including personal protection needs, are observed throughout the work. 1.4. Materials are selected and inspected for quality. 1.5. Hand, power tooling and safety equipment are identified and checked for operation. 1.6. Procedures are determined to minimise waste material. 1.7. Procedures are identified for maximising energy efficiency while completing the job.
2. Remove surface rust and scale and prepare body surfaces for application of primers	2.1. Surfaces to be painted are cleaned of contaminants. 2.2. Surfaces to be painted are prepared using approved methods, materials and equipment. 2.3. Surface preparation activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies. 2.4. Work is completed without causing damage to any component or system. 2.5. Waste materials are disposed of in accordance with statutory and enterprise requirements.
3. Apply primers and/or sealers	3.1. Components and ancillary fittings that can be affected by application processes are protected and/or removed and stored safely. 3.2. Primers/primer surfaces are applied using approved methods, materials and equipment. 3.3. Application activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies. 3.4. Work is completed without causing damage to any component or system.
4. Prepare primed/sealed surface for refinishing	4.1. Surfaces to be refinished are prepared using approved methods, materials and equipment. 4.2. Preparation activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies. 4.3. Work is completed without causing damage to any component or system.

ELEMENT	PERFORMANCE CRITERIA
	4.4. Waste materials are disposed of in accordance with statutory and enterprise requirements.
5. Clean up work area and maintain equipment	5.1. Material that can be reused is collected and stored. 5.2. Waste and scrap is removed following workplace procedures. 5.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures. 5.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures. 5.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures. 5.6. Tooling is maintained in accordance with workplace procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for preparing substrate for refinishing
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use workplace technology related to preparation of substrate for refinishing, including the use of specialist tooling, measuring equipment and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental protection requirements/substance disposal and storage
- material safety data sheets
- technical information/manufacture/component supplier specifications
- surface preparation procedures for primers/sealers (including minor dent/surface blemish repair)
- the types and uses of cleaning agents
- types of primers and sealers
- application methods of primers/fillers/sealers, including roller application
- operating procedure of equipment for surface preparation
- wet/dry rubbing procedures
- feather edging procedures
- primer/sealed surface preparation for refinishing
- work organisation and planning processes

**REQUIRED SKILLS AND KNOWLEDGE**

- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- preparing primed/sealed surface for refinishing to workplace and manufacturer/component supplier requirements.

#### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to preparation of substrate for refinishing
- equipment, hand and power tooling appropriate to preparation of substrate for refinishing
- activities covering mandatory task requirements
- specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<ul style="list-style-type: none"><li>1.1. Work instructions are used to determine the job requirements, including method and material type.</li><li>1.2. Job specifications are read and interpreted.</li><li>1.3. WHS requirements, including personal protection needs, are observed throughout the work.</li><li>1.4. Materials are selected and inspected for quality.</li><li>1.5. Hand, power tooling and safety equipment are identified and checked for operation.</li><li>1.6. Procedures are determined to minimise waste material.</li><li>1.7. Procedures are identified for maximising energy efficiency while completing the job.</li></ul>
2. Mix multi-layer/clear over base paint colours	<ul style="list-style-type: none"><li>2.1. Mixing is performed using the appropriate method and/or system.</li><li>2.2. Mixing activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</li><li>2.3. Multi-layer/clear over base paint colours are mixed without causing damage to any component or system.</li></ul>
3. Prepare colour test card and perform visual matching test	<ul style="list-style-type: none"><li>3.1. Test card is prepared in the prescribed manner, to enable a visual comparison between matched and original paints.</li><li>3.2. Visual matching tests are performed and findings noted.</li><li>3.3. Following matched and original paint comparison, paint is remixed for further matching prior to application.</li><li>3.4. Activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</li></ul>
4. Clean up work area and maintain equipment	<ul style="list-style-type: none"><li>4.1. Material that can be reused is collected and stored.</li><li>4.2. Waste and scrap is removed following workplace procedure.</li><li>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</li><li>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</li><li>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</li><li>4.6. Tooling is maintained in accordance with workplace procedures.</li></ul>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for multi layer/clear over base paint matching techniques
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to calculate time, apply accurate measurements, calculate material requirements and establish quality checks
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use workplace technology related to colour matching of multi-layer/clear over base colours, including the use of specialist tooling, measuring equipment, computerised technology and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental protection requirements
- material safety data sheets
- paint mixing techniques/mixing machines and systems operation
- colour matching techniques relevant to multi layer/clear over base paint materials
- colour test cards and visual matching techniques
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Matching methods**

Matching methods include application of spray gun techniques, various spraying techniques, drying procedures, paint mixing methods, paint straining methods, paint thinning methods.

**WHS**

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This

<b>RANGE STATEMENT</b>	
	may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include tinting machines, microfiche, scales, air operated agitators, hand paddles, mixing banks, spray gun stem strainers, funnel strainers, mesh strainers, nylon stocking weave, vacuum paint strainers, viscosity measuring equipment, high-volume low-pressure spray guns, gravity feed spray guns,

<b>RANGE STATEMENT</b>	
	suction feed spray guns, pressure regulators, air compressors, personal protective equipment, spray booths, baking ovens, heating and lighting systems, polishing and cleaning equipment, safety equipment and metal/cardboard test cards.
<b>Materials</b>	Materials may include acrylic lacquers, air dry synthetic enamels, two-pack urethane acrylic enamels, metallic two pack enamels, clear acrylic lacquers, metallic acrylic lacquers, pearl finishes, water-based finishes, paint thinners, paint reducers and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"><li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li><li>• safe work procedures related to colour matching of multi layer/clear over base colours</li><li>• regulatory/legislative requirements pertaining to automotive painting and finishing</li><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>

## AURVTP3015 Apply solid colour matching techniques

### Modification History

Release	Comment
Release 1	<p>Replaces AURV329803CA Apply solid colour matching techniques</p> <p>Unit code updated to meet policy requirements</p> <p>Reference to OHS legislation replaced with new WHS legislation</p> <p>Licensing statement added to unit descriptor</p>

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit covers the competence required to match solid colours.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>The unit includes identification and confirmation of work requirement, preparation for work, mixing of colours, preparation of colour test cards, performance of visual testing and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	1.1. Work instructions are used to determine the job requirements, including method and material type. 1.2. Job specifications are read and interpreted. 1.3. WHS requirements, including personal protection needs, are observed throughout the work. 1.4. Materials are selected and inspected for quality. 1.5. Hand and power tooling and safety equipment are identified and checked for operation. 1.6. Procedures are determined to minimise waste material. 1.7. Procedures are identified for maximising energy efficiency while completing the job.
2. Mix solid paint colours	2.1. Mixing is performed using appropriate method and/or system. 2.2. Mixing activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies. 2.3. Solid paint colours are mixed without causing damage to any component or system.
3. Prepare colour test card and perform visual matching test	3.1. Test card prepared in the prescribed manner, to enable a visual comparison between matched and original paints. 3.2. Visual matching tests are performed and findings noted. 3.3. Following matched and original paint comparison, paint is remixed for further matching, prior to application. 3.4. Activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.
4. Clean up work area and maintain equipment	4.1. Material that can be reused is collected and stored. 4.2. Waste and scrap is removed following workplace procedure. 4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures. 4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures. 4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications

ELEMENT	PERFORMANCE CRITERIA
	and worksite procedures. 4.6.Tooling is maintained in accordance with workplace procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for solid colour matching techniques
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to calculate time, apply accurate measurements, calculate material requirements and establish quality checks
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use workplace technology related to matching of solid colours, including the use of specialist tooling, measuring equipment, computerised technology and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental protection requirements
- material safety data sheets
- paint mixing techniques/mixing machines and systems operation
- colour matching techniques relevant to solid paint materials
- colour test cards and visual matching techniques
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying paint mixing procedures
- applying colour matching techniques for solid paint materials
- preparing colour test cards
- applying colour matching techniques for a range of solid paint materials.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to matching of solid colours
- equipment, hand and power tooling appropriate to matching of solid colours
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.

**EVIDENCE GUIDE**

	<ul style="list-style-type: none"> <li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Methods**

Methods are to include spray gun techniques, various spraying techniques, drying procedures, paint mixing methods, paint straining methods, paint thinning methods and colour test card preparation.

<b>RANGE STATEMENT</b>	
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include tinting machines, microfiche, scales, air operated agitators, hand paddles, mixing banks, spray gun

<b>RANGE STATEMENT</b>	
	stem strainers, funnel strainers, mesh strainers, nylon stocking weave, vacuum paint strainers, viscosity measuring equipment, high-volume low-pressure spray guns, gravity feed spray guns, suction feed spray guns, pressure regulators, air compressors, personal protective equipment, spray booths, baking ovens, heating and lighting systems, polishing and cleaning equipment, safety equipment and metal/cardboard test cards.
<b>Materials</b>	Materials may include acrylic lacquers, air dry synthetic enamels, two-pack urethane acrylic enamels, metallic two-pack enamels, clear acrylic lacquers, metallic acrylic lacquers, pearl finishes, water-based finishes, paint thinners, paint reducers and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>• safe work procedures related to matching of solid colours</li> <li>• regulatory/legislative requirements pertaining to automotive painting and finishing</li> <li>• engineer's design specifications and instructions</li> <li>• organisation work specifications and requirements</li> <li>• instructions issued by authorised enterprise or external persons</li> <li>• Australian Standards.</li> </ul>

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

Employability skills	This unit contains employability skills.
----------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements including method and material type.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including personal protection needs, are observed throughout the work.</p> <p>1.4. Materials are selected and inspected for quality.</p> <p>1.5. Hand, power tooling and safety equipment are identified and checked for correct operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Determine paint fault cause and rectification requirements for solid (two component system) paint materials	<p>2.1. Cause of paint fault is determined from available information to provide background for report/repair.</p> <p>2.2. Visual inspection of vehicle is undertaken to determine the extent of damage and areas requiring repair/rework.</p> <p>2.3. Damage to paintwork is assessed from visual comparison with undamaged paintwork.</p> <p>2.4. Determinations are carried out according to industry regulations/guidelines, WHS legislation, statutory legislation and enterprise procedures/policies.</p> <p>2.5. Paint faults cause and rectification requirements are determined without causing undue damage to any component or system.</p>
3. Rectify and touch up paint faults of solid (two component system) paint materials	<p>3.1. Materials required to restore paintwork to "as new" condition are determined from industry and manufacturer/ component supplier.</p> <p>3.2. Damaged paintwork is rectified to blend with existing paintwork on vehicle.</p> <p>3.3. Rectification operations are carried out according to industry regulations/guidelines, WHS legislation, statutory legislation and enterprise procedures/policies.</p> <p>3.4. Paint faults are rectified without causing damage to any component or system.</p>
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste and scrap is removed following workplace procedure.</p> <p>4.3. Equipment and work area are cleaned and inspected</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and site procedures.</p> <p>4.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for solid (two component system) paint rectification and touch up work
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with site supervisor, other workers and customers, and the documenting of work outcomes and problems
- plan and organise activities including preparation and layout of worksite and the obtaining of equipment and materials to avoid any backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to calculate time, apply measurements, calculate material requirements and establish quality checks
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use workplace technology related to the rectification and touch up of solid (two component system) including, the use of specialist tooling and equipment, measuring equipment, and communication devices, and the reporting/documenting of results

#### Required knowledge

A working knowledge of:

- relevant WHS regulations/requirements, equipment, material and personal safety requirements
- relevant environmental protection requirements/substance disposal and storage
- material safety data sheets
- paint surface fault identification and rectification procedures for solid (two component system) paint materials
- touch up techniques
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>Guidance information for assessment</b>	

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Methods

Methods include:

- spray gun selection, various spraying techniques, drying procedures and paint mixing
- safe work procedures.

#### Specific requirements

Specific requirements may include personal safety protection and equipment.

<b>RANGE STATEMENT</b>	
<b>Variables</b>	Other variables may include compound polishing and detailing of repaired surfaces.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting and working in proximity to others and site visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to, emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and site evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include, but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include but not be limited to regulations including, Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.

<b>RANGE STATEMENT</b>	
<b>Tooling and equipment</b>	Tooling and equipment may include various spray guns, air pressure regulators, air compressors, spray booths, baking ovens, heating and lighting systems, strainers, measuring sticks, ford cup and safety equipment.
<b>Materials</b>	Materials may include solid acrylic enamel paint, hardeners and reduces, polishing buffs and pads, rags, tac rags cleaning solvents, compounds and glazes, and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions, fault reporting and may include site specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets and diagrams or sketches</li> <li>• safe work procedures related to the rectification and touch up of solid (two component system) paintwork</li> <li>• regulatory/legislative requirements pertaining to automotive painting and finishing</li> <li>• engineer's design specifications and instructions</li> <li>• organisation work specifications and requirements</li> <li>• instructions issued by authorised enterprise or external personnel</li> <li>• Australian Standards.</li> </ul>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for clear over base (two component system) paint rectification and touch up work
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with site supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities including, preparation and layout of worksite and the obtaining of equipment and materials to avoid any backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to calculate time, apply measurements, calculate material requirements and establish quality checks
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology related to the rectification and touch up of clear over base (two component system) paintwork including the use of specialist tooling and equipment, measuring equipment, computerised technology, and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental protection requirements/substance disposal and storage
- material safety data sheets
- paint surface fault identification and rectification procedures for clear over base (two component system) paint materials
- touch up techniques
- work organisation and planning processes
- enterprise quality processes

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Methods</b>	<p>Methods include:</p> <ul style="list-style-type: none"> <li>• spray gun selection, various spraying techniques, drying procedures and paint mixing</li> <li>• safe work procedures.</li> </ul>
<b>Specific requirements</b>	<p>Specific requirements may include personal safety protection and equipment.</p>

<b>RANGE STATEMENT</b>	
<b>Variables</b>	Other variables may include compound polishing and detailing of repaired surfaces.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting and working in proximity to others and site visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and site evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include, but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/ Territory and local authorities administering acts, regulations and codes of practice.

<b>RANGE STATEMENT</b>	
<b>Tooling and equipment</b>	Tooling and equipment may include various spray guns, air pressure regulators, air compressors, spray booths, baking ovens, heating and lighting systems, strainers, measuring sticks and ford cup.
<b>Materials</b>	Materials may include polishing buffs and pads, tac rags, acrylic enamel base coats, acrylic enamel clear, hardeners and reducers, cleaning solvents, compounds and hardeners and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include site specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>• safe work procedures related to the rectification and touch up of clear over base (two component system) paint work</li> <li>• regulatory/legislative requirements pertaining to automotive painting and finishing</li> <li>• engineer's design specifications and instructions</li> <li>• organisation work specifications and requirements</li> <li>• instructions issued by authorised enterprise or external personnel</li> <li>• Australian Standards.</li> </ul>

## AURVTP3018 Carry out paint rectification for multi-layer and pearl using two component system

### Modification History

Release	Comment
Release 1	<p>Replaces AURV329903CA Carry out paint rectification and touch up work for multi layer/pearl (two component system)</p> <p>Unit code updated to meet policy requirements</p> <p>Minor changes to unit title</p> <p>Reference to OHS legislation replaced with new WHS legislation</p> <p>Licensing statement added to unit descriptor</p>

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit covers the competence required to rectify and touch up multi layer/pearl (two component system) paint material faults.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>The unit includes the identification and confirmation of work requirement, preparation for work, identification of rectification/touch up requirements, rectification and touch up of faults and completion of work finalisation processes including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem solving skills in managing own work activities and contributing to a productive team environment.</p>

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements including method and material type.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including personal protection needs, are observed throughout the work.</p> <p>1.4. Materials are selected and inspected for quality.</p> <p>1.5. Hand and power tooling, and safety equipment are identified and checked for correct operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Determine paint fault cause and rectification requirements for multi-layer/pearl (two component system) paint materials	<p>2.1. Cause of paint fault is determined from available information to provide background for report/repair.</p> <p>2.2. Visual inspection of vehicle is undertaken to determine the extent of damage and areas requiring repair/rework.</p> <p>2.3. Damage to paintwork is assessed from visual comparison with undamaged paintwork.</p> <p>2.4. Determinations are carried out according to industry regulations/guidelines, WHS legislation, statutory legislation and enterprise procedures/policies.</p> <p>2.5. Paint faults cause and rectification requirements are determined without causing undue damage to any component or system.</p>
3. Rectify and touch up paint faults of multi-layer/pearl (two component system) paint materials	<p>3.1. Materials required to restore paintwork to "as new" condition are determined from industry and manufacturer/ component supplier.</p> <p>3.2. Damaged paintwork is rectified to blend with existing paintwork on vehicle.</p> <p>3.3. Rectification operations are carried out according to industry regulations/guidelines, WHS legislation, statutory legislation and enterprise procedures/policies.</p> <p>3.4. Paint faults are rectified without causing damage to any component or system.</p>
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste and scrap is removed following workplace procedure.</p> <p>4.3. Equipment and work area are cleaned and inspected</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and site procedures.</p> <p>4.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for multi layer pearl (two component system) paint rectification and touch up work
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with site supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities including preparation and layout of worksite and the obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to calculate time, apply measurements, calculate material requirements and establish quality checks
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology related to the rectification and touch up of multi-layer/pearl (two component system) paintwork including the use of specialist tooling and equipment, measuring equipment, and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental protection requirements/substance disposal and storage
- material safety data sheets
- paint surface fault identification and rectification procedures for multi-layer/pearl (two component system) paint materials
- touch up techniques
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:</p> <ul style="list-style-type: none"> <li>• observing safety procedures and requirements</li> <li>• communicating effectively with others in associated areas</li> <li>• selecting methods and techniques appropriate to the circumstances</li> <li>• completing preparatory activity in a systematic manner</li> <li>• applying environmental procedures</li> <li>• preparing paint</li> <li>• determining and rectifying paint fault for multi-layer/pearl (two component system) paint materials.</li> </ul>
<b>Context of, and specific resources for assessment</b>	<p>Application of competence is to be assessed in the workplace or simulated worksite.</p> <p>Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.</p> <p>Assessment is to comply with regulatory requirements including Australian Standards.</p> <p>The following resources should be made available:</p> <ul style="list-style-type: none"> <li>• workplace location or simulated workplace</li> <li>• materials relevant to the rectification and touch up of multi-layer/pearl (two component system) paintwork</li> <li>• equipment and hand and power tooling appropriate to the rectification and touch up of multi-layer/pearl (two component system) paintwork</li> <li>• activities covering mandatory task requirements</li> <li>• specifications and work instructions.</li> </ul>
<b>Method of assessment</b>	<ul style="list-style-type: none"> <li>• Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&amp;R Training Package.</li> <li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Methods</b>	<p>Methods include:</p> <ul style="list-style-type: none"> <li>• spray gun selection, various spraying techniques, drying procedures and paint mixing</li> <li>• safe work procedures.</li> </ul>
<b>Specific requirements</b>	<p>Specific requirements may include personal safety protection and equipment.</p>

<b>RANGE STATEMENT</b>	
<b>Variables</b>	Other variables may include compound polishing and detailing of repaired surfaces.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, and working in proximity to others and site visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and site evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include, but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/ Territory and local authorities administering acts, regulations and codes of practice.

<b>RANGE STATEMENT</b>	
<b>Tooling and equipment</b>	Tooling and equipment may include various spray guns, air pressure regulators, air compressors, spray booths, baking ovens, heating and lighting systems, strainers, measuring sticks and ford cup.
<b>Materials</b>	Materials may include acrylic enamel, multi layer/pearls, two pack base coats, acrylic enamel clear, hardeners and reducers, tac rags, polishing buffs and pads, cleaning solvents, compounds and glazes and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include site specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>• safe work procedures related to the rectification and touch up of multi layer/pearl (two component system) paintwork</li> <li>• regulatory/legislative requirements pertaining to automotive painting and finishing</li> <li>• engineer's design specifications and instructions</li> <li>• organisation work specifications and requirements</li> <li>• instructions issued by authorised enterprise or external personnel</li> <li>• Australian Standards.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	1.1. Work instructions are used to determine the job requirements, including method and material type. 1.2. Job specifications are read and interpreted. 1.3. WHS requirements, including personal protection needs, are observed throughout the work. 1.4. Materials are selected and inspected for quality. 1.5. Hand, power tooling and safety equipment are identified and checked for operation. 1.6. Procedures are determined to minimise waste material. 1.7. Procedures are identified for maximising energy efficiency while completing the job.
2. Prepare plastic surfaces for refinishing	2.1. Environment for preparation of plastic surfaces conforms to requirements for temperature, extraction of fumes and cleanliness. 2.2. Preparation activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies. 2.3. Preparation is completed without causing damage to any component or system. 2.4. Waste materials are disposed of and/or stored in accordance with statutory and enterprise requirements.
3. Apply refinishing materials to plastic surfaces	3.1. Environment for application of refinishing materials conforms to requirements for temperature, extraction of fumes and cleanliness. 3.2. Surfaces are prepared and refinishing materials are applied at manufacturer/component supplier recommended intervals using approved methods. 3.3. Refinishing materials are dried using approved methods and equipment. 3.4. Finish produced meets application specifications for colour, texture, depth and gloss and is contaminant-free blending into surrounding surfaces. 3.5. Refinishing material application is completed without causing damage to any component or system. 3.6. Application activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies. 3.7. Waste materials are disposed of and/or stored in

ELEMENT	PERFORMANCE CRITERIA
	accordance with statutory and enterprise requirements.
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste and scrap is removed following workplace procedure.</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for preparation and painting of plastic components
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to calculate time, apply accurate measurements, calculate material requirements and establish quality checks
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use workplace technology related to preparation and painting of plastic components, including the use of specialist tooling and equipment, measuring equipment and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental protection requirements/storage and disposal requirements
- material safety data sheets
- surface preparation methods
- types of paints
- application methods, including spray and roller methods
- types of spray guns and maintenance requirements
- spray gun/roller techniques
- paint drying methods and procedures
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying environmental procedures for preparing paint
- preparing and painting plastic components.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to preparation and painting of plastic components
- equipment, hand and power tooling appropriate to preparation and painting of plastic components
- activities covering mandatory task requirements
- specifications and work instructions including Australian Standards.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.

**EVIDENCE GUIDE**

	<ul style="list-style-type: none"> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Preparation**

Preparation includes application of anti-static cleaning agents.

**Application methods**

Application methods include spray gun techniques, various spraying techniques, drying procedures, paint mixing and polishing and detailing of brushed surfaces.

**WHS**

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace

<b>RANGE STATEMENT</b>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for denibbing, buffing and polishing vehicle paint work
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to calculate time, apply accurate measurements, calculate material requirements and establish quality checks
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use workplace technology related to denibbing, buffing and polishing of refinishing materials, including the use of specialist tooling and materials, measuring equipment and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- processes to treat work
- identification of surface materials and finish requirements
- application of denibbing buffing and polishing equipment
- operating procedures for denibbing, buffing and polishing equipment
- denibbing, buffing and polishing procedures and techniques
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- denibbing painted surfaces without causing damage to equipment or injury to persons
- buffing painted surfaces without causing damage to equipment or injury to persons
- polishing painted surfaces without causing damage to equipment or injury to persons
- achieving painted surface finish outcome.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to denibbing, buffing and polishing of refinishing materials
- equipment, hand and power tooling appropriate to denibbing, buffing and polishing of refinishing materials
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.

**EVIDENCE GUIDE**

	<ul style="list-style-type: none"> <li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Methods</b>	Methods are to include underhand and overhand techniques hand and machine grinding, denibbing, buffing and polishing.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This

<b>RANGE STATEMENT</b>	
	may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include power tooling, including flexible drive appliances
<b>Materials</b>	Materials may include polishes, felt wheels, fabric mops and cleaning materials.

RANGE STATEMENT	
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	Sources of information/documents may include: <ul style="list-style-type: none"><li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li><li>• safe work procedures related to denibbing, buffing and polishing of refinishing materials</li><li>• regulatory/legislative requirements pertaining to automotive painting and finishing</li><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the work requirements, including method, materials and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including personal protection needs are observed throughout the work.</p> <p>1.4. Material for work is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the work.</p>
2. Inspect and identify paint faults and determine restoration procedure	<p>2.1. Inspection, identification and determination of procedures are completed without causing further damage to paint or components.</p> <p>2.2. Inspection and identification procedures are carried out according to workplace methods and procedures.</p> <p>2.3. Restoration process is determined according to type of damage, paint type and finish, workplace and industry/ product manufacturer/component supplier prescribed methods and procedures.</p>
3. Restore vehicle body exterior finishing material	<p>3.1. Equipment is selected and used according to workplace methods and customer requirements.</p> <p>3.2. Restoration materials are selected according to type of damage and type of finishing material, workplace methods and paint manufacturer/component supplier recommendations.</p> <p>3.3. Vehicle body exterior finish is restored according to industry standards/regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p> <p>3.4. Restoration is completed without causing damage to any component or system.</p> <p>3.5. Materials are used and stored according to manufacturer/ component supplier recommendations and regulatory requirement.</p>
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste material is removed following workplace and environmental procedure.</p> <p>4.3. Equipment and work area are cleaned and inspected</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for vehicle paint restoration
- identifying safety precautions
- identifying recommended applications and procedures
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- reading and interpreting product labels/directions
- listening and following verbal instructions
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to complete measurements and estimate material requirements required for measuring and mixing restoration materials
- use workplace technology related to restoration of vehicle external paintwork, including the use of painting equipment, measuring equipment and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- restoration agents and their recommended applications
- types of body paint surfaces and finishing materials
- types of vehicle body exterior finishing material faults, including colour change, surface variations, rework, pitting
- finishing material restoration procedures
- environmental requirements for storage, handling and disposal of substances
- material safety data sheets
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- selecting and using materials and equipment
- restoring of vehicle body exterior finish to specification
- completing workplace records.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to restoration of vehicle external paintwork
- equipment, hand and power tooling appropriate to restoration of vehicle external paintwork
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with

**EVIDENCE GUIDE**

	<p>questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</p> <ul style="list-style-type: none"> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Methods**

Methods are to include manual or machine assisted restoration methods.

**WHS**

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and

<b>RANGE STATEMENT</b>	
	substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include tooling and equipment to restore vehicle body external finish.
<b>Materials</b>	Materials may include restoration agents, vehicle/paint manufacturer/component supplier specifications and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and

**RANGE STATEMENT**

	paggers.
<b>Information/documents</b>	Sources of information/documents may include: <ul style="list-style-type: none"><li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li><li>• safe work procedures related to restoration of vehicle external paintwork</li><li>• regulatory/legislative requirements pertaining to the use of paints</li><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including job sheets, material type, colour, quality and quantity.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including personal protection needs, breathing apparatus and full body protection, are observed throughout the work.</p> <p>1.4. Materials are selected and inspected for quality.</p> <p>1.5. Hand tooling and safety equipment are identified and checked for operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Prepare substrate for the application of custom finishes.</p> <p>1.8. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Apply mediums to paint surfaces to create a variety of different visual effects	<p>2.1. Substrates, backgrounds, materials and equipment used for creation of a range of visual effects are identified.</p> <p>2.2. Appropriate colour combinations and effects for pictorial reproduction mediums and equipment to produce various painting techniques are selected.</p> <p>2.3. Accurate visual texture, light and shade on given subject matter is achieved.</p> <p>2.4. Appropriate colours to replicate the given subject, achieving correct tones and tonal order are selected and applied.</p> <p>2.5. Lines, shapes, patterns and illustrations are produced using freehand techniques with the assistance of shields, templates or stencils.</p> <p>2.6. Appropriate backgrounds, colour combinations and the effectiveness of colours are identified and produced.</p> <p>2.7. Application of special effects to given illustrations/graphics are performed, including:</p> <p>2.7.1. highlighting, reflection, and transparency techniques</p> <p>2.7.2. texture simulations</p> <p>2.7.3. metal, stone, and liquid simulations</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.7.4. 3D effects, to create visual realism</p> <p>2.7.5. tribal/Indigenous art styles</p> <p>2.7.6. correct application of colour layering processes.</p> <p>2.8. Application of paint mediums to surfaces is carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
3. Prepare a substrate ready to accept a clear top coat	<p>3.1. Correct abrasives to carry out substrate preparation for clear top coat finishes are identified and selected.</p> <p>3.2. Correct cleaning and drying procedures in relation to sludge removal is carried out.</p> <p>3.3. Preparation of the surface to accept clear top coats using solvent cleaners and tack rags is carried out.</p> <p>3.4. Surface preparation activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
4. Apply clear top coat refinishing materials by spray gun	<p>4.1. Refinishing materials are applied without causing damage to any component or system.</p> <p>4.2. The finish produced meets specifications for; texture, depth and gloss and is contaminant-free.</p> <p>4.3. Application activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
5. Rectify and touch up paint faults of clear over base multi layer refinishing materials	<p>5.1. Materials to restore paintwork to as new condition are determined from industry and manufacturer/component supplier standards.</p> <p>5.2. Damaged paintwork is rectified to blend with existing paintwork.</p> <p>5.3. Paint film surface faults are removed using compounds, polishes and glazes.</p> <p>5.4. Paint faults are rectified without causing damage to any component or system.</p> <p>5.5. All rectification operations are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
6. Clean up work area and maintain equipment	<p>6.1. Material that can be reused is collected and stored.</p> <p>6.2. Waste material is removed and disposed of or stored according to statutory and workplace procedure.</p> <p>6.3. Spray equipment is cleaned as specified by manufacturer/ component supplier and/or workplace policy and procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>6.4. Work area is cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>6.5. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>6.6. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>6.7. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for vehicle paint restoration
- identifying safety precautions
- identifying recommended applications and procedures
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- reading and interpreting product labels/directions
- listening and following verbal instructions
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to complete measurements and estimate material requirements required for measuring and mixing restoration materials
- use workplace technology related to custom painting, including the use of painting equipment, measuring equipment and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental protection requirements/substance disposal and storage requirements
- material safety data sheets
- types of paints used for custom painting
- types of clear coat refinishing materials
- application methods
- pictorial reproduction
- special effects tools and techniques
- types of spray guns
- spray gun operation (spraying techniques)

**REQUIRED SKILLS AND KNOWLEDGE**

- spray gun cleaning methods
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- preparing a surface ready to accept colour coats
- demonstrating custom painting techniques including pictorial reproduction, highlighting, special effects
- preparing surfaces in readiness for clear top coat paint refinishing materials
- applying clear and coloured top coat refinishing materials
- rectifying paint faults
- applying environmental procedures.

#### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials required for the application of graphic designs
- clear top coat refinishing materials
- equipment, hand and power tooling appropriate to application of refinishing materials

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• activities covering mandatory task requirements</li> <li>• specifications and work instructions.</li> </ul>
<b>Method of assessment</b>	<ul style="list-style-type: none"> <li>• Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&amp;R Training Package.</li> <li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

## Range Statement

<b>RANGE STATEMENT</b>
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>

<b>RANGE STATEMENT</b>	
<b>Fundamental custom graphic techniques</b>	Fundamental custom graphic techniques include pictorial reproduction, highlighting, reflective, and transparency techniques, texture simulation, metal, stone, and liquid simulations, highlighting techniques, leather simulation, chrome simulation, marbling and the use of tinted clears.
<b>Refinishing materials</b>	Refinishing materials may include acrylic enamel, acrylic lacquer, waterborne paints, acrylic enamel hardeners and reducers.
<b>Refinishing methods</b>	Refinishing methods include spray gun selection equipment protection methods, various spraying techniques, drying procedures, paint mixing, compound polishing and detailing of surfaces.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and

<b>RANGE STATEMENT</b>	
	clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include various air brushes, spray guns, air pressure regulators, air compressors, spray booths, baking ovens, heating and lighting systems, strainers, measuring sticks, specialised custom painting tools/equipment and safety equipment.
<b>Materials</b>	Materials may include templates, stencils, masking medium, tac rags, water-based and solvent-based paints, polishing buffs and pads, cleaning solvents, compounds, glazes and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>• safe work procedures related to application of colour and clear coat refinishing materials</li> <li>• regulatory/legislative requirements pertaining to automotive painting and finishing</li> <li>• engineer's design specifications and instructions</li> <li>• organisation work specifications and</li> </ul>

## AURVTP3023 Mix and apply clear over-base refinishing materials in two-component systems

### Modification History

Release	Comment
Release 1	<p>Replaces AURV329603CA Apply clear over base refinishing materials (two component system)</p> <p>Elements and Performance Criteria updated to reflect mixing of paint products</p>

### Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes required to mix and apply clear over-base refinishing materials in two-component systems to a variety of vehicle bodies and substrates by spray-gun application.</p> <p>The unit involves determining causes of paint finish faults and suitable rectification procedures. The unit also involves preparing for work and completing work finalisation processes, including clean-up and workplace documentation.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	---

### Application of the Unit

Application of the unit	<p>Work applies to refinishing technicians in a repair environment and the application of clear over-base materials to a range of vehicles.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
-------------------------	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions and workplace <b>communications</b> are used to determine job requirements, including material type, colour, quality and quantity</p> <p>1.2. <b>Workplace health and safety (WHS) requirements</b>, including <b>personal protective equipment (PPE)</b> needs, breathing apparatus and full body protection, are observed throughout the work</p> <p>1.3. <b>Refinishing materials</b> are selected and inspected for quality</p> <p>1.4. Refinishing <b>tools and equipment</b>, including safety equipment, are identified and checked for correct operation</p> <p>1.5. <b>Refinishing methods</b> are determined to minimise waste material</p> <p>1.6. Painting procedures are identified to maximise energy efficiency while completing the job</p> <p>1.7. Workplace <b>emergency procedures</b> are identified and followed when required</p>
2. Mix clear over-base paint colours	<p>2.1. Mixing is performed according to paint manufacturer recommended specifications</p> <p>2.2. Mixing activities are carried out according to <b>environmental requirements</b>; industry, <b>statutory and regulatory authorities' guidelines</b>; WHS legislation; and workplace <b>safe operating procedures</b> and policies</p> <p>2.3. Clear over-base paints are mixed without causing damage to other components or systems</p>
3. Apply clear over-base refinishing materials by spray-gun	<p>3.1. Refinishing materials are applied using <b>processes</b> and <b>information</b> from the paint supplier and their recommended methods</p> <p>3.2. Refinishing materials are dried using approved methods and equipment</p> <p>3.3. Techniques are used that ensure that finish produced meets specifications for colour, texture, depth and gloss and is contaminant-free, blending into the surrounding surfaces</p> <p>3.4. Surface refinishing is completed within approved time frames</p> <p>3.5. Application activities are carried out according to industry regulations and guidelines, WHS legislation, and workplace policies and procedures</p>
4. Rectify paint faults	<p>4.1. Paint faults are identified according to industry and workplace procedures</p> <p>4.2. Paint fault causes are determined according to industry and</p>

	<p>workplace procedures</p> <p>4.3.Paint surface faults are removed using compounds, polishes and glazes</p> <p>4.4.Rectification procedures are determined according to industry standard and workplace quality requirements</p>
5. Rectify and touch up paint faults of clear over-base refinishing materials	<p>5.1.<b>Materials</b> to restore paintwork to as new condition are determined from industry and paint manufacturer supplier standards</p> <p>5.2.Damaged paintwork is rectified to blend with existing paintwork <b>quality</b> on vehicle</p> <p>5.3.Rectification operations are carried out according to industry regulations and guidelines, WHS legislation, and workplace policies and procedures; and without causing damage to components or systems</p>
6. Clean up work area and maintain equipment	<p>6.1.Material that can be reused is collected and stored according to workplace sustainability practices</p> <p>6.2.Waste materials are removed and disposed of or stored according to statutory and workplace procedures</p> <p>6.3.Spray equipment is cleaned according to manufacturer and component supplier and workplace policies and procedures</p> <p>6.4.Work area is cleaned and inspected for serviceable condition according to workplace procedures</p> <p>6.5.Faulty equipment is identified and tagged according to workplace procedures</p> <p>6.6.Operator maintenance is completed according to manufacturer and component supplier specifications and workplace procedures</p> <p>6.7.Tools are maintained according to workplace procedures</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to follow workplace verbal instructions
- initiative and enterprise skills to recognise a workplace problem or potential problem and take action
- learning skills to identify sources of information, assistance and expert knowledge to expand skills, knowledge and understanding
- literacy skills to:
  - read and follow information in written job instructions, specifications, standard operating procedures, charts, lists, drawings and other reference documents
  - obtain and record measurements
  - document required paint and consumable parts
- numeracy skills to calculate paint quantity, mixing ratios and drying times
- planning and organising skills to:
  - plan, use and follow job specifications when mixing and applying clear over-base refinishing materials to components
  - plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed on time
  - identify risk factors and take action to minimise them
- problem-solving skills to:
  - refer problems outside area of responsibility to appropriate person
  - seek information and assistance as required to solve problems
- self-management skills to:
  - select and use appropriate clear over-base refinishing materials and equipment, processes and procedures
  - recognise own limitations and seek advice
  - follow workplace policies and documentation, such as codes of practice or original equipment manufacturer (OEM) repair procedures
- teamwork skills to apply knowledge of own role to complete activities efficiently to support team activities and tasks
- technical skills to use paint workplace tools and equipment relating to refinishing vehicles or components
- technology skills to:
  - operate vehicle painting and refinishing equipment
  - use technology to collect paint product information

#### Required knowledge

- WHS regulations, requirements, equipment and material relating to mixing and applying

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

- clear over-base refinishing materials, including personal safety requirements
- environmental protection requirements, and substance disposal and storage requirements
- material safety data sheets (MSDS)
- types of clear over-base refinishing materials in two-component systems
- mixing methods
- application methods
- paint surface fault identification and rectification procedures
- drying methods for clear over-base refinishing material in two-component systems
- types of spray-guns
- spray-gun operation procedures and spraying techniques
- spray-gun cleaning methods
- work organisation and planning processes
- workplace quality processes

## Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria and required skills and knowledge.</p> <p>A person who demonstrates competency in this unit must be able to:</p> <ul style="list-style-type: none"> <li>• observe safety procedures and requirements</li> <li>• select methods and techniques appropriate to the circumstances</li> <li>• complete preparatory activity in a systematic manner</li> <li>• prepare clear over-base paint in two-component systems</li> <li>• apply clear over-base refinishing materials in two-component systems</li> <li>• identify paint faults and determine rectification procedures</li> <li>• rectify paint faults</li> <li>• apply environmental procedures.</li> </ul>
<b>Context of, and specific resources for assessment</b>	<p>Competency is to be assessed in the workplace or a simulated workplace environment that accurately reflects performance in a real workplace setting.</p> <p>Assessment is to occur:</p> <ul style="list-style-type: none"> <li>• using standard workplace practices and procedures</li> <li>• following safety requirements</li> <li>• applying environmental constraints.</li> </ul> <p>Assessment is to comply with relevant:</p> <ul style="list-style-type: none"> <li>• regulatory requirements</li> <li>• Australian standards</li> <li>• industry codes of practice.</li> </ul> <p>The following resources must be made available for the assessment of this unit:</p> <ul style="list-style-type: none"> <li>• workplace location or simulated workplace</li> <li>• materials relevant to application of clear over-base refinishing materials</li> <li>• equipment, hand and power tools appropriate to application of</li> </ul>

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

- clear over-base refinishing materials
- specifications and work instructions.

### Method of assessment

Assessment must satisfy the endorsed Assessment Guidelines of this Training Package.

Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with the application of required skills and knowledge.

Assessment methods must be by direct observation of tasks and include questioning on required skills and knowledge to ensure correct interpretation and application.

Competence in this unit may be assessed in conjunction with other units which together form part of a holistic work role.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate the needs of diverse clients.

Assessment processes and techniques must be culturally sensitive and appropriate to the language, literacy and numeracy capacity of the candidate and the work being performed.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Communications</i></b> may include:	<ul style="list-style-type: none"> <li>• verbal instructions</li> <li>• visual instructions</li> <li>• worksite-specific instructions</li> <li>• written instructions</li> <li>• job and task sheets</li> <li>• telephones.</li> </ul>
<b><i>WHS</i></b> requirements:	<ul style="list-style-type: none"> <li>• are those prescribed under legislation, regulations, codes of practice and policies and procedures</li> <li>• may include: <ul style="list-style-type: none"> <li>• personal protective clothing and equipment</li> <li>• use of tools and equipment</li> <li>• safe handling of material</li> <li>• use of fire-fighting equipment</li> <li>• workplace first aid equipment</li> <li>• hazard control, including control of hazardous materials and toxic substances.</li> </ul> </li> </ul>
<b><i>Personal protective equipment:</i></b>	<ul style="list-style-type: none"> <li>• is that prescribed under legislation, regulations, codes of practice, and workplace policies and practices</li> <li>• may include: <ul style="list-style-type: none"> <li>• eye protection</li> <li>• personal protective clothing</li> <li>• gloves</li> <li>• respirators</li> <li>• safety shoes</li> <li>• air feed mask.</li> </ul> </li> </ul>
<b><i>Refinishing materials</i></b> may include:	<ul style="list-style-type: none"> <li>• solid, metallic, pearl two-pack base coat</li> <li>• clear two-pack acyclic enamel</li> <li>• hardener</li> <li>• paint reducer.</li> </ul>
<b><i>Tools and equipment</i></b> may include:	<ul style="list-style-type: none"> <li>• air pressure regulators</li> <li>• air compressors</li> <li>• spray booths</li> <li>• baking ovens</li> </ul>

## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

	<ul style="list-style-type: none"> <li>• heating and lighting systems</li> <li>• strainers</li> <li>• measuring sticks</li> <li>• ford cups</li> <li>• safety equipment</li> <li>• tinting machines</li> <li>• hand paddles</li> <li>• nylon stocking weave</li> <li>• viscosity measuring equipment</li> <li>• high-volume low-pressure spray-guns</li> <li>• gravity feed spray-guns</li> <li>• suction feed spray-guns</li> <li>• personal protective equipment</li> <li>• polishing and cleaning equipment.</li> </ul>
<b><i>Refinishing methods</i></b> may include:	<ul style="list-style-type: none"> <li>• spray-gun selection</li> <li>• equipment protection methods</li> <li>• various spraying techniques</li> <li>• drying procedures</li> <li>• paint mixing</li> <li>• compound polishing</li> <li>• detailing of surfaces.</li> </ul>
<b><i>Emergency procedures</i></b> may include:	<ul style="list-style-type: none"> <li>• emergency shutdown</li> <li>• extinguishing fires</li> <li>• workplace first aid requirements</li> <li>• workplace evacuation.</li> </ul>
<b><i>Environmental requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• waste management</li> <li>• noise control</li> <li>• dust control</li> <li>• clean-up management.</li> </ul>
<b><i>Statutory and regulatory authority guidelines</i></b> may include:	<ul style="list-style-type: none"> <li>• statutory and regulatory regulations</li> <li>• industry codes of practice.</li> </ul>
<b><i>Safe operating procedures</i></b> may include:	<ul style="list-style-type: none"> <li>• workplace safety policies and procedures</li> <li>• operational risk assessment</li> </ul>

## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

	<ul style="list-style-type: none"> <li>• toxic substances</li> <li>• electrical safety</li> <li>• machinery movement and operation</li> <li>• manual and mechanical lifting and shifting</li> <li>• working in proximity to others</li> <li>• workplace visitors.</li> </ul>
<b><i>Application processes</i></b> must:	<ul style="list-style-type: none"> <li>• conform to: <ul style="list-style-type: none"> <li>• temperature</li> <li>• extraction of fumes</li> <li>• cleanliness requirements</li> </ul> </li> <li>• not cause damage to other components or systems.</li> </ul>
<b><i>Information</i></b> may include:	<ul style="list-style-type: none"> <li>• verbal and written information</li> <li>• graphical instructions</li> <li>• signage</li> <li>• work schedules, plans and specifications</li> <li>• work bulletins and memos</li> <li>• MSDS</li> <li>• diagrams and sketches</li> <li>• safe work procedures relating to colour matching of multi-layer and clear over-base colours</li> <li>• regulatory and legislative requirements</li> <li>• automotive painting and finishing code of practice</li> <li>• engineer's design specifications</li> <li>• workplace work specifications</li> <li>• instructions issued by authorised workplace or external persons</li> <li>• Australian standards.</li> </ul>
<b><i>Materials</i></b> may include:	<ul style="list-style-type: none"> <li>• polishing buffs and pads</li> <li>• tac-rags</li> <li>• cleaning solvents</li> <li>• polishes and glazes</li> <li>• compounds and cleaning materials</li> <li>• two-pack urethane acrylic enamels</li> <li>• clear acrylic lacquers</li> <li>• paint thinners</li> <li>• paint reducers</li> </ul>

## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

	<ul style="list-style-type: none"> <li>• cleaning materials.</li> </ul>
<i>Quality</i> may include:	<ul style="list-style-type: none"> <li>• industry standards</li> <li>• workplace standards</li> <li>• Australian standards</li> <li>• quality policy</li> <li>• workplace operations and procedures.</li> </ul>

## AURVTP3024 Mix and apply clear over-base multi-layer pearl refinishing materials

### Modification History

Release	Comment
Release 1	Replaces AURV329603EA Apply clear over base multi layer/pearl refinishing materials  Elements and Performance Criteria updated to reflect mixing of paint products

### Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes required to mix and apply clear over-base multi-layer pearl refinishing materials to a variety of vehicle substrates by spray-gun application. It also involves determining the causes of paint finish faults and rectifying them.</p> <p>The unit involves preparing for work and completing work finalisation processes, including clean-up and documentation.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	---

### Application of the Unit

Application of the unit	<p>Work applies to refinishing technicians in a repair environment who apply clear over-base pearl materials to a range of vehicles.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
-------------------------	--

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions and workplace <b>communications</b> are used to determine job requirements, including material type, colour, quality and quantity</p> <p>1.2. <b>Workplace health and safety (WHS) requirements</b>, including <b>personal protective equipment (PPE)</b> needs, are identified, checked and observed</p> <p>1.3. <b>Refinishing materials</b> are selected and inspected for quality</p> <p>1.4. Refinishing <b>tools and equipment</b> are identified and checked for operation</p> <p>1.5. <b>Refinishing methods</b> are determined to minimise waste and maximise energy efficiency while completing the job</p> <p>1.6. Workplace <b>emergency procedures</b> are identified and followed when required</p>
2. Mix clear over-base multi-layer pearl refinishing materials	<p>2.1. Materials are mixed using the appropriate method</p> <p>2.2. Mixing activities are carried out according to <b>environmental requirements</b>; industry, <b>statutory and regulatory authority guidelines</b>; WHS legislation; and workplace <b>safe operating policies and procedures</b></p> <p>2.3. Clear over-base multi-layer pearl paint colours are mixed without causing damage to components or systems</p>
3. Apply clear over-base multi-layer pearl refinishing materials by spray-gun	<p>3.1. <b>Requirements for environment</b> for applying refinishing materials are identified and observed</p> <p>3.2. Refinishing materials are applied using <b>recommended methods</b> and intervals, in line with <b>information and documents</b> from paint manufacturer and component supplier, and without causing damage to components or systems</p> <p>3.3. Refinishing materials are dried using approved methods and equipment</p> <p>3.4. Paint surface faults are removed using compounds, polishes and glazes</p> <p>3.5. Finish is completed that meets <b>specifications</b></p> <p>3.6. Surface refinishing is completed within approved time frames</p>
4. Identify and rectify paint faults	<p>4.1. Paint faults are identified according to industry and workplace procedures</p> <p>4.2. Paint fault causes are determined according to industry and workplace procedures</p> <p>4.3. Rectification procedures are selected to suit fault and type of finish material</p>

<p>5. Rectify paint faults of clear over-base multi-layer pearl refinishing materials</p>	<p>5.1. <b>Materials</b> to restore paintwork to as new condition are determined from industry, manufacturer and component supplier standards</p> <p>5.2. Damaged paintwork is rectified to blend with existing paintwork <b>quality</b> on vehicle according to industry regulations and guidelines, WHS legislation, and workplace policies and procedures</p> <p>5.3. Paint faults are rectified without causing damage to components or systems</p>
<p>6. Clean up work area and maintain equipment</p>	<p>6.1. Material that can be reused is collected and stored according to workplace sustainability practices</p> <p>6.2. Waste material is removed and disposed of or stored according to statutory and workplace procedure</p> <p>6.3. Spray equipment is cleaned as specified by manufacturer, component supplier and workplace policies and procedures</p> <p>6.4. Work area is cleaned and inspected for serviceable condition according to workplace procedures</p> <p>6.5. Faulty equipment is identified and tagged according to workplace procedures</p> <p>6.6. Operator maintenance is completed according to manufacturer and component supplier specifications and workplace procedures</p> <p>6.7. Tools are maintained according to workplace procedures</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to follow workplace verbal instructions
- initiative and enterprise skills to recognise a workplace problem or potential problem and take action
- learning skills to identify sources of information, assistance and expert knowledge to expand skills, knowledge and understanding
- literacy skills to:
  - understand quality procedures
  - read and follow information in written job instructions, specifications, standard operating procedures, charts, lists, drawings and other reference documents
  - obtain and record required paint and measurements
- numeracy skills to calculate paint quantity, mixing ratios and drying times
- planning and organising skills to:
  - plan, use and follow job specifications when mixing and applying clear over-base multi-layer pearl refinishing materials to components
  - plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed on time
  - identify risk factors and take action to minimise them
- problem-solving skills to:
  - refer problems outside area of responsibility to appropriate person and suggest possible causes
  - seek information and assistance as required to solve problems
- self-management skills to:
  - select and use appropriate clear over-base multi-layer pearl materials and equipment, processes and procedures
  - recognise own limitations and seek advice
  - follow workplace policies and documentation, such as codes of practice or original equipment manufacturer (OEM) repair procedures
- teamwork skills to apply knowledge of own role to complete activities efficiently to support team activities and tasks
- technical skills to use paint workplace tools and equipment relating to refinishing vehicles and components
- technology skills to:
  - operate vehicle painting and refinishing equipment
  - use technology to collect paint product information

#### Required knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

- WHS regulations, requirements, equipment and material relating to mixing and applying clear over-base multi-layer pearl material, including personal safety requirements
- environmental protection requirements and substance disposal and storage requirements
- material safety data sheets (MSDS)
- types of and application methods for clear over-base multi-layer pearl refinishing materials
- paint surface fault identification and rectification procedures
- drying methods for clear over-base multi-layer pearl material
- types of spray-guns
- spray-gun operation procedures and spraying techniques
- spray-gun cleaning methods
- planning processes for work required
- workplace quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria and required skills and knowledge.

A person who demonstrates competency in this unit must be able to:

- observe safety procedures and requirements
- select methods and techniques appropriate to the circumstances
- complete preparatory activity in a systematic manner
- prepare clear over-base multi-layer pearl paint
- apply clear over-base multi-layer pearl refinishing
- identify paint faults and determine appropriate rectification procedures
- rectify paint faults
- apply environmental procedures.

##### Context of, and specific resources for assessment

Competency is to be assessed in the workplace or a simulated workplace environment that accurately reflects performance in a real workplace setting.

Assessment is to occur:

- using workplace practices and procedures
- following safety requirements
- applying environmental constraints.

Assessment is to comply with relevant:

- regulatory requirements
- Australian standards
- industry codes of practice.

The following resources must be made available for the assessment of this unit:

- workplace location or simulated workplace
- materials relevant to applying clear over-base multi-layer pearl refinishing materials
- equipment, hand and power tools appropriate to applying clear

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

- over-base multi-layer pearl refinishing materials
- workplace instructions.

### Method of assessment

Assessment must satisfy the endorsed Assessment Guidelines of this Training Package.

Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with the application of required skills and knowledge.

Assessment methods must be by direct observation of tasks and include questioning on required skills and knowledge to ensure correct interpretation and application.

Competence in this unit may be assessed in conjunction with other units which together form part of a holistic work role.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate the needs of diverse clients.

Assessment processes and techniques must be culturally sensitive and appropriate to the language, literacy and numeracy capacity of the candidate and the work being performed.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Communications</i></b> may include:	<ul style="list-style-type: none"> <li>• email</li> <li>• verbal instructions</li> <li>• visual instructions</li> <li>• worksite-specific instructions</li> <li>• written instructions</li> <li>• job or task sheets</li> <li>• telephones.</li> </ul>
<b><i>Workplace health and safety requirements:</i></b>	<ul style="list-style-type: none"> <li>• are those prescribed under legislation, regulations, codes of practice and policies and procedures</li> <li>• may include: <ul style="list-style-type: none"> <li>• personal protective clothing and equipment</li> <li>• use of tools and equipment</li> <li>• workplace environment policy</li> <li>• safe handling of material</li> <li>• use of fire-fighting equipment</li> <li>• first aid equipment</li> <li>• hazard control, including control of hazardous materials and toxic substances.</li> </ul> </li> </ul>
<b><i>Personal protective equipment:</i></b>	<ul style="list-style-type: none"> <li>• is that prescribed under legislation, regulations, codes of practice, and workplace policies and practices</li> <li>• may include: <ul style="list-style-type: none"> <li>• eye protection</li> <li>• personal protective clothing</li> <li>• full body protection</li> <li>• gloves</li> <li>• respirators</li> <li>• safety shoes</li> <li>• air feed mask.</li> </ul> </li> </ul>
<b><i>Refinishing materials</i></b> may include:	<ul style="list-style-type: none"> <li>• metallic, pearl two-pack base coat</li> <li>• clear two-pack acyclic enamel</li> <li>• hardeners</li> <li>• paint reducers.</li> </ul>

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Tools and equipment</i></b> may include:	<ul style="list-style-type: none"> <li>• air pressure regulators</li> <li>• air compressors</li> <li>• spray booths</li> <li>• baking ovens</li> <li>• heating and lighting systems</li> <li>• strainers</li> <li>• measuring sticks</li> <li>• ford cups</li> <li>• safety equipment</li> <li>• tinting machines</li> <li>• hand paddles</li> <li>• nylon stocking weave</li> <li>• viscosity measuring equipment</li> <li>• high-volume low-pressure spray-guns</li> <li>• gravity feed spray-guns</li> <li>• suction feed spray-guns</li> <li>• personal protective equipment</li> <li>• polishing and cleaning equipment.</li> </ul>
<b><i>Refinishing methods</i></b> may include:	<ul style="list-style-type: none"> <li>• spray-gun selection</li> <li>• equipment protection methods</li> <li>• various spraying techniques</li> <li>• drying procedures</li> <li>• paint mixing</li> <li>• compound polishing</li> <li>• detailing of surfaces.</li> </ul>
<b><i>Emergency procedures</i></b> may include:	<ul style="list-style-type: none"> <li>• emergency shutdown</li> <li>• extinguishing fires</li> <li>• workplace first aid requirements</li> <li>• workplace evacuation.</li> </ul>
<b><i>Environmental requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• waste management</li> <li>• noise control</li> <li>• dust control</li> <li>• clean-up management.</li> </ul>
<b><i>Statutory and regulatory</i></b>	<ul style="list-style-type: none"> <li>• regulations</li> </ul>

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>authority guidelines</i></b> may include:	<ul style="list-style-type: none"> <li>• codes of practice.</li> </ul>
<b><i>Safe operating policies and procedures</i></b> may include:	<ul style="list-style-type: none"> <li>• workplace safety policies and procedures</li> <li>• operational risk assessment</li> <li>• toxic substances</li> <li>• electrical safety</li> <li>• machinery movement and operation</li> <li>• manual and mechanical lifting and shifting</li> <li>• working in proximity to others</li> <li>• workplace visitors.</li> </ul>
<b><i>Requirements for environment</i></b> must include:	<ul style="list-style-type: none"> <li>• cleanliness</li> <li>• correct temperature</li> <li>• extraction of fumes.</li> </ul>
<b><i>Recommended methods</i></b> include:	<ul style="list-style-type: none"> <li>• industry regulations and guidelines</li> <li>• WHS legislation</li> <li>• workplace policies and procedures.</li> </ul>
<b><i>Information and documents</i></b> may include:	<ul style="list-style-type: none"> <li>• verbal and written documents</li> <li>• graphical instructions</li> <li>• signage</li> <li>• work schedules, plans and specifications</li> <li>• work bulletins and memos</li> <li>• MSDS</li> <li>• diagrams and sketches</li> <li>• safe work procedures relating to colour matching multi-layer clear over-base colours</li> <li>• regulatory and legislative requirements</li> <li>• automotive painting and finishing code of practice</li> <li>• engineer's design specifications</li> <li>• workplace work specifications</li> <li>• instructions issued by authorised workplace or external persons</li> <li>• Australian standards.</li> </ul>
<b><i>Specifications</i></b> may include:	<ul style="list-style-type: none"> <li>• colour, texture, depth and gloss</li> <li>• contaminant-free</li> <li>• blending into the surrounding surfaces.</li> </ul>

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Materials*** may include:

- polishing buffs and pads
- tac-rags
- cleaning solvents
- polishes and glazes
- compounds and cleaning materials
- two-pack urethane acrylic enamels
- clear acrylic lacquers
- paint thinners
- paint reducers
- cleaning materials.

***Quality*** may include:

- industry standards
- workplace standards
- Australian standards
- quality policy
- workplace operation and procedures.

## AURVTP3025 Mix and apply water-based refinishing materials

### Modification History

Release	Comment
Release 1	Replaces AURV329603FA Apply water based refinishing materials Elements and Performance Criteria updated to reflect mixing of paint products

### Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes required to mix and apply water-based refinishing materials to a variety of vehicle bodies and substrates. It involves determining the causes of paint finish faults and rectifying them.</p> <p>The unit involves preparing for work and completing work processes, including clean-up and workplace documentation.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	---

### Application of the Unit

Application of the unit	<p>Work applies to refinishing technicians in a repair environment who apply water-based materials to a range of vehicles.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
-------------------------	--

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Workplace instructions and <i>communications</i> are used to determine job requirements, including material type, colour, quality and quantity</p> <p>1.2. <i>Workplace health and safety (WHS) requirements</i>, including <i>personal protective equipment (PPE)</i> needs, are observed throughout the work</p> <p>1.3. <i>Refinishing materials</i> are selected and inspected for quality</p> <p>1.4. Refinishing <i>tools, equipment</i> and PPE are identified and checked for correct operation</p> <p>1.5. <i>Refinishing methods</i> are determined to minimise waste, and maximise energy efficiency while completing the job</p> <p>1.6. Workplace <i>emergency procedures</i> are identified and followed when required</p>
2. Mix water-based paint colours	<p>2.1. Materials are mixed using the appropriate method</p> <p>2.2. Mixing activities are carried out according to <i>environmental requirements</i>; industry, <i>statutory and regulatory authorities' guidelines</i>; WHS legislation; and workplace <i>safe operating policies and procedures</i></p> <p>2.3. Water-based paint colours are mixed without causing damage to components or systems</p>
3. Apply water-based refinishing materials by spray-gun	<p>3.1. <i>Requirements for environment</i> for applying refinishing materials are identified and observed</p> <p>3.2. Refinishing materials are applied using recommended methods and intervals, in line with <i>information</i> from paint supplier and without causing damage to components or systems</p> <p>3.3. Refinishing materials are dried using approved methods and equipment</p> <p>3.4. Paint surface faults are removed using compounds, polishes and glazes</p> <p>3.5. Finish is produced that meets <i>specifications</i></p> <p>3.6. Surface refinishing is completed within approved time frames</p>
4. Identify and rectify paint faults	<p>4.1. Paint faults are identified according to industry and workplace procedures</p> <p>4.2. Paint fault causes are determined according to industry and workplace procedures</p> <p>4.3. Paint surface faults are removed using compounds, polishes and glazes, and rectification procedures that suit fault and type of finish</p>

5. Rectify and touch up paint faults	<p>5.1. <b>Materials</b> to restore paintwork to as new condition are determined from industry and supplier standards</p> <p>5.2. Damaged paintwork is rectified to blend with existing paintwork <b>quality</b> on vehicles</p> <p>5.3. Rectification operations are carried out according to industry regulations and guidelines, WHS legislation and workplace policies and procedures</p> <p>5.4. Paint faults are rectified without causing damage to components or systems</p>
6. Clean up work area and maintain equipment	<p>6.1. Material that can be reused is collected and stored according to workplace sustainability practices</p> <p>6.2. Waste material is removed and disposed of or stored according to statutory and workplace procedures</p> <p>6.3. Spray equipment is cleaned as specified by manufacturer, component supplier and workplace policies and procedures</p> <p>6.4. Work area is cleaned and inspected for serviceable condition according to workplace procedures</p> <p>6.5. Faulty equipment is identified and tagged according to workplace procedures</p> <p>6.6. Operator maintenance is completed according to manufacturer and component supplier specifications and workplace procedures</p> <p>6.7. Tools are maintained according to workplace procedures</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to follow workplace verbal instructions
- initiative and enterprise skills to recognise a workplace problem or potential problem and take action
- learning skills to identify sources of information, assistance and expert knowledge to expand skills, knowledge and understanding
- literacy skills to:
  - understand quality procedures
  - read and follow information in written job instructions, specifications, standard operating procedures, charts, lists, drawings and other reference documents
  - obtain and record required paint and paint measurements
- numeracy skills to calculate paint quantity, mixing ratios and drying times
- planning and organising skills to:
  - plan, use and follow job specifications when mixing and applying water-based refinishing materials to components
  - identify risk factors and take action to minimise them
- problem-solving skills to:
  - refer problems outside area of responsibility to appropriate person
  - seek information and assistance as required to solve problems
- self-management skills to:
  - select and use appropriate water-based refinishing materials and equipment, processes and procedures
  - recognise own limitations and seek advice
  - follow workplace policies and documentation, such as codes of practice or original equipment manufacturer (OEM) repair procedures
- teamwork skills to apply knowledge of own role to complete activities efficiently to support team activities and tasks
- technical skills to use paint workplace tools and equipment relating to refinishing vehicles or components
- technology skills to operate vehicle painting and refinishing equipment

#### Required knowledge

- WHS regulations, requirements, equipment and material relating to mixing and applying water-based refinishing materials, including personal safety requirements
- environmental protection requirements and substance disposal and storage requirements
- material safety data sheets (MSDS)
- types of water-based refinishing materials

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

- methods and processes for applying water-based material
- paint surface fault identification and rectification procedures
- drying methods for water-based material
- types of spray-guns
- spray-gun operation procedures and spraying techniques
- spray-gun cleaning methods
- planning processes for work required
- workplace quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria and required skills and knowledge.

A person who demonstrates competency in this unit must be able to:

- observe safety procedures and requirements
- select methods and techniques appropriate to the circumstances
- complete preparatory activity in a systematic manner
- prepare water-based paint
- apply water-based refinishing materials
- identify paint faults and determine appropriate rectification procedures
- rectify paint faults
- apply environmental procedures.

##### Context of, and specific resources for assessment

Competency is to be assessed in the workplace or a simulated workplace environment that accurately reflects performance in a real workplace setting.

Assessment is to occur:

- using standard workplace practices and procedures
- following safety requirements
- applying environmental constraints.

Assessment is to comply with relevant:

- regulatory requirements
- Australian standards
- industry codes of practice.

The following resources must be made available for the assessment of this unit:

- workplace location or simulated workplace
- materials relevant to application of water-based refinishing materials
- equipment, hand and power tools appropriate to application of

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

- water-based refinishing materials
- specifications and work instructions.

### Method of assessment

Assessment must satisfy the endorsed Assessment Guidelines of this Training Package.

Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with the application of required skills and knowledge.

Assessment methods must be by direct observation of tasks and include questioning on required skills and knowledge to ensure correct interpretation and application.

Competence in this unit may be assessed in conjunction with other units which together form part of a holistic work role.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate the needs of diverse clients.

Assessment processes and techniques must be culturally sensitive and appropriate to the language, literacy and numeracy capacity of the candidate and the work being performed.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Communications</i></b> may include:	<ul style="list-style-type: none"> <li>• email</li> <li>• telephone</li> <li>• verbal instructions</li> <li>• visual instructions</li> <li>• worksite-specific instructions</li> <li>• written instructions</li> <li>• job and task sheets.</li> </ul>
<b><i>WHS</i></b> requirements:	<ul style="list-style-type: none"> <li>• are those prescribed under legislation, regulations, codes of practice and policies and procedures</li> <li>• may include: <ul style="list-style-type: none"> <li>• personal protective clothing and equipment</li> <li>• use of tools and equipment</li> <li>• safe handling of material</li> <li>• use of fire-fighting equipment</li> <li>• first aid equipment</li> <li>• hazard control, including control of hazardous materials and toxic substances.</li> </ul> </li> </ul>
<b><i>Personal protective equipment:</i></b>	<ul style="list-style-type: none"> <li>• is that prescribed under legislation, regulations, codes of practice, and workplace policies and practices</li> <li>• may include: <ul style="list-style-type: none"> <li>• eye protection</li> <li>• personal protective clothing</li> <li>• gloves</li> <li>• respirators</li> <li>• safety shoes</li> <li>• air feed mask.</li> </ul> </li> </ul>
<b><i>Refinishing materials</i></b> may include:	<ul style="list-style-type: none"> <li>• solid, metallic, pearl base coats</li> <li>• clear two-pack acyclic enamel</li> <li>• hardener</li> <li>• water based reducer.</li> </ul>
<b><i>Tools and equipment</i></b> may include:	<ul style="list-style-type: none"> <li>• air pressure regulators</li> <li>• air compressors</li> <li>• spray booths</li> </ul>

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

	<ul style="list-style-type: none"> <li>• baking ovens</li> <li>• heating and lighting systems</li> <li>• strainers</li> <li>• measuring sticks</li> <li>• ford cups</li> <li>• safety equipment</li> <li>• tinting machines</li> <li>• hand paddles</li> <li>• nylon stocking weave</li> <li>• viscosity measuring equipment</li> <li>• high-volume low-pressure spray-guns</li> <li>• gravity feed spray-guns</li> <li>• suction feed spray-guns</li> <li>• personal protective equipment</li> <li>• polishing and cleaning equipment.</li> </ul>
<b><i>Refinishing methods</i></b> may include:	<ul style="list-style-type: none"> <li>• spray-gun selection</li> <li>• equipment protection methods</li> <li>• various spraying techniques</li> <li>• drying procedures</li> <li>• paint mixing</li> <li>• compound polishing</li> <li>• detailing of surfaces.</li> </ul>
<b><i>Emergency procedures</i></b> may include:	<ul style="list-style-type: none"> <li>• emergency shutdown</li> <li>• extinguishing fires</li> <li>• workplace first aid requirements</li> <li>• worksite evacuation.</li> </ul>
<b><i>Environmental requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• waste management</li> <li>• noise control</li> <li>• dust control</li> <li>• clean-up management.</li> </ul>
<b><i>Statutory and regulatory authorities' guidelines</i></b> may include:	<ul style="list-style-type: none"> <li>• statutory and regulatory regulations</li> <li>• codes of practice.</li> </ul>
<b><i>Safe operating policies and</i></b>	<ul style="list-style-type: none"> <li>• workplace safety policies and procedures</li> </ul>

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>procedures</i></b> may include:	<ul style="list-style-type: none"> <li>operational risk assessment</li> <li>toxic substances</li> <li>electrical safety</li> <li>machinery movement and operation</li> <li>manual and mechanical lifting and shifting</li> <li>working in proximity to others</li> <li>workplace visitors.</li> </ul>
<b><i>Requirements for environment</i></b> may include:	<ul style="list-style-type: none"> <li>requirements for temperature</li> <li>extraction of fumes</li> <li>cleanliness.</li> </ul>
<b><i>Information</i></b> may include:	<ul style="list-style-type: none"> <li>verbal and written information</li> <li>graphical instructions</li> <li>signage</li> <li>work schedules, plans and specifications</li> <li>work bulletins and memos</li> <li>MSDS</li> <li>diagrams and sketches</li> <li>safe work procedures relating to colour matching multi-layer clear over-base colours</li> <li>regulatory and legislative requirements</li> <li>automotive painting and finishing code of practice</li> <li>engineer's design specifications</li> <li>workplace work specifications</li> <li>instructions issued by authorised workplace or external persons</li> <li>Australian standards.</li> </ul>
<b><i>Specifications</i></b> may include:	<ul style="list-style-type: none"> <li>colour, texture, depth and gloss</li> <li>contaminant-free</li> <li>blending into the surrounding surfaces.</li> </ul>
<b><i>Materials</i></b> may include:	<ul style="list-style-type: none"> <li>polishing buffs and pads</li> <li>tac-rags</li> <li>cleaning solvents</li> <li>polishes and glazes</li> <li>compounds and cleaning materials</li> <li>two-pack urethane acrylic enamels</li> <li>clear acrylic lacquers</li> </ul>

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

	<ul style="list-style-type: none"><li>• paint thinners</li><li>• paint reducers</li><li>• cleaning materials.</li></ul>
<b><i>Quality</i></b> may include:	<ul style="list-style-type: none"><li>• industry standards</li><li>• workplace standards</li><li>• Australian standards</li><li>• quality policy</li><li>• workplace operations and procedures.</li></ul>

## AURVTS2006 Carry out fabrication of components

### Modification History

Release	Comment
Release 1	Replaces AURV224508A Carry out fabrication of components Unit code updated to meet policy requirements Reference to OHS legislation replaced with new WHS legislation Licensing statement added to unit descriptor

### Unit Descriptor

Unit descriptor	<p>This unit of competency covers the skills and knowledge required to measure, mark out and carry out fabrication of basic components.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	--

### Application of the Unit

Application of the unit	<p>The unit includes identification and confirmation of work requirements, preparation for work, selection of material, fabrication of components to specifications, and completion of work finalisation processes, including clean-up and documentation.</p> <p>This unit covers only fabrication of basic or straightforward components.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
-------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including job sheets, quality and quantity of materials.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal protection needs, are observed throughout the work.</p> <p>1.4. Materials are selected and inspected for quality.</p> <p>1.5. Hand, power tooling and safety equipment are identified and checked for safe use.</p>
2. Perform basic fabrication	<p>2.1. Information is accessed and interpreted from manufacturer/component supplier specifications.</p> <p>2.2. Suitable materials are selected and components/equipment fabricated to specific requirements.</p> <p>2.3. Procedures for set-up are followed in accordance with plan, customer requirements and specifications.</p> <p>2.4. Tooling, equipment and material are located on worksite and confirmed for commencement of production in accordance with enterprise established procedures.</p> <p>2.5. Work plan is followed to commence fabrication.</p>
3. Monitor fabrication process and outputs	<p>3.1. Key characteristics are monitored to ensure conformity to specifications during fabrication process.</p> <p>3.2. Fabrication is checked for conformity to specification.</p> <p>3.3. Product is tagged and stored and safely for future use.</p> <p>3.4. Fabrication operations are carried out according to industry regulations/guideline, WHS requirements, legislation and enterprise procedures/policies.</p>
4. Clean up work area and Maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste and scrap is removed following workplace procedures.</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable conditions in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>4.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.6.Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for fabricating a component
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to complete measurements and estimate material requirements required for the work
- use pre-checking and inspection techniques to anticipate planning and scheduling problems, avoid wastage of line and material
- use workplace technology related to fabrication of components, including use of specialist tooling, measuring equipment, use of communication devices and reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS regulations/requirements, equipment, material and personal safety requirements
- equipment maintenance procedures
- vehicle/material safety requirements
- manufacturer/component supplier/company policies
- types of fabrication materials and their application
- fabrication procedures/marking out and cutting procedures
- methods of fastening/gluing/bonding
- planning of fabrication, processes and techniques
- workplace guidelines regarding acceptable tolerance levels
- procedures for reporting faults and material defects
- enterprise quality procedures
- work organisation and planning processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to circumstances
- completing preparatory activity in a systematic manner
- selecting material used in the work process
- identifying, setting up, operating and maintaining equipment to complete a range of component fabrication tasks
- conducting operator maintenance on welding, bending, lifting and measuring equipment.

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to fabrication of components
  - equipment, hand and power tooling appropriate to fabrication of components
  - activities covering mandatory task requirements
  - specifications and work instructions.

##### Method of assessment

- Assessment must satisfy endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of

**EVIDENCE GUIDE**

	<p>underpinning knowledge.</p> <ul style="list-style-type: none"> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce integration of key competencies.</li> <li>• Assessment may be applied under project-related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Fabrication methods**

Fabrication methods are to include:

- welding, heating, soldering, measuring, mechanical fastening, cutting, shaping, bending, bonding, gluing, marking and assembling

**WHS**

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This

<b>RANGE STATEMENT</b>	
	<p>may include:</p> <ul style="list-style-type: none"> <li>• protective clothing and equipment</li> <li>• use of tooling and equipment</li> <li>• workplace environment and safety</li> <li>• handling of material</li> <li>• use of firefighting equipment</li> <li>• enterprise first aid</li> <li>• hazard control and hazardous material and substances</li> </ul>
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices
<b>Safe operating procedures</b>	<p>Safe operating procedures are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• conduct of operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors</li> </ul>
<b>Emergency procedures</b>	<p>Emergency procedures related to this unit are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• emergency shutdown and stopping of equipment</li> <li>• extinguishing fires</li> <li>• enterprise first aid requirements</li> <li>• worksite evacuation</li> </ul>
<b>Environmental requirements</b>	<p>Environmental requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• waste management, noise, dust and clean-up management</li> </ul>
<b>Quality requirements</b>	<p>Quality requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• regulations, including Australian standards, internal company quality policy and standards and enterprise operations and procedures</li> </ul>
<b>Statutory/regulatory authorities</b>	<p>Statutory/regulatory authorities may include:</p> <ul style="list-style-type: none"> <li>• federal, state/territory and local authorities</li> </ul>

<b>RANGE STATEMENT</b>	
	administering applicable Acts, regulations and codes of practice
<b>Tooling and equipment</b>	<p>Tooling and equipment are to include:</p> <ul style="list-style-type: none"> <li>hand tooling, power tooling, welding equipment, cutting equipment, measuring equipment, marking out equipment, lifting and bending equipment</li> </ul>
<b>Materials</b>	Materials may include sheet metal, bonding material, steel, paints, plastics and cleaning materials.
<b>Communications</b>	<p>Communications are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers</li> </ul>
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets (MSDS), diagrams or sketches</li> <li>safe work procedures related to fabrication of basic components</li> <li>regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li> <li>engineer's design specifications and instructions</li> <li>organisation work specifications and requirements</li> <li>instructions issued by authorised enterprise or external persons</li> <li>Australian standards</li> </ul>

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including job sheets, quality and quantity of materials.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including personal protection needs, are observed throughout the work.</p> <p>1.4. Materials are selected and inspected for quality.</p> <p>1.5. Hand, power tooling and safety equipment are identified and checked for safe use.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Fabricate wood components and parts	<p>2.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>2.2. Materials are selected and prepared for fabrication.</p> <p>2.3. Fabrication procedures are carried out following enterprise policies and procedures within established enterprise guidelines.</p> <p>2.4. Fabrication in wood material is achieved without causing damage to equipment or machinery.</p> <p>2.5. All activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p> <p>2.6. Fabricated items are checked to specification and workplace records are completed to worksite requirements.</p>
3. Clean up work area and maintain equipment	<p>3.1. Material that can be reused is collected and stored.</p> <p>3.2. Waste and scrap is removed following workplace procedure.</p> <p>3.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>3.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>3.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>3.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- apply research and interpretive skills sufficient to locate, interpret and apply manufacturer/component supplier procedures, workplace policies and procedures
- apply analytical skills required for identification and analysis of technical information
- apply plain English literacy and communication skills in relation to dealing with customers and team members
- apply questioning and active listening skills for example when obtaining information from customers
- apply oral communication skills sufficient to convey information and concepts to customers
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring one's own performance
- interact effectively with other persons both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to fabrication of wood materials, including the use of specialist tooling, measuring equipment and communication devices and the reporting/ recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- technical information
- fabrication procedures
- measuring procedures
- adhesives and their application
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- completing the fabrication of components and plugs or moulds without damage to components, tooling, equipment and persons.

#### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to fabrication of wood materials
- equipment, hand and power tooling appropriate to fabrication of wood materials
- activities covering mandatory task requirements
- specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.

**EVIDENCE GUIDE**

	<ul style="list-style-type: none"> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Methods**

Methods are to include manual, machine operation, measuring, interpreting of drawings, fabrication procedures, gluing, screwing and nailing.

**WHS**

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and

<b>RANGE STATEMENT</b>	
	substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power tooling, special equipment, including wood working tooling and equipment, jigs, measuring equipment and templates.
<b>Materials</b>	Materials may include raw materials, adhesives, spare parts, fasteners and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or

RANGE STATEMENT	
	instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"><li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li><li>• safe work procedures related to fabrication of wood materials</li><li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	1.1. Work instructions are used to determine the job requirements, including job sheets, quality and quantity of materials. 1.2. Job specifications are read and interpreted. 1.3. WHS requirements, including personal protection needs, are observed throughout the work. 1.4. Materials are selected and inspected for quality. 1.5. Hand, power tooling and safety equipment are identified and checked for safe use. 1.6. Procedures are determined to minimise waste material. 1.7. Procedures are identified for maximising energy efficiency while completing the job.
2. Carry out repair procedures	2.1. Information is accessed and interpreted from manufacturer/component supplier specifications. 2.2. Items to be repaired are identified. 2.3. Methods of repair are identified. 2.4. Equipment, tooling and materials are prepared for use. 2.5. Repair procedures are carried out following enterprise procedures. 2.6. Repair procedures are completed without causing damage to equipment or machinery. 2.7. All activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies. 2.8. Repairs are checked to specification and workplace/equipment records are completed to worksite requirements.
3. Clean up work area and maintain equipment	3.1. Material that can be reused is collected and stored. 3.2. Waste and scrap is removed following workplace procedure. 3.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures. 3.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures. 3.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications

ELEMENT	PERFORMANCE CRITERIA
	and worksite procedures. 3.6.Tooling is maintained in accordance with workplace procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- apply research and interpretive skills sufficient to locate, interpret and apply manufacturer/component supplier procedures, workplace policies and procedures
- apply analytical skills required for identification and analysis of technical information
- apply plain English literacy and communication skills in relation to dealing with customers and team members
- apply questioning and active listening skills for example when obtaining information from customers
- apply oral communication skills sufficient to convey information and concepts to customers
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring one's own performance
- interact effectively with other persons both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to repair of composite material components, including the use of specialist tooling, measuring equipment and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental requirements
- measuring procedures
- technical information
- types of composite materials (including fibreglass) and their application
- repair procedures
- manufacturer/component supplier/company policies
- manual handling techniques

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
<ul style="list-style-type: none"><li>• work organisation and planning processes</li><li>• enterprise quality processes</li></ul>

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- completing repair procedures to a range of components to enterprise and manufacturer/component supplier requirements
- completing repair procedures without damage to tooling, equipment and persons
- completing repair procedures within enterprise timeframes
- completing workplace/equipment records.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to repair of composite material components
- equipment, hand and power tooling appropriate to repair of composite material components
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.

**EVIDENCE GUIDE**

	<ul style="list-style-type: none"> <li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Composite materials**

Composite materials may include fibreglass, carbon fibre and Kevlar.

**Methods**

Methods are to include both hand and machine operations, mixing and application.

<b>RANGE STATEMENT</b>	
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power tooling, specialist tooling for composite material work, mixers, moulds, jigs and

RANGE STATEMENT	
	measuring equipment.
<b>Materials</b>	Materials may include fibreglass, carbon fibre, Kevlar and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	Sources of information/documents may include: <ul style="list-style-type: none"><li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li><li>• safe work procedures related to repair of composite material components</li><li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>

## AURVTS3005 Fabricate vehicle body panels and components

### Modification History

Release	Comment
Release 1	New unit of competency

### Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes required to measure, develop patterns and templates, and carry out panel fabrication activities to produce body panels and components.</p> <p>It includes the identification of panel shapes, preparation for work, selection of material, use of production techniques, and use of specialist tools when fabricating vehicle body panels or components to specification.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	--

### Application of the Unit

Application of the unit	<p>Work applies to the vehicle restoration industry and the fabrication of panels or panel sections that may be needed during a restoration process.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
-------------------------	--

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills
-----------------------------	---

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements</p> <p>1.2. Legal, <i>workplace health and safety (WHS) and environmental requirements</i>, policies and procedures, and manufacturer and component specifications are identified and complied with</p> <p>1.3. Personal protective equipment, <i>tools and equipment</i>, and <i>materials</i> are selected and checked for correct operation</p>
2. Produce patterns and templates	<p>2.1. Paper patterns are produced from sample panel or simulated frame, indicating panel size, panel shapes and all folds and edges</p> <p>2.2. Templates are produced from sample panel or simulated frame</p> <p>2.3. Difference between convex and concave shapes is correctly identified</p>
3. Cut material	<p>3.1. Panel steel or aluminium sections are selected and checked for quality</p> <p>3.2. Patterns and templates are transferred to steel or aluminium sheet surface</p> <p>3.3. Selected hand tools are used to cut steel or aluminium to pattern and panel specification</p> <p>3.4. Panels are filed to remove sharp edges</p>
4. Shape panels	<p>4.1. Panel shaping equipment and hand tools are selected, including 'English' wheeling machine</p> <p>4.2. Required shapes are identified and fabricated to pattern specification, following WHS and workplace environmental practices</p> <p>4.3. Shaped panel sections are checked against pattern and template specifications for <i>quality</i> finish and conformity</p>
5. Evaluate and check fabricated panel	<p>5.1. Fabricated panel sections are inspected for quality finish and fits to sample panel or frame</p> <p>5.2. Panels are fitted to vehicle or frame without distortion</p>
6. Clean up work area and maintain equipment	<p>6.1. Material that can be reused is collected and stored according to workplace sustainability practices</p> <p>6.2. Waste materials are removed following workplace procedures</p>

	<p>6.3. Equipment and work area are cleaned and inspected for serviceable condition according to workplace procedures</p> <p>6.4. Faulty tools and equipment are identified and tagged according to workplace procedures</p> <p>6.5. Tools and equipment are cleaned and maintained according to workplace procedures</p>
--	---

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to:
  - follow verbal instructions
  - follow job sheets and work orders
- initiative and enterprise skills to recognise a workplace problem or potential problem and take action
- learning skills to identify sources of information, assistance and expert knowledge to expand skills, knowledge and understanding
- literacy skills to:
  - understand quality procedures
  - read and follow information in written job instructions, specifications, standard operating procedures, charts, lists, drawings and other reference documents
  - obtain and record measurements
- numeracy skills to measure and calculate material, size, shape and specifications
- planning and organising skills to:
  - plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed on time
  - identify risk factors and take action to minimise them
- problem-solving skills to refer problems outside area of responsibility to appropriate person and suggest possible causes
- self-management skills to:
  - select and use appropriate equipment, materials, processes and procedures
  - recognise limitations and seek timely advice
  - follow workplace documentation, such as codes of practice and operating procedures
- teamwork skills to apply knowledge of own role to complete activities efficiently to support team activities and tasks
- technical skills to use workplace tools and equipment relating to fabricating panels, including the use of specialist tools and equipment
- technology skills to operate 'English' wheeling machine and specialist panel fabrication tools

#### Required knowledge

- WHS regulations and requirements relating to fabrication process
- personal safety requirements relating to fabricating vehicle body panels and components
- equipment maintenance procedures
- procedures for the correct use of panel fabrication specialist equipment
- industry standards, customer requirements and workplace quality procedures relating to the fabrication of panel sections

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

- techniques for producing paper patterns and templates
- marking and cutting out procedures
- wheeling and shaping techniques
- features of convex and concave shapes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria and required skills and knowledge.

A person who demonstrates competency in this unit must be able to:

- observe safety procedures and requirements
- select methods and techniques appropriate to the circumstances
- apply vehicle protection methods
- select the equipment most appropriate to the circumstances
- complete panel fabrication to match sample panel or simulated frame.

##### Context of, and specific resources for assessment

Competency is to be assessed in the workplace or a simulated workplace environment that accurately reflects performance in a real workplace setting

Assessment is to occur:

- using standard workplace practices and procedures
- following safety requirements
- applying environmental constraints.

Assessment is to comply with relevant:

- regulatory requirements
- Australian standards
- industry codes of practice.

The following resources must be made available for the assessment of this unit:

- workplace location or simulated workplace
- materials relevant to panel fabrication processes
- equipment, hand and power tools appropriate to panel fabrication processes
- panel specifications and work instructions.

#### Method of assessment

Assessment must satisfy the endorsed Assessment Guidelines of this Training Package.

Assessment methods must confirm consistency and accuracy of

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

performance (over time and in a range of workplace relevant contexts) together with the application of required skills and knowledge.

Assessment methods must be by direct observation of tasks and include questioning on required skills and knowledge to ensure correct interpretation and application.

Competence in this unit may be assessed in conjunction with other units which together form part of a holistic work role.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate the needs of diverse clients.

Assessment processes and techniques must be culturally sensitive and appropriate to the language, literacy and numeracy capacity of the candidate and the work being performed.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Workplace health and safety requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• correct use of tools and equipment</li> <li>• workplace first aid equipment</li> <li>• safe handling of material</li> <li>• hazardous materials and substances</li> <li>• personal safety</li> <li>• PPE</li> <li>• use of fire-fighting equipment</li> <li>• workplace safety.</li> </ul>
<b><i>Environmental requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• waste management</li> <li>• noise control</li> <li>• dust control</li> <li>• clean-up management.</li> </ul>
<b><i>Tools and equipment</i></b> may include:	<ul style="list-style-type: none"> <li>• hand and power tools</li> <li>• panel shaping hammers</li> <li>• sand bags</li> <li>• body sweeps</li> <li>• timber blocks</li> <li>• clamps.</li> </ul>
<b><i>Materials</i></b> may include:	<ul style="list-style-type: none"> <li>• mild steel sheeting</li> <li>• aluminium sheeting</li> <li>• paper for pattern</li> <li>• cardboard for templates</li> <li>• cleaning materials.</li> </ul>
<b><i>Quality</i></b> may include:	<ul style="list-style-type: none"> <li>• industry standard</li> <li>• workplace finish quality standard</li> <li>• original vehicle manufacturer finish and surface standard.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including quality and quantities of materials.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal protection needs, are observed throughout the work.</p> <p>1.4. Materials for repairs and alterations are selected and inspected for quality.</p> <p>1.5. Hand and power tooling are inspected for safe use.</p> <p>1.6. Products are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Carry out hand and machine sewing procedures	<p>2.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>2.2. Sewing procedures are carried out in accordance with manufacturer/component supplier specifications.</p> <p>2.3. Sewing procedures are completed within established industry/enterprise guidelines.</p> <p>2.4. Activities are carried out according to industry regulations/ guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
3. Carry out sewing machine maintenance procedures	<p>3.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>3.2. Cleaning and lubricating procedures are carried out to manufacturer/component supplier/enterprise guidelines.</p> <p>3.3. Activities are carried out according to industry regulations/ guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste and scrap is removed following workplace procedures.</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable conditions in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications</p>

ELEMENT	PERFORMANCE CRITERIA
	and worksite procedures. 4.6.Tooling is maintained in accordance with workplace procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to sewing repairs and alterations, work orders, plans and safety procedures for fabricating a component or piece of equipment
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to calculate time, apply accurate measurements, calculate material requirements and establish quality checks
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology related to carrying out sewing repairs and alterations, including the use of specialist tooling, measuring equipment, computerised technology and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS cleaning materials, equipment, material and personal safety requirements
- technical information
- equipment operation and safety requirements
- manufacturer/component supplier/company policies
- material matching procedures
- machine sewing procedures
- sewing methods appropriate to various material types
- planning processes and techniques for sewing repairs and alterations
- workplace guidelines regarding tolerance levels to manufacture/component supplier/enterprise/customer requirements
- procedures for reporting faults and material defects
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- identifying, setting up, operating and maintaining sewing equipment and procedures to complete a range of sewing repairs and alterations
- maintaining sewing machine equipment.

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - material relevant to carrying out sewing repairs and alterations
  - equipment, hand and power tooling appropriate to carrying out sewing repairs and alterations
  - activities covering mandatory task requirements
  - specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of

**EVIDENCE GUIDE**

	<p>underpinning knowledge.</p> <ul style="list-style-type: none"> <li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li> <li>• Assessment may be applied under project-related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Sewing repairs and alterations**

Sewing repairs and alterations are to include:

- small repairs and alterations to vehicle trim

**Sewing methods**

Sewing methods are to include:

- both hand and machine sewing
- component removal and replacement
- repair of trims trim alterations

<b>RANGE STATEMENT</b>	
<b>Sewing machine maintenance procedures</b>	Sewing machine maintenance procedures are to be included
<b>WHS</b>	<p>WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:</p> <ul style="list-style-type: none"> <li>• protective clothing and equipment</li> <li>• use of tooling and equipment</li> <li>• workplace environment and safety</li> <li>• handling of material</li> <li>• use of firefighting equipment</li> <li>• enterprise first aid</li> <li>• hazard control and hazardous material and substances</li> </ul>
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices
<b>Safe operating procedures</b>	<p>Safe operating procedures are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• operational risk assessment and treatments associated with vehicular movement, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors</li> </ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including quality, material, equipment and quantities.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal protection needs, are observed throughout the work.</p> <p>1.4. Materials for repairs and alterations are selected and inspected for quality.</p> <p>1.5. Hand and power tooling are identified and checked for safe use.</p> <p>1.6. Products are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Match material	<p>2.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>2.2. Matching procedures are carried out in accordance with manufacturer/component supplier specifications.</p> <p>2.3. Matching procedures are completed within established industry/enterprise guidelines.</p> <p>2.4. Activities are carried out according to industry regulations/ guidelines, WHS requirements, legislation and enterprise procedures policies.</p>
3. Measure and cut material	<p>3.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>3.2. Measuring and cutting procedures are carried out in accordance with manufacturer/component supplier specifications.</p> <p>3.3. Measuring and cutting procedures are completed within established industry/enterprise guidelines.</p> <p>3.4. Activities are carried out according to industry regulations/ guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
4. Fabricate trim/covers to suit vehicle components	<p>4.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>4.2. Trim/cover fabrication procedures are carried out in accordance with manufacturer/component supplier specifications.</p> <p>4.3. Fabrication procedures are completed within</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>established industry/enterprise guidelines.</p> <p>4.4.Activities are carried out according to industry regulations/ guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
5. Attach material cover to vehicle/component	<p>5.1.Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>5.2.Attaching procedures are completed in accordance with manufacturer/component supplier specifications and within established industry/enterprise guidelines.</p> <p>5.3.Material is attached without causing damage to component or system.</p> <p>5.4.Activities are carried out according to industry regulations/ guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
6. Clean up work area and maintain equipment	<p>6.1.Material that can be reused is collected and stored.</p> <p>6.2.Waste and scrap is removed following workplace procedures.</p> <p>6.3.Equipment and work area are cleaned and inspected for serviceable conditions in accordance with workplace procedures.</p> <p>6.4.Unserviceable equipment is tagged and faults identified in accordance with workplace.</p> <p>6.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>6.6.Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to trimming, fabrication adhesives, material and work orders, plans and safety procedures
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to calculate time, apply accurate measurements, calculate material requirements and establish quality checks
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology related to carrying out trim repairs and alterations, including the use of specialist tooling, measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS cleaning materials, equipment, material and personal safety requirements
- technical and legal requirements
- manufacturer/component supplier/company policies
- removal and replacement methods
- measuring/testing and adjustment procedures
- types and use of various materials
- trim fabrication, matching, measuring and cutting procedures
- planning trim repairs, fabrication processes and techniques
- workplace guidelines regarding acceptable tolerance levels
- procedures for reporting faults and material defects
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- identifying, setting up, operating and maintaining trim repairs equipment and procedures to complete a range of:
  - trim repairs
  - sewing operations
  - fabrication techniques
  - completing workplace records.

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to carrying out trim repairs and alterations
  - equipment, hand and power tooling appropriate to carrying out trim repairs and alterations
  - activities covering mandatory task requirements
  - specifications and work instructions.

**EVIDENCE GUIDE****Method of assessment**

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.
- Assessment may be applied under project-related conditions and require evidence of process.
- Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
- It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.
- Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Trim repairs and alterations</b>	<p>Trim repairs and alterations are to include:</p> <ul style="list-style-type: none"> <li>• small repairs and alterations to vehicle trim</li> </ul>
<b>Repair and alteration methods</b>	<p>Repair and alteration methods are to include:</p> <ul style="list-style-type: none"> <li>• removing, repairing, fabricating, and altering vehicle trim components</li> </ul>
<b>WHS</b>	<p>WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:</p> <ul style="list-style-type: none"> <li>• protective clothing and equipment</li> <li>• use of tooling and equipment</li> <li>• workplace environment and safety</li> <li>• handling of material</li> <li>• use of firefighting equipment</li> <li>• enterprise first aid</li> <li>• hazard control and hazardous material and substances</li> </ul>
<b>Personal protective equipment</b>	<p>Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices</p>
<b>Safe operating procedures</b>	<p>Safe operating procedures are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• operational risk assessment and treatments associated with vehicular movement, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors</li> </ul>
<b>Emergency procedures</b>	<p>Emergency procedures related to this unit are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• emergency shutdown and stopping of</li> </ul>

<b>RANGE STATEMENT</b>	
	equipment <ul style="list-style-type: none"> <li>• extinguishing fires</li> <li>• enterprise first aid requirements</li> <li>• worksite evacuation</li> </ul>
<b>Environmental requirements</b>	Environmental requirements are to include, but are not limited to: <ul style="list-style-type: none"> <li>• waste management, noise, dust and clean-up management</li> </ul>
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to: <ul style="list-style-type: none"> <li>• regulations, including Australian standards</li> <li>• internal company quality policies and standards</li> <li>• enterprise operations and procedures</li> </ul>
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include: <ul style="list-style-type: none"> <li>• federal, state/territory and local authorities administering Acts, regulations and codes of practice</li> </ul>
<b>Tooling and equipment</b>	Tooling and equipment may include: <ul style="list-style-type: none"> <li>• hand and power tooling</li> <li>• specialist tooling for dismantling/assembly</li> <li>• staple gun, hammers, wad punches and heat gun</li> <li>• foam cutter, scissors and knives</li> <li>• revolving hole punch</li> <li>• ruler and tape</li> <li>• hand clamps</li> <li>• adhesive gun</li> <li>• pop rivet kit</li> <li>• punch and die set</li> <li>• hog ring pliers</li> <li>• door handle remover</li> <li>• hacksaw</li> <li>• sander</li> <li>• staple and tack remover</li> <li>• scrapers and putty knives</li> <li>• stuffing irons</li> <li>• vacuum formers</li> </ul>

<b>RANGE STATEMENT</b>	
<b>Materials</b>	Materials may include: <ul style="list-style-type: none"><li>• trim</li><li>• adhesives</li><li>• fabrication material and components</li><li>• cleaning materials</li></ul>
<b>Communications</b>	Communications are to include, but are not limited to: <ul style="list-style-type: none"><li>• verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers</li></ul>
<b>Information/documents</b>	Sources of information/documents may include: <ul style="list-style-type: none"><li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets (MSDS), diagrams or sketches</li><li>• safe work procedures related to carrying out trim repairs and alterations</li><li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian standards</li></ul>

## AURVTT2003 Remove and replace vehicle interior trim components

### Modification History

Release	Comment
Release 1	<p>Replaces AURV230864A Remove and replace vehicle interior trim components</p> <p>Unit code updated to meet policy requirements</p> <p>Reference to OHS legislation replaced with new WHS legislation</p> <p>Licensing statement added to unit descriptor</p>

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit of competency covers the skills and knowledge required to remove and replace vehicle interior trim components to facilitate trim repairs/replacement.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>The unit includes identification and confirmation of work requirements, preparation for work, removal and replacement of interior trim components, and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
--------------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including method, material and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal protection needs are observed throughout the work.</p> <p>1.4. Material for the work is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Remove interior trim components	<p>2.1. Removal activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
3. Replace interior trim components	<p>3.1. Replacement activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste and scrap is removed following workplace and environmental procedure.</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for removing and replacing trim components
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to complete measurements and estimate material requirements required for the work
- use pre-checking and inspection techniques to anticipate planning and scheduling problems, avoid wastage of time and material
- use workplace technology related to removing and replacing vehicle interior trim components, including the use of specialist tooling, measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS cleaning materials, equipment, material and personal safety requirements
- vehicle safety requirements
- use of tooling and equipment
- manual handling techniques
- removal and replacement/refitting procedures for trim components, including electrical disconnection and reconnection methods and procedures
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- removing and replacing a range of trim components
- completing workplace records.

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian Standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - material relevant to removing and replacing vehicle interior trim components
  - equipment, hand and power tooling appropriate to removing and replacing vehicle interior trim components
  - activities covering mandatory task requirements
  - specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also

**EVIDENCE GUIDE**

	<p>reinforce the integration of key competencies.</p> <ul style="list-style-type: none"> <li>• Assessment may be applied under project-related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. ## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including method, process and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal safety needs, are observed throughout the work.</p> <p>1.4. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.5. Procedures are determined to minimise task time.</p>
2. Match material	<p>2.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>2.2. Matching procedures are carried out in accordance with manufacturer/component supplier specifications.</p> <p>2.3. Matching procedures are completed within established industry enterprise guidelines.</p> <p>2.4. Activities are carried out according to industry regulations/ guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
3. Measure and cut material	<p>3.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>3.2. Measuring and cutting procedures are carried out in accordance with manufacturer/component supplier specifications.</p> <p>3.3. Measuring and cutting procedures are completed within established industry enterprise guidelines.</p> <p>3.4. Activities are carried out according to industry regulations/ guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
4. Fabricate trim/covers to suit vehicle/ components	<p>4.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>4.2. Trim/cover fabrication procedures are carried out in accordance with manufacturer/component supplier specifications.</p> <p>4.3. Fabrication procedures are completed within established industry enterprise guidelines.</p> <p>4.4. Activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>

ELEMENT	PERFORMANCE CRITERIA
5. Attach material cover to vehicle/component	<p>5.1.Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>5.2.Attaching procedures are carried out in accordance with manufacturer/component supplier specifications.</p> <p>5.3.Attaching procedures are completed within established industry/enterprise guidelines.</p> <p>5.4.Activities are carried out according to industry regulations/ guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
6. Clean up work area and maintain equipment	<p>6.1.Material that can be reused is collected and stored.</p> <p>6.2.Waste and scrap is removed following workplace procedure.</p> <p>6.3.Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>6.4.Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>6.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>6.6.Tooling and equipment is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for trimming of vehicle components
- technical literacy and communication skills sufficient to interpret and apply common industry terminology, and interpret technical information and specifications
- research and interpretive skills to locate, interpret and apply operational and safety information
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plain English literacy and communication skills in relation to dealing with others involved in the work
- questioning and active listening skills, for example when obtaining information regarding trimming requirements
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking or workflow interruptions
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to complete tests and measurements to determine trimming requirements
- use pre-checking and inspection techniques to anticipate planning and scheduling problems, avoid wastage of time and material
- manipulative and dexterity skills to perform trimming activities
- problem-solving skills for a range of differing procedural issues
- use workplace technology related to carrying out trimming of vehicle components, including the use of specialist tooling, measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS cleaning materials, equipment, material and personal safety requirements
- removal and replacement methods
- measuring/testing and adjustment procedures
- technical and legal requirements

**REQUIRED SKILLS AND KNOWLEDGE**

- manufacturer/component supplier/company policies
- types and uses of various materials
- trim fabrication, matching, measuring and cutting procedures
- use of tooling and equipment
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- fabricating covers/trims
- repairing material covers/trims
- replacing material covers/trims
- adjusting material covers/trims
- completing workplace records.

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian Standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - material relevant to carrying out trimming of vehicle components
  - equipment, hand and power tooling appropriate to carrying out trimming of vehicle components
  - activities covering mandatory task requirements
  - specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and

**EVIDENCE GUIDE**

	<p>accuracy of performance together with application of underpinning knowledge.</p> <ul style="list-style-type: none"><li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li><li>• Assessment may be applied under project-related conditions and require evidence of process.</li><li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li><li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. --	--

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Trimming methods

Trimming methods are to include:

- sewing, gluing, riveting, cutting, forming and stapling

#### Vehicles

Vehicles may include:

- marine craft aircraft
- light and heavy vehicles and equipment

#### WHS

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:

- protective clothing and equipment
- use of tooling and equipment
- workplace environment and safety
- handling of material
- use of firefighting equipment
- enterprise first aid
- hazard control and hazardous material and substances

#### Personal protective equipment

Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices

#### Safe operating procedures

Safe operating procedures are to include, but are not limited to:

- operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.

#### Emergency procedures

Emergency procedures related to this unit are to include, but are not limited to:

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• emergency shutdown and stopping of equipment</li> <li>• extinguishing fires</li> <li>• enterprise first aid requirements</li> <li>• worksite evacuation</li> </ul>
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management
<b>Quality requirements</b>	<p>Quality requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• regulations, including Australian standards</li> <li>• internal company quality policies and standards</li> <li>• enterprise operations and procedures</li> </ul>
<b>Statutory/regulatory authorities</b>	<p>Statutory/regulatory authorities may include:</p> <ul style="list-style-type: none"> <li>• federal, state/territory and local authorities administering Acts, regulations and codes of practice</li> </ul>

## AURVTT2005 Select and apply trim and fabric materials

### Modification History

Release	Comment
Release 1	<p>Replaces AURV231268A Select and apply trim/fabric materials and determine attachment methods</p> <p>Unit code updated to meet policy requirements</p> <p>Minor changes to unit title</p> <p>Reference to OHS legislation replaced with new WHS legislation</p> <p>Licensing statement added to unit descriptor</p>

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit of competency covers the skills and knowledge required to select trim/fabric materials and determine methods of attaching trim/fabric materials.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>The unit includes identification and confirmation of work requirements, preparation for work, selection of trim/fabric material for specific applications, selection of the methods of attachment of material to vehicle components, and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
--------------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including method, process and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal safety needs, are observed throughout the work.</p> <p>1.4. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.5. Procedures are determined to minimise task time.</p>
2. Select trim/fabric materials	<p>2.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>2.2. Material applications and usages are compared with the job requirements.</p> <p>2.3. The material selected is that which best meets the user requirement.</p> <p>2.4. Activities are carried out according to industry regulations/ guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
3. Determine attachment methods	<p>3.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>3.2. Attachment options are identified and analysed.</p> <p>3.3. Attachment option is selected.</p> <p>3.4. Selected option is documented.</p>
4. Clean up work area and maintain equipment	<p>4.1. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.2. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.3. Equipment is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for selection and application of trim/fabric materials
- technical literacy and communication skills sufficient to interpret and apply common industry terminology, and interpret technical information and specifications
- research and interpretive skills to locate, interpret and apply operational and safety information
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plain English literacy and communication skills in relation to dealing with others involved in the work
- questioning and active listening skills, for example when obtaining information relating to selection and application of trim/fabric materials
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking or workflow interruptions
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to complete tests and measurements to determine selection and application of trim/fabric materials
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology related to selection and application of trim/fabric materials, including the use of measuring equipment, computerised technology and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS cleaning materials, equipment, material and personal safety requirements
- manufacturer/component supplier/company specifications
- trim/fabric material types and their application
- selection procedures to determine trim/fabric material requirements
- methods of attachment of trim/fabric materials
- work organisation and planning processes

<b>REQUIRED SKILLS AND KNOWLEDGE</b>

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- completing preparatory activity in a systematic manner
- selecting trim/fabric materials for a range of specified jobs
- determine attachment methods to be used for a range of specified jobs.

#### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian Standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to selection and determination of attachment methods of trim/fabric materials
  - equipment, hand and power tooling appropriate to selection and determination of attachment methods of trim/fabric materials
  - activities covering mandatory task requirements
  - specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also

**EVIDENCE GUIDE**

	<p>reinforce the integration of key competencies.</p> <ul style="list-style-type: none"><li>• Assessment may be applied under project-related conditions and require evidence of process.</li><li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li><li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li><li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li></ul>
--	--

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Methods

Methods to be considered are to include:

- clamping, crimping, gluing and sewing

#### Trim/fabric materials

Trim/fabric materials may be attached to:

- passenger/commercial vehicles
- plant and agricultural equipment
- recreational equipment
- mining equipment
- marine craft and aircraft

#### WHS

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:

- protective clothing and equipment
- use of tooling and equipment
- workplace environment and safety
- handling of material
- use of firefighting equipment
- enterprise first aid
- hazard control and hazardous material and substances

#### Personal protective equipment

Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices

#### Safe operating procedures

Safe operating procedures are to include, but are not limited to:

- operational risk assessment and treatments associated with electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors

<b>RANGE STATEMENT</b>	
<b>Emergency procedures</b>	<p>Emergency procedures related to this unit are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• extinguishing fires</li> <li>• enterprise first aid requirements</li> <li>• worksite evacuation</li> </ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including method, process and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal safety needs, are observed throughout the work.</p> <p>1.4. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.5. Procedures are determined to minimise task time.</p>
2. Select adhesive	<p>2.1. Information is accessed and interpreted from manufacturer/component supplier specifications.</p> <p>2.2. Adhesives are selected according to material type and adhesive produce/manufacturer/component supplier recommendations.</p> <p>2.3. Activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
3. Prepare surfaces and apply adhesive	<p>3.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>3.2. Adhesive surface preparation and application procedures are carried out in accordance with adhesive product/ manufacturer/component supplier specifications.</p> <p>3.3. Work is completed without causing damage to component or system.</p> <p>3.4. Activities are carried out according to industry regulations/ guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste and scrap is removed following workplace procedure.</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
	4.6.Tooling and equipment is maintained in accordance with workplace procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for selection, preparation and application of adhesives
- technical literacy and communication skills sufficient to interpret and apply common industry terminology, and interpret technical information and specifications
- research and interpretive skills to locate, interpret and apply operational and safety information
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plain English literacy and communication skills in relation to dealing with others involved in the work
- questioning and active listening skills, for example when obtaining information for selection, preparation and application of adhesives
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking or workflow interruptions
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to complete tests and measurements to determine selection, preparation and application of adhesives
- use pre-checking and inspection techniques to anticipate planning and scheduling problems, avoid wastage of time and material
- manipulative and dexterity skills to perform the preparation and application of adhesives
- problem-solving skills for a range of differing procedural issues
- use workplace technology related to selection and application of trim/fabric adhesives, including the use of specialist tooling and equipment, measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS cleaning materials, equipment, material and personal safety requirements
- technical information
- product safety requirements
- manufacturer/component supplier/company policies

**REQUIRED SKILLS AND KNOWLEDGE**

- adhesive types and their application
- adhesive selection, preparation and application procedures
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- selecting and applying a range of trim/fabric adhesives
- completing workplace records.

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian Standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to selection and application of trim/fabric adhesives
  - equipment, hand and power tooling appropriate to selection and application of trim/fabric adhesives
  - activities covering mandatory task requirements
  - specifications and work instructions.

##### Method of assessment

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine work requirements, including method, material and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal protection needs are observed throughout the work.</p> <p>1.4. Material for work is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the work.</p>
2. Clean vehicle internal and external plastic trim and fittings	<p>2.1. Tooling and equipment are selected and used according to workplace methods and customer requirements.</p> <p>2.2. Cleaning agents are selected and used according to plastic trim and fitting types, workplace methods and product manufacturer/component supplier recommendations.</p> <p>2.3. Plastic trim and fittings are cleaned according to workplace/customer and product manufacturer/component supplier prescribed methods and procedures.</p> <p>2.4. Cleaning is completed without causing damage to component or system.</p> <p>2.5. Vehicle plastic trim and fittings are cleaned according to industry standards/regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p> <p>2.6. Cleaning agents are stored according to manufacturer/component supplier recommendations and regulatory requirements.</p>
3. Finish vehicle internal and external plastic trim and fittings	<p>3.1. Tooling and equipment are selected and used according to workplace methods and customer requirements.</p> <p>3.2. Finishing agents are selected and used according to plastic trim and fitting types, workplace methods and product manufacturer/component supplier recommendations.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.3. Plastic trim and fittings are finished according to workplace/customer and product manufacturer/component supplier prescribed methods and procedures.</p> <p>3.4. Finishing is completed without causing damage to component or system.</p> <p>3.5. Vehicle plastic trim and fittings are finished according to industry standards/regulations/guidelines, WHS requirements, legislation and enterprise procedures/ policies.</p> <p>3.6. Finishing agents are stored according to manufacturer/ component supplier recommendations and regulatory requirement.</p>
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste material is removed following workplace and environmental procedure.</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for cleaning and finishing vehicle internal and external plastic trim and fittings
- identify safety precautions and recommended applications and procedures
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- read and interpret product labels/directions
- listen to and follow verbal instructions
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use mathematical ideas and techniques to complete measurements and estimate material requirements required for the work, including the measuring and mixing cleaning and finishing material/fluids
- use workplace technology related to the cleaning and finishing of plastic trim fittings, including the use of measuring equipment and communication devices and the reporting/ documenting of results

#### Required knowledge

Required knowledge includes:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental requirements for storage, handling and disposal of substances
- material safety data sheets
- types of vehicle body plastics, trim and fittings
- cleaning agents and their recommended applications
- finishing agents and their recommended applications
- cleaning and finishing procedures for internal and external vehicle body plastic trim and fittings

**REQUIRED SKILLS AND KNOWLEDGE**

- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

- It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:
- observing safety procedures and requirements
  - communicating effectively with others involved in or affected by the work
  - selecting methods and techniques appropriate to the circumstances
  - completing preparatory activity in a systematic manner
  - selecting and using material and equipment
  - cleaning and finishing of a range of internal and external vehicle body plastic trim and fittings.

#### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian Standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to the cleaning and finishing of plastic trim fittings
  - equipment, hand and power tooling appropriate to the cleaning and finishing of plastic trim fittings
  - activities covering mandatory task requirements
  - specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also

**EVIDENCE GUIDE**

	<p>reinforce the integration of key competencies.</p> <ul style="list-style-type: none"> <li>• Assessment may be applied under project-related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Methods**

Methods are to include:

- manual or machine assisted cleaning and finishing

**WHS**

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:

- protective clothing and equipment
- use of tooling and equipment
- workplace environment and safety

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• handling of material</li> <li>• use of firefighting equipment</li> <li>• enterprise first aid</li> <li>• hazard control and hazardous material and substances</li> </ul>
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices
<b>Safe operating procedures</b>	<p>Safe operating procedures are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors</li> </ul>
<b>Emergency procedures</b>	<p>Emergency procedures related to this unit are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• emergency shutdown and stopping of equipment</li> <li>• extinguishing fires</li> <li>• enterprise first aid requirements</li> <li>• worksite evacuation</li> </ul>
<b>Environmental requirements</b>	<p>Environmental requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• waste management, noise, dust and clean-up management</li> </ul>
<b>Quality requirements</b>	<p>Quality requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• regulations, including Australian standards</li> <li>• internal company quality policies and standards</li> <li>• enterprise operations and procedures</li> </ul>
<b>Statutory/regulatory authorities</b>	<p>Statutory/regulatory authorities may include:</p> <ul style="list-style-type: none"> <li>• federal, state/territory and local authorities administering Acts, regulations and codes of practice</li> </ul>
<b>Materials</b>	Materials may include:

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• cloths</li> <li>• brushes</li> <li>• finishing agents</li> <li>• cleaning agents</li> </ul>
<b>Communications</b>	<p>Communications are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers</li> </ul>
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets (MSDS), diagrams or sketches</li> <li>• safe work procedures related to the cleaning and finishing of plastic trim fittings</li> <li>• regulatory/legislative requirements pertaining to automotive painting and finishing</li> <li>• engineer's design specifications and instructions</li> <li>• organisation work specifications and requirements</li> <li>• instructions issued by authorised enterprise or external persons</li> <li>• Australian standards</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine work requirements, including method, material and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal protection needs are observed throughout the work.</p> <p>1.4. Material for work is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the work.</p>
2. Clean vehicle interior trim and seats	<p>2.1. Tooling and equipment are selected and used according to workplace methods and customer requirements.</p> <p>2.2. Cleaning agents are selected according to trim and seat fabric type, workplace methods and product/fabric manufacturer/component supplier recommendations.</p> <p>2.3. Cleaning agents are used and stored according to manufacturer/component supplier recommendations and regulatory requirements.</p> <p>2.4. Interior trim and seats are cleaned according to workplace/ customer and product/fabric manufacturer/component supplier prescribed methods and procedures.</p> <p>2.5. Cleaning is completed without causing damage to component or system.</p> <p>2.6. Interior trim and seats are cleaned according to industry standards/regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
3. Finish vehicle interior trim and seats	<p>3.1. Tooling and equipment are selected and used according to workplace methods and customer requirements.</p> <p>3.2. Finishing agents are selected according to trim and seat fabric type, workplace methods and product/fabric manufacturer/component supplier recommendations.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.3.Finishing agents are used and stored according to manufacturer/component supplier recommendations and regulatory requirement.</p> <p>3.4.Interior trim and seats are finished according to workplace/ customer and product/fabric manufacturer/component supplier prescribed methods and procedures.</p> <p>3.5.Interior trim and seats are finished according to industry standards/regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
4. Clean up work area and maintain equipment	<p>4.1.Material that can be reused is collected and stored.</p> <p>4.2.Waste material is removed following workplace and environmental procedure.</p> <p>4.3.Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4.Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>4.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>4.6.Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for cleaning and finishing vehicle interior trim and seats
- identifying safety precautions
- identifying recommended applications and procedures
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- reading and interpreting product labels/directions
- listening and following verbal instructions
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to complete measurements and estimate material requirements required for the work
- measuring and mixing cleaning and finishing material/fluids
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology related to the cleaning and finishing of vehicle interior trim and seats, including the use of measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- material safety data sheets
- cleaning agents and their recommended applications
- finishing agents and their recommended applications
- types of trim/components, including seats carpets, mats, dash, arm rests, consoles, door trim
- cleaning and finishing procedures for vehicle interior trim and seats
- enterprise quality procedures
- work organisation and planning processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- selecting and using material and equipment
- cleaning and finishing a range of vehicle interior trim and seats.

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to the cleaning and finishing of vehicle interior trim and seats
  - equipment, hand and power tooling appropriate to the cleaning and finishing of vehicle interior trim and seats
  - activities covering mandatory task requirements
  - specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of AUR12 Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with

**EVIDENCE GUIDE**

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including method, material and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal protection needs are observed throughout the work.</p> <p>1.4. Material for removal is selected.</p> <p>1.5. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.6. Procedures are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Remove seats and fittings	<p>2.1. Protective clothing and equipment appropriate to replacement activities are used.</p> <p>2.2. Seats and fittings are removed using approved methods, tooling and equipment.</p> <p>2.3. Removal activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
3. Replace seats and fittings	<p>3.1. Protective clothing and equipment appropriate to the replacement activities are used.</p> <p>3.2. Seats and fittings are replaced using approved methods, tooling and equipment.</p> <p>3.3. Replacement activities are carried out according to industry regulations/guidelines, WHS requirements, legislation and enterprise procedures/policies.</p>
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste and scrap is removed following workplace and environmental procedure.</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
	4.6.Tooling is maintained in accordance with workplace procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for removing and replacing seats and internal fittings
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to calculate time, apply accurate measurements, calculate material requirements and establish quality checks
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology related to removing and replacing seats and internal fittings, including the use of measuring equipment, computerised technology and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS and environmental regulations/requirements, equipment, material and personal safety requirements
- use of tooling and equipment
- manual handling techniques
- removal and replacement/refitting procedures for seats and internal fittings, including electrical disconnection and reconnection methods and procedures
- enterprise quality procedures
- work organisation and planning processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- removal and replacement of a range of seats and internal fittings.

#### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to removing and replacing seats and internal fittings
  - equipment, hand and power tooling appropriate to removing and replacing seats and internal fittings
  - activities covering mandatory task requirements
  - specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.

**EVIDENCE GUIDE**

	<ul style="list-style-type: none"> <li>• Assessment may be applied under project-related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. ### Modification History

Release	Comment
Release 1	Replaces AURV330964A Remove and replace vehicle head lining Unit code updated to meet policy requirements Reference to OHS legislation replaced with new WHS legislation Licensing statement added to unit descriptor

### Unit Descriptor

Unit descriptor	<p>This unit covers the competence required to remove and replace vehicle head lining to facilitate trim repairs/replacement.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	--

### Application of the Unit

Application of the unit	<p>The unit includes identification and confirmation of work requirement, preparation for work, removal and replacement of head lining to specification and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
-------------------------	--

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<ul style="list-style-type: none"><li>1.1. Work instructions are used to determine the job requirements, including method, materials and equipment.</li><li>1.2. Job specifications are read and interpreted.</li><li>1.3. WHS requirements, including personal protection needs are observed throughout the work.</li><li>1.4. Material for removal is selected.</li><li>1.5. Equipment and tooling are identified and checked for safe and effective operation.</li><li>1.6. Procedures are determined to minimise waste time.</li><li>1.7. Procedures are identified for maximising energy efficiency while completing the job.</li></ul>
2. Remove vehicle head lining	<ul style="list-style-type: none"><li>2.1. Head lining is removed using vehicle manufacturer/ component supplier approved methods, tooling and equipment.</li><li>2.2. Removal activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</li><li>2.3. Removal is completed without causing damage to any component or system.</li></ul>
3. Replace vehicle head lining	<ul style="list-style-type: none"><li>3.1. Head lining is replaced using vehicle manufacturer/ component supplier approved methods, tooling and equipment.</li><li>3.2. Replacement activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</li><li>3.3. Replacement is completed without causing damage to any component or system.</li></ul>
4. Clean up work area and maintain equipment	<ul style="list-style-type: none"><li>4.1. Material that can be reused is collected and stored.</li><li>4.2. Waste and scrap is removed following workplace and environmental procedure.</li><li>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</li><li>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</li><li>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</li></ul>

ELEMENT	PERFORMANCE CRITERIA
	4.6.Tooling is maintained in accordance with workplace procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for removing and replacing vehicle head lining
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to calculate time, apply accurate measurements, calculate material requirements and establish quality checks
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use workplace technology related to removal and replacement of vehicle head lining, including the use of specialist tooling, measuring equipment and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- types of head linings, materials and handling precautions
- removal and replacement/refitting procedures, including electrical disconnection and reconnection methods and procedures
- use of tooling and equipment
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- removing and replacing a range of vehicle head lining to specification.

#### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to removal and replacement of vehicle head lining
- equipment, hand and power tooling appropriate to removal and replacement of vehicle head lining
- activities covering mandatory task requirements
- specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.

**EVIDENCE GUIDE**

	<ul style="list-style-type: none"> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Removal and replacement methods**

Removal and replacement methods are to include:

- visual, mechanical and physical examinations
- removal and replacement/refitting of vehicle head lining
- electrical disconnection and reconnection.

**WHS**

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid,

<b>RANGE STATEMENT</b>	
	hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling and special equipment/tooling for removal and replacement/ refitting.
<b>Materials</b>	Materials may include vinyl, fabric, foam, adhesives and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or

RANGE STATEMENT	
	instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"><li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li><li>• safe work procedures related to removal and replacement of vehicle head lining</li><li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including method, process and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including personal safety needs, are observed throughout the work.</p> <p>1.4. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.5. Procedures are determined to minimise task time.</p>
2. Remove seat	<p>2.1. Information is accessed and interpreted.</p> <p>2.2. Removal procedures are carried out in accordance with manufacturer/component supplier procedures.</p> <p>2.3. Removal procedures are completed within established industry and enterprise guidelines.</p> <p>2.4. Removal activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
3. Remove seat trim and padding	<p>3.1. Information is accessed and interpreted.</p> <p>3.2. Removal procedures are carried out in accordance with manufacturer/component supplier procedures.</p> <p>3.3. Removal procedures are completed within established industry and enterprise guidelines.</p> <p>3.4. Removal activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
4. Repair seat frame	<p>4.1. Information is accessed and interpreted.</p> <p>4.2. Repairs are completed using tooling and equipment.</p> <p>4.3. Repairs are carried out in accordance within established industry and enterprise practices and guidelines.</p> <p>4.4. Repair processes and materials meet manufacturer/component supplier standards and road worthy requirements.</p> <p>4.5. All activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
5. Refit and adjust seat trim and padding	<p>5.1. Information is accessed and interpreted.</p> <p>5.2. Refitting procedures are carried out in accordance with manufacturer/component supplier procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>5.3.Refitting and adjustment procedures are completed within established industry and enterprise guidelines.</p> <p>5.4.Refitting and adjustment activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
6. Reinstall seat	<p>6.1.Information is accessed and interpreted from manufacturer/component supplier procedures.</p> <p>6.2.Reinstallation procedures are carried out in accordance with manufacturer/component supplier procedures.</p> <p>6.3.Reinstallation and testing procedures are completed within established industry and enterprise guidelines.</p> <p>6.4.Reinstallation and testing activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
7. Clean up work area and maintain equipment	<p>7.1.Material that can be reused is collected and stored.</p> <p>7.2.Waste and scrap is removed following workplace procedure.</p> <p>7.3.Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>7.4.Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>7.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>7.6.Tooling and equipment is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for seat and trim removal and reinstalling/refitting, and frame repair procedures
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking or workflow interruptions
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to complete tests and measurements to determine repair requirements
- use pre-checking and inspection techniques to anticipate planning and scheduling problems, avoid wastage of time and material
- manipulative and dexterity skills to perform trimming activities
- problem-solving skills for a range of differing procedural issues
- use workplace technology related to repair of seat frames, including the use of specialist tooling, measuring equipment, computerised technology and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- material safety requirements/material safety data sheets
- technical and legal requirements and implications/ roadworthy requirements
- manufacturer/component supplier/company policies
- types of vehicle seating and their application, including function, properties, application, handling and maintenance
- vehicle seating construction, including component types, spring and suspension systems
- seat removal and replacement methods and safety requirements
- seat dismantling and assembling, including trim, padding, springs, runners, recliners and refitting and adjustment procedures
- types and use of various frame repair materials
- seat frame repair, reinforcing and testing procedures

**REQUIRED SKILLS AND KNOWLEDGE**

- work organisation and planning processes
- enterprise quality procedures

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- completing a range of seat removal and reinstallation tasks
- completing a range of trim and padding removal, refitting and adjustment tasks
- completing a range of seat frame repair and testing tasks.

#### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to repair of seat frames
- equipment, hand and power tooling appropriate to repair of seat frames
- activities covering mandatory task requirements
- specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with

**EVIDENCE GUIDE**

	<p>questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</p> <ul style="list-style-type: none"> <li>• Assessment may be applied under project related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul>
<b>Guidance information for assessment</b>	

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Methods</b>	Methods are to include dismantling, assembling, reinforcing, removing, refitting, welding, riveting, cutting, forming and bolting.
<b>Seat frames</b>	Seat frames may be in marine craft, aircraft, heavy vehicle and equipment.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment,

<b>RANGE STATEMENT</b>	
	use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power/ air tooling, specialist tooling for trim/cover removal and refitting, seat dismantling/assembling, staple gun, clamps, pop rivet kit, punch and die set, hog ring pliers, hacksaw, sander, staple and tack remover, attachments, W ferrules, zig zag spring and spring

<b>RANGE STATEMENT</b>	
	edge wire.
<b>Materials</b>	Materials may include wire electrodes, metals, sealants, paint, argon/CO <sub>2</sub> , elastic webbing, foam, high-density foam, spare parts and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine the job requirements, including method, process and equipment.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including personal safety needs, are observed throughout the work.</p> <p>1.4. Equipment and tooling are identified and checked for safe and effective operation.</p> <p>1.5. Procedures are determined to minimise task time.</p>
2. Carry out hand sewing procedures	<p>2.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>2.2. All sewing procedures are carried out in accordance with workplace/industry standard practices.</p> <p>2.3. All sewing procedures are completed within established industry/enterprise guidelines.</p> <p>2.4. All activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
3. Carry out machine sewing procedures	<p>3.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>3.2. All sewing procedures are carried out in accordance with workplace/industry practices and manufacturer/component supplier specifications.</p> <p>3.3. All sewing procedures are completed within established industry/enterprise guidelines.</p> <p>3.4. All activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored.</p> <p>4.2. Waste and scrap is removed following workplace procedure.</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>4.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
	4.6.Tooling and equipment is maintained in accordance with workplace procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for hand and machine sewing operations
- technical literacy and communication skills sufficient to interpret and apply common industry terminology, and interpret technical information and specifications
- research and interpretive skills to locate, interpret and apply operational and safety information
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plain English literacy and communication skills in relation to dealing with others involved in the work
- questioning and active listening skills, for example when obtaining information regarding sewing procedures and equipment operation
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking or workflow interruptions
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to complete tests and measurements to determine sewing requirements
- use pre-checking and inspection techniques to anticipate planning and scheduling problems, avoid wastage of time and material
- manipulative and dexterity skills to perform sewing operations
- problem solving skills for a range of differing procedural issues
- use workplace technology related to carrying out sewing operations, including the use of specialist tooling, measuring equipment, computerised technology and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- technical information
- equipment operation and safety requirements
- manufacturer/component supplier/company policies
- material matching procedures

**REQUIRED SKILLS AND KNOWLEDGE**

- machine sewing procedures
- hand sewing procedures
- sewing methods appropriate to various material types
- work organisation and planning processes
- enterprise quality procedures

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- interpreting methods (i.e. hand or machine sewing)
- matching materials
- hand sewing a range of products
- machine sewing a range of products.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to carrying out sewing operations
- equipment, hand and power tooling appropriate to carrying out sewing operations
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with

**EVIDENCE GUIDE**

	<p>questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</p> <ul style="list-style-type: none"><li>• Assessment may be applied under project related conditions and require evidence of process.</li><li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li><li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. ## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Methods</b>	Methods are to include hand sewing, machine sewing, tufting, buttoning, matching of materials, measuring, cutting and overlocking.
<b>Sewing</b>	Sewing may be required for components in recreational equipment, marine craft, aircraft, heavy vehicle, plant and agricultural equipment.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and

<b>RANGE STATEMENT</b>	
	clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power/ air tooling, and specialist tooling for dismantling/ assembly, sewing machine, scissors, needles, knives, straight edge, tape and square.
<b>Materials</b>	Materials may include spare parts, lubricants and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>• safe work procedures related to carrying out sewing operations</li> <li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li> <li>• engineer's design specifications and instructions</li> <li>• organisation work specifications and requirements</li> <li>• instructions issued by authorised enterprise or external persons</li> <li>• Australian Standards.</li> </ul>

## AURVTT3013 Fabricate loose and fitted covers

### Modification History

Release	Comment
Release 1	<p>Replaces AURV331423AA Fabricate and install loose and fitted covers</p> <p>Unit code updated to meet policy requirements</p> <p>Reference to OHS legislation replaced with new WHS legislation</p> <p>Licensing statement added to unit descriptor</p>

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit covers the competence required to fabricate (measure, mark out, cut and make up/assemble) and install loose and fitted covers.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>The unit includes identification and confirmation of work requirement, preparation for work, measuring, marking out and cutting loose and fitted covers, assembling, installing and fastening loose and fitted covers and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
--------------------------------	---

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for fabrication work	<p>1.1.Information for work is accessed from manufacturer/component supplier specifications and interpreted.</p> <p>1.2.WHS requirements, including personal protection needs, are observed throughout the work.</p> <p>1.3.Materials are selected and inspected for quality.</p> <p>1.4.Components, tooling and equipment for fabrication are identified, selected and prepared in accordance with worksite procedures.</p> <p>1.5.Procedures are determined to minimise waste material.</p> <p>1.6.Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Measure, mark out and cut loose and fitted covers	<p>2.1.Information for measuring, marking out and cutting is interpreted and followed.</p> <p>2.2.Measurements are accessed from manufacturer/component supplier specifications and/or directly measured fitting requirements.</p> <p>2.3.Marking out and cutting are carried out and completed in accordance with work plan and specifications.</p> <p>2.4.Measurements, marking out and cutting are checked for conformity to specifications in accordance with worksite procedures.</p>
3. Make up/assemble loose and fitted covers	<p>3.1.Information for following production process is accessed from manufacturer/component supplier specifications, interpreted and followed.</p> <p>3.2.Make up/assembly of loose and fitted covers is carried out and completed in accordance with work plan and specifications.</p> <p>3.3.Damage to equipment or machinery is avoided.</p> <p>3.4.Production is checked for conformity to specifications in accordance with worksite procedures.</p>
4. Install and fasten loose and fitted covers	<p>4.1.Information for installation and fastening is interpreted and followed.</p> <p>4.2.Installation and fastening processes and methods are accessed from manufacturer/component supplier specifications and/or determined from existing fitting.</p> <p>4.3.Installation and fastenings are checked for</p>

ELEMENT	PERFORMANCE CRITERIA
	conformity to manufacturer/component supplier specifications and vehicle operational requirements.
5. Clean up work area and maintain equipment	<p>5.1. Material that can be reused is collected and stored.</p> <p>5.2. Waste and scrap is removed following workplace procedure.</p> <p>5.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>5.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>5.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>5.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for fabricating and installing loose and fitted covers
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to complete measurements and estimate material requirements for the work
- use pre-checking and inspection techniques to anticipate planning and scheduling problems, avoid wastage of time and material
- use workplace technology related to:
  - access, interpret and apply technical information
  - use tooling and equipment and fabricate and install loose and fitted covers

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements and personal safety requirements
- equipment safety requirements
- types of covers, materials and their application
- fastener types, application and positioning
- adhesives and glues/material safety data information
- production methods and procedures, including planning, measuring, marking out, cutting and making up/assembling of loose and fitted covers
- fastening and fitting procedures
- technical information
- work organisation and planning processes
- enterprise quality procedures

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- interpreting and communicating task information
- operating machinery
- measuring, marking out, cutting and making up/ assembling loose and fitted covers
- following production processes
- monitoring production processes and outputs
- completing post-activity housekeeping.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to fabrication and installation of loose and fitted covers
- equipment, hand and power tooling appropriate to fabrication and installation of loose and fitted covers
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.

**EVIDENCE GUIDE**

- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.
- Assessment may be applied under project related conditions and require evidence of process.
- Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
- It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.
- Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Methods</b>	<p>Methods may include:</p> <ul style="list-style-type: none"> <li>material selection, estimation of quantity</li> <li>hand sewing, machine sewing, measuring, marking out, cutting, mechanical fastening, shaping, bonding, gluing, assembling and fitting.</li> </ul>
<b>Variables</b>	Other variables may include recreational equipment, marine craft, aircraft, heavy vehicles, trailers, plant and agricultural equipment.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid

<b>RANGE STATEMENT</b>	
	requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power tooling, air tooling, specialist tooling, sewing machines, needles, cutting equipment (scissors, knives), measuring and marking-out equipment (straight edge, tape, square, chalk).
<b>Materials</b>	Materials may include thread, fasteners, rope, zippers/ slides, adhesives, glues, plastic products, fabric, canvas and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>• safe work procedures related to fabrication and installation of loose and fitted covers</li> <li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li> <li>• engineer's design specifications and instructions</li> </ul>

RANGE STATEMENT	
	<ul style="list-style-type: none"><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for fabrication work	<p>1.1.Information for work is accessed from manufacturer/component supplier specifications and interpreted.</p> <p>1.2.WHS requirements, including personal protection needs, are observed throughout the work.</p> <p>1.3.Materials are selected and inspected for quality.</p> <p>1.4.Components, tooling and equipment for fabrication are identified, selected and prepared in accordance with worksite procedures.</p> <p>1.5.Procedures are determined to minimise waste material.</p> <p>1.6.Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Measure, mark out and cut canvas products	<p>2.1.Information for measuring, marking out and cutting is interpreted and followed.</p> <p>2.2.Measurements are accessed from manufacturer/component supplier specifications and/or directly measured fitting requirements.</p> <p>2.3.Marking out and cutting are carried out and completed in accordance with work plan and specifications.</p> <p>2.4.Measurements, marking out and cutting are checked for conformity to specifications in accordance with worksite procedures.</p>
3. Make up/assemble canvas products	<p>3.1.Information for following production process is accessed from manufacturer/component supplier specifications, interpreted and followed.</p> <p>3.2.Make up/assembly of canvas products is carried out and completed in accordance with work plan and specifications.</p> <p>3.3.Damage to equipment or machinery is avoided.</p> <p>3.4.Production is checked for conformity to specifications in accordance with worksite procedures.</p>
4. Install canvas products	<p>4.1.Information for installing is interpreted and applied.</p> <p>4.2.Installing is carried out to enterprise and/or manufacturer/ component supplier specifications.</p> <p>4.3.Installing is carried out without damage to equipment.</p>
5. Clean up work area and maintain	<p>5.1.Material that can be reused is collected and stored.</p>

ELEMENT	PERFORMANCE CRITERIA
equipment	<p>5.2.Waste and scrap is removed following workplace procedures.</p> <p>5.3.Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>5.4.Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>5.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>5.6.Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for fabricating and installing canvas products
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to complete measurements and estimate material requirements for the work
- use pre-checking and inspection techniques to anticipate planning and scheduling problems, avoid wastage of time and material
- use workplace technology related to accessing, interpreting and applying technical information and using tooling and equipment, and fabricating and installing canvas products

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements and personal safety requirements
- equipment safety requirements
- types, characteristics and applications of canvas
- adhesives/glues/material safety data sheets information
- job planning and drawing
- production methods and procedures, including measuring, marking out, cutting and make up/assembly of canvas products
- installation processes and techniques
- technical information
- enterprise quality procedures
- work organisation and planning processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- applying WHS policy and procedures
- operating machinery
- measuring, marking out, cutting and making up/ assembling a range of canvas products
- installing a range of canvas products
- completing post-activity housekeeping.

#### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to fabricating and installing canvas products
- equipment, hand and power tooling appropriate to fabricating and installing canvas products
- activities covering mandatory task requirements
- specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.

**EVIDENCE GUIDE**

- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.
- Assessment may be applied under project related conditions and require evidence of process.
- Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
- It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.
- Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Methods</b>	Methods are to include: <ul style="list-style-type: none"> <li>• quantity estimation, canvas selection</li> <li>• hand sewing, machine sewing</li> <li>• measuring, marking out, cutting, reinforcing, edge finishing, mechanical fastening, shaping, bonding, gluing, assembling and installing.</li> </ul>
<b>Canvas products/covers</b>	Canvas products/covers may be for recreational equipment, marine craft, aircraft, heavy vehicles, plant and agricultural equipment.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid

<b>RANGE STATEMENT</b>	
	requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power tooling, air tooling, specialist tooling, sewing machines, needles, cutting equipment (scissors, knives), measuring and marking out equipment (straight edge, tape, square, chalk).
<b>Materials</b>	Materials may include adhesives, glues, canvas, thread, rope, window fabric, jute webbing, sailtrack, fasteners and zipper/slides.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>• safe work procedures related to fabricating and installing canvas products</li> <li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li> <li>• engineer's design specifications and instructions</li> </ul>

RANGE STATEMENT	
	<ul style="list-style-type: none"><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>

## AURVTT3016 Fabricate frame structures

### Modification History

Release	Comment
Release 1	Replaces AURV331423DA Fabricate and install frame structures Unit code updated to meet policy requirements Minor changes to unit title Reference to OHS legislation replaced with new WHS legislation Licensing statement added to unit descriptor

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the competence required to fabricate (measure, select material and attachments, cut, make up/assemble and fit) and install frame structures.  Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	The unit includes identification and confirmation of work requirement, preparation for work, measuring frame requirements, selecting materials, assembling, fitting and installation of frame structure and completion of work finalisation processes, including clean-up and documentation.  Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for fabrication work	<p>1.1.Information for work is accessed from manufacturer/ component supplier specifications and interpreted.</p> <p>1.2.WHS requirements, including personal protection needs, are observed throughout the work.</p> <p>1.3.Materials are selected and inspected for quality.</p> <p>1.4.Components, tooling and equipment for fabrication are identified, selected and prepared in accordance with worksite procedures.</p> <p>1.5.Procedures are determined to minimise waste material.</p> <p>1.6.Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Measure job and determine frame requirements	<p>2.1.Information for measuring and determining frame requirements is interpreted and followed.</p> <p>2.2.Measurements are accessed from manufacturer/component supplier specifications and/or from directly measured fitting requirements.</p> <p>2.3.Frame dimensions are confirmed against job/customer requirements.</p>
3. Select frame materials and attachments/joiners	<p>3.1.Information for selection of materials and attachments/ joiners is interpreted and followed.</p> <p>3.2.Materials type and size are selected according to frame dimension, in-service environment and customer requirements.</p> <p>3.3.Attachment methods and materials are selected according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
4. Cut materials, fit frame attachments/joiners and assemble frame	<p>4.1.Information for cutting materials, fitting of attachments/ joiners and assembly is interpreted and followed.</p> <p>4.2.Tooling and equipment are used for cutting and fitting attachments/joiners.</p> <p>4.3.Cutting, attachment/joiner fitting and assembly is carried out and completed in accordance with work plan and specifications.</p> <p>4.4.Component lengths, fittings and frame assembly dimensions are checked for conformity to specifications in accordance with worksite procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>4.5.All cutting, fitting and assembly operations are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.</p>
<p>5. Fit fabricated frame structure</p>	<p>5.1.Fitting is completed without causing damage to equipment, component/system or machinery.</p> <p>5.2.Information for fitting fabricated frame is interpreted and followed.</p> <p>5.3.Frame fitting is carried out and completed in accordance with work plan and specifications.</p> <p>5.4.Production is checked for conformity to specifications in accordance with worksite procedures.</p>
<p>6. Install and fasten frame structure</p>	<p>6.1.Information for installation and fastening is interpreted and followed.</p> <p>6.2.Installation and fastening processes and methods are accessed from manufacturer/component supplier specifications and/or determined from existing fitting.</p> <p>6.3.Installation and fastenings are checked for conformity to manufacturer/component supplier specifications and vehicle operational requirements.</p>
<p>7. Clean up work area and maintain equipment</p>	<p>7.1.Material that can be reused is collected and stored.</p> <p>7.2.Waste and scrap is removed following workplace procedure.</p> <p>7.3.Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>7.4.Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>7.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>7.6.Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for fabricating and installing frame structures
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to complete measurements and estimate material requirements for work
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use workplace technology related to fabrication and installation of frame structures, including the use of measuring equipment, computerised technology and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements and personal safety requirements
- technical information
- equipment safety requirements/operation of tube bending and wire swaging equipment
- types of frames, fittings and fasteners
- frame positioning and fixing methods and procedures
- types of frame materials and their application
- production methods and procedures, including frame design, material and hardware selection, measuring, cutting and assembly/fitting up
- enterprise quality procedures
- work organisation and planning processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- fabricating a range of frame structures following production processes
- measuring job and determining frame requirements
- selecting frame materials and attachments
- assembling and fitting/attaching frame
- monitoring production processes, specifications and outputs
- completing post-activity housekeeping.

#### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to fabrication and installation of frame structures
- equipment, hand and power tooling appropriate to fabrication and installation of frame structures
- activities covering mandatory task requirements
- specifications and work instructions.

**EVIDENCE GUIDE****Method of assessment**

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.
- Assessment may be applied under project related conditions and require evidence of process.
- Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
- It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.
- Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Methods</b>	<p>Methods are to include:</p> <ul style="list-style-type: none"> <li>material selection, measuring, cutting, mechanical fastening, wire swaging, shaping, bending, riveting, and fitting</li> <li>dismantling, assembling, fitting, fixing.</li> </ul>
<b>Frame structures</b>	Frame structures may be those in recreational equipment, marine craft, aircraft, heavy vehicles, plant and agricultural equipment.
<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.

<b>RANGE STATEMENT</b>	
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power tooling, air tooling, specialist tooling, rivet gun and rivets, machines, drills, cutting equipment, measuring and assembly equipment (straight edge, tape, square).
<b>Materials</b>	Materials may include stainless steel hardware, bow sets, fasteners, stainless steel wire and tube, and aluminium tube.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>• safe work procedures related to fabrication and installation of frame structures</li> <li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li> <li>• engineer's design specifications and instructions</li> <li>• organisation work specifications and</li> </ul>

**RANGE STATEMENT**

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for fabricating and installing vehicle hoods (soft tops)
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to complete measurements and estimate material requirements for the work
- use pre-checking and inspection techniques to anticipate planning and scheduling problems, avoid wastage of time and material
- use workplace technology related to fabrication and installation of hoods (soft tops), including the use of specialist tooling, measuring equipment, computerised technology and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements and personal safety requirements
- vehicle and equipment safety requirements
- technical information types of hoods (soft tops), materials and frames
- hood and soft top operation and components parts
- types of windows
- production methods, procedures, including measuring, marking out, cutting and making up/assembling (including sewing, joining and finishing)
- window fitting methods and procedures
- hood (soft top) installation and fastening methods and procedures, including vehicle preparation
- adhesives/glues/material safety data sheets information
- enterprise quality procedures
- work organisation and planning processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- measuring, marking out, cutting and making up/ assembling vehicle hoods (soft tops)
- installing and fastening a range of vehicle hoods (soft tops)
- completing post-activity housekeeping.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to fabrication and installation of hoods (soft tops)
- equipment, hand and power tooling appropriate to fabrication and installation of hoods (soft tops)
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of

**EVIDENCE GUIDE**

	<p>underpinning knowledge.</p> <ul style="list-style-type: none"><li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li><li>• Assessment may be applied under project related conditions and require evidence of process.</li><li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li><li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li><li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li></ul>
--	---

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>WHS</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulations/codes of practice and workplace policies and practices.
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.

<b>RANGE STATEMENT</b>	
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, power tooling, air tooling, specialist tooling, sewing machines, needles, cutting equipment (scissors, knives), measuring and marking out equipment (straight edge, tape, square, chalk).
<b>Materials</b>	Materials may include adhesives, glues, contact cement, vinyl, fabric, thread, reels, clear plastic, composite materials and fasteners.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>• safe work procedures related to fabrication and installation of hoods (soft tops)</li> <li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li> <li>• engineer's design specifications and instructions</li> <li>• organisation work specifications and requirements</li> <li>• instructions issued by authorised enterprise or external persons</li> <li>• Australian Standards.</li> </ul>

## AURVTT3019 Fabricate and install canopies and curtains

### Modification History

Release	Comment
Release 1	<p>Replaces AURV331423GA Fabricate and install canopies and curtains</p> <p>Unit code updated to meet policy requirements</p> <p>Reference to OHS legislation replaced with new WHS legislation</p> <p>Licensing statement added to unit descriptor</p>

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit covers the competence required to fabricate (measure, mark out, cut and make up/assemble) and install canopies and curtains.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>The unit includes identification and confirmation of work requirement, preparation for work, measuring, marking out, cutting, assembling, installing and fastening canopies and curtains and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for fabrication work	<p>1.1.Information for work is accessed from manufacturer/component supplier specifications and interpreted.</p> <p>1.2.WHS requirements, including personal protection needs, are observed throughout the work.</p> <p>1.3.Materials are selected and inspected for quality.</p> <p>1.4.Components, tooling and equipment for fabrication are identified, selected and prepared in accordance with worksite procedures.</p> <p>1.5.Procedures to minimise waste material are determined.</p> <p>1.6.Procedures for maximising energy efficiency while completing the job are identified.</p>
2. Measure, mark out and cut canopies and curtains	<p>2.1.Information for measuring, marking out and cutting is interpreted and followed.</p> <p>2.2.Measurements are accessed from manufacturer/component supplier specifications and/or directly measured fitting requirements.</p> <p>2.3.Marking out and cutting are carried out and completed in accordance with work plan and specifications.</p> <p>2.4.Measurements, marking out and cutting are checked for conformity to specifications and customer requirements in accordance with worksite procedures.</p>
3. Make up/assemble canopies and curtains	<p>3.1.Production process information is accessed from manufacturer/component supplier specifications and workplace procedures and is interpreted and followed.</p> <p>3.2.Make up/assembly of canopies and curtains is carried out and completed in accordance with work plan and specifications.</p> <p>3.3.Damage to equipment or machinery is avoided.</p> <p>3.4.Production is checked for conformity to specifications in accordance with worksite procedures.</p>
4. Install and fasten canopies and curtains	<p>4.1.Information for installation and fastening is interpreted and followed.</p> <p>4.2.Installation and fastening processes and methods are accessed from manufacturer/component supplier specifications and/or determined from existing</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>fitting.</p> <p>4.3.Installation and fastenings are checked for conformity to manufacturer/component supplier specifications and vehicle operational requirements.</p>
5. Clean up work area and maintain equipment	<p>5.1.Material that can be reused is collected and stored.</p> <p>5.2.Waste and scrap is removed following workplace procedure.</p> <p>5.3.Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>5.4.Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>5.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>5.6.Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for fabricating and installing canopies and curtains
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to complete measurements and estimate material requirements for the work
- use pre-checking and inspection techniques to anticipate planning and scheduling problems, avoid wastage of time and material
- use workplace technology related to fabrication and installation of canopies and curtains, including the use of specialist tooling, measuring equipment, computerised technology and communication devices and the reporting/recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements and personal safety requirements
- equipment safety requirements
- technical information types of canopy and curtain materials and their application
- adhesives/glues/material safety data sheets information
- sewing procedures, including seams, binding and pockets
- production methods and procedures, including planning, measuring, trade drawing, marking out, cutting and making up/assembling
- fitting and fastening/attachment methods, processes, procedures and applications
- enterprise quality procedures
- work organisation and planning processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- fabricating canopies and curtains/following production processes
- measuring, marking out, cutting and making up/ assembling canopies and curtains
- fitting and fixing a range of canopies and curtains
- completing post-activity housekeeping.

##### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to fabrication and installation of canopies and curtains
- equipment, hand and power tooling appropriate to fabrication and installation of canopies and curtains
- activities covering mandatory task requirements
- specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and

**EVIDENCE GUIDE**

	<p>accuracy of performance together with application of underpinning knowledge.</p> <ul style="list-style-type: none"><li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li><li>• Assessment may be applied under project related conditions and require evidence of process.</li><li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li><li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. ## AURVTT3020 Select and use leather in trimming

### Modification History

Release	Comment
Release 1	New unit of competency

### Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes required to identify, select and use leather in a vehicle trimming environment.</p> <p>The unit involves establishing work requirements; preparing for the task; identifying and performing leather calculations and leather matching; understanding the leather tanning process; measuring, cutting, fabricating and attaching leather covers and trim to vehicle components; and clean-up and documentation.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	---

### Application of the Unit

Application of the unit	<p>Work applies to light and heavy vehicles, mobile plant and equipment, marine, motorcycles and recreational vehicles as well as aircraft.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
-------------------------	---

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions, <i>information and documents</i> are used to determine job requirements, including method, process and equipment</p> <p>1.2. <i>Workplace health and safety (WHS) requirements</i>, including <i>personal protective equipment</i> (PPE) and safety needs, are observed throughout the work</p> <p>1.3. Leather is selected and <i>checked</i> and quantities are calculated</p> <p>1.4. Appropriate <i>tools and equipment</i> are selected and checked for safe operation</p> <p>1.5. Appropriate trimming <i>materials</i> are selected and checked for quality</p> <p>1.6. Workplace <i>emergency procedures</i> are identified and followed when required</p>
2. Cut, fit and check leather	<p>2.1. <i>Leather characteristics</i> and types are identified and inspected</p> <p>2.2. Leather pieces are laid out in sequence according to developed cutting plan</p> <p>2.3. Leather pieces are cut according to vehicle plan using predetermined measurements or pattern</p> <p>2.4. Leather is worked to produce required range of trimming components for particular application</p> <p>2.5. Leather pieces are applied in line with particular application, ensuring appropriate leather is fitted to high-wear areas and trimmed components</p> <p>2.6. Leather is positioned and checked prior to being attached to ensure correct fit</p>
3. Attach leather to vehicle or component	<p>3.1. Leather is secured using appropriate fixing and <i>attaching procedures</i> according to manufacturer and component supplier specifications</p> <p>3.2. Leather is attached according to industry guidelines, WHS requirements, and <i>legislative and workplace policies and procedures</i></p>
4. Clean up work area and maintain equipment	<p>4.1. Leather material that can be reused is collected and stored according to workplace sustainability practices</p> <p>4.2. Waste and scrap leather are removed following workplace procedures</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable condition according to workplace procedures</p> <p>4.4. Faulty equipment is identified and tagged according to</p>

	<p>workplace requirements</p> <p>4.5.Operator maintenance is completed according to manufacturer and component supplier specifications and workplace procedures</p> <p>4.6.Tools and equipment are maintained according to workplace procedures</p>
--	---

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to communicate ideas and information to:
  - confirm work requirements and specifications
  - coordinate work with supervisor and other workers
  - report work problems
  - follow workplace verbal instructions
- initiative and enterprise skills to recognise a workplace problem or potential problem and take action
- learning skills to identify sources of information, assistance and expert knowledge to expand skills, knowledge and understanding
- literacy skills to:
  - understand quality procedures
  - read and follow information on cutting plan, written job instructions, specifications, standard operating procedures, charts, lists, drawings and other reference documents
  - obtain and record leather usage and measurements
  - document leather trimming procedure and required parts
- numeracy skills to interpret and apply metric and imperial systems of measurement when preparing material for cutting
- planning and organising skills to:
  - plan leather trimming job requirements following job specification
  - plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed on time
  - identify risk factors and take action to minimise them
- problem-solving skills to:
  - refer problems outside area of responsibility to appropriate person and suggest possible causes
  - seek information and assistance as required to solve problems
- self-management skills to:
  - select and use appropriate trimming equipment, leather products, materials, processes and procedures
  - recognise own limitations and seek advice
  - follow workplace policies and documentation, such as codes of practice or trimming procedures
- teamwork skills to apply knowledge of own role to complete activities efficiently to support team activities and tasks
- technical skills to use trimming workplace tools and equipment relating to the manufacture and

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

- re-cover of leather trimmed components, including:
  - specialist tools and equipment
  - measuring equipment
  - trim patterns
- technology skills to:
  - operate trimming equipment
  - use technology to collect information on leather types and tanning processes

**Required knowledge**

- WHS and PPE requirements and workplace policies relating to trimming processes
- workplace tools and equipment relating to leather trimming
- leather technical information
- criteria for selecting leather
- techniques for measuring and calculating leather
- leather preparation and application processes
- leather cleaning procedures and equipment
- industry and workplace quality standards relating to trimming leather
- workplace-specific technology required for trimming leather

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria and required skills and knowledge.

A person who demonstrates competency in this unit must be able to:

- observe safety procedures and requirements
- select methods and techniques appropriate to the circumstances
- complete preparatory activity in a systematic manner
- fabricate leather covers and trims
- repair leather covers and trims
- replace leather covers and trims
- adjust leather covers and trims.

#### Context of, and specific resources for assessment

Competency is to be assessed in the workplace or a simulated workplace environment that accurately reflects performance in a real workplace setting.

Assessment is to occur:

- using standard workplace practices and procedures
- following safety requirements
- applying environmental constraints.

Assessment is to comply with relevant:

- regulatory requirements
- Australian standards
- industry codes of practice.

The following resources must be made available for the assessment of this unit:

- workplace location or simulated workplace
- material relevant to carrying out leather trimming activities
- equipment, hand and power tools appropriate to carrying out leather trimming activities
- specifications and work instructions.

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Method of assessment**

Assessment must satisfy the endorsed Assessment Guidelines of this Training Package.

Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with the application of required skills and knowledge.

Assessment methods must be by direct observation of tasks and include questioning on required skills and knowledge to ensure correct interpretation and application.

Competence in this unit may be assessed in conjunction with other units which together form part of a holistic work role.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate the needs of diverse clients.

Assessment processes and techniques must be culturally sensitive and appropriate to the language, literacy and numeracy capacity of the candidate and the work being performed.

## Range Statement

### • RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Information and documents</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• verbal, written or graphical</li> <li>• signage</li> <li>• work schedules, plans and specifications</li> <li>• work bulletins</li> <li>• material safety data sheets (MSDS)</li> <li>• diagrams and sketches</li> <li>• safe work procedures relating to trimming vehicle components</li> <li>• regulatory and legislative requirements relating to trimming in the automotive industry</li> <li>• Australian Design Rules</li> <li>• engineer's design specifications and instructions</li> <li>• workplace work specifications and requirements</li> <li>• instructions issued by authorised workplace or external persons</li> <li>• Australian standards.</li> </ul>
<p><b><i>Workplace health and safety requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• personal protective clothing and equipment</li> <li>• safe use of tools and equipment</li> <li>• safe handling of material</li> <li>• use of fire-fighting equipment</li> <li>• workplace first aid equipment</li> <li>• hazard control, including control of hazardous materials and toxic substances.</li> </ul>
<p><b><i>Personal protective equipment</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• safety glasses or goggles</li> <li>• earmuffs or earplugs</li> <li>• safety footwear</li> <li>• protective clothing.</li> </ul>
<p><b><i>Checking</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• contaminants</li> <li>• grain</li> <li>• quality</li> <li>• quantity</li> <li>• size</li> <li>• wear stress.</li> </ul>
<p><b><i>Tools and equipment</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• single or multi-needle flatbed sewing machine</li> <li>• heat-gun</li> <li>• hammer</li> </ul>

## • RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

	<ul style="list-style-type: none"> <li>• staple-gun</li> <li>• hog ring pliers</li> <li>• skiving machine</li> <li>• hand sewing needles</li> <li>• hand tools</li> <li>• power or air tools</li> <li>• specialist tools for assembly or dismantling</li> <li>• wad punches</li> <li>• foam cutters</li> <li>• scissors and knives</li> <li>• revolving hole punch</li> <li>• ruler and tape</li> <li>• hand clamps</li> <li>• adhesive-gun</li> <li>• pop rivet kit</li> <li>• punch and die set</li> <li>• door handle remover</li> <li>• hacksaw</li> <li>• sander</li> <li>• staple and tack remover</li> <li>• fluting irons.</li> </ul>

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions and job specification are read and interpreted to determine job requirements, including adhesive types and attachment <i>method</i></p> <p>1.2. <i>Workplace health and safety (WHS) requirements</i>, including <i>personal protective equipment (PPE)</i> needs, are observed and addressed</p> <p>1.3. Tools and equipment are identified, sourced and checked for safe and effective operation</p> <p>1.4. <i>Emergency procedures</i> and equipment are identified</p> <p>1.5. <i>Information</i> is accessed and interpreted from adhesive manufacturer specifications</p> <p>1.6. <i>Material</i> applications and usage are compared with job requirements</p>
2. Select adhesives	<p>2.1. Material safety data sheet (MSDS) information is sourced and interpreted</p> <p>2.2. Adhesives appropriate for the task are selected, following <i>environmental, statutory and regulatory authority requirements</i></p>
3. Prepare surfaces and apply adhesive	<p>3.1. Surface and adhesive preparation is carried out according to adhesive manufacturer specifications</p> <p>3.2. Adhesives are applied without causing damage to components or systems and in line with industry regulations and guidelines, WHS requirements and workplace procedures</p>
4. Clean up work area and maintain equipment	<p>4.1. Adhesives and materials that can be reused are collected and stored according to workplace sustainability practices</p> <p>4.2. Waste and scrap are removed following workplace procedure</p> <p>4.3. Equipment and work areas are cleaned and inspected for serviceable condition according to workplace procedures</p> <p>4.4. Faulty equipment is identified and tagged according to workplace requirements</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to follow workplace verbal instructions
- initiative and enterprise skills to recognise a workplace problem or potential problem and take action
- learning skills to identify sources of information, assistance and expert knowledge to expand skills, knowledge and understanding
- literacy skills to:
  - read and follow information in written job instructions, quality procedures, specifications, standard operating procedures, charts, lists, drawings and other reference documents
  - document adhesive procedures and required parts
- numeracy skills to calculate surface area and adhesive requirements
- planning and organising skills to:
  - plan, use and follow job specifications when using adhesives
  - plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed on time
  - identify risk factors and take action to minimise them
- problem-solving skills to:
  - refer problems outside area of responsibility to appropriate person and suggest possible causes
  - seek information and assistance as required to solve problems
- self-management skills to:
  - select and use appropriate attaching equipment, adhesives, materials, processes and procedures
  - recognise own limitations and seek advice
  - follow workplace policies and documentation, such as codes of practice and attaching procedures
- technical skills to:
  - use adhesive attaching workplace tools and equipment relating to the manufacture and re-covering of leather trimmed components, including the use of adhesives, specialist tools and equipment
- technology skills to:
  - adapt to the use of adhesives and workplace tools and equipment
  - operate adhesive attaching equipment
  - use technology to collect and provide information on adhesive types

#### Required knowledge

- WHS and personal safety requirements

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

- adhesive application equipment
- technical information relating to adhesive use
- MSDS and product safety requirements
- adhesive manufacturer specifications
- adhesive selection, preparation and application procedures
- procedures for the safe use of adhesive cleaning materials
- workplace quality processes relating to selecting and applying adhesives in vehicles

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria and required skills and knowledge.

A person who demonstrates competency in this unit must be able to:

- observe safety procedures and requirements
- select methods and techniques appropriate to the circumstances
- complete preparatory activity in a systematic manner
- select and apply a range of fabric adhesives
- follow workplace procedures and requirements as they apply to adhesive, tool and equipment use.

##### Context of, and specific resources for assessment

Competency is to be assessed in the workplace or a simulated workplace environment that accurately reflects performance in a real workplace setting.

Assessment is to occur:

- using standard workplace practices and procedures
- following safety requirements
- applying environmental constraints.

Assessment is to comply with relevant:

- regulatory requirements
- Australian standards
- industry codes of practice.

The following resources must be made available for the assessment of this unit:

- workplace location or simulated workplace
- materials relevant to selecting and applying trim and fabric adhesives
- equipment, and hand and power tools appropriate to selecting and applying trim and fabric adhesives
- specifications and work instructions.

#### Method of assessment

Assessment must satisfy the endorsed Assessment Guidelines of

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

this Training Package.

Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with the application of required skills and knowledge.

Assessment methods must be by direct observation of tasks and include questioning on required skills and knowledge to ensure correct interpretation and application.

Competence in this unit may be assessed in conjunction with other units which together form part of a holistic work role.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate the needs of diverse clients.

Assessment processes and techniques must be culturally sensitive and appropriate to the language, literacy and numeracy capacity of the candidate and the work being performed.

## Range Statement

<b><i>RANGE STATEMENT</i></b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b><i>Method</i></b> may include:	<ul style="list-style-type: none"> <li>• clamping</li> <li>• crimping</li> <li>• gluing</li> <li>• sewing.</li> </ul>
<b><i>Workplace health and safety requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• personal protective clothing and equipment</li> <li>• safe use of tools and equipment</li> <li>• workplace environment, including adequate workstation ventilation</li> <li>• safe handling of material</li> <li>• use of fire-fighting equipment</li> <li>• workplace first aid equipment</li> <li>• control of hazards and hazardous material and substances.</li> </ul>
<b><i>Personal protective equipment</i></b> may include:	<ul style="list-style-type: none"> <li>• eye protection</li> <li>• personal protective clothing</li> <li>• safety footwear.</li> </ul>
<b><i>Emergency procedures</i></b> may include:	<ul style="list-style-type: none"> <li>• extinguishing fires</li> <li>• workplace first aid requirements</li> <li>• workplace evacuation.</li> </ul>
<b><i>Information</i></b> may include:	<ul style="list-style-type: none"> <li>• verbal, written or graphical instructions</li> <li>• product manufacturer specifications</li> <li>• catalogues</li> <li>• colour charts</li> <li>• vehicle details</li> <li>• material safety data sheets (MSDS)</li> <li>• diagrams and sketches.</li> </ul>
<b><i>Materials</i></b> may include:	<ul style="list-style-type: none"> <li>• adhesives</li> <li>• fabric</li> <li>• vinyl</li> <li>• cleaning materials</li> <li>• leather.</li> </ul>
<b><i>Environmental requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• EPA requirements</li> <li>• federal, state or territory environmental regulations</li> <li>• specific environmental considerations for:</li> </ul>

<b><i>RANGE STATEMENT</i></b>	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
	<ul style="list-style-type: none"> <li>• products used in the process</li> <li>• activities undertaken in the process</li> <li>• waste-management regulations</li> <li>• clean-up management.</li> </ul>
<b><i>Statutory and regulatory authorities' requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• federal, state or territory, and local authorities administering Acts</li> <li>• industry regulations</li> <li>• codes of practice</li> <li>• Australian standards.</li> </ul>

## AURVTV2001 Remove, replace, fit and test components and accessories

### Modification History

Release	Comment
Release 1	<p>Replaces AURV232165A Remove, replace, fit and test components/accessories</p> <p>Unit code updated to meet policy requirements</p> <p>Minor changes to unit title</p> <p>Reference to OHS legislation replaced with new WHS legislation</p> <p>Licensing statement added to unit descriptor</p>

### Unit Descriptor

Unit descriptor	<p>This unit of competency covers the skills and knowledge required to remove, replace, fit and test non-electrical automotive components/accessories.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p> <p>This unit does not apply to electrical accessory fitting. For the installation of ancillary electrical equipment refer to AURETR2011 Install and test basic ancillary electrical components .</p>
-----------------	--

## Application of the Unit

<b>Application of the unit</b>	The unit includes identification and confirmation of work requirements, preparation for work, removal and replacement or initial fitting and testing of a range of non-electrical components/accessories, and completion of work finalisation processes, including clean-up and documentation.
--------------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including method, processes and equipment</p> <p>1.2. Job specifications are read and interpreted</p> <p>1.3. Workplace health and safety (WHS) requirements, including personal safety needs, are observed throughout the work</p> <p>1.4. Equipment and tooling are identified and checked for safe and effective operation</p> <p>1.5. Procedures are determined to minimise task time</p>
2. Remove/replace/fit components/accessories	<p>2.1. Information required for the work is accessed from manufacturer/component supplier specifications and interpreted</p> <p>2.2. WHS policies and procedures are observed throughout the work processes</p> <p>2.3. Accessories, tooling and equipment required for the work are identified, selected and prepared in accordance with worksite procedures</p> <p>2.4. Accessories are removed and refitted in accordance with worksite procedures</p> <p>2.5. Accessory removal and refit procedures are carried out in accordance with legislation, industry and enterprise policies/procedures guidelines</p>
3. Test components/accessories	<p>3.1. Information required for testing is accessed from manufacturer/component supplier specifications and interpreted</p> <p>3.2. Components/accessories are tested in accordance with authorised procedures</p> <p>3.3. Testing of accessories is completed without causing damage to component or system</p> <p>3.4. Workplace records are completed in accordance with enterprise procedures</p>
4. Clean up work area and maintain equipment	<p>4.1. Material that can be reused is collected and stored</p> <p>4.2. Waste and scrap is removed following workplace procedure</p> <p>4.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures</p> <p>4.4. Unserviceable equipment is tagged and faults identified in accordance with workplace</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>requirements</p> <p>4.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures</p> <p>4.6.Tooling and equipment is maintained in accordance with workplace procedures</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- apply research and interpretive skills to locate, interpret and apply manufacturer/component supplier procedures, workplace policies and procedures
- apply analytical skills required for the identification and analysis of technical information
- apply oral communication skills sufficient to convey information and concepts to customers
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring one's own performance
- interact effectively with other persons both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to the removal, replacement, fitting and testing of components/accessories, including the use of specialist tooling and equipment, measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS regulations/requirements, equipment, material and personal safety requirements
- components/accessories application
- range and type and location of commonly used installation and testing procedures
- types and layout of service/repair manuals (hard copy and electronic)
- procedures relevant to the removal, replacement, fitting and testing of a range of accessories
- worksite reporting procedures
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- carrying out removal, replacing and fitting of a range of accessories to workplace and manufacturer/component supplier requirements
- testing accessories
- completing essential post-activity housekeeping.

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to the removal, replacement, fitting and testing of non-electrical components and accessories
  - equipment, hand and power tooling appropriate to the removal, replacement, fitting and testing of non-electrical components and accessories
  - activities covering mandatory task requirements
  - specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of AUR12 Automotive Industry Retail,

**EVIDENCE GUIDE**

	<p>Service and Repair Training Package.</p> <ul style="list-style-type: none"><li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li><li>• Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</li><li>• Assessment may be applied under project related conditions and require evidence of process.</li><li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li><li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li><li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li></ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Non-electrical accessories

Non-electrical accessories may include:

- roof racks, weather shields, stone protectors, mud flaps, spoilers, bonnet scoops, non-SRS compliant protective bars (e.g. bull bars)

#### Methods

Methods are to include:

- removing, replacing and/or fitting automotive accessories

#### WHS requirements

WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:

- protective clothing and equipment
- use of tooling and equipment
- workplace environment and safety
- handling of materials
- use of firefighting equipment
- enterprise first aid
- hazard control and hazardous materials and substances

#### Personal protective equipment

Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and practices

#### Safe operating procedures

Safe operating procedures are to include, but are not limited to:

- operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors

#### Emergency procedures

Emergency procedures related to this unit are to

<b>RANGE STATEMENT</b>	
	<p>include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• emergency shutdown and stopping of equipment</li> <li>• extinguishing fires</li> <li>• enterprise first aid requirements</li> <li>• worksite evacuation</li> </ul>
<b>Environmental requirements</b>	<p>Environmental requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• waste management, noise, dust and clean-up management</li> </ul>
<b>Quality requirements</b>	<p>Quality requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• regulations, including Australian standards</li> <li>• internal company quality policies and standards</li> <li>• enterprise operations and procedures</li> </ul>
<b>Statutory/regulatory authorities</b>	<p>Statutory/regulatory authorities may include:</p> <ul style="list-style-type: none"> <li>• federal, state/territory and local authorities administering Acts, regulations and codes of practice</li> </ul>
<b>Tooling and equipment</b>	<p>Tooling and equipment may include:</p> <ul style="list-style-type: none"> <li>• lifting equipment/jacks and stands</li> <li>• testing equipment</li> <li>• hoists</li> <li>• hand and power tooling</li> <li>• specialised tooling</li> </ul>
<b>Communications</b>	<p>Communications are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers</li> </ul>
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets (MSDS), diagrams or sketches</li> </ul>

**RANGE STATEMENT**

	<ul style="list-style-type: none"><li>• safe work procedures related to application of colour and clear coat refinishing materials</li><li>• regulatory/legislative requirements pertaining to automotive painting and finishing</li><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian standards</li></ul>

## AURVTW2001 Carry out manual metal arc welding procedures

### Modification History

Release	Comment
Release 1	Replaces AURV281108A Carry out manual metal arc welding procedures Unit code updated to meet policy requirements Reference to OHS legislation replaced with new WHS legislation Licensing statement added to unit descriptor

### Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to carry out manual metal arc welding procedures. Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.
-----------------	--

### Application of the Unit

Application of the unit	The unit includes identification and confirmation of work requirement, preparation for work and the completion of welding and work finalisation processes, including clean-up and documentation. Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.
-------------------------	--

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including job sheets, quality and quantity of materials.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. WHS requirements, including personal protection needs, are observed throughout the work.</p> <p>1.4. Materials for repairs and replacements are selected and inspected for quality.</p> <p>1.5. Hand, power tooling and safety equipment are identified and checked for safe use.</p> <p>1.6. Products are determined to minimise waste material.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p>
2. Carry out manual metal arc procedures	<p>2.1. Information is accessed from sources to enable welding to be performed in accordance with vehicle and equipment manufacturer/component supplier procedures.</p> <p>2.2. Manual metal arc welding is completed using approved methods and equipment, according to type of material and repairs required.</p> <p>2.3. Manual metal arc welding procedures are completed without causing damage to component or system.</p> <p>2.4. Manual metal arc welding is carried out according to a standard that meets industry regulations/guidelines, WHS requirements, legislation and enterprise policy/procedures.</p>
3. Clean up work area and maintain equipment	<p>3.1. Material that can be reused is collected and stored.</p> <p>3.2. Waste and scrap is removed following workplace procedures.</p> <p>3.3. Equipment and work area are cleaned and inspected for serviceable conditions in accordance with workplace procedures.</p> <p>3.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>3.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>3.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- apply research and interpretive skills sufficient to locate, interpret and apply manufacturer/component supplier procedures, workplace policies and procedures
- apply analytical skills required for the identification and analysis of technical information
- apply plain English literacy and communication skills in relation to dealing with customers and team members
- apply questioning and active listening skills for example when obtaining information from customers
- apply oral communication skills sufficient to convey information and concepts to customers
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring one's own performance
- interact effectively with other persons both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to welding systems, including the use of measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- common automotive technology
- types of metals
- types of electrodes and their application
- manual metal arc welding procedures
- equipment maintenance procedures
- workplace guidelines regarding acceptable tolerance levels to be considered as per

**REQUIRED SKILLS AND KNOWLEDGE**

- job sheet and manufacturer/component supplier specifications
- procedures for reporting faults and material defects
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- setting up, operating and maintaining manual metal arc welding, safety, lifting and measuring equipment
- completing a range of manual metal arc welding tasks to specification.

#### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to manual metal arc welding
  - equipment, hand and power tooling appropriate to manual metal arc welding
  - activities covering mandatory task requirements
  - specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also

## AURVTW2002 Carry out brazing procedures

### Modification History

Release	Comment
Release 1	Replaces AURV281208A Carry out brazing procedures Unit code updated to meet policy requirements Reference to OHS legislation replaced with new WHS legislation Licensing statement added to unit descriptor

### Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers the skills and knowledge required to carry out brazing procedures.  Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	The unit includes identification and confirmation of work requirement, preparation for work and the completion of brazing procedures and work finalisation processes, including clean-up and documentation.  Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<ul style="list-style-type: none"><li>1.1. Work instructions are used to determine job requirements, including job sheets, quality and quantity of materials.</li><li>1.2. Job specifications are read and interpreted.</li><li>1.3. WHS requirements, including personal protection needs, are observed throughout the work.</li><li>1.4. Materials for repairs and replacements are selected and inspected for quality.</li><li>1.5. Hand, power tooling and safety equipment are identified and checked for safe use.</li><li>1.6. Products are determined to minimise waste material.</li><li>1.7. Procedures are identified for maximising energy efficiency.</li></ul>
2. Complete brazing procedures	<ul style="list-style-type: none"><li>2.1. Information is accessed from sources to enable brazing to be performed in accordance with vehicle and equipment manufacturer/component supplier procedures.</li><li>2.2. Brazing procedures are completed without causing damage to component or system.</li><li>2.3. Brazing is carried out according to a standard that meets industry regulations/guidelines, WHS requirements, legislation and enterprise policy/procedures.</li></ul>
3. Clean up work area and Maintain equipment	<ul style="list-style-type: none"><li>3.1. Material that can be reused is collected and stored.</li><li>3.2. Waste and scrap is removed following workplace procedures.</li><li>3.3. Equipment and work area are cleaned and inspected for serviceable conditions in accordance with workplace procedures.</li><li>3.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</li><li>3.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</li><li>3.6. Tooling is maintained in accordance with workplace procedures.</li></ul>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to brazing work orders, plans and safety procedures
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- interact effectively with other persons both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to brazing systems, including the use of measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- brazing materials, processes and techniques
- types of flux, rods and their application
- equipment maintenance procedures
- workplace guidelines regarding acceptable tolerance levels to be considered as per job sheet and manufacturer/component supplier specification
- procedures for reporting faults and material defects
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- identifying, setting up, operating and maintaining heating equipment (oxy propane), rods, flux and measuring equipment
- completing a range of brazing tasks to specification.

#### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to brazing procedures
  - equipment, hand and power tooling appropriate to brazing systems
  - activities covering mandatory task requirements
  - specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also

**EVIDENCE GUIDE**

	<p>reinforce the integration of key competencies.</p> <ul style="list-style-type: none"><li>• Assessment may be applied under project-related conditions and require evidence of process.</li><li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li><li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li><li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li></ul>
--	--

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Brazing equipment</b>	<p>Brazing equipment is to include:</p> <ul style="list-style-type: none"> <li>heating appliances</li> </ul>
<b>Brazing methods</b>	<p>Brazing methods are to include:</p> <ul style="list-style-type: none"> <li>equipment selection and preparation, material selection/confirmation and preparation, the application of brazing techniques and the operator maintenance of equipment</li> </ul>
<b>WHS requirements</b>	<p>WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include:</p> <ul style="list-style-type: none"> <li>protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of material, use of fire fighting equipment, enterprise first aid, hazard control and hazardous material and substances</li> </ul>
<b>Personal protective equipment</b>	<p>Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices</p>
<b>Safe operating procedures</b>	<p>Safe operating procedures are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors</li> </ul>
<b>Emergency procedures</b>	<p>Emergency procedures related to this unit are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>emergency shutdown and stopping of equipment, extinguishing fires, enterprise first</li> </ul>

<b>RANGE STATEMENT</b>	
	aid requirements and worksite evacuation
<b>Environmental requirements</b>	<p>Environmental requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>waste management, noise, dust and clean-up management</li> </ul>
<b>Quality requirements</b>	<p>Quality requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>regulations, including Australian standards, internal company quality policy and standards and enterprise operations and procedures</li> </ul>
<b>Statutory/regulatory authorities</b>	<p>Statutory/regulatory authorities may include:</p> <ul style="list-style-type: none"> <li>federal, state/territory and local authorities administering acts, regulations and codes of practice</li> </ul>
<b>Tooling and equipment</b>	<p>Tooling and equipment may include:</p> <ul style="list-style-type: none"> <li>hand tooling, oxy acetylene/propane torch, brazing equipment, measuring equipment and marking out equipment</li> </ul>
<b>Materials</b>	<p>Materials may include:</p> <ul style="list-style-type: none"> <li>solvents and fluxes, filler rods, brazing and silver solder rods, and cleaning materials</li> </ul>
<b>Communications</b>	<p>Communications are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers</li> </ul>
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>safe work procedures related to brazing procedures</li> <li>regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li> </ul>

**RANGE STATEMENT**

	<ul style="list-style-type: none"><li>• engineer's design specifications and instructions</li><li>• organisation work specifications and requirements</li><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian standards</li></ul>

## AURVTW2003 Carry out gas metal arc welding procedures

### Modification History

Release	Comment
Release 1	<p>Replaces AURV281308A Carry out gas metal arc (MIG) welding procedures</p> <p>Unit code updated to meet policy requirements</p> <p>Minor changes to unit title</p> <p>Reference to OHS legislation replaced with new WHS legislation</p> <p>Licensing statement added to unit descriptor</p>

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit of competency covers the skills and knowledge required to carry out gas metal arc (MIG) welding procedures appropriate to the repairs conducted in the retail, service and repair streams.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>Work requires individuals to demonstrate some discretion, judgement and problem solving skills in lifting, safety equipment, MIG welding procedures, environmental issues, repair procedures and vehicle operational requirements.</p>
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements including job sheets, quality and quantity of materials.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety requirements, including personal protection needs, are observed throughout the work.</p> <p>1.4. Materials for repairs and replacements are selected and inspected for quality.</p> <p>1.5. Correct hand, power tools and safety equipment for safe use.</p> <p>1.6. Products are determined to minimise waste materials.</p> <p>1.7. Procedures are identified for maximising energy efficiency whilst completing the job.</p>
2. Carry out gas metal arc (MIG) welding procedures	<p>2.1. Gas metal arc (MIG) welding procedures are completed without causing damage to any component or system.</p> <p>2.2. Information is accessed from appropriate sources to enable welding to be performed in accordance with vehicle and equipment manufacturer procedures.</p> <p>2.3. MIG welding is carried out according to a standard that meets industry regulations/guidelines, WHS legislation, statutory legislation and enterprise policy/procedures.</p>
3. Clean up work area and maintain equipment	<p>3.1. Material that can be reused is collected and stored.</p> <p>3.2. Waste and scrap is removed following workplace procedures.</p> <p>3.3. Equipment and work area are cleaned and inspected for serviceable conditions in accordance with workplace procedures.</p> <p>3.4. Unserviceable equipment is tagged and faults identified in accordance with workplace.</p> <p>3.5. Operator maintenance is completed in accordance with manufacturer's specifications and site procedures.</p> <p>3.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- apply research and interpretive skills sufficient to locate, interpret and apply manufacturer/component supplier procedures, workplace policies and procedures
- apply analytical skills required for the identification and analysis of technical information
- apply plain English literacy and communication skills in relation to dealing with customers and team members
- apply questioning and active listening skills for example when obtaining information from customers
- apply oral communication skills sufficient to convey information and concepts to customers
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring one's own performance
- interact effectively with other persons both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to welding systems, including the use of measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

Required knowledge includes:

- WHS regulations/requirements
- equipment safety requirements
- personal safety requirements (e.g. toxic fumes/lead poisoning)
- types of materials to be welded
- types of MIG welding wire and their application
- types of gases and their application
- MIG welding processes, techniques and faults

**REQUIRED SKILLS AND KNOWLEDGE**

- equipment set up and maintenance procedures
- workplace safety policies and procedures
- workplace guidelines regarding acceptable tolerance levels to be considered as per job sheet and manufacturer specification
- procedures for reporting faults and material defects

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Interpret work order and locate and apply relevant information.
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment.
- Read and interpret communication procedural information from job sheets to prepare for work.
- Identify materials used in the work process.
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage and wastage of goods, equipment and products
  - maintain required production output and product quality
- Identify, set up, operate and maintain MIG welding, lifting and measuring equipment.

##### Context of, and specific resources for assessment

- Assessment may occur on the job or in a workplace simulated facility with relevant process equipment, materials, work instructions and deadlines.
- Access to vehicle and manufacturer specifications as identified in the Range Statement and standard operating procedures.

##### Method of assessment

- Assessment methods must confirm consistency of performance over time and in a range of workplace relevant contexts.
- Assessment should be by direct observation of tasks and questioning on underpinning knowledge.
- Assessment should be conducted over time and may be in conjunction with assessment of other units of competency.
- Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>MIG welding</b>	MIG equipment to include <ul style="list-style-type: none"> <li>• MIG welders</li> </ul>
<b>Materials</b>	Materials include: <ul style="list-style-type: none"> <li>• MIG welding wire and gas</li> </ul>
<b>Methods</b>	Methods include: <ul style="list-style-type: none"> <li>• MIG welding methods and preparation.</li> </ul> Methods should be applied under normal operating conditions
<b>Work practices</b>	Work practices must abide by: <ul style="list-style-type: none"> <li>• workplace health and safety requirements include OHS legislation, material safety management systems, hazardous substances and dangerous goods code, local safe operating procedures and Australian Design Rules regulations</li> <li>• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling and lifting equipment procedures and organisation insurance requirements</li> </ul>
<b>Resources</b>	Resources may include: <ul style="list-style-type: none"> <li>• hand tools, MIG welding machines and safety equipment</li> <li>• measuring equipment, marking out equipment and lifting equipment</li> <li>• MIG welding wire and appropriate gases</li> </ul>
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation, regulations and enterprise policies and practices

**RANGE STATEMENT****Information/documents**

Sources of information/documentation may include:

- workplace procedures relating to the use of tools and equipment
- work instructions, including:
  - job sheets
  - vehicle manufacturer specifications
  - enterprise operating procedures
  - component manufacture specifications
  - customer requirements
  - industry/workplace codes of practice
  - statutory legislation for vehicle road worthiness, including Australian Design Rules
  - material safety data sheets
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures

## AURVTW2004 Carry out gas tungsten arc welding procedures

### Modification History

Release	Comment
Release 1	<p>Replaces AURV281408A Carry out gas tungsten arc (TIG) welding procedures</p> <p>Unit code updated to meet policy requirements</p> <p>Minor changes to unit title</p> <p>Reference to OHS legislation replaced with new WHS legislation</p> <p>Licensing statement added to unit descriptor</p>

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit of competency covers the skills and knowledge required to carry out gas tungsten arc (TIG) welding procedures.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>The unit includes identification and confirmation of work requirement, preparation for work and the completion of welding and work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
--------------------------------	---

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	1.1. Work instructions are used to determine job requirements, including job sheets, quality and quantity of materials. 1.2. Job specifications are read and interpreted. 1.3. WHS requirements, including personal protection needs, are observed throughout the work. 1.4. Materials for repairs and replacements are selected and inspected for quality. 1.5. Hand, power tooling and safety equipment are identified and checked for safe use. 1.6. Products are determined to minimise waste material. 1.7. Procedures are identified for maximising energy efficiency while completing the job.
2. Carry out gas tungsten arc (TIG) welding procedures	2.1. Information is accessed from sources to enable welding to be performed in accordance with vehicle and equipment manufacturer/component supplier procedures. 2.2. Gas tungsten arc (TIG) welding procedures are completed without causing damage to component or system. 2.3. TIG welding is carried out according to a standard that meets industry regulations/guidelines, WHS requirements, legislation and enterprise policy/procedures.
3. Clean up work area and maintain equipment	3.1. Material that can be reused is collected and stored. 3.2. Waste and scrap is removed following workplace procedures. 3.3. Equipment and work area are cleaned and inspected for serviceable conditions in accordance with workplace procedures. 3.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures. 3.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures. 3.6. Tooling is maintained in accordance with workplace procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- apply research and interpretive skills sufficient to locate, interpret and apply manufacturer/component supplier procedures, workplace policies and procedures
- apply analytical skills required for the identification and analysis of technical information
- apply plain English literacy and communication skills in relation to dealing with customers and team members
- apply questioning and active listening skills for example when obtaining information from customers
- apply oral communication skills sufficient to convey information and concepts to customers
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring one's own performance
- interact effectively with other persons both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to welding systems, including the use of measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- types of metals
- types of fluxes, rods and their application
- TIG welding processes and techniques
- equipment maintenance procedures
- workplace guidelines regarding acceptable tolerance levels to be considered as per job sheet and manufacturer/component supplier specifications

**REQUIRED SKILLS AND KNOWLEDGE**

- procedures for reporting faults and material defects
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- setting up, operating and maintaining TIG welding, safety, lifting and measuring equipment
- completing a range of gas tungsten arc (TIG) welding tasks to specifications.

#### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to gas tungsten arc (TIG) welding
  - equipment, hand and power tooling appropriate to gas tungsten arc (TIG) welding
  - activities covering mandatory task requirements
  - specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of AUR12 Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also

**EVIDENCE GUIDE**

	<p>reinforce the integration of key competencies.</p> <ul style="list-style-type: none"><li>• Assessment may be applied under project-related conditions and require evidence of process.</li><li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li><li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li><li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li></ul>

## AURVTW2005 Carry out spot welding procedures

### Modification History

Release	Comment
Release 1	Replaces AURV281508A Carry out spot welding procedures Unit code updated to meet policy requirements Reference to OHS legislation replaced with new WHS legislation Licensing statement added to unit descriptor

### Unit Descriptor

Unit descriptor	<p>This unit of competency covers the skills and knowledge required to carry out spot welding procedures.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	--

### Application of the Unit

Application of the unit	<p>The unit includes identification and confirmation of work requirement, preparation for work and the completion of spot welding and work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
-------------------------	--

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	1.1. Work instructions are used to determine job requirements, including job sheets, quality and quantity of materials. 1.2. Job specifications are read and interpreted. 1.3. WHS requirements, including personal protection needs, are observed throughout the work. 1.4. Materials for repairs and replacements are selected and inspected for quality. 1.5. Hand, power tooling and safety equipment is identified and checked for safe use. 1.6. Products are determined to minimise waste material. 1.7. Procedures are identified for maximising energy efficiency while completing the job.
2. Carry out spot welding procedures	2.1. Information is accessed from sources to enable welding to be performed in accordance with vehicle and equipment manufacturer/component supplier procedures. 2.2. Spot welding procedures are completed without causing damage to component or system. 2.3. Spot welding is carried out according to a standard that meets industry regulations/guidelines, WHS requirements, legislation and enterprise policy/procedures.
3. Clean up work area and maintain equipment	3.1. Material that can be reused is collected and stored. 3.2. Waste and scrap is removed following workplace procedures. 3.3. Equipment and work area are cleaned and inspected for serviceable conditions in accordance with workplace procedures. 3.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures. 3.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures. 3.6. Tooling is maintained in accordance with workplace procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- apply research and interpretive skills sufficient to locate, interpret and apply manufacturer/component supplier procedures, workplace policies and procedures
- apply analytical skills required for the identification and analysis of technical information
- apply plain English literacy and communication skills in relation to dealing with customers and team members
- apply questioning and active listening skills for example when obtaining information from customers
- apply oral communication skills sufficient to convey information and concepts to customers
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring one's own performance
- interact effectively with other persons both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to spot welding, including the use of welding and measuring equipment and communication devices and the reporting/documenting of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- types of metals
- spot welding equipment types and applications
- spot welding processes and techniques
- equipment maintenance procedures
- workplace guidelines regarding acceptable tolerance levels to be considered as per job sheet and manufacturer/component supplier specifications

**REQUIRED SKILLS AND KNOWLEDGE**

- procedures for reporting faults and material defects
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- identifying, setting up, operating and maintaining spot welding, lifting and measuring equipment
- completing a range of spot welding tasks to specifications.

##### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials relevant to spot welding
  - equipment, hand and power tooling appropriate to spot welding
  - activities covering mandatory task requirements
  - specifications and work instructions.

##### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of AUR12 Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also

**EVIDENCE GUIDE**

	<p>reinforce the integration of key competencies.</p> <ul style="list-style-type: none"><li>• Assessment may be applied under project-related conditions and require evidence of process.</li><li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li><li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li><li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li></ul>
--	--

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Spot welding methods</b>	Spot welding methods are to include: <ul style="list-style-type: none"> <li>equipment election and preparation, material selection/confirmation and preparation, the application of spot welding techniques and the operator maintenance of equipment</li> </ul>
<b>WHS requirements</b>	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include: <ul style="list-style-type: none"> <li>protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of material, use of fire fighting equipment, enterprise first aid, hazard control and hazardous material and substances</li> </ul>
<b>Personal protective equipment</b>	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices
<b>Safe operating procedures</b>	Safe operating procedures are to include, but are not limited to: <ul style="list-style-type: none"> <li>operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors</li> </ul>
<b>Emergency procedures</b>	Emergency procedures related to this unit are to include, but are not limited to: <ul style="list-style-type: none"> <li>emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation</li> </ul>
<b>Environmental requirements</b>	Environmental requirements are to include, but

<b>RANGE STATEMENT</b>	
	<p>are not limited to:</p> <ul style="list-style-type: none"> <li>waste management, noise, dust and clean-up management</li> </ul>
<b>Quality requirements</b>	<p>Quality requirements are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>regulations, including Australian standards, internal company quality policy and standards and enterprise operations and procedures</li> </ul>
<b>Statutory/regulatory authorities</b>	<p>Statutory/regulatory authorities may include:</p> <ul style="list-style-type: none"> <li>federal, state/territory and local authorities administering acts, regulations and codes of practice</li> </ul>
<b>Tooling and equipment</b>	<p>Tooling and equipment may include:</p> <ul style="list-style-type: none"> <li>hand tooling, spot welding equipment, measuring equipment, marking out equipment and lifting equipment</li> </ul>
<b>Materials</b>	<p>Materials may include:</p> <ul style="list-style-type: none"> <li>steel products and cleaning materials</li> </ul>
<b>Communications</b>	<p>Communications are to include, but are not limited to:</p> <ul style="list-style-type: none"> <li>verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers</li> </ul>
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>safe work procedures related to spot welding</li> <li>regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li> <li>engineer's design specifications and instructions</li> <li>organisation work specifications and requirements</li> <li>instructions issued by authorised enterprise or</li> </ul>

## AURVTW2007 Conduct oxy-acetylene, thermal heating and cutting

### Modification History

Release	Comment
Release 1	New unit of competency

### Unit Descriptor

Unit descriptor	<p>This unit describes the performance outcomes required to set up an oxy-acetylene plant; follow safety requirements, including adjusting gauges to recommended working pressures and identifying flames; and conduct thermal heating and thermal cutting operations.</p> <p>Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.</p>
-----------------	---

### Application of the Unit

Application of the unit	<p>Work applies to body repairers or dismantlers in the auto body repair and related vehicle industry environment. Skills and knowledge are to be used within the scope of the job role.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
-------------------------	--

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine job requirements	<p>1.1.Job specifications and requirements are interpreted and determined from job sheets and work instructions</p> <p>1.2.Appropriate workplace health and safety (WHS) practices are identified and adhered to according to <b>WHS, legislative and workplace requirements</b></p> <p>1.3.<b>Information</b> is accessed from appropriate sources to enable oxy-acetylene safety, set-up, <b>flame</b> adjustment, thermal heating and thermal cutting operations</p> <p>1.4.Approved methods and equipment are accessed and used</p>
2. Plan and prepare work	<p>2.1.Required <b>resources</b> are identified, obtained and inspected for safety and compliance with job specifications</p> <p>2.2.Relevant plans, drawings and texts are selected and interpreted according to work plan and job sheet instructions</p> <p>2.3.Correct working pressures and flame adjustment are applied and inspected for compliance with job specifications</p> <p>2.4.Work is sequenced, prioritised and considered according to specification requirements</p> <p>2.5.Work areas are prepared according to workplace requirements and procedures</p> <p>2.6.Potential hazards are identified and prevention control measures selected according to work plan and workplace procedures</p>
3. Conduct work	<p>3.1.Oxy-acetylene set-up and flame adjustment operations are carried out according to industry standards</p> <p>3.2.Thermal heating is carried out according to industry and workplace standards and job requirements</p> <p>3.3.Thermal cutting operations are carried out according to industry and workplace standards</p>
4. Finalise work processes	<p>4.1.Work area is cleaned and tidied according to workplace procedures</p> <p>4.2.Waste and scrap materials are removed following workplace and environmental requirements and procedures</p> <p>4.3.Tools and equipment are checked and faulty items are identified and tagged</p> <p>4.4.Equipment maintenance activities are completed according to workplace and manufacturer specifications</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to follow workplace verbal instructions
- initiative and enterprise skills to recognise a workplace problem or potential problem and take action
- learning skills to identify sources of information, seek assistance and expert knowledge to develop skills and understanding
- literacy skills to:
  - understand quality procedures
  - read and follow information in written job instructions, specifications, standard operating procedures, charts, lists, drawings and other reference documents
- numeracy skills to interpret oxy-acetylene pressure gauge and measuring equipment
- planning and organising skills to:
  - plan set-up, adjustment, cutting and heating requirements and follow job specification
  - plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed on time
  - identify risk factors and take action to minimise them
- problem-solving skills to:
  - refer problems outside area of responsibility to appropriate person and suggest possible causes
  - seek information and assistance as required to solve problems
- self-management skills to:
  - recognise own limitations and seek advice
  - follow workplace policies and documentation, such as industry code of practice and procedures
- teamwork skills to apply knowledge of own role to complete activities efficiently to support team activities and tasks
- technical skills to use workplace tools and equipment relating to oxy-acetylene plant, thermal heating and thermal cutting of vehicle sectional repairs, including:
  - specialist tools and equipment

#### Required knowledge

- WHS and environmental regulations and workplace policies and procedures needed to carry out work in a manner that ensures the safety of people and equipment
- safety procedures, specifications and schedules relating to work
- workplace quality system documentation covering instructions, procedures, performance indicators and review processes or equivalent
- environmental protection requirements relating to the disposal of waste material

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

- established communication channels and protocols
- problem-identification and resolution techniques
- equipment safety requirements
- personal protective equipment requirements
- procedures for operating oxy-acetylene working pressure gauges for thermal cutting and thermal heating operations
- different oxy-acetylene flames and their application
- procedures for using oxy-acetylene thermal heating and thermal cutting equipment and associated safety requirements

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

##### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria and required skills and knowledge.

A person who demonstrates competency in this unit must be able to:

- comply with relevant regulations, standards, codes of practice, established safe practices, and workplace policies and procedures
- maintain working knowledge of current work systems and practices
- apply, within scope of own role, the requirements of the job or work role:
  - achieve oxy-acetylene set-up, cutting and heating goals
  - achieve workplace quality goals
  - effectively apply problem-solving techniques
- conduct oxy-acetylene safety, set-up and flame adjustment processes
- conduct thermal cutting processes
- conduct thermal heating processes
- use relevant tools and equipment.

##### Context of, and specific resources for assessment

Competency is to be assessed in the workplace or a simulated workplace environment that accurately reflects performance in a real workplace setting.

Assessment is to occur:

- using standard workplace practices and procedures
- following safety requirements
- applying environmental constraints.

Assessment is to comply with relevant:

- regulatory requirements
- Australian standards
- industry codes of practice.

The following resources must be made available for the assessment

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

of this unit:

- a safe work environment
- oxy-acetylene plant
- thermal heating and cutting equipment
- hand tools
- safety equipment
- equipment operating instructions
- equipment safety instructions.

### Method of assessment

Assessment must satisfy the endorsed Assessment Guidelines of this Training Package.

Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with the application of required skills and knowledge.

Assessment methods must be by direct observation of tasks and include questioning on required skills and knowledge to ensure correct interpretation and application.

Competence in this unit may be assessed in conjunction with other units which together form part of a holistic work role.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate the needs of diverse clients.

Assessment processes and techniques must be culturally sensitive and appropriate to the language, literacy and numeracy capacity of the candidate and the work being performed.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Workplace health and safety requirements:</i></b>	<ul style="list-style-type: none"> <li>• are those prescribed under legislation, regulations, codes of practice and policies and procedures</li> <li>• may include: <ul style="list-style-type: none"> <li>• use of personal protective equipment and clothing</li> <li>• use of fire-fighting equipment</li> <li>• first aid equipment</li> <li>• hazard and risk control and elimination</li> <li>• systems covering the use of hazardous materials and substances</li> <li>• manual-handling procedures, including for lifting and carrying.</li> </ul> </li> </ul>
<b><i>Legislative requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• environmental protection and regulations</li> <li>• duty of care</li> <li>• industry codes of practice.</li> </ul>
<b><i>Workplace requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• environmental management: waste disposal, recycling and re-use guidelines</li> <li>• emergency and evacuation procedures</li> <li>• equipment use procedures</li> <li>• legal obligations</li> <li>• maintenance and storage procedures</li> <li>• WHS requirements</li> <li>• workplace guidelines</li> <li>• policies and procedures relating to own role and responsibility</li> <li>• technical manuals</li> <li>• quality and continuous improvement processes</li> <li>• recording and reporting guidelines.</li> </ul>
<b><i>Information</i></b> may include:	<ul style="list-style-type: none"> <li>• equipment manufacturer specifications</li> <li>• workplace operating procedures</li> <li>• customer requirements</li> <li>• industry codes of practice</li> <li>• material safety data sheets (MSDS).</li> </ul>
<b><i>Flames</i></b> may include:	<ul style="list-style-type: none"> <li>• natural</li> <li>• carburising</li> </ul>

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

	<ul style="list-style-type: none"><li>• oxidising.</li></ul>
<b><i>Resources</i></b> may include:	<ul style="list-style-type: none"><li>• hand tools</li><li>• oxy-acetylene thermal heating equipment</li><li>• oxy-acetylene thermal cutting equipment</li><li>• job sheets, drawings and work instructions</li><li>• workplace or simulated workplace.</li></ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<p>1.1. Work instructions are used to determine job requirements, including job sheets, quality and quantity of materials.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Workplace health and safety requirements, including personal protection needs, are observed throughout the work.</p> <p>1.4. Materials for repairs and replacements are selected and inspected for quality.</p> <p>1.5. Correct hand, power tools and safety equipment are selected for safe use.</p> <p>1.6. Products are determined to minimise waste materials.</p> <p>1.7. Procedures are identified for maximising energy efficiency whilst completing the job.</p>
2. Carry out oxy acetylene welding procedures	<p>2.1. Welding procedures are completed without causing damage to any component or system.</p> <p>2.2. Information is accessed from appropriate sources to enable welding to be performed in accordance with vehicle and equipment manufacturer procedures.</p> <p>2.3. Welding is carried out according to a standard that meets industry regulations/guidelines, workplace health and safety (WHS) legislation, statutory legislation and enterprise policy/procedures.</p>
3. Clean up work area and maintain equipment	<p>3.1. Material that can be reused is collected and stored.</p> <p>3.2. Waste and scrap is removed following workplace procedures.</p> <p>3.3. Equipment and work area are cleaned and inspected for serviceable conditions in accordance with workplace procedures.</p> <p>3.4. Unserviceable equipment is tagged and faults identified in accordance with workplace requirements.</p> <p>3.5. Operator maintenance is completed in accordance with manufacturer's specifications and site procedures.</p> <p>3.6. Tooling is maintained in accordance with workplace procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- reading and interpreting job specifications
- following work procedures
- handling tools and equipment safely
- accessing relevant information

#### Required knowledge

Required knowledge includes:

- WHS regulations/requirements
- equipment safety requirements
- personal safety requirements (e.g. toxic fumes/lead poisoning)
- types of metals relevant to application
- welding procedures (oxy)
- thermal cutting procedures
- thermal heating procedures
- types of flux, rod and their applications
- equipment maintenance procedures
- planing of oxy welding, thermal cutting and heating
- workplace safety policies and procedures
- workplace guidelines regarding acceptable tolerance levels to be considered as per job sheet and manufacturer specification
- procedures for reporting faults and material defects

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Assessors must be satisfied that the candidate can competently and consistently:</p> <ul style="list-style-type: none"> <li>• interpret work order and locate and apply relevant information</li> <li>• apply safe handling requirements for equipment, products and materials, including use of personal protective equipment</li> <li>• read and interpret communication procedural information from job sheets to prepare for work</li> <li>• identify materials used in the work process</li> <li>• follow work instructions, operating procedures and inspection processes to: <ul style="list-style-type: none"> <li>• minimise the risk of injury to self or others</li> <li>• prevent damage and wastage of goods, equipment and products</li> <li>• maintain required production output and product quality</li> <li>• identify, set up, operate and maintain oxy welding, heating and cutting equipment.</li> </ul> </li> </ul>
<b>Context of, and specific resources for assessment</b>	<ul style="list-style-type: none"> <li>• Assessment may occur on the job or in a workplace simulated facility with relevant process equipment, materials, work instructions and deadlines.</li> <li>• Access to vehicle and manufacturer specifications as identified in the Range Statement, and standard operating procedures.</li> </ul>
<b>Method of assessment</b>	<ul style="list-style-type: none"> <li>• Assessment methods must confirm consistency of performance over time and in a range of workplace relevant contexts.</li> <li>• Assessment should be by direct observation of tasks and questioning on underpinning knowledge.</li> <li>• Assessment should be conducted over time and may be in conjunction with assessment of other units of competency.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which</li> </ul>

## EVIDENCE GUIDE

	together form part of the holistic work role.
<b>Guidance information for assessment</b>	

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Methods

Methods include:

- cutting metal
- welding metal
- heating metal
- measuring.

Methods should be applied under normal operating conditions.

#### Work practices

Work practices must abide by workplace health and safety requirements, and include:

- WHS legislation
- material safety management systems
- hazardous substances and dangerous goods code
- local safe operating procedures
- Australian Design Rules regulations

#### Resources

Resources may include:

- hand tools, welding equipment, thermal cutting equipment and thermal heating equipment
- measuring equipment, marking out equipment and lifting equipment
- oxy acetylene gas, welding rods, steel, tubing, aluminium, cast iron and marking chalk

RANGE STATEMENT	
Personal protective equipment	Personal protective equipment prescribed under legislation, regulations and enterprise policies and practices
Information/documents	Sources of information/documents may include: <ul style="list-style-type: none"><li>• workplace procedures relating to the use of tools and equipment</li><li>• work instructions, including:<ul style="list-style-type: none"><li>• job sheets</li><li>• vehicle manufacturer specifications</li><li>• enterprise operating procedures</li><li>• component manufacture specifications</li><li>• customer requirements</li><li>• industry/workplace codes of practice</li><li>• statutory legislation for vehicle road worthiness, including Australian Design Rules</li><li>• material safety data sheets</li><li>• workplace procedures relating to reporting and communication</li><li>• manufacturer specifications and operational procedures</li></ul></li></ul>

-----------------	---

### Application of the Unit

Application of the unit	<p>The unit includes identification and confirmation of work requirement, preparation for work, completion of thermoplastic welding and completion of work finalisation processes, including clean-up and documentation.</p> <p>Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.</p>
-------------------------	--

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	<ul style="list-style-type: none"><li>1.1. Work instructions are used to determine job requirements, including job sheets and quality and quantity of materials.</li><li>1.2. Job specifications are read and interpreted.</li><li>1.3. WHS requirements, including personal protection needs, are observed throughout the work.</li><li>1.4. Materials for repairs and replacements are selected and inspected for quality.</li><li>1.5. Hand, power tooling and safety equipment for safe use.</li><li>1.6. Products are determined to minimise waste materials.</li><li>1.7. Procedures are identified for maximising energy efficiency while completing the job.</li></ul>
2. Carry out thermoplastic welding procedures	<ul style="list-style-type: none"><li>2.1. Information is accessed from sources to enable welding to be performed in accordance with vehicle and equipment manufacturer/component supplier procedures.</li><li>2.2. Thermoplastic welding procedures are completed without causing damage to any component or system.</li><li>2.3. Thermoplastic welding is carried out according to a standard that meets industry regulations/guidelines, WHS legislation, and enterprise policy/procedures.</li></ul>
3. Clean up work area and maintain equipment	<ul style="list-style-type: none"><li>3.1. Material that can be reused is collected and stored</li><li>3.2. Waste and scrap is removed following workplace procedures.</li><li>3.3. Equipment and work area are cleaned and inspected for serviceable conditions in accordance with workplace procedures.</li><li>3.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</li><li>3.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</li><li>3.6. Tooling is maintained in accordance with workplace procedures.</li></ul>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- apply research and interpretive skills sufficient to locate, interpret and apply manufacturer/component supplier procedures, workplace policies and procedures
- apply analytical skills for identification and analysis of technical information
- apply plain English literacy and communication skills in relation to dealing with customers and team members
- apply questioning and active listening skills for example when obtaining information from customers
- apply oral communication skills sufficient to convey information and concepts to customers
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring one's own performance
- interact effectively with other persons both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to thermoplastic welding, including the use of thermoplastic welding systems, measuring equipment and communication devices and the reporting/ recording of results

#### Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- thermoplastic welding processes and techniques
- types of plastics and welding procedures
- equipment maintenance procedures
- workplace guidelines regarding acceptable tolerance levels to be considered as per job sheet and manufacturer/component supplier specifications
- procedures for reporting faults and material defects
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- carrying out thermoplastic welding procedures for tasks covering a range of plastics to specification
- completing post-welding housekeeping.

#### Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite.

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with regulatory requirements, including Australian Standards.

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to thermoplastic welding
- equipment and hand and power tooling appropriate to thermoplastic welding
- activities covering mandatory task requirements
- specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also

**EVIDENCE GUIDE**

	<p>reinforce the integration of key competencies.</p> <ul style="list-style-type: none"><li>• Assessment may be applied under project related conditions and require evidence of process.</li><li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li><li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li><li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li></ul>
--	--

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Thermoplastic welding</b>	<ul style="list-style-type: none"> <li>• Thermoplastic welding equipment.</li> <li>• Materials - variety of plastics.</li> </ul>
<b>Methods</b>	<ul style="list-style-type: none"> <li>• Methods are to include thermoplastic welding preparation and methods covering a variety of plastics.</li> <li>• Particular care and safe working practices must be applied in relation to fumes emanating from plastic materials and bonding agents.</li> </ul>
<b>WHS</b>	<p>WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.</p>
<b>Personal protective equipment</b>	<p>Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.</p>
<b>Safe operating procedures</b>	<p>Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.</p>
<b>Emergency procedures</b>	<p>Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.</p>

<b>RANGE STATEMENT</b>	
<b>Environmental requirements</b>	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
<b>Quality requirements</b>	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
<b>Statutory/regulatory authorities</b>	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
<b>Tooling and equipment</b>	Tooling and equipment may include hand tooling, thermoplastic welding equipment, including electric and flame heated irons and gas-fired torches, safety equipment, measuring equipment and marking out equipment.
<b>Materials</b>	Materials may include thermoplastic welding rods/ materials and cleaning materials.
<b>Communications</b>	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
<b>Information/documents</b>	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> <li>• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches</li> <li>• safe work procedures related to thermoplastic welding</li> <li>• regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules</li> <li>• engineer's design specifications and instructions</li> <li>• organisation work specifications and requirements</li> </ul>

**RANGE STATEMENT**

	<ul style="list-style-type: none"><li>• instructions issued by authorised enterprise or external persons</li><li>• Australian Standards.</li></ul>
--	--

**Unit Sector(s)**

<b>Unit sector</b>	Vehicle body
--------------------	--------------

**Co-requisite units**

Not applicable.

**Competency field**

<b>Competency field</b>	Technical - Welding, Grinding, Machining and Soldering
-------------------------	--

## AUMABA002 Operate load shifting equipment

### Modification History

Release	Comment
Release 1	Unit updated to reflect the new standards for Training Packages Replaces AUMABA3002 Operate load shifting equipment

### Application

This unit describes the performance outcomes required to safely use load shifting equipment. It applies to those in an automotive environment and involves the application of skills and knowledge to select and use suitable load shifting equipment and perform pre-operational inspections to ensure its safe operation.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.

### Competency Field

Manufacturing - Common

### Unit Sector

Support and Logistics

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Inspect load shifting equipment	<p>1.1 <b><i>Inspection of load shifting equipment</i></b> is completed according to <b><i>workplace procedures</i></b></p> <p>1.2 Load weights and volumes are identified, and confirmed by supervisor</p> <p>1.3 Equipment faults are identified, documented and reported to appropriate personnel</p>
2. Lift, shift and place load	<p>2.1 Load characteristics and handling requirements are identified and appropriate shifting device is selected</p> <p>2.2 Shifting route is planned and identified hazards are controlled</p> <p>2.3 Load is placed in specified locations without causing damage to property, machinery or equipment</p> <p>2.4 Lift, shift and placement of load are completed using approved work health and safety (WHS) methods and equipment, according to workplace procedures</p>
3. Complete load shifting operations	<p>3.1 Post-inspection of load shifting equipment is completed</p> <p>3.2 Identified faults are tagged and reported</p> <p>3.3 Load shifting equipment is stored and secured</p> <p>3.4 Load shifting documentation and maintenance records are completed according to workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skills	Description
Reading skills to:	<ul style="list-style-type: none"><li>interpret load shifting equipment operating procedures and safety requirements</li><li>review load shifting equipment pre- and post-inspection schedules.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>legibly complete inspection schedules, maintenance reports and workplace documents.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>convey identified equipment faults to appropriate personnel</li><li>speak clearly and directly to inform others of loading and shifting requirements</li><li>communicate equipment operating instructions and load weights and volumes to co-workers.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>identify and where necessary estimate weights and volumes of objects to be shifted</li><li>identify numbers in metric and imperial units and measurements.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>identify and prepare load shifting equipment and work area</li><li>identify overhead and ground level workplace hazards</li><li>conduct pre- and post-use inspection of equipment</li><li>complete workplace documentation.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>identify load shifting equipment appropriate for the job</li><li>identify load shifting equipment faults and defects.</li></ul>
Teamwork skills to:	<ul style="list-style-type: none"><li>advise co-workers of load shifting activities.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Inspection</i></b> must include:	<ul style="list-style-type: none"><li>• hydraulic and pneumatic leaks</li><li>• lifting block</li><li>• operation of control system</li><li>• vehicle hazard warning light</li><li>• wheels and tyres</li><li>• wire rope, chains and lifting attachments.</li></ul>
<b><i>Load shifting equipment</i></b> must include:	<ul style="list-style-type: none"><li>• overhead travelling crane</li><li>• pallet truck</li><li>• trolley jack.</li></ul>
<b><i>Workplace procedures</i></b> must include:	<ul style="list-style-type: none"><li>• equipment operating instructions</li><li>• identifying load weights and volumes</li><li>• pre- and post-use inspection of equipment</li><li>• recording and reporting</li><li>• load storage location</li><li>• WHS requirements.</li></ul>

# Assessment Requirements for AUMABA002 Operate load shifting equipment

## Modification History

Release	Comment
Release 1	Unit updated to reflect the new standards for Training Packages Replaces AUMABA3002 Operate load shifting equipment

## Performance Evidence

Before competency can be determined, individuals must have competently operated load shifting equipment on a minimum of two occasions.

Individuals must demonstrate they can:

- conduct pre- and post-operational checks to load shifting equipment
- comply with workplace procedures and relevant load shifting regulations, standards and codes of practice
- document and report load shifting equipment faults
- demonstrate safe operating techniques for lifting, shifting and placing loads in line with work health and safety (WHS) and workplace requirements
- select and use load shifting equipment appropriate to weight and volume of load
- complete load shifting equipment records.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- WHS requirements when operating load shifting equipment, including overhead and ground level workplace hazards
- types, application and operation of load shifting equipment, including:
  - overhead travelling crane
  - pallet truck
  - trolley jack
- inspection procedures for load shifting equipment
- methods of determining load specifications, including weight, size and type
- methods of determining appropriate load shifting equipment for the circumstance
- load shifting equipment maintenance reports and schedules
- load shifting equipment storage procedures.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements and hold relevant load shifting equipment licences.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the operation of load-shifting equipment, e.g. load shifting equipment log books.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive manufacturing workplace or simulated workplace
- load shifting devices and equipment
- workplace documentation relating to load shifting, including load shifting equipment inspection documentation
- load shifting equipment operating instructions and procedures
- relevant to an automotive manufacturing environment.

## **AUMAMM001 Influence and lead work groups in an automotive manufacturing workplace**

### **Modification History**

<b>Release</b>	<b>Comment</b>
<b>Release 1</b>	Unit updated to reflect the new standards for Training Packages Replaces AUMAMM3001 Influence and lead work groups in an automotive manufacturing environment

### **Application**

This unit describes the performance outcomes required to influence and lead work groups and resolve problems in an automotive manufacturing environment.

It involves the application of skills and knowledge at a specialist level.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### **Competency Field**

Manufacturing - Common

### **Unit Sector**

Management, Leadership and Supervision - Manufacture

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Plan and determine work group task	<p>1.1 <b><i>Work instructions</i></b> and work health and safety (WHS) requirements are identified</p> <p>1.2 Current work processes are monitored for efficiency and effectiveness</p> <p>1.3 Process methods necessary to complete a group task are planned</p> <p>1.4 Responsibility for planning and completing components of the group task is assigned on an individual or shared basis</p>
2. Participate in work group task	<p>2.1 Communication methods appropriate to the group task are applied</p> <p>2.2 Responsibility for quality and project timelines and proposed productivity outcomes are agreed</p> <p>2.3 Assistance in completing the group task is sought from appropriate personnel as required</p> <p>2.4 Problems are discussed and resolved according to workplace procedures</p>
3. Monitor progress of work group task	<p>3.1 Contribution of individual group members to work task progress is monitored</p> <p>3.2 Feedback is provided to the work group on effectiveness of the group task</p> <p>3.3 Ways of improving performance are proposed and agreed on</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skills	Description
Reading skills to:	<ul style="list-style-type: none"><li>interpret team key production indicators and production goals</li><li>interpret production requirements and meeting agendas</li><li>interpret work instructions.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>legibly enter information into manufacturing control documents</li><li>complete production control sheets and graphs</li><li>legibly complete safety, accident and incident reporting documents.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>actively participate in team decision making and team meetings</li><li>communicate and contribute to the structure of team tasks.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>read, interpret and prepare control sheets and charts</li><li>interpret team key production indicators and production goals.</li></ul>
Planning and Organising skills to:	<ul style="list-style-type: none"><li>adapting to changing work conditions</li><li>manage time when planning, preparing and organising work priorities.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Work instructions</i></b> must include:	<ul style="list-style-type: none"><li>machine set-up procedures</li><li>operator instruction sheets (OIS) or workplace equivalent</li><li>preventative maintenance checklists</li><li>process control plans (PCPs) or workplace equivalent</li><li>standard operating procedures (SOPs) or workplace equivalent.</li></ul>

## Assessment Requirements for AUMAMM001 Influence and lead work groups in an automotive manufacturing workplace

### Modification History

Release	Comment
Release 1	Unit updated to reflect the new standards for Training Packages Replaces AUMAMM3001 Influence and lead work groups in an automotive manufacturing environment

### Performance Evidence

Before competency can be determined, individuals must have competently participated in influencing and leading work groups on a minimum of three occasions.

Individuals must demonstrate they can:

- give and receive instructions relating to group task
- work and communicate effectively with others in an automotive manufacturing environment
- influence and lead work groups within scope of own authority to:
  - achieve production goals
  - achieve work quality goals
  - identify problems and apply problem-resolution techniques
- follow work instructions, workplace diversity, equal opportunity and conflict-resolution procedures
- respond constructively to changing work requirements
- show initiative in adapting to changing work conditions or contexts
- manage time when planning, preparing and organising work priorities.

### Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- established workplace communication techniques, channels and protocols
- work health and safety (WHS) requirements relating to influencing and leading automotive manufacturing work groups
- workplace diversity, equal opportunity and conflict-resolution procedures when influencing and leading work groups
- quality systems and performance measures
- recording, reporting and maintenance procedures relating to influencing and leading automotive work groups.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to activities related to leading work groups in an automotive manufacturing environment.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive manufacturing workplace or simulated workplace
- work instructions
- workplace conflict-resolution, diversity and equal opportunity procedures that inform work involving influencing and leading automotive manufacturing work groups.

## AUMGTG001 Install fixed and moveable glass components on vehicles

### Modification History

Release	Comment
Release 1	Unit updated to reflect the new standards for Training Packages Replaces AUMGTG3001 Install fixed and moveable glass components

### Application

This unit describes the performance outcomes required to cut, prepare and install fixed and moveable glass components on vehicles.

It applies to those in an automotive service and repair environment and involves the application of skills and knowledge at a production worker level.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Competency Field

Manufacturing - Bus, Truck and Trailer

### Unit Sector

Technical - Glazing

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Fabricate templates for glass components	1.1 Job specifications are identified from work orders and work instructions 1.2 <b><i>Workplace procedures</i></b> are identified 1.3 Templates are fabricated from selected materials to meet job specifications
2. Mark and cut glass openings	2.1 Templates are used to mark and cut glass opening using workplace methods and equipment 2.2 Vehicle panels and trims are prepared for installing glass components
3. Install glass components	3.1 Adhesives or glass retaining system are identified and selected according to work order and job specification 3.2 Glass components are installed according to vehicle manufacturer specifications 3.3 Installed glass components are checked against specifications and leak tested, and corrective action is taken as required
4. Complete work processes	4.1 Work area is cleaned, and materials disposed of or recycled according to workplace procedures 4.2 Tools and equipment are cleaned, checked, maintained and stored according to workplace procedures 4.3 Workplace documentation is completed according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skills	Description
Reading skills to:	<ul style="list-style-type: none"><li>interpret job specifications and work instructions</li><li>identify work health and safety (WHS) requirements from workplace procedures</li><li>interpret operating procedures of tools and equipment</li><li>identify work orders.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>complete job sheets relating to installation.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>identify, mark out and measure glass components and templates according to specifications</li><li>use measuring equipment.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Workplace procedures</i></b> must include:	<ul style="list-style-type: none"><li>recording and reporting guidelines for installing glass components in vehicles</li><li>use of equipment for installing glass components in vehicles</li><li>WHS requirements related to installing glass components in vehicles, including:<ul style="list-style-type: none"><li>vehicle protection measures</li><li>personal protective equipment, including safety glasses, gloves and coveralls</li></ul></li><li>workplace quality guidelines for installing glass components in vehicles.</li></ul>

## Assessment Requirements for AUMGTG001 Install fixed and moveable glass components on vehicles

### Modification History

Release	Comment
Release 1	Unit updated to reflect the new standards for Training Packages Replaces AUMGTG3001 Install fixed and moveable glass components

### Performance Evidence

Before competency can be determined, individuals must have competently installed glass components on vehicles on a minimum of two occasions.

Individuals must demonstrate they can:

- interpret job information
- mark out and fabricate templates for glass components
- select appropriate glass sealants, adhesives, tools and equipment
- prepare, install and adjust fixed and moveable glass components according to workplace procedures and work health and safety (WHS) requirements
- leak test installed glass components
- complete job sheets relating to installation.

### Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- workplace procedures and WHS requirements relating to installing fixed and moveable glass components on vehicles
- work documentation covering procedures, specifications, schedules and work plans
- template measuring and marking out procedures
- cutting procedures for vehicle panels and trim
- installation procedures for fixed, bonded and moveable glass components
- urethane, rubber and butyl installation methods
- bonded glass installation methods.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles on which they have worked, e.g. work sheets.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive manufacturing workplace or simulated workplace
- tools and equipment required for installing glass components
- automotive vehicle or simulated frame for glass installation
- materials to produce templates for glass components
- fixed and movable glass components
- work orders and job specifications
- WHS requirements for installing glass components on vehicles, including:
  - vehicle protection equipment
  - personal protective equipment, including safety glasses, gloves and coveralls
- workplace procedures to install fixed and moveable glass components on vehicles
- workplace documentation relating to installing glass components on vehicles, including:
  - customer details
  - glass warranty information
  - work sheets.

## AUMGTS004 Fabricate parts for vehicle sub-assemblies

### Modification History

Release	Comment
Release 1	Unit updated to reflect the new standards for Training Packages Replaces AUMGTS3004 Fabricate parts for sub-assemblies

### Application

This unit describes the performance outcomes required to produce, finish and test parts and components for vehicle sub-assemblies.

It applies to those in an automotive manufacturing environment and involves the application of skills and knowledge at a production worker level.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Competency Field

Manufacturing - Bus, Truck and Trailer

### Unit Sector

Technical - Fabrication

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Plan and prepare	1.1 Work orders, job specifications and drawings are identified and confirmed 1.2 Tools, equipment and materials are identified, selected and prepared according to work order and job specification 1.3 Materials are inspected for quality, and defects identified and reported 1.4 Welding equipment is selected, inspected, tested and adjusted according to job requirements
2. Weld components	2.1 Components are welded as identified in working drawings according to <b><i>workplace procedures</i></b> 2.2 Welds are completed to workplace <b><i>quality standards</i></b> and weld specifications 2.3 Welded parts are checked against job specifications 2.4 Weld faults are identified and rectified according to workplace procedures
3. Assemble and finish sub-assemblies	3.1 Sub-assemblies are completed and checked against job specification 3.2 Sub-assembly fasteners are tensioned to specifications 3.3 Seals, adhesives and sealants are applied to ensure joints are leak free
4. Complete work processes	4.1 Final inspections are made and faulty sub-assemblies are reworked in line with workplace procedures 4.2 Tools, equipment and work areas are cleaned, maintained, and inspected according to workplace procedures 4.3 Waste material is collected and recycled or disposed of according to workplace procedures 4.4 Faulty equipment is identified, tagged and reported according to workplace procedures 4.5 Work job sheets are completed and reported to supervisor

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skills	Description
Reading skills to:	<ul style="list-style-type: none"><li>interpret workplace procedures, work health and safety (WHS) requirements, work orders, job specifications and drawings</li><li>interpret equipment operating procedures and work instructions.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>identify part numbers and quantities</li><li>interpret job specification measurements</li><li>set welding equipment</li><li>use measuring equipment.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>complete faulty equipment tags</li><li>legibly complete production documents.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>inform team members of suitable fabrication sequence and methods.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>select and prepare equipment, materials and work area</li><li>fabricate parts for sub-assemblies within required timelines.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>access, interpret and apply work orders and work instructions.</li></ul>
Teamwork skills to:	<ul style="list-style-type: none"><li>work as part of a production team.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Workplace procedures</i></b> must include:	<ul style="list-style-type: none"><li>• procedures for recording and reporting the fabrication of parts for vehicle sub-assemblies</li><li>• use of tools and equipment for fabricating parts for vehicle sub-assemblies</li><li>• WHS requirements for fabricating parts for vehicle sub-assemblies</li><li>• workplace quality standards relevant to fabricating parts for vehicle sub-assemblies.</li></ul>
<b><i>Quality standards</i></b> must include:	<ul style="list-style-type: none"><li>• component fit and finish of fabricated parts for vehicle sub-assemblies</li><li>• weld quality of fabricated parts for vehicle sub-assemblies.</li></ul>

## Assessment Requirements for AUMGTS004 Fabricate parts for vehicle sub-assemblies

### Modification History

Release	Comment
Release 1	Unit updated to reflect the new standards for Training Packages Replaces AUMGTS3004 Fabricate parts for sub-assemblies

### Performance Evidence

Before competency can be determined, individuals must have competently fabricated parts for sub-assemblies on a minimum of two occasions.

Individuals must demonstrate they can:

- locate, interpret and apply fabrication information and specifications
- use tools, equipment and welding equipment safely
- fabricate parts for sub-assemblies according to workplace procedures and work health and safety (WHS) requirements
- follow work instructions and production schedules when fabricating parts for vehicle sub-assemblies
- use inspection and checking processes and identify faulty parts of vehicle sub-assemblies.

### Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- WHS requirements relevant to fabricating vehicle sub-assemblies
- types of vehicle sub-assemblies and their components
- original equipment manufacturer operating procedures
- component fabrication alignment procedures
- welding types and techniques for fabricating vehicle sub-assemblies
- assembly procedures of vehicle sub-assemblies.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicle sub-assemblies that they have fabricated, e.g. production work sheets.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive manufacturing workplace or simulated workplace
- work instructions for fabricating vehicle sub-assemblies
- vehicle sub-assembly components
- vehicle sub-assembly specifications
- tools, equipment and welding equipment relevant to fabricating vehicle sub-assemblies.

## AUMGTY002 Install vehicle components

### Modification History

Release	Comment
Release 1	Unit updated to reflect the new standards for Training Packages Replaces AUMGTY3002 Mount and install assembled component to chassis or frame

### Application

This unit describes the performance outcomes required to mount and install assembled components to a chassis or frame (e.g. vehicle cabin, sleeper or vehicle bodies). It applies to those in an automotive and related component manufacturing environment and involves the application of skills and knowledge at a specialist level. No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Competency Field

Manufacturing - Bus, Truck and Trailer

### Unit Sector

Technical - Chassis and Frame

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Plan and prepare	1.1 Hand <b><i>tools and equipment</i></b> are selected and inspected, and faults repaired or reported 1.2 Appropriate lifting equipment is selected and checked for safe operation 1.3 Fasteners are identified from job specifications 1.4 Job <b><i>information</i></b> and working drawings are identified, interpreted and confirmed
2. Position and tension components	2.1 <b><i>Workplace procedures</i></b> are identified and followed 2.2 Components are matched, positioned and secured according to work instruction and component specifications 2.3 Fasteners are tensioned to specification 2.4 Components are inspected for alignment and quality according to work order and workplace quality standards
3. Hook up systems	3.1 Component service lines are hooked up according to drawings and component specifications 3.2 Completed hook-up is checked against job specifications, and then tested and inspected for quality and operation
4. Complete work processes	4.1 Work area and equipment are cleaned, inspected and maintained according to workplace procedures 4.2 Faulty equipment is identified, tagged and reported 4.3 Work sheets and production schedule are completed and given to appropriate personnel

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skills	Description
Reading skills to:	<ul style="list-style-type: none"><li>• identify workplace procedures and work health and safety (WHS) requirements</li><li>• interpret job instructions, working drawings, original equipment manufacturer (OEM) guides and, if applicable, requirements of Vehicle Standards Bulletin 6 (VSB6) National Code of Practice – Heavy Vehicle Modifications</li><li>• interpret component specifications</li><li>• identify installation sequences</li><li>• identify work sheets and inspection forms.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• complete production schedules, equipment maintenance forms and faulty equipment tags</li><li>• prepare sequence work plans.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• identify drawing and component specifications</li><li>• use measuring equipment</li><li>• identify fastener quantities and tension specifications.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>• select and prepare components, equipment and work area.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Tools and equipment</i></b> must include:	<ul style="list-style-type: none"><li>• hand and power tools</li><li>• lifting equipment</li><li>• vehicle protection equipment.</li></ul>
<b><i>Information</i></b> must include:	<ul style="list-style-type: none"><li>• component and service line specifications</li><li>• component assembly instructions</li><li>• customer requirements</li><li>• manufacturer specifications and guides</li><li>• VSB6</li><li>• work orders and job specifications</li><li>• workplace procedures and instructions.</li></ul>
<b><i>Workplace procedures</i></b> must include:	<ul style="list-style-type: none"><li>• equipment operations</li><li>• quality standards</li><li>• recording and reporting</li><li>• WHS requirements</li><li>• work instructions.</li></ul>

## Unit Mapping Information

## Assessment Requirements for AUMGTY002 Install vehicle components

### Modification History

Release	Comment
Release 1	Unit updated to reflect the new standards for Training Packages Replaces AUMGTY3002 Mount and install assembled component to chassis or frame

### Performance Evidence

Before competency can be determined, individuals must have competently installed vehicle components on a minimum of two occasions.

Individuals must demonstrate they can:

- mount and install assembled components and service lines to a chassis or frame according to workplace procedures and work health and safety (WHS) requirements
- follow job specifications and work instructions when installing vehicle components
- identify materials lists, working drawings and production requirements
- select components for installation
- select and use tools and equipment for installing vehicle components
- complete workplace documentation relating to installing vehicle components
- apply manual-handling techniques relating to installing vehicle components.

### Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- workplace procedures and WHS requirements relating to installing vehicle components, including safe use of vehicle component installation equipment
- quality standards relating to installing vehicle components
- manufacturing procedures and vehicle component specifications
- material-handling techniques for installing vehicle components
- work sheets and production schedule documentation relating to installing vehicle components
- vehicle components
- procedures for operating lifting equipment required to install vehicle components.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles on which they have worked, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive manufacturing workplace or simulated workplace
- working drawings and component specifications for installation
- original equipment manufacturer (OEM) installation guides
- service line fasteners and assembled components
- tools and equipment required to install vehicle components
- personal protective clothing and equipment relating to work requirements
- Vehicle Standards Bulletin 6 (VSB6) National Code of Practice – Heavy Vehicle Modifications
- workplace procedures for installing vehicle components
- lifting equipment required to install vehicle components.

## AURFA009 Carry out research into the automotive industry

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to carry out research into the nature and structure of an automotive retail service and repair (RS&R) or automotive manufacturing workplace. It also requires the learner to prepare a research report.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Competency Field

Common

### Unit Sector

Foundation Skills

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare and plan research	1.1 Automotive industry sectors and types of businesses are identified for research 1.2 Information on the structure and operation of the automotive industry is located 1.3 <b><i>Safety and environmental requirements</i></b> for the automotive business are sourced
2. Investigate nature and structure of automotive business	2.1 Type of business, product line and customer profile are identified 2.2 Basic <b><i>supervision or management structure</i></b> of business is identified 2.3 <b><i>Employment conditions</i></b> of business are identified 2.4 <b><i>Employee clothing requirements</i></b> for business are identified 2.5 Workplace plan is drawn detailing identified <b><i>workplace safety features</i></b> 2.6 <b><i>Environment protection features</i></b> of business are identified 2.7 Findings and details are recorded for research report
3. Prepare research report	3.1 Research findings are reviewed and summarised under broad headings 3.2 Research findings are presented as a document

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"><li>locate key information quickly and efficiently in appropriate sources.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>interpret information from industry and workplace documents.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>organise findings and prepare a research report.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>participate effectively in verbal exchanges using questioning and active listening to obtain information on business structure and operation from business workers.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety and environmental requirements</i></b> must include:	<ul style="list-style-type: none"> <li>• relevant workplace procedures reflecting health and safety requirements</li> <li>• material safety management systems</li> <li>• hazardous substances and dangerous goods codes.</li> </ul>
<b><i>Supervision or management structure</i></b> must include one or more of the following:	<ul style="list-style-type: none"> <li>• employee supervision</li> <li>• line or operational management</li> <li>• team leaders</li> <li>• trainers.</li> </ul>
<b><i>Employment conditions</i></b> must include one or more of the following:	<ul style="list-style-type: none"> <li>• employee attendance times</li> <li>• induction training</li> <li>• shift work and weekend work requirements</li> <li>• type of qualifications.</li> </ul>
<b><i>Employee clothing requirements</i></b> must include:	<ul style="list-style-type: none"> <li>• any requirements in special work areas, such as foundry or paint shop</li> <li>• ear protection</li> <li>• personal protective clothing and footwear</li> <li>• safety glasses</li> <li>• any uniform requirements.</li> </ul>
<b><i>Workplace safety features</i></b> must include:	<ul style="list-style-type: none"> <li>• emergency procedures</li> <li>• fire extinguishers (type and location)</li> <li>• first aid facilities</li> <li>• hazardous warning signs</li> <li>• manual-handling procedures.</li> </ul>
<b><i>Environment protection features</i></b> must include:	<ul style="list-style-type: none"> <li>• emission control</li> <li>• material recycling</li> <li>• waste material disposal.</li> </ul>

## Unit Mapping Information

## Assessment Requirements for AURAF009 Carry out research into the automotive industry

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- produce a research report on an automotive retail service or repair business or a component manufacturing business.

### Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- automotive industry information, including:
  - sectors of the industry
  - types of businesses in each sector, including their products and services
  - distribution channels for industry products and services
  - relationships of the automotive industry with other industries
  - state and commonwealth government agencies responsible for directing safety and environmental requirements for the automotive industry
  - major automotive industry bodies and associations
  - career opportunities and career paths in the automotive industry
- roles, responsibilities and inter-relationships of individual personnel in an industry environment, including:
  - unions and employer bodies
  - professional associations
- industrial relations issues, including:
  - awards and enterprise bargaining agreements
  - non-award areas
  - cultural issues
- employment obligations in day-to-day work activities in the automotive industry
- new technologies in the automotive industry and their effect on the industry
- procedures for recording, reviewing and presenting research findings.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that validates the industry research.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- reference books and technical manuals
- industry journals
- computer and internet access
- job descriptions
- federal and state industrial awards
- specialist technical publications.

## AURETK003 Operate electrical test equipment

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to operate electrical test equipment. It requires the learner to plan and prepare the task, select the correct equipment, test electrical and electronic circuits, and check and store the electrical test equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Competency Field

Electrical

### Unit Sector

Technical - Tools and Equipment

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Plan to operate electrical test equipment	1.1 <b><i>Safety requirements</i></b> are sourced and interpreted 1.2 Task instruction is interpreted and vehicle electrical circuit to be worked on is identified 1.3 Manufacturer specifications and workplace procedures for operating electrical test equipment are sourced and interpreted 1.4 Potential hazards and risks associated with task are identified and reported to workplace supervisor 1.5 Electrical test equipment is identified according to task instruction and manufacturer specifications
2. Test electrical circuits	2.1 <b><i>Electrical test equipment</i></b> is checked prior to use according to manufacturer specifications and safety requirements 2.2 Electrical test equipment is used to test vehicle electrical circuits according to manufacturer specifications and safety requirements 2.3 Electrical test equipment readings are checked and compared with manufacturer specifications 2.4 Electrical test equipment readings are recorded
3. Complete work processes	3.1 Final inspection is made to ensure work meets task instruction and workplace standards, and vehicle or equipment is presented ready for use or storage according to workplace procedures 3.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures 3.3 Tools and equipment are checked and stored according to workplace procedures, or tagged and reported where necessary 3.4 Workplace documentation is processed according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"><li>locate appropriate sources of vehicle electrical system information and electrical test equipment operating procedures.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>select and interpret key information from job instruction, manufacturer specifications, safety requirements and workplace procedures to safely and effectively operate electrical test equipment</li><li>select and interpret key information from environmental requirements and workplace procedures to support environmental sustainability and to ensure a clean and safe work site.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>legibly and accurately fill out workplace documentation, using correct industry terminology and conventions.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>use basic mathematical operations, including addition, subtraction, multiplication and division, when using Ohm's law and Watt's law to calculate electrical voltage, current flow, resistance and power</li><li>read and interpret electrical test equipment correctly, and report and record the results correctly using relevant mathematical symbols and conventions (e.g. <math>\Omega</math> for ohms).</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>plan own work requirements and prioritise actions to achieve required outcomes.</li></ul>
Self-management skills to:	<ul style="list-style-type: none"><li>recognise own limitations when selecting and using tools and equipment and seek timely advice.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>refer problems that cannot be readily resolved and seek assistance from workplace supervisor.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety requirements</i></b> must include:	<ul style="list-style-type: none"><li>• information about key aspects of work health and safety (WHS) and occupational health and safety (OHS) requirements, including:</li><li>• use of personal protective equipment, including safety glasses, ear protection and safety footwear</li><li>• use of tools</li><li>• identification of electrical hazards</li><li>• application of procedures for operating electrical test equipment.</li></ul>
<b><i>Electrical test equipment</i></b> must include:	<ul style="list-style-type: none"><li>• 12 volt test lights and LED test lights</li><li>• ammeters</li><li>• voltmeters</li><li>• ohmmeters</li><li>• multimeters.</li></ul>

## Assessment Requirements for AURETK003 Operate electrical test equipment

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- correctly and safely operate electrical test equipment to test electrical circuits on a minimum of two different vehicles.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS) and, occupational health and safety (OHS) requirements when operating electrical test equipment, including:
- procedures for the correct use of personal protective equipment, including safety glasses, ear protection and safety footwear
- procedures for the correct use of tools
- identification of electrical hazards
- procedures for operating electrical test equipment
- meaning of electrical terms, including:
  - voltage
  - amperage
  - watts
  - resistance
- theory of electrical circuits, including:
  - Ohm's law
  - Watt's law
- circuit types, including series and parallel
- electrical component symbols
- types of electrical circuits in vehicles, including electrical components
- types of electrical circuit diagrams
- types, application and operation of electrical test equipment, including:
  - 12 volt test lights and LED test lights
  - ammeters
  - voltmeters
  - multimeters
  - ohmmeters
- procedures for testing electrical circuits on vehicles
- procedures for identifying and rectifying faults
- work area clean-up and maintenance requirements.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to operating electrical test equipment, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- electrical test equipment, including:
  - 12 volt test light
  - ammeter
  - voltmeter
  - ohmmeter
  - multimeter
  - LED test light
- two vehicles with operational electrical circuits.

## AURETR046 Remove and refit vehicle batteries

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to remove and refit lead-acid batteries from a vehicle. It requires the learner to plan and prepare the task; investigate battery types and connections; perform the task; and maintain the work area, tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Competency Field

Electrical

### Unit Sector

Technical - Electrical and Electronic

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare to remove and refit battery	<p>1.1 <b><i>Safety and environmental requirements</i></b> are sourced and interpreted</p> <p>1.2 Task instruction is interpreted and vehicle battery to be worked on is identified</p> <p>1.3 Manufacturer specifications and workplace procedures for battery removal and refitting are sourced and interpreted</p> <p>1.4 Potential hazards and risks associated with task are identified and reported to workplace supervisor</p> <p>1.5 Tools and equipment required for battery removal and refitting are identified according to manufacturer specifications</p>
2. Remove battery	<p>2.1 Tools, equipment and materials are selected and checked prior to use according to manufacturer specifications and safety requirements</p> <p>2.2 Vehicle is prepared for battery removal according to workplace procedures and safety and environmental requirements</p> <p>2.3 <b><i>Battery</i></b> is removed according to workplace procedures and manufacturer specifications, and without causing damage to components, tools or equipment</p> <p>2.4 Battery is identified and inspected according to manufacturer specifications</p> <p>2.5 Battery inspection results are recorded</p>
3. Refit battery	<p>3.1 Battery is refitted according to workplace procedures, manufacturer specifications and safety requirements, and without causing damage to components, tools or equipment</p> <p>3.2 Vehicle is checked for correct electrical operation</p>
4. Complete work processes	<p>4.1 Final inspection is made to ensure work meets task instruction and workplace standards, and vehicle is presented ready for use or storage according to workplace procedures</p> <p>4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures</p> <p>4.3 Tools and equipment are checked and stored according to workplace procedures, or tagged and reported where necessary</p> <p>4.4 Workplace documentation is processed according to workplace procedures</p>

## Foundation Skills

# Assessment Requirements for AURETR046 Remove and refit vehicle batteries

## Modification History

Release	Comment
Release 1	New unit of competency

## Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- correctly remove and refit the automotive batteries of a minimum of two different operational vehicles.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements when removing and refitting batteries, including:
  - safety data sheets (SDS) and procedures for handling, storing and disposing of used automotive batteries
  - use of personal protective equipment, including safety glasses, ear protection and safety footwear
  - use of hand tools and lifting equipment
- battery types and their application, including:
  - lead-acid batteries, including:
    - deep cycle batteries
    - maintenance-free batteries, including gel batteries and absorbed glass mat batteries
    - lithium-ion batteries
- battery identification procedures
- battery polarity and connection methods
- battery removal and refitting methods, precautions and procedures
- battery cleaning methods
- post-fitting inspection procedures
- work area clean-up and maintenance requirements.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles where they have removed and refitted batteries, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- two operational vehicles with lead-acid batteries
- hand tools for removing and refitting lead-acid batteries.

## AURETR047 Recharge vehicle batteries

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to recharge a vehicle's battery. It requires the learner to plan and prepare the task; investigate battery types and connections; inspect, test and charge batteries; and maintain a work area, tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Competency Field

Electrical

### Unit Sector

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare to recharge battery	<p>1.1 <b><i>Safety and environmental requirements</i></b> are sourced and interpreted</p> <p>1.2 Task instruction is interpreted and battery to be worked on is identified</p> <p>1.3 Manufacturer specifications and workplace procedures for recharging vehicle battery are sourced and interpreted</p> <p>1.4 Potential hazards and risks associated with task are identified and reported to workplace supervisor</p> <p>1.5 Tools and equipment are identified according to manufacturer specifications</p>
2. Determine battery serviceability	<p>2.1 <b><i>Battery testing equipment</i></b> is checked prior to use according to manufacturer specifications and safety requirements</p> <p>2.2 <b><i>Battery</i></b> is cleaned and prepared for inspection and testing according to manufacturer specifications and safety and environmental requirements</p> <p>2.3 Battery is inspected and tested according to manufacturer specifications and workplace procedures</p> <p>2.4 Observations of battery condition and serviceability or issues requiring further exploration are recorded</p>
3. Charge battery	<p>3.1 Battery charging equipment is checked prior to use according to manufacturer specifications and safety requirements</p> <p>3.2 Battery is prepared and charged according to manufacturer specifications and procedures</p> <p>3.3 Battery post-charging condition and serviceability are checked according to manufacturer specifications and workplace procedures</p> <p>3.4 Observations of battery condition and serviceability post charging or issues requiring further exploration are recorded</p>
4. Complete work processes	<p>4.1 Final inspection is made to ensure work meets task instruction and workplace standards, and battery is presented ready for use or storage according to workplace procedures</p> <p>4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures</p> <p>4.3 Tools and equipment are checked and stored according to</p>

	workplace procedures, or tagged and reported where necessary 4.4 Workplace documentation is processed according to workplace procedures
--	--

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> <li>locate appropriate sources of vehicle battery information and battery charging procedures.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>select and interpret key information from manufacturer specifications, safety requirements and workplace procedures relating to recharging vehicle batteries</li> <li>select and interpret key information from environmental requirements and workplace procedures to ensure a clean and safe work site.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>legibly and accurately fill out workplace documentation using correct industry terminology and conventions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>read and interpret numerical information in battery identification codes and ratings</li> <li>use basic mathematical operations, including addition, subtraction, multiplication and division, to calculate appropriate charge rates</li> <li>read and interpret electrical test equipment correctly, including voltmeters and hydrometers, and report and record the results correctly using relevant mathematical symbols and conventions (e.g. V for volts).</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>plan own work requirements and prioritise actions to achieve required outcomes.</li> </ul>
Self-management skills to:	<ul style="list-style-type: none"> <li>recognise own limitations when selecting and using tools and equipment and seek timely advice.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>refer problems that cannot be readily resolved and seek assistance from workplace supervisor.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>set up and operate equipment and tools required to recharge batteries.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety and environmental requirements</i></b> must include:	<ul style="list-style-type: none"><li>• information about key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:<ul style="list-style-type: none"><li>• use of personal protective equipment, including safety glasses, ear protection and safety footwear</li><li>• use of hand tools and battery lifting equipment</li><li>• identifying dangers of working with battery testing and charging equipment</li><li>• applying procedures for handling, storing and disposing of used automotive batteries and battery fluid.</li></ul></li></ul>
<b><i>Battery testing equipment</i></b> must include:	<ul style="list-style-type: none"><li>• hydrometer</li><li>• high-rate discharge tester.</li></ul>
<b><i>Battery</i></b> must include:	<ul style="list-style-type: none"><li>• lead-acid battery.</li></ul>

## Assessment Requirements for AURETR047 Recharge vehicle batteries

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- correctly recharge at least two automotive batteries with different cold-cranking amp (CCA) ratings.

### Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:
  - use of personal protective equipment, including safety glasses, ear protection and safety footwear
  - dangers of working with battery testing and charging equipment
  - safety data sheets (SDS) and procedures for handling, storing and disposing of automotive batteries and battery fluid
- battery inspection and testing methods, including:
  - visual checks
  - hydrometers
  - high-rate discharge testers
  - resting battery voltage
- battery charging procedures, including:
  - methods for determining appropriate charging rate, including reserve capacity (RC) and CCA methods
  - types, application and operating procedures for automotive battery chargers
- work area clean-up and maintenance requirements.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles where they have recharged batteries, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- two lead-acid automotive batteries with different CCA ratings
- battery testing equipment, including hydrometer and high-rate discharge tester
- battery charger
- automotive hand tools.

## AURETR048 Construct and test basic electronic circuits

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to construct and test basic electronic circuits using a small number of standard electronic components. It requires the learner to plan and prepare the task, select the correct equipment, construct and test electronic circuits, and check and store the electrical test equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Competency Field

Electrical

### Unit Sector

Technical - Electrical and Electronic

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare to construct basic electronic circuit	<p>1.1 <b><i>Safety and environmental requirements</i></b> are sourced and interpreted</p> <p>1.2 Task instruction is interpreted and <b><i>electronic circuit</i></b> to be worked on is identified</p> <p>1.3 Manufacturer specifications and workplace procedures for electronic circuitry are sourced and interpreted</p> <p>1.4 Potential hazards and risks associated with task are identified and reported to workplace supervisor</p>
2. Draw circuit diagrams and identify equipment and materials to construct electronic circuit	<p>2.1 Electronic circuit diagrams that accurately reflect the circuit specifications are drawn according to manufacturer specifications</p> <p>2.2 Electronic components are depicted correctly in circuit diagram using standard symbols</p> <p>2.3 Component and material requirements are identified from electronic circuit diagram and recorded</p>
3. Construct electronic circuit	<p>3.1 Tools, equipment and electronic components are sourced and selected according to manufacturer specifications and safety requirements</p> <p>3.2 Component manufacturer installation and connection information is read, interpreted and applied</p> <p>3.3 Circuit is constructed using <b><i>electronic components</i></b> according to manufacturer specifications and safety requirements</p>
4. Test electronic circuit	<p>4.1 Circuit fault testing equipment is identified and sourced according to workplace procedures, manufacturer specifications and safety requirements</p> <p>4.2 Electronic circuit is tested according to workplace procedures, manufacturer specifications and safety requirements</p> <p>4.3 Faults detected are corrected and circuit is re-tested to confirm their operation</p> <p>4.4 Circuit testing procedures and outcomes are recorded</p>
5. Complete work processes	<p>5.1 Final inspection is made to ensure work meets task instruction and workplace standards, and that electronic circuit is constructed ready for use or storage</p> <p>5.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures</p>

ELEMENT	PERFORMANCE CRITERIA
	5.3 Tools and equipment are checked and stored according to workplace procedures, or tagged and reported where necessary 5.4 Workplace documentation is processed according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> <li>locate appropriate sources of electronic circuit information and electrical test equipment operating procedures.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>select and interpret key information from manufacturer specifications, safety requirements and workplace procedures relating to constructing basic electronic circuits</li> <li>select and interpret key information from environmental requirements and workplace procedures to ensure a clean and safe work site.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>legibly and accurately fill out workplace documentation using correct industry terminology and conventions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>read and interpret numerical information imbedded in electronic components' identification codes</li> <li>use basic mathematical operations, including addition, subtraction, multiplication and division, when using Ohm's law and Watt's law to calculate electrical voltage, current flow, resistance and power</li> <li>read and interpret electrical test equipment correctly, and report and record the results correctly using relevant mathematical symbols and conventions (e.g. <math>\Omega</math> for ohms).</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>plan own work requirements and prioritise actions to achieve required outcomes.</li> </ul>
Self-management skills to:	<ul style="list-style-type: none"> <li>recognise own limitations when selecting and using tools and equipment and seek timely advice.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>identify potential or actual hazards and take action to minimise risk</li> <li>refer problems that cannot be readily resolved and seek assistance from workplace supervisor.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>set up and operate equipment and tools required to construct basic electronic circuits.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety and environmental requirements</i></b> must include:	<ul style="list-style-type: none"> <li>information about key aspects of work health and safety (WHS) and occupational health and safety (OHS) requirements, including: <ul style="list-style-type: none"> <li>use of personal protective equipment, including safety glasses</li> <li>use of tools</li> <li>identification of electrical hazards</li> <li>applying procedures for disposing of used electronic circuit components and materials.</li> </ul> </li> </ul>
<b><i>Electronic circuit</i></b> must include:	<ul style="list-style-type: none"> <li>printed circuit board.</li> </ul>
<b><i>Electronic components</i></b> must include:	<ul style="list-style-type: none"> <li>heat sinks</li> <li>electronic wiring</li> <li>terminals</li> <li>solders</li> <li>switches</li> <li>lamps</li> <li>relays</li> <li>diodes</li> <li>resistors</li> <li>capacitors</li> <li>transistors.</li> </ul>

## Assessment Requirements for AURETR048 Construct and test basic electronic circuits

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- correctly and safely construct and test two different basic electronic circuits.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements relating to the construction of basic electronic circuits, including:
  - use of personal protective equipment, including safety glasses
  - use of soldering irons
  - use of hand tools and electrical test equipment
  - identification of electrical risks and hazards
  - disposal of used electronic components
- meaning of electrical terms, including:
  - voltage
  - amperage
  - watts
  - current
  - resistance
- theory of electrical circuits, including:
  - Ohm's law
  - Watt's law
- types and application of electronic components, including:
  - heat sinks
  - electronic wiring
  - terminals
  - solder
  - switches
  - lamps
  - potentiometers
  - relays
  - diodes
  - resistors
  - capacitors
  - transistors
  - integrated circuits
- types, application and operation of basic electronic circuits, including:
  - flashing circuits
  - timing circuits
  - speed control circuits
  - methods for drawing electronic circuit diagrams
  - procedures for constructing basic electronic circuits
  - procedures for testing electronic circuits, and identifying and rectifying faults
- work area clean-up and maintenance requirements.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to having constructed basic electronic circuits, e.g. circuit diagrams. Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace, including a safe work area for constructing electronic circuit boards
- personal protective equipment appropriate to the workplace, including safety glasses
- electronic components and materials, including:
  - heat sinks
  - electronic wiring
  - terminals
  - solders
  - switches
  - lamps
  - relays
  - diodes
  - resistors
  - capacitors
  - transistors.

## AURKTJ001 Remove, inspect and fit earthmoving and off-the-road tyres

### Modification History

Release	Comment
Release 1	New unit of competency
Release 2	Minor changes to the application, performance criteria, foundation skills, range of conditions, performance evidence, knowledge evidence and assessment requirements

### Application

This unit describes the performance outcomes required to remove, inspect and fit earthmoving and off-the-road (OTR) tyres to construction, mining, agricultural and industrial vehicles. It involves removing the tyre from the rim; controlling risks; inspecting the tyre, wheel and rim assembly; recommending required repair action; fitting the tyre to the wheel and rim assembly; and preparing the tyre, wheel and rim assembly for use or storage.

It applies to those who fit tyres to wheel assemblies and rim assemblies of not less than 600 mm (24 inches) nominal diameter.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.

### Competency Field

Mechanical - Mobile Plant

### Unit Sector

Technical - Wheels and Tyres

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare to remove tyre from wheel and rim assembly of a vehicle	1.1 Australian standards for earthmoving and OTR tyres, manufacturer instructions, workplace procedures and safety information are identified and interpreted 1.2 Site and task hazards are identified and control measures determined 1.3 <b><i>Safety requirements</i></b> are identified and applied 1.4 Tyre, rim and mounting system is identified 1.5 <b><i>Tools and equipment</i></b> are selected and checked according to manufacturer instructions and workplace procedures
2. Control risk	2.1 <b><i>Hazardous conditions in work environment</i></b> are identified and controlled 2.2 <b><i>Hazardous tyre and wheel and rim assembly conditions</i></b> are identified and controlled 2.3 Tyre is deflated according to Australian standards, manufacturer instructions and workplace procedures
3. Remove tyre from wheel and rim assembly	3.1 Australian standards and workplace procedures are accessed and interpreted to determine tyre removal procedures 3.2 Tyre is removed according to Australian standards and workplace procedures 3.3 Tyre removal is completed without causing component damage 3.4 Tyre and rim assembly are cleaned and visually inspected according to Australian standards and workplace procedures
4. Inspect tyre, wheel and rim assembly	4.1 Tyre is cleaned and visually inspected for damage and wear according to Australian standards and workplace procedures 4.2 Wheel and rim assembly are visually inspected for serviceability 4.3 <b><i>Mounting components and fasteners</i></b> are visually inspected for damage, wear, corrosion, foreign material and cracks according to workplace procedures
5. Recommend repair action and replace unserviceable parts and components	5.1 Inspection findings are recorded and reported according to workplace procedures 5.2 Recommended repair actions are documented according to workplace procedures 5.3 Unserviceable parts and components are replaced and reported according to workplace procedures
6. Fit tyre to wheel and rim	6.1 Workplace procedures for fitting tyres are accessed and

ELEMENTS	PERFORMANCE CRITERIA
assembly	interpreted 6.2 Tyre is fitted according to workplace procedures 6.3 Tyre and rim assembly are checked according to Australian standards and workplace procedures to confirm correct assembly and component compatibility and serviceability prior to inflation
7. Inflate tyre	7.1 Tyre inflation safety procedures are identified and applied prior to inflating tyre 7.2 Tyre is inflated according to Australian standards and workplace procedures 7.3 Tyre and rim assembly are monitored during inflation according to Australian standards and workplace procedures
8. Complete work processes	8.1 Final work inspection is conducted to ensure work is to required standard 8.2 Tyre, wheel and rim assembly are prepared for use or storage according to workplace procedures 8.3 Tools and equipment are checked, tagged where necessary, and stored according to workplace procedures 8.4 <b>Workplace documentation</b> is completed and processed according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance are not explicit in the performance criteria.

Skills	Description
Reading skills to:	<ul style="list-style-type: none"><li>• read and interpret:<ul style="list-style-type: none"><li>• written information in Australian standards, workplace procedures, manufacturer instructions, and occupational health and safety (OHS) and work health and safety (WHS) requirements relating to removing, inspecting and fitting earthmoving and OTR tyres</li></ul></li><li>• charts, lists, drawings and other applicable documents.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• document inspection findings and recommend repair actions.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• ask questions to clarify instructions and procedures</li><li>• report inspection results</li><li>• brief team and customers.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• read and interpret metric and imperial systems of measurement</li><li>• read and interpret mathematical information, including charts and drawings</li><li>• use specialist tools and measuring equipment, including:<ul style="list-style-type: none"><li>• gauges</li><li>• pressure testing guns.</li></ul></li></ul>
Digital literacy skills to:	<ul style="list-style-type: none"><li>• use workplace computerised technology and tools relating to the removal and refitting of earthmoving and OTR tyres.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>• plan and prioritise own work to achieve required outcomes.</li></ul>
Self-management skills to:	<ul style="list-style-type: none"><li>• select and use appropriate equipment, materials, processes and procedures</li><li>• recognise own limitations when selecting and using tools and equipment and seek timely advice.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>• seek information and assistance as required to solve problems</li><li>• identify tyre condition and performance</li><li>• match tyres to wheel and rim assemblies and vehicle type.</li></ul>
Teamwork skills to:	<ul style="list-style-type: none"><li>• work with team members, such as riggers, doggers, mechanics, tyre fitters, drivers and site operators.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<p><b><i>Safety requirements</i></b> must include:</p>	<ul style="list-style-type: none"> <li>• those prescribed under Australian standards, OHS and WHS Acts and regulations, and workplace policies and procedures</li> <li>• hazard control</li> <li>• manual-handling techniques</li> <li>• personal protective clothing and equipment</li> <li>• using tools and equipment</li> <li>• working with dangerous or toxic substances:             <ul style="list-style-type: none"> <li>• chemicals</li> <li>• compressed air</li> <li>• nitrogen gas</li> <li>• polyurethane resin (PUR) tyre fill</li> <li>• tyre additive.</li> </ul> </li> </ul>
<p><b><i>Tools and equipment</i></b> must include:</p>	<ul style="list-style-type: none"> <li>• bead breakers</li> <li>• cranes</li> <li>• forklifts</li> <li>• grab trucks</li> <li>• hand tools</li> <li>• inflation and deflation tools</li> <li>• integrated tool handlers</li> <li>• jacks</li> <li>• lifting equipment</li> <li>• lock ring catcher</li> <li>• mufflers</li> <li>• pneumatic tools</li> <li>• power tools</li> <li>• soft face hammers</li> <li>• support stands</li> <li>• torque tools</li> <li>• tyre levers</li> <li>• wire brushes.</li> </ul>
<p><b><i>Hazardous conditions</i></b> must include:</p>	<ul style="list-style-type: none"> <li>• changing and unstable ground conditions</li> <li>• dust</li> <li>• hard, soft or uneven ground conditions</li> <li>• line of fire</li> <li>• noise</li> <li>• standard or non-standard heavy rims</li> </ul>

	<ul style="list-style-type: none"> <li>• traffic</li> <li>• variable weather conditions</li> <li>• working in or around other machinery.</li> </ul>
<b>Work environment</b> must include:	<ul style="list-style-type: none"> <li>• day and night</li> <li>• indoors and outdoors</li> <li>• interaction of work personnel</li> <li>• workshop or work site.</li> </ul>
<b>Hazardous tyre and wheel and rim assembly conditions</b> must include:	<ul style="list-style-type: none"> <li>• blocked or damaged valves</li> <li>• cracks</li> <li>• corrosion</li> <li>• cuts and damage</li> <li>• distortion</li> <li>• dislodged components</li> <li>• expired scheduled testing date</li> <li>• heat damage</li> <li>• leakage</li> <li>• mechanical damage</li> <li>• structural damage</li> <li>• tyre defects</li> <li>• under- or over-inflated tyre</li> <li>• valve gear</li> <li>• wear</li> <li>• wheel and rim component defects.</li> </ul>
<b>Mounting components and fasteners</b> must include:	<ul style="list-style-type: none"> <li>• adaptor rings</li> <li>• bolts</li> <li>• cleats</li> <li>• nuts</li> <li>• reducers</li> <li>• spacer bands</li> <li>• studs</li> <li>• washers</li> <li>• wedge bands</li> <li>• wedges.</li> </ul>
<b>Workplace documentation</b> must include:	<ul style="list-style-type: none"> <li>• job safety analysis</li> <li>• risk assessment</li> <li>• tyre change documentation.</li> </ul>

Implementation Guide - <http://www.asacompanionvolumes.com.au/aur-implementation-guide>

## Assessment Requirements for AURKTJ001 Remove, inspect and fit earthmoving and off-the-road tyres

### Modification History

Release	Comment
Release 1	New unit of competency
Release 2	Minor changes to the application, performance criteria, foundation skills, range of conditions, performance evidence, knowledge evidence and assessment requirements

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- remove, inspect and fit earthmoving and off-the-road (OTR) tyres on a minimum of three occasions
- perform the above work on tyres fitted to wheel assemblies and rim assemblies of not less than 600 mm (24 inches) nominal diameter.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- Australian standards relevant to removing, inspecting and fitting earthmoving and OTR tyres
- procedures relating to earthmoving and OTR tyres:
  - fitting
  - hazard identification and risk control methods
  - inflation and deflation
  - inspection
  - post-fitting inspection
  - pre-removal inspection
- removal procedures of earthmoving and OTR wheel and rim assemblies relating to:
  - methods for undoing fasteners
  - methods for handling earthmoving and OTR wheel and rim assemblies
  - safety lock rim
  - split industrial rim
  - rim or hub-mounted multi-piece rim
  - one piece wheel and rim
- types and classifications of earthmoving and OTR tyres, rims and wheel assemblies
- types of mounting systems for earthmoving and OTR wheel and rim assemblies
- methods for deflating earthmoving and OTR tyres
- occupational health and safety (OHS) and work health and safety (WHS) requirements relevant to removing, inspecting and fitting earthmoving and OTR tyres.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles that they have worked on, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- Australian standards relevant to removing, inspecting and fitting earthmoving and OTR tyres, wheels and rim assemblies
- crane
- earthmoving and OTR tyre handler
- earthmoving and OTR tyres, wheels and rim assemblies
- forklift
- grab truck
- integrated tool handler
- tyre, wheel and rim assembly specifications and workplace instructions
- tools and equipment appropriate for removing, inspecting and fitting earthmoving and OTR tyres
- OHS and WHS requirements and workplace procedures relevant to removing, inspecting and fitting earthmoving and OTR tyres
- workplace location or simulated workplace.

## AURKTJ002 Remove, inspect and fit earthmoving and off-the-road wheel and rim assemblies

### Modification History

Release	Comment
Release 1	New unit of competency
Release 2	Minor changes to the application, performance criteria, foundation skills, range of conditions, performance evidence, knowledge evidence and assessment requirements

### Application

This unit describes the performance outcomes required to remove, inspect and fit earthmoving and off-the-road (OTR) wheel and rim assemblies and fasteners.

It applies to those who fit wheel assemblies and rim assemblies of not less than 600 mm (24 inches) nominal diameter.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.

### Competency Field

Mechanical - Mobile Plant

### Unit Sector

Technical - Wheels and Tyres

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
1. Prepare to remove wheel and rim assembly from a vehicle	<p>1.1 Australian standards for earthmoving and OTR wheel and rim assemblies, workplace procedures and <b>safety requirements</b> are identified and interpreted</p> <p>1.2 Site and task hazards are identified and control measures determined</p> <p>1.3 <b>Wheel and rim assembly</b> to be removed is identified</p> <p>1.4 Wheel and rim assembly is cleaned and visually inspected to assess potential health and safety threats according to workplace procedures</p> <p>1.5 <b>Tools and equipment</b> are selected and checked according to manufacturer instructions and workplace procedures</p>
2. Control risk	<p>2.1 <b>Hazardous conditions in work environment</b> are identified and controlled</p> <p>2.2 <b>Hazardous wheel and rim assembly conditions</b> are identified and controlled</p>
3. Remove wheel and rim assembly from vehicle	<p>3.1 Vehicle is raised and supported according to Australian standards and workplace procedures</p> <p>3.2 Tyre is deflated according to Australian standards and workplace procedures</p> <p>3.3 Wheel and rim assembly is removed according to manufacturer instructions and workplace procedures</p>
4. Inspect wheel and rim assembly, mounting surfaces and fasteners	<p>4.1 Wheel and rim assembly is cleaned and visually inspected according to Australian standards and workplace procedures</p> <p>4.2 <b>Mounting components and fasteners</b> are visually inspected according to manufacturer instructions and workplace procedures</p> <p>4.3 Findings are recorded and reported according to Australian standards and workplace procedures</p>
5. Fit wheel and rim assembly	<p>5.1 Wheel and rim assembly is <b>checked and confirmed</b> prior to fastening</p> <p>5.2 Wheel and rim assembly is fitted using handling equipment according to Australian standards and workplace procedures</p> <p>5.3 Wheel and rim assembly positioning and alignment are checked prior to fastening</p> <p>5.41 Wheel and rim assembly tightening sequence and torque settings are applied according to Australian standards and workplace procedures</p>
6. Inflate tyre	<p>6.1 Tyre inflation safety procedures are identified and applied prior to inflating tyre</p> <p>6.2 Tyre is inflated according to Australian standards and workplace</p>

ELEMENTS	PERFORMANCE CRITERIA
	procedures 6.3 Tyre, wheel and rim assembly are monitored during inflation according to Australian standards and workplace procedures
7. Complete work processes	7.1 Vehicle is lowered according to Australian standards and workplace procedures 7.2 Wheel fastener torque settings are re-checked according to Australian standards and workplace procedures 7.3 Wheel and rim assembly clearances are checked 7.4 Final inspection is made to ensure work is to workplace requirements 7.5 Tools and equipment are checked and stored according to workplace procedures, or tagged and reported where necessary 7.6 <b>Workplace documentation</b> is completed and processed according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skills	Description
Reading skills to:	<ul style="list-style-type: none"><li>• read and interpret:<ul style="list-style-type: none"><li>• written information in Australian standards, workplace procedures, manufacturer instructions, and occupational health and safety (OHS) and work health and safety (WHS) requirements relating to removing, inspecting and fitting earthmoving and OTR wheel and rim assemblies</li><li>• charts, lists, drawings and other applicable documents.</li></ul></li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• document inspection findings and recommended repair actions.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• follow oral instructions</li><li>• ask questions to clarify instructions and procedures</li><li>• report inspection results</li><li>• brief team and customers.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• read and interpret metric and imperial systems of measurement</li><li>• use specialist tools and measuring equipment, including:<ul style="list-style-type: none"><li>• gauges</li><li>• pressure testing guns</li></ul></li><li>• read and interpret mathematical information, including charts and drawings.</li></ul>
Digital literacy skills to:	<ul style="list-style-type: none"><li>• use workplace computerised technology and tools relating to removing and refitting earthmoving and OTR wheel and rim assemblies.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>• plan and prioritise own work to achieve required outcomes.</li></ul>
Self-management skills to:	<ul style="list-style-type: none"><li>• select and use appropriate equipment, materials, processes and procedures</li><li>• recognise own limitations when selecting and using tools and equipment and seek timely advice.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>• seek information and assistance as required to solve problems</li><li>• identify tyre condition and performance</li><li>• match wheel and rim assemblies to tyres and vehicle type.</li></ul>
Teamwork skills to:	<ul style="list-style-type: none"><li>• work with team members, such as riggers, doggers, mechanics, tyre fitters, drivers and site operators.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety requirements</i></b> must include:	<ul style="list-style-type: none"> <li>those prescribed under Australian standards, OHS and WHS Acts and regulations, and workplace policies and procedures</li> <li>hazard control</li> <li>manual-handling techniques</li> <li>personal protective clothing and equipment</li> <li>use of tools and equipment</li> <li>working with dangerous or toxic substances: <ul style="list-style-type: none"> <li>chemicals</li> <li>compressed air</li> <li>nitrogen gas</li> <li>polyurethane resin (PUR) tyre fill</li> <li>tyre additive.</li> </ul> </li> </ul>
<b><i>Wheel and rim assembly</i></b> must include:	<ul style="list-style-type: none"> <li>one piece wheel and rim</li> <li>rim or hub-mounted multi-piece rim</li> <li>rim or hub-mounted split rim</li> <li>safety lock rim</li> <li>split rim</li> <li>tyre and rim</li> <li>tyre and rim mounted to a hub.</li> </ul>
<b><i>Tools and equipment</i></b> must include:	<ul style="list-style-type: none"> <li>bead breakers</li> <li>cranes</li> <li>earthmoving and OTR tyre handlers</li> <li>forklifts</li> <li>grab trucks</li> <li>hand tools</li> <li>inflation and deflation tools</li> <li>integrated tool handlers</li> <li>jacks</li> <li>lifting equipment</li> <li>lock ring catcher</li> <li>mufflers</li> <li>pneumatic tools</li> <li>power tools</li> <li>soft face hammers</li> <li>support stands</li> <li>torque tools</li> </ul>

	<ul style="list-style-type: none"> <li>• tyre levers</li> <li>• wire brushes.</li> </ul>
<b><i>Hazardous conditions</i></b> must include:	<ul style="list-style-type: none"> <li>• changing and unstable ground conditions</li> <li>• dust</li> <li>• hard, soft or uneven ground conditions</li> <li>• line of fire</li> <li>• noise</li> <li>• standard or non-standard heavy rims</li> <li>• traffic</li> <li>• variable weather conditions</li> <li>• working in or around other machinery.</li> </ul>
<b><i>Work environment</i></b> must include:	<ul style="list-style-type: none"> <li>• day and night</li> <li>• indoors and outdoors</li> <li>• interaction of work personnel</li> <li>• workshop or work site.</li> </ul>
<b><i>Hazardous wheel and rim assembly conditions</i></b> must include:	<ul style="list-style-type: none"> <li>• blocked or damaged valves</li> <li>• cracks</li> <li>• corrosion</li> <li>• cuts and damage</li> <li>• distortion</li> <li>• dislodged components</li> <li>• expired scheduled testing date</li> <li>• heat damage</li> <li>• leakage</li> <li>• mechanical damage</li> <li>• structural damage</li> <li>• tyre defects</li> <li>• under- or over-inflated tyre</li> <li>• valve gear</li> <li>• wear</li> <li>• wheel and rim component defects.</li> </ul>
<b><i>Mounting components and fasteners</i></b> must include:	<ul style="list-style-type: none"> <li>• adaptor rings</li> <li>• bolts</li> <li>• cleats</li> <li>• nuts</li> <li>• reducers</li> <li>• spacer bands</li> <li>• studs</li> <li>• washers</li> <li>• wedge bands</li> <li>• wedges.</li> </ul>

<b><i>Checked and confirmed</i></b> must include:	<ul style="list-style-type: none"><li>• component compatibility</li><li>• wheel and rim component serviceability</li><li>• correct assembly of wheel and rim assembly.</li></ul>
<b><i>Workplace documentation</i></b> must include:	<ul style="list-style-type: none"><li>• job safety analysis</li><li>• risk assessment</li><li>• tyre change documentation.</li></ul>

## Unit Mapping Information

AURKTJ002 Remove, inspect and fit earthmoving and off-the-road wheel and rim assemblies

## Links

Implementation Guide - <http://www.asacompanionvolumes.com.au/aur-implementation-guide>

## Assessment Requirements for AURKTJ002 Remove, inspect and fit earthmoving and off-the-road wheel and rim assemblies

### Modification History

Release	Comment
Release 1	New unit of competency
Release 2	Minor changes to the application, performance criteria, foundation skills, range of conditions, performance evidence, knowledge evidence and assessment requirements

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- remove, inspect and fit earthmoving and off-the-road (OTR) wheel and rim assemblies on a minimum of three occasions
- perform the above work on wheel assemblies and rim assemblies of not less than 600 mm (24 inches) nominal diameter.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- Australian standards relevant to removing, inspecting and fitting earthmoving and OTR wheel and rim assemblies
- procedures relating to earthmoving and OTR wheel and rim assemblies:
  - fitting
  - hazard identification and risk control methods
  - inflation and deflation
  - inspection
  - post-fitting inspection
  - pre-removal inspection
- raising, supporting and lowering procedures for mining and construction vehicles that include soft ground support procedures and systems
- removal procedures of earthmoving and OTR wheel and rim assemblies:
  - methods for undoing wheel or rim fasteners
  - handling methods
  - safety lock rim
  - split industrial rim
  - rim or hub-mounted multi-piece rim
  - one piece wheel and rim
- types and classifications of earthmoving and OTR tyres, wheels and rim assemblies
- types of mounting systems for earthmoving and OTR wheel and rim assemblies
- methods for deflating earthmoving and OTR tyres
- occupational health and safety (OHS) and work health and safety (WHS) requirements relevant to removing, inspecting and fitting earthmoving and OTR tyres.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles that they have worked on, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- Australian standards relevant to removing, inspecting and fitting earthmoving and OTR wheel and rim assemblies
- crane
- earthmoving and OTR tyre handler
- earthmoving and OTR wheel and rim assemblies
- forklift
- grab truck
- integrated tool handler
- OHS and WHS requirements relevant to removing, inspecting and fitting earthmoving and OTR wheel and rim assemblies
- tools and equipment appropriate for removing and fitting earthmoving and OTR wheel and rim assemblies
- tyre, wheel and rim assembly specifications and workplace instructions
- operational vehicles with earthmoving and OTR wheel and rim assemblies
- workplace location or simulated workplace.

## AURKTJ003 Perform minor repairs to earthmoving and off-the-road tyres

### Modification History

Release	Comment
Release 1	New unit of competency
Release 2	Updated to correct data
Release 3	Minor changes to elements, foundation skills, performance evidence and knowledge evidence

### Application

This unit describes the performance outcomes required to inspect and perform minor repairs to earthmoving and off-the-road (OTR) tyres.

It applies to those who fit earthmoving and OTR tyres, wheel and rim assemblies of not less than 600 mm (24 inches) nominal diameter.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.

### Competency Field

Mechanical - Mobile Plant

### Unit Sector

Technical - Wheels and Tyres

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare for inspection of tyre	1.1 Australian standards for earthmoving and OTR tyres, workplace procedures and safety information are identified and interpreted 1.2 Site and task hazards are identified and control measures determined 1.3 Initial workplace documentation for tyre inspection is completed 1.4 Tyre is prepared and cleaned for inspection 1.5 Tyre is positioned and secured for inspection
2. Inspect tyre	2.1 Extent and nature of internal and external tyre damage are identified 2.2 Damage is categorised in line with Australian standards 2.3 Repairable and non-repairable damage and extent of repairs are identified 2.4 Overall repairability of tyre is determined
3. Carry out minor repair	3.1 Information on appropriate manufacturer instructions and Australian standards is accessed and interpreted 3.2 Task hazards and risks are identified, and risk controls are applied to equipment to be used 3.3 Minor repair to tyre is carried out according to workplace procedures, manufacturer instructions and Australian standards
4. Complete work processes	4.1 Workplace documentation relating to tyre repair is completed 4.2 Inspection documentation is completed according to Australian standards 4.3 Tyre is stored according to workplace procedures 4.4 Work area is cleared and waste materials disposed of, reused or recycled according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"><li>identify information and assistance in manufacturer instructions and Australian standards relating to the inspection and repair of earthmoving and OTR tyres</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>read and interpret information in:<ul style="list-style-type: none"><li>written Australian standards, workplace procedures and manufacturer instructions</li><li>charts, lists, drawings and other applicable documents.</li></ul></li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>document required repair actions</li><li>complete inspection documentation.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>ask questions to clarify instructions and procedures</li><li>report inspection and repair results.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>read and interpret metric and imperial systems of measurement.</li><li>read and interpret mathematical information, including charts and drawings</li><li>use specialist tools and measuring equipment, including:<ul style="list-style-type: none"><li>gauges</li><li>pressure testing guns.</li></ul></li></ul>
Digital literacy skills to:	<ul style="list-style-type: none"><li>use workplace computerised technology and tools relating to the inspection and repair of earthmoving and OTR tyres.</li></ul>
Initiative skills to:	<ul style="list-style-type: none"><li>plan and prioritise own work to achieve required outcomes.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>select and use appropriate equipment, materials, processes and procedures when inspecting and repairing tyres</li><li>recognise own limitations when selecting and using tools and equipment and seek timely advice.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>seek information and assistance as required to solve problems</li><li>identify tyre condition and determine repair requirements.</li></ul>

## Unit Mapping Information

## Assessment Requirements for AURKTJ003 Perform minor repairs to earthmoving and off-the-road tyres

### Modification History

Release	Comment
Release 1	New unit of competency
Release 2	Updated to correct data
Release 3	Minor changes to elements, foundation skills, performance evidence and knowledge evidence

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria and foundation skills:

- inspect and perform minor repairs to earthmoving and off-the-road (OTR) tyres on a minimum of three occasions on different earthmoving and OTR tyres
- perform the above work on wheel assemblies and rim assemblies of not less than 600 mm (24 inches) nominal diameter.

### Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- Australian standards and manufacturer instructions relevant to inspecting and repairing earthmoving and OTR tyres
- hazard identification procedures and risk control methods relevant to inspecting and repairing earthmoving and OTR tyres
- inspection procedures for earthmoving and OTR tyres
- indicators of tyre damage
- procedures for identifying and undertaking minor repairs to earthmoving and OTR tyres
- procedures for reporting damage and repair work on earthmoving and OTR tyres
- types of tyre damage, including repairable and non-repairable damage.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles that they have worked on, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- Australian standards relevant to the inspection and minor repair of earthmoving and OTR tyres
- earthmoving and OTR tyres
- manufacturer instructions and workplace procedures relevant to inspecting and repairing earthmoving and OTR tyres
- tools and equipment appropriate for the inspection and minor repair of earthmoving and OTR tyres
- workplace location or simulated workplace.

## AURKTJ005 Select earthmoving and off-the-road tyres, wheels and rim assemblies for specific applications

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to select earthmoving and off-the-road (OTR) vehicle tyres, wheels and rim assemblies to suit specific applications. It involves identifying and confirming work requirements; preparing for work; selecting tyres, wheels and rim assemblies; and completing work finalisation processes.

It applies to those working on earthmoving and OTR vehicle tyres, wheels and rim assemblies in the mining, construction and other industrial environments.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.

### Competency Field

Mechanical - Mobile Plant

### Unit Sector

Technical - Wheels and Tyres

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare to select tyres, wheels and rim assemblies	1.1 Customer and job requirements are determined 1.2 Workplace instructions and information required to select tyres, wheels and rim assemblies are sourced
2. Determine appropriate tyres, wheels and rim assemblies	2.1 Information required to select earthmoving and OTR tyres, wheels and rim assemblies is accessed from manufacturer and component supplier specifications 2.2 Tyre, wheel and rim assembly options are analysed to identify technical compliance, economic benefits and operational requirements 2.3 Selection procedures are carried out according to workplace instructions and work health and safety (WHS) requirements 2.4 Product is selected according to customer requirements, manufacture and component supplier specifications
3. Complete selection of tyres, wheels and rim assemblies	3.1 Customer is briefed on product selection 3.2 Required documentation regarding selection is completed

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"><li>identify sources of information and assistance in selecting earthmoving and OTR tyres, wheels and rim assemblies.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>read and interpret written information in: job instructions manufacturer and component supplier specifications workplace instructions.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>complete workplace documentation</li><li>document product selection.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>ask questions to clarify instructions, procedures or customer requirements</li><li>brief customer on product selection</li><li>follow oral instructions.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>read and interpret both metric and imperial systems of measurement.</li><li>interpret numerical information in: job instructions manufacturer and component supplier specifications workplace instructions relating to wheels, rim assemblies, and tyres.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>seek information and assistance to solve problems.</li></ul>

## Unit Mapping Information

No equivalent unit.

Implementation Guide - <http://www.asacompanionvolumes.com.au/aur-implementation-guide>

## Assessment Requirements for AURKTJ005 Select earthmoving and off-the-road tyres, wheels and rim assemblies for specific applications

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must have competently selected a minimum of two different earthmoving and off-the-road (OTR) tyres, wheels and rim assemblies.

Individuals must demonstrate they can:

- access and interpret information required for selecting tyres, wheels and rim assemblies
- select a range of earthmoving and OTR vehicle tyres, wheels and rim assemblies according to customer, workplace, manufacturer and component supplier requirements, observing safety procedures and requirements.

### Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- Australian standards relating to earthmoving and OTR vehicle tyres, wheels and rim assemblies
- work health and safety requirements relating to selecting earthmoving and OTR vehicle tyres, wheels and rim assemblies
- earthmoving and OTR vehicle tyres, wheels and rim assembly terminology and codes
- earthmoving and OTR tyre tread patterns; and tyre and wheel and rim assembly types and their applications.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles that they have worked on, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- workplace location or simulated workplace
- Australian standards relating to earthmoving and OTR vehicle tyres, wheels and rim assemblies
- earthmoving and OTR vehicles with tyres, wheels and rim assemblies
- manufacturer and component supplier specifications
- workplace instructions.

## AURKTJ006 Use earthmoving and off-the-road tyre handlers

### Modification History

Release	Comment
Release 1	New unit of competency
Release 2	Minor changes to the application, elements, performance evidence and knowledge evidence

### Application

This unit describes the performance outcomes required to use an earthmoving and off-the-road (OTR) tyre handler. It includes checking the tyre handler and work site for suitability, operating the tyre handler, and completing work according to operational requirements.

It applies to those who fit earthmoving and OTR tyres, wheels and rim assemblies of not less than 600 mm (24 inches) nominal diameter.

Earthmoving and OTR tyre handlers must be operated in compliance with the licence requirements and regulations of the relevant state or territory authority.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.

### Competency Field

Mechanical - Mobile Plant

### Unit Sector

Technical - Wheels and Tyres

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Check tyre handler and work site for suitability	1.1 Work site is selected for operations 1.2 Work area is checked for obstructions and proximity to vehicles and equipment 1.3 Barriers and warning signs are erected in areas where there may be passing traffic 1.3 Specialist equipment and tools are selected 1.4 Tyre handler is inspected for serviceability and compliance with relevant Australian standards
2. Operate tyre handler	2.1 Tyre handler pre-operational checks are conducted, and any operating hazards identified and addressed 2.2 Tyre handler, and specialist equipment and tools are operated within safe working limits and to maximise efficiency of operations 2.3 Tyres, wheels and rim assemblies are handled according to workplace procedures and Australian standards
3. Complete work processes	2.4 Barriers and warning signs are removed and stored 2.5 Tyre handler, and specialist equipment and tools are returned to appropriate storage or parking area 2.6 Documentation is completed, reporting any <b><i>damage or faults</i></b>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Reading skills to:	<ul style="list-style-type: none"> <li>read and interpret written information in Australian standards and workplace procedures relating to the use of earthmoving and OTR tyre handlers.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>document actions required during work.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>report damage or faults.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret vehicle instruments and indicators</li> <li>read and interpret metric and imperial systems of measurement.</li> </ul>
Initiative skills to:	<ul style="list-style-type: none"> <li>identify and avoid potential work obstructions and danger to passing traffic.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>prepare and lay out work area, and obtain equipment and material to avoid wastage, backtracking and workflow interruptions.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Damage or faults</i></b> must include:	<ul style="list-style-type: none"> <li>specialist equipment and tool damage</li> <li>tyre, wheel and rim assembly damage</li> <li>tyre handler damage or faults</li> <li>work area damage.</li> </ul>
--	---

## Unit Mapping Information

## Links

Implementation Guide - <http://www.asacompanionvolumes.com.au/aur-implementation-guide>

## Assessment Requirements for AURKTJ006 Use earthmoving and off-the-road tyre handlers

### Modification History

Release	Comment
Release 1	New unit of competency
Release 2	Minor changes to the application, elements, performance evidence and knowledge evidence

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- use an earthmoving and off-the-road (OTR) tyre handler on a minimum of three occasions, demonstrating that they can:
- observe safety procedures and requirements when operating earthmoving and OTR tyre handlers
- select methods and techniques to operate an earthmoving and OTR tyre handler appropriate to the circumstances
- perform the above work on wheel assemblies and rim assemblies of not less than 600 mm (24 inches) nominal diameter.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- Australian standards and workplace procedures relevant to operating an earthmoving and OTR tyre handler
- duty of care requirements relating to operating an earthmoving and OTR tyre handler
- handling procedures for earthmoving and OTR tyre handlers
- earthmoving and OTR tyre handler controls, instruments and indicators and their use
- operating hazards and procedures to be followed in the event of an operational emergency
- procedures for pre-operational checks
- factors affecting selection of work site, including site layout and obstacles
- typical damage and faults related to operating earthmoving and off-the-road tyre handlers, including:
  - specialist equipment and tool damage
  - tyre, wheel and rim assembly damage
  - tyre handler damage or faults
  - work area damage.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles that they have worked on, e.g. vehicle log books.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- Australian standards relevant to the use of an earthmoving and OTR tyre handler
- earthmoving and OTR tyre and wheel and rim assemblies
- tools and equipment appropriate to the use of an earthmoving and OTR tyre handler
- earthmoving and OTR tyre handler
- operational vehicles with earthmoving and OTR tyres, wheel and rim assemblies
- workplace instructions relating to the use of earthmoving and OTR tyre handlers
- workplace location or simulated workplace.

## AURTTA027 Carry out basic vehicle servicing operations

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to carry out basic vehicle servicing operations. It requires the learner to plan and prepare the servicing task; select the correct equipment and service the major vehicle systems according to manufacturer servicing procedures and specifications; record findings; maintain the work area; and check and store the servicing tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Competency Field

Mechanical Miscellaneous

### Unit Sector

Technical

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Plan to carry out basic vehicle servicing operations	<p>1.1 <b><i>Safety and environmental requirements</i></b> are sourced and interpreted</p> <p>1.2. Task instruction is interpreted and <b><i>vehicle</i></b> to be serviced is identified</p> <p>1.3 Manufacturer specifications and workplace procedures for basic vehicle servicing operations are sourced and interpreted</p> <p>1.4 Potential hazards and risks associated with task are identified and reported to workplace supervisor</p> <p>1.5 Tools and equipment required for vehicle servicing are identified according to manufacturer specifications</p>
2. Carry out basic vehicle servicing operations	<p>2.1 Tools and equipment are selected and checked prior to use according to manufacturer specifications and safety requirements</p> <p>2.2 <b><i>Basic vehicle servicing operations</i></b> are carried out according to workplace procedures, manufacturer specifications and safety and environmental requirements</p> <p>2.3 Observations of worn vehicle components or issues requiring further exploration are recorded</p> <p>2.4 Basic vehicle servicing operation procedures are recorded</p>
3. Complete work processes	<p>3.1 Final inspection is made to ensure work meets task instruction and workplace standards, and serviced vehicle is presented ready for use or storage according to workplace procedures</p> <p>3.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures</p> <p>3.3 Tools and equipment are checked and stored according to workplace procedures, or tagged and reported where necessary</p> <p>3.4 Workplace documentation is processed according to workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"><li>locate appropriate sources of vehicle servicing information and servicing equipment operating procedures.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>select and interpret key information from manufacturer specifications, safety requirements and workplace procedures to perform basic vehicle servicing operations</li><li>select and interpret key information from environmental requirements and workplace procedures to ensure a clean and safe work site.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>legibly and accurately fill out workplace documentation using correct industry terminology and conventions.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>read and interpret metric and imperial systems of measurement</li><li>read and interpret mathematical information, including charts and drawings</li><li>use specialist tools and measuring equipment, including gauges</li><li>use basic mathematical operations, including addition, subtraction, multiplication and division, to calculate volumes and ratios.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>plan own work requirements and prioritise actions to achieve required outcomes.</li></ul>
Self-management skills to:	<ul style="list-style-type: none"><li>recognise own limitations when selecting and using tools and equipment and seek timely advice.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>identify potential or actual hazards and take action to minimise risk</li><li>refer problems that cannot be readily resolved and seek assistance from workplace supervisor.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>set up and operate equipment and tools required to perform basic vehicle servicing operations.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety and environmental requirements</i></b> must include:	<ul style="list-style-type: none"> <li>information about key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including: <ul style="list-style-type: none"> <li>use of personal protective equipment, including safety glasses, ear protection and safety footwear</li> <li>use of hand tools and lifting equipment</li> <li>application of procedures for handling, storing and disposing of used oil, lubricants and coolants.</li> </ul> </li> </ul>
<b><i>Vehicle</i></b> must include one or more of the following:	<ul style="list-style-type: none"> <li>passenger or light commercial motor vehicle</li> <li>motorcycle</li> <li>constructed vehicle.</li> </ul>
<b><i>Basic vehicle servicing operations</i></b> must include:	<ul style="list-style-type: none"> <li>servicing the following: <ul style="list-style-type: none"> <li>engine and exhaust system</li> <li>drive belt</li> <li>cooling system</li> <li>transmission and final drive</li> <li>tyres, suspension and steering</li> <li>fuel and intake system</li> <li>electrical system</li> <li>braking system</li> <li>body fittings and pedal rubbers.</li> </ul> </li> </ul>

## Unit Mapping Information

No equivalent unit.

## Assessment Requirements for AURTTA027 Carry out basic vehicle servicing operations

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- correctly perform basic servicing operations on a minimum of two different operational vehicles.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements relating to basic vehicle servicing operations, including:
  - use of personal protective equipment, including safety glasses, ear protection and safety footwear
  - use of hand tools and lifting equipment
  - safety data sheets (SDS) and procedures for handling, storing and disposing of used oil, lubricants, coolants, transmission and brake fluids
  - reasons for servicing vehicles
- basic vehicle servicing procedures, including:
  - servicing the engine:
    - checking for leaks, worn or loose fittings, cracks or other damage
    - changing the engine oil
    - changing the oil filter
  - servicing the drive belt:
    - checking for cracks, fraying, oil soaking and glazing at the belt to pulley contact area
    - adjusting the belt
  - servicing the cooling system:
    - checking for leaks, signs of corrosion, damaged or cracked hoses, worn or loose fittings
    - topping up the coolant
  - servicing transmission and final drive systems:
    - checking for leaks, worn or loose fittings, cracks or other damage
    - checking and topping up transmission and final drive lubricant level
    - topping up the clutch master cylinder fluid
  - servicing the tyres and suspension and steering system:
    - checking for leaks, splits in rubber boots, worn or loose fittings, and tyre wear
    - adjusting air pressure
    - lubricating ball joints
    - topping up power steering reservoir fluid
  - servicing the fuel system:
    - checking for leaks, worn or loose fittings, cracks or other damage
    - replacing air filters
  - servicing the electrical system:
    - checking the lighting system
    - checking and topping up the battery
  - servicing the brakes:
    - checking for leaks, wear, excessive heat damage, cracks or other damage
    - topping up the master cylinder fluid
  - other tasks, including checking:
    - windscreen wipers

- windscreen washers (fluid level)
  - heating, ventilation and air-conditioning (HVAC) operation
  - body panels
  - exhaust system
  - mirrors
  - condition of foot pedal rubbers
- hand and power tools and equipment used in vehicle servicing
  - work area clean-up and maintenance requirements.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles that they have serviced, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- two vehicles for servicing
- automotive hand and power tools and lifting and supporting equipment
- automotive fluids and oils, including:
  - engine oil
  - transmission oil
  - brake fluid.

## AURTTB007 Remove and replace brake assemblies

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to remove and replace the front and rear brake assemblies of a vehicle. It requires the learner to plan and prepare the task; identify types of brake assemblies; inspect components and identify their function; remove and replace the front and rear brake assemblies; and maintain the work area, tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Competency Field

Mechanical Miscellaneous

### Unit Sector

Technical - Brakes

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare to remove and replace brake assemblies	<p>1.1 <b><i>Safety and environmental requirements</i></b> are sourced and interpreted</p> <p>1.2 Task instruction is interpreted and vehicle brake assemblies to be worked on are identified</p> <p>1.3 Manufacturer specifications and workplace procedures for brake assemblies removal and replacement are sourced and interpreted</p> <p>1.4 Potential hazards and risks associated with task are identified and reported to workplace supervisor</p> <p>1.5 Tools and equipment required for removing and replacing brake assemblies are identified according to manufacturer specifications</p>
2. Remove and inspect brake assemblies	<p>2.1 Tools, equipment and materials are selected and checked prior to use according to manufacturer specifications and safety requirements</p> <p>2.2 Vehicle is prepared for brake assemblies removal according to workplace procedures and safety and environmental requirements</p> <p>2.3 <b><i>Brake assemblies</i></b> are removed according to workplace procedures and safety and environmental requirements, and without causing damage to components, tools or equipment</p> <p>2.4 Brake assemblies' components are arranged, identified and inspected according to manufacturer specifications</p> <p>2.5 Brake assemblies' inspection results are recorded</p>
3. Replace brake assemblies	<p>3.1 Brake assemblies are prepared for replacement</p> <p>3.2 Brake assemblies are replaced according to workplace procedures, manufacturer specifications, and safety and environmental requirements, and without causing damage to components, tools or equipment</p> <p>3.3 Brake assemblies are adjusted and bled</p>
4. Complete work processes	<p>4.1 Final inspection is made to ensure work meets task instruction and workplace standards, and vehicle is presented ready for use or storage according to workplace procedures</p> <p>4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures</p> <p>4.3 Tools and equipment are checked and stored according to</p>

ELEMENTS	PERFORMANCE CRITERIA
	workplace procedures, or tagged and reported where necessary 4.4 Workplace documentation is processed according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"><li>locate appropriate sources of vehicle braking system information and brake assembly removal and replacement procedures.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>select and interpret key information from manufacturer specifications, safety requirements and workplace procedures to safely remove and replace front and rear brake assemblies</li><li>select and interpret key information from environmental requirements and workplace procedures to ensure a clean and safe work site.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>legibly and accurately fill out workplace documentation using correct industry terminology and conventions.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>read and interpret numerical information in brake system component identification codes</li><li>use specialist tools and measuring equipment correctly, including verniers, and report and record the results correctly using relevant mathematical symbols and conventions (e.g. mm for millimeters)</li><li>use basic mathematical operations, including addition, subtraction, multiplication and division, to calculate clearances.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>plan own work requirements and prioritise actions to achieve required outcomes.</li></ul>
Self-management skills to:	<ul style="list-style-type: none"><li>recognise own limitations when selecting and using tools and equipment and seek timely advice.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>identify potential or actual hazards and take action to minimise risk</li><li>refer problems that cannot be readily resolved and seek assistance from workplace supervisor.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>set up and operate equipment and tools required to remove and replace front and rear brake assemblies.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety and environmental requirements</i></b> must include:	<ul style="list-style-type: none"><li>• information about key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:<ul style="list-style-type: none"><li>• use of personal protective equipment, including safety glasses, ear protection and safety footwear</li><li>• use of hand tools and lifting equipment</li><li>• application of procedures for handling and disposing of used brake fluid, lubricants and asbestos-based products, including brake dust.</li></ul></li></ul>
<b><i>Brake assemblies</i></b> must include:	<ul style="list-style-type: none"><li>• both front disc brake assemblies</li><li>• both rear drum brake assemblies.</li></ul>

## Unit Mapping Information

## Assessment Requirements for AURTTB007 Remove and replace brake assemblies

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- correctly remove and replace the brake assemblies of at least two different vehicles.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:
  - use of personal protective equipment, including safety glasses, ear protection and safety footwear
  - use of hand tools and lifting equipment
  - safety data sheets (SDS) and procedures for handling and disposing of waste brake fluid, lubricants and asbestos-based products, including brake dust
- types, application and basic operation of brake assembly, including:
  - disc brake systems
  - drum brake systems
  - hand brake systems
  - brake fluids
- brake assembly function and basic principles of operation
- brake assembly component names and their functions
- brake assembly dismantling procedures, including:
  - disc caliper, pad and disc removal
  - brake drum, shoes and wheel cylinder removal
- brake assembly inspection procedures, including:
  - brake hose serviceability
  - disc thickness
  - disc runout
  - brake shoe serviceability
  - brake drum wear
- brake assembly replacement procedures, including:
  - disc pad replacement
  - caliper pin lubrication
  - disc replacement
  - brake cylinder and shoe replacement
  - bleeding and adjustment procedures
- work area clean-up and maintenance requirements.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles where they have removed and replaced front and rear brake assemblies, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- two vehicles fitted with front and rear brake assemblies, including disc and drum brake assemblies
- tools and special equipment, including lifting equipment.

## AURTTC004 Remove and replace radiators

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to remove and replace the radiator of a vehicle. It requires the learner to plan and prepare the task; remove the radiator and inspect it and its associated components; replace the radiator; top up the cooling system and check for leaks; and maintain the work area, tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Competency Field

Mechanical Miscellaneous

### Unit Sector

Technical - Cooling Systems

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare to remove and replace radiator	<p>1.1 <b><i>Safety and environmental requirements</i></b> are sourced and interpreted</p> <p>1.2 Task instruction is interpreted and vehicle radiator to be worked on is identified</p> <p>1.3 Manufacturer specifications and workplace procedures for radiator removal and replacement are sourced and interpreted</p> <p>1.4 Potential hazards and risks associated with task are identified and reported to workplace supervisor</p> <p>1.5 Tools and equipment required for removing and replacing radiator are identified according to manufacturer specifications</p>
2. Remove radiator	<p>2.1 Tools, equipment and materials are selected and checked prior to use according to manufacturer specifications and safety requirements</p> <p>2.2 Vehicle is prepared for radiator removal according to workplace procedures and safety and environmental requirements</p> <p>2.3 <b><i>Vehicle radiator</i></b> is removed according to workplace procedures and manufacturer specifications, and without causing damage to components, tools or equipment</p> <p>2.4 Radiator and associated components are inspected according to manufacturer specifications</p> <p>2.5 Results of inspection of radiator and its associated components are recorded</p>
3. Replace radiator	<p>3.1 Radiator is prepared for replacement</p> <p>3.2 Radiator is replaced according to workplace procedures, manufacturer specifications, and safety and environmental requirements, and without causing damage to components, tools or equipment</p> <p>3.3 <b><i>Cooling system is tested</i></b> according to manufacturer specifications</p> <p>3.4 Cooling system test results are recorded</p>
4. Complete work processes	<p>4.1 Final inspection is made to ensure work meets task instruction and workplace standards, and vehicle is presented ready for use or storage according to workplace procedures</p> <p>4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures</p>

ELEMENTS	PERFORMANCE CRITERIA
	4.3 Tools and equipment are checked and stored according to workplace procedures, or tagged and reported where necessary 4.4 Workplace documentation is processed according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"><li>locate appropriate sources of information on vehicle cooling system and radiator removal and refitting procedures.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>select and interpret key information from manufacturer specifications, safety requirements and workplace procedures to safely remove and replace radiators</li><li>select and interpret key information from environmental requirements and workplace procedures to ensure a clean and safe work site.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>legibly and accurately fill out workplace documentation using correct industry terminology and conventions.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>read and interpret numerical information in cooling system information</li><li>use specialist tools and measuring equipment correctly, including pressure testers, and report and record the results correctly using relevant mathematical symbols and conventions (e.g. kPa for kilopascals)</li><li>use basic mathematical operations, including addition, subtraction, multiplication and division, to calculate ratios of coolant.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>plan own work requirements and prioritise actions to achieve required outcomes.</li></ul>
Self-management skills to:	<ul style="list-style-type: none"><li>recognise own limitations when selecting and using tools and equipment and seek timely advice.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>identify potential or actual hazards and take action to minimise risk</li><li>refer problems that cannot be readily resolved and seek assistance from workplace supervisor.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>set up and operate equipment and tools required to remove and replace radiators.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety and environmental requirements</i></b> must include:	<ul style="list-style-type: none"><li>• information about key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:<ul style="list-style-type: none"><li>• use of personal protective equipment, including safety glasses, ear protection and safety footwear</li><li>• use of automotive hand tools</li><li>• application of procedures for handling and disposing of used coolant.</li></ul></li></ul>
<b><i>Vehicle radiator</i></b> must include:	<ul style="list-style-type: none"><li>• radiator for an engine with a liquid cooling system.</li></ul>
<b><i>Cooling system is tested</i></b> must include:	<ul style="list-style-type: none"><li>• pressure-testing the cooling system.</li></ul>

# Assessment Requirements for AURTTTC004 Remove and replace radiators

## Modification History

Release	Comment
Release 1	New unit of competency

## Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- correctly and safely remove and replace the radiators of at least two different vehicles or engine assemblies.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:
  - use of personal protective equipment, including safety glasses, ear protection and safety footwear
  - use of automotive hand tools and lifting equipment
  - safety data sheets (SDS) and procedures for handling and disposing of used coolant
- types, application and basic operation of radiators, including:
  - vertical flow radiators
  - cross flow radiators
  - cooling system coolants and additives
  - radiator hoses and clamps
- radiator removal procedures, including procedures for catching and storing engine coolant
- radiator and associated component inspection procedures
- radiator replacement procedures, including:
  - calculating coolant system filling and additive concentration
  - coolant system bleeding
- work area clean-up and maintenance requirements.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles where they have removed and replaced radiators, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- two motor vehicles or engine assemblies with engines with a liquid cooling system
- automotive hand tools and special equipment, including cooling system pressure tester.

## Assessment Requirements for AURTID006 Remove and replace vehicle front suspension springs

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- correctly remove and replace the front suspension springs of at least two different vehicles.

### Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS) and occupational health and safety (OHS) requirements, including:
  - dangers of working with stored energy in suspension springs
  - use of personal protective equipment, including safety glasses, ear protection and safety footwear
  - use of hand tools and lifting and supporting equipment
- types, application and basic operation of front suspension springs, including:
  - MacPherson strut
  - coil springs
- suspension spring removal procedures, including procedures for compressing springs
- suspension spring and associated component inspection procedures
- suspension spring replacement procedures, including ride height measurement procedures
- work area clean-up and maintenance requirements.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles where they have removed and replaced front suspension springs, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- two vehicles with complete front suspension assemblies
- tools and special equipment, including lifting and supporting equipment.

## AURTID007 Remove and replace steering assemblies

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to remove and replace the steering assemblies of a vehicle. It requires the learner to plan and prepare the task; remove the steering assembly and inspect it and its associated components; replace the steering assembly; and maintain the work area, tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Competency Field

Mechanical Miscellaneous

### Unit Sector

Technical - Steering and Suspension

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare to remove and replace a steering assembly	<p>1.1 <b><i>Safety and environmental requirements</i></b> are sourced and interpreted</p> <p>1.2 Task instruction is interpreted and vehicle steering assembly to be worked on is identified</p> <p>1.3 Manufacturer specifications and workplace procedures for removing and replacing steering assembly are sourced and interpreted</p> <p>1.4 Potential hazards and risks associated with task are identified and reported to workplace supervisor</p> <p>1.5 <b><i>Tools and equipment</i></b> required for removing and replacing steering assembly are identified according to manufacturer specifications</p>
2. Remove and inspect steering assembly	<p>2.1 Tools, equipment and materials are selected and checked prior to use according to manufacturer specifications and safety requirements</p> <p>2.2 Vehicle is prepared for steering assembly removal according to workplace procedures and safety and environmental requirements</p> <p>2.3 <b><i>Vehicle steering assembly</i></b> is removed according to workplace procedures and manufacturer specifications and safety and environmental requirements, and without causing damage to components, tools or equipment</p> <p>2.4 Steering assembly components are arranged, identified and inspected according to manufacturer specifications</p> <p>2.5 Results of inspecting steering system components are recorded</p>
3. Replace steering assembly	<p>3.1 Steering assembly components are prepared for assembly</p> <p>3.2 Steering assemblies are replaced according to workplace procedures, manufacturer specifications and safety and environmental requirements, and without causing damage to components, tools or equipment</p> <p>3.3 Front wheel toe-in is measured and adjusted according to manufacturer specifications</p>
4. Complete work processes	<p>4.1 Final inspection is made to ensure work meets task instruction and workplace standards, and vehicle steering assembly is presented ready for use or storage according to workplace procedures</p> <p>4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored</p>

ELEMENTS	PERFORMANCE CRITERIA
	<p>according to environmental requirements and workplace procedures</p> <p>4.3 Tools and equipment are checked and stored according to workplace procedures, or tagged and reported where necessary</p> <p>4.4 Workplace documentation is processed according to workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance criteria and is not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"><li>locate appropriate sources of vehicle steering system information and steering assembly removal and replacement procedures.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>select and interpret key information from manufacturer specifications, safety requirements and workplace procedures to safely remove and replace vehicle steering assemblies</li><li>select and interpret key information from environmental requirements and workplace procedures to ensure a clean and safe work site.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>legibly and accurately fill out workplace documentation using correct industry terminology and conventions.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>read and interpret numerical information in steering system information</li><li>use specialist tools and measuring equipment correctly, including tape measures, and report and record the results correctly using relevant mathematical symbols and conventions (e.g. mm for millimeters)</li><li>use basic mathematical operations, including addition and subtraction to calculate length.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>plan own work requirements and prioritise actions to achieve required outcomes.</li></ul>
Self-management skills to:	<ul style="list-style-type: none"><li>recognise own limitations when selecting and using tools and equipment and seek timely advice.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>identify potential or actual hazards and take action to minimise risk</li><li>refer problems that cannot be readily resolved and seek assistance from workplace supervisor.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety and environmental requirements</i></b> must include:	<ul style="list-style-type: none"> <li>information about key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including: <ul style="list-style-type: none"> <li>use of personal protective equipment, including safety glasses, ear protection and safety footwear</li> <li>use of hand tools and vehicle lifting equipment</li> <li>applying procedures for handling and disposing of used steering system fluids.</li> </ul> </li> </ul>
<b><i>Tools and equipment</i></b> must include:	<ul style="list-style-type: none"> <li>automotive hand tools</li> <li>vehicle lifting equipment</li> <li>product-related special tools, such as ball joint breakers.</li> </ul>
<b><i>Vehicle steering assemblies</i></b> must include:	<ul style="list-style-type: none"> <li>assembly from one of the following: <ul style="list-style-type: none"> <li>light vehicle</li> <li>light commercial vehicle</li> <li>motorcycle</li> <li>constructed vehicle.</li> </ul> </li> </ul>

## Assessment Requirements for AURTID007 Remove and replace steering assemblies

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- correctly remove and replace steering assemblies of at least two different vehicles.

### Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements relating to the removal and replacement of steering assemblies, including:
  - use of personal protective equipment, including safety glasses, ear protection and safety footwear
  - use of hand tools and vehicle lifting equipment
  - procedures for handling and disposing of used steering system fluids
- types, application and basic operation of steering assemblies, including:
  - manual steering
  - power assisted steering
- steering assembly removal procedures
- steering assembly and associated component inspection procedures
- steering assembly replacement procedures, including front toe-in measuring and adjustment procedures
- work area clean-up and maintenance requirements.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles where they have removed and replaced steering assemblies, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- two vehicles fitted with steering assemblies
- tools and equipment, including lifting equipment.

## Assessment Requirements for AURTTE006 Remove and replace conventional engine assemblies

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- remove and replace at least one engine assembly from a conventional rear wheel drive vehicle.

### Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:
  - use of safety glasses, ear protection and safety footwear
  - use of engine lifting equipment
  - collection and disposal of used engine lubricants and coolant
- types, application and basic operation of engines, including:
  - multi-cylinder configurations
  - petrol and diesel classifications
  - engine lubrication requirements, including types and classifications of engine lubricants
- engine assembly removal procedures
- engine assembly and associated component inspection procedures, including procedures for inspecting:
  - cooling system components
  - electrical system components
  - exhaust system components
  - fuel system components
- engine assembly replacement procedures, including pre-startup checks and post-startup checks
- work area clean-up and maintenance requirements.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles where they have removed and replaced the engine assembly, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- an operable vehicle with rear wheel drive
- automotive tools, engine assembly lifting equipment and attachments
- engine oil
- engine coolant.

## Assessment Requirements for AURTTE007 Dismantle and assemble single cylinder four-stroke petrol engines

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- dismantle and assemble at least two different single cylinder four-stroke petrol engines.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:
  - use of safety glasses, ear protection and safety footwear
  - use of engine dismantling and re-assembly equipment
  - collection and disposal of used engine lubricants and coolant
- types of engines and engine operating principles for:
  - four and two-stroke engines
  - single and multi-cylinder configuration
- construction and operating principles of single cylinder four-stroke engine and functions of their major components
- functions of the lubricating system
- components of the lubricating system and their function
- functions of the cooling system
- components of the cooling system and their functions
- types and application of:
  - seals
  - gaskets
  - bearings
- dismantling procedures for engines, including:
  - bolt loosening sequences
  - procedures for noting component positions
- measurement and calculation methods for:
  - piston to bore and connecting rod bearing clearance
  - swept volume
  - clearance volume
  - compression ratio and engine capacity
- reassembly procedures for engines, including:
  - bolt tightening sequences and torque requirements
  - piston ring compression procedures
- work area clean-up and maintenance requirements.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the engines that they have dismantled and assembled, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- two different single cylinder four-stroke petrol engines
- tools and measuring instruments, including lifting equipment.

## AURTTE008 Dismantle and assemble multi-cylinder four-stroke petrol engines

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to dismantle and reassemble a multi-cylinder four-stroke engine. It requires the learner to plan and prepare the task; dismantle the engine and inspect the components; reassemble the engine and check the engine operation; and maintain the work area, tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Competency Field

Mechanical Miscellaneous

### Unit Sector

Technical - Engines

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare to dismantle and re-assemble a multi-cylinder four-stroke petrol engine	<p>1.1 <b><i>Safety and environmental requirements</i></b> are sourced and interpreted</p> <p>1.2 Task instruction is interpreted and engine to be worked on is identified</p> <p>1.3 Manufacturer specifications and workplace procedures for engine dismantle and assembly are sourced and interpreted</p> <p>1.4 Potential hazards and risks associated with task are identified and reported to workplace supervisor</p> <p>1.5 <b><i>Tools and equipment</i></b> required for dismantling and assembling multi-cylinder four-stroke petrol engine are identified according to manufacturer specifications</p>
2. Dismantle engine and clean its components	<p>2.1 Tools, equipment and materials are selected and checked prior to use according to manufacturer specifications and safety requirements</p> <p>2.2 Engine is cleaned according to manufacturer specifications and workplace procedures</p> <p>2.3 <b><i>Engine</i></b> is dismantled without causing damage to components, tools or equipment</p> <p>2.4 Engine components are cleaned and arranged for identification according to workplace procedures</p>
3. Identify, inspect and measure engine components	<p>3.1 Measuring equipment and tools are selected and checked according to manufacturer specifications and workplace safety procedures</p> <p>3.2 Engine and components are measured and results compared against manufacturer specifications</p> <p>3.3 Engine bearing information is sourced and interpreted, and engine bearing type and associated loads are identified</p> <p>3.4 Information on engine seals, sealants and gaskets is sourced and interpreted, and engine seals, sealants and gaskets are identified</p> <p>3.5 Engine component inspection results are recorded</p>
4. Inspect engine cooling system and components and identify type	<p>4.1 Information on the function, type and components of cooling system is sourced and interpreted</p> <p>4.2 Cooling system components are identified and inspected according to manufacturer specifications</p> <p>4.3 Cooling system component inspection results are recorded</p>
5. Re-assemble engine and	5.1 Information on engine seals, sealants and gaskets is sourced and

ELEMENTS	PERFORMANCE CRITERIA
perform operational tests	<p>interpreted</p> <p>5.2 Engine components are prepared for assembly according to manufacturer specifications and safety and environmental requirements</p> <p>5.3 Engine is re-assembled according to manufacturer specifications, and without causing damage to components, tools and equipment</p> <p>5.4 Engine is tested for correct assembly and operation</p> <p>5.5 Engine re-assembly and testing procedures are recorded</p>
6. Complete work processes	<p>6.1 Final inspection is made to ensure work meets task instruction and workplace standards, and engine is presented ready for use or storage according to workplace procedures</p> <p>6.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures</p> <p>6.3 Tools and equipment are checked and stored in a condition ready for use according to workplace procedures, or tagged and reported where necessary</p> <p>6.4 Workplace documentation is processed according to workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> <li>locate appropriate sources of vehicle engine information and engine dismantle and reassembly procedures.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>select and interpret key information from manufacturer specifications, safety requirements and workplace procedures to safely dismantle and assemble a multi-cylinder four-stroke engine</li> <li>select and interpret key information from environmental requirements and workplace procedures to ensure a clean and safe work site.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>legibly and accurately fill out workplace documentation using correct industry terminology and conventions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>read and interpret numerical information in engine information</li> <li>use specialist tools and measuring equipment correctly, including verniers, micrometers and torque wrenches, and report and record the results correctly using relevant mathematical symbols and conventions (e.g. mm for millimeters)</li> <li>use basic mathematical operations, including addition, subtraction, multiplication and division, to calculate clearances and ratios.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>plan own work requirements and prioritise actions to achieve required outcomes.</li> </ul>
Self-management skills to:	<ul style="list-style-type: none"> <li>recognise own limitations when selecting and using tools and equipment and seek timely advice.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>identify potential or actual hazards and take action to minimise risk</li> <li>refer problems that cannot be readily resolved and seek assistance from workplace supervisor.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety and environmental requirements</i></b> must include:	<ul style="list-style-type: none"> <li>information about key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including: <ul style="list-style-type: none"> <li>use of safety glasses, ear protection and safety footwear</li> <li>use of engine dismantling and re-assembly equipment</li> <li>collection and disposal of used engine lubricants and coolant.</li> </ul> </li> </ul>
<b><i>Tools and equipment</i></b> must include:	<ul style="list-style-type: none"> <li>micrometers and other measurement instruments</li> <li>torque wrench.</li> </ul>
<b><i>Engine</i></b> must include one or more of the following:	<ul style="list-style-type: none"> <li>operational multi-cylinder four-stroke petrol engine with: <ul style="list-style-type: none"> <li>2, 4, 6 or 8 cylinder configurations</li> <li>overhead valve with push rods or overhead camshaft</li> </ul> </li> <li>complete multi-cylinder four-stroke engine assembly with carburettor, manifold, ignition system and flywheel.</li> </ul>

## Unit Mapping Information

No equivalent unit.

## Assessment Requirements for AURTTE008 Dismantle and assemble multi-cylinder four-stroke petrol engines

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- dismantle and assemble at least two different multi-cylinder four-stroke petrol engines.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:
  - use of safety glasses, ear protection and safety footwear
  - use of engine dismantling and re-assembly equipment
  - collection and disposal of used engine lubricants and coolant
- types of engines and engine operating principles for:
  - four and two-stroke engines
  - single and multi-cylinder configuration, including straight, vee and horizontally-opposed engine configurations
- construction and operating principles of multi-cylinder four-stroke engine and functions of their major components
- functions of the lubricating system
- components of the lubricating system and their function, including:
  - sump
  - oil pumps
  - oil filters
  - oil galleries
- functions of the cooling system
- components of the cooling system and their function, including:
  - engine cooling galleries
  - radiators and hoses
  - thermostats
- types and applications of:
  - seals
  - gaskets
  - bearings
- dismantling procedures for engines, including:
  - bolt loosening sequences
  - procedures for noting component positions and order
- measurement and calculation methods for:
  - piston to bore and connecting rod bearing clearance
  - swept volume
  - clearance volume
  - compression ratio and engine capacity
- reassembly procedures for engines, including:
  - bolt tightening sequences and torque requirements
  - piston ring compression procedures
  - procedures for fitting pistons in bores in pairs
- work area clean-up and maintenance requirements.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the engines they have dismantled and re-assembled, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- two different multi-cylinder four-stroke petrol engines
- tools and measuring instruments, including lifting equipment.

## AURTTE009 Remove and replace engine cylinder heads

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to remove and replace an engine cylinder head. It requires the learner to plan and prepare the task; remove and dismantle the cylinder head, inspect the components, and reassemble and replace the cylinder head; check the engine operation; and maintain the work area, tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Competency Field

Mechanical Miscellaneous

### Unit Sector

Technical - Engines

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare to remove and replace an engine cylinder head	<p>1.1 <b><i>Safety and environmental requirements</i></b> are sourced and interpreted</p> <p>1.2 Task instruction is interpreted and engine assembly to be worked on is identified</p> <p>1.3 Manufacturer specifications and workplace procedures for engine cylinder head removal and replacement are sourced and interpreted</p> <p>1.4 Potential hazards and risks associated with task are identified and reported to workplace supervisor</p> <p>1.5 <b><i>Tools and equipment</i></b> required for removing and replacing an engine cylinder head are identified according to manufacturer specifications</p>
2. Remove engine cylinder head	<p>2.1 Tools, equipment and materials are selected and checked according to manufacturer procedures</p> <p>2.2 <b><i>Engine cylinder head</i></b> is removed according to safety and environmental requirements, and without causing damage to components, tools or equipment</p> <p>2.3 Removal procedures are recorded</p>
3. Clean, dismantle and inspect engine cylinder head	<p>3.1 Cleaning methods and materials are selected and checked according to manufacturer specifications and workplace procedures</p> <p>3.2 Engine cylinder head is cleaned according to safety and environmental requirements</p> <p>3.3 <b><i>Engine cylinder head is dismantled</i></b> without causing damage to components, tools or equipment</p> <p>3.4 Engine cylinder head and components are cleaned and arranged for identification</p> <p>3.5 Engine cylinder head and components are measured and results compared against manufacturer specifications</p> <p>3.6 Engine cylinder head and components inspection results are recorded</p>
4. Reassemble and replace engine cylinder head	<p>4.1 Engine cylinder head and components are prepared for assembly according to manufacturer specifications and safety requirements</p> <p>4.2 Engine cylinder head is assembled according to manufacturer specifications and workplace procedures, and without causing damage to components, tools or equipment</p>

ELEMENTS	PERFORMANCE CRITERIA
	<p>4.3 <i>Engine cylinder head is replaced</i> onto engine assembly according to manufacturer specifications and workplace procedures, and without causing damage to components, tools or equipment</p> <p>4.4 Engine is tested for correct assembly and operation</p>
5. Complete work processes	<p>5.1 Final inspection is made to ensure work meets task instruction and workplace standards, and engine is presented ready for use or storage according to workplace procedures</p> <p>5.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures</p> <p>5.3 Tools and equipment are checked and stored in a condition ready for use according to workplace procedures, or tagged and reported where necessary</p> <p>5.4 Workplace documentation is processed according to workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"><li>locate appropriate sources of vehicle engine information and engine cylinder head removal, dismantle, reassembly and replacement procedures.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>select and interpret key information from manufacturer specifications, safety requirements and workplace procedures to safely remove and replace engine cylinder head</li><li>select and interpret key information from environmental requirements and workplace procedures to ensure a clean and safe work site.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>legibly and accurately fill out workplace documentation using correct industry terminology and conventions.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>read and interpret numerical information in engine information</li><li>use specialist tools and measuring equipment correctly, including feeler gauges, verniers, micrometers and torque wrenches, and report and record the results correctly using relevant mathematical symbols and conventions (e.g. mm for millimeters)</li><li>use basic mathematical operations, including addition, subtraction, multiplication and division, to calculate length, volume, clearances and ratios.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>plan own work requirements and prioritise actions to achieve required outcomes.</li></ul>
Self-management skills to:	<ul style="list-style-type: none"><li>recognise own limitations when selecting and using tools and equipment and seek timely advice.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>identify potential or actual hazards and take action to minimise risk</li><li>refer problems that cannot be readily resolved and seek assistance from workplace supervisor.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>set up and operate equipment and tools required to remove and replace an engine cylinder head.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety and environmental requirements</i></b> must include:	<ul style="list-style-type: none"> <li>information about key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including: <ul style="list-style-type: none"> <li>use of safety glasses, ear protection and safety footwear</li> <li>use of engine cylinder head removal, dismantling, reassembly and replacement equipment</li> <li>collection and disposal of used engine lubricants and coolant.</li> </ul> </li> </ul>
<b><i>Tools and equipment</i></b> must include:	<ul style="list-style-type: none"> <li>automotive hand tools and cylinder head lifting equipment and attachments.</li> </ul>
<b><i>Engine cylinder head</i></b> must include:	<ul style="list-style-type: none"> <li>the cylinder head of a multi-cylinder engine assembly, including all operational fitting attachments.</li> </ul>
<b><i>Engine cylinder head is dismantled</i></b> must include:	<ul style="list-style-type: none"> <li>removing the valve operating mechanisms and valves from the cylinder head.</li> </ul>
<b><i>Engine cylinder head is replaced</i></b> must include	<ul style="list-style-type: none"> <li>correctly torquing cylinder head bolts and associated component retaining bolts</li> </ul>

## Assessment Requirements for AURTTE009 Remove and replace engine cylinder heads

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- correctly remove and replace at least two different cylinder heads.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:
  - use of safety glasses, ear protection and safety footwear
  - use of cylinder head removal and replacement equipment
  - collection and disposal of used engine lubricants and coolant
- types of engines and engine operating principles for:
  - four and two-stroke engines
  - single and multi-cylinder configuration
  - petrol and diesel classification
- construction, function and operating principles of major engine components
- component lubricating systems, including:
  - principles and function
  - splash and pressure systems, including system components
- engine cooling systems, including:
  - principles and function
  - air-cooled and water-cooled systems, including system components
- types and application of:
  - seals
  - gaskets
  - bearings
- measurement and calculation methods for:
  - swept volume
  - clearance volume
  - compression ratio and engine capacity
- engine cylinder head removal procedures
- engine cylinder head dismantling procedures
- engine cylinder head inspection procedures, including testing for warping
- engine cylinder reassembly procedures
- engine cylinder head replacement procedures, including methods for torqueing cylinder head to engine
- work area clean-up and maintenance requirements.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to having removed and replaced engine cylinder heads, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- two different vehicle or stand-mounted operable engines
- tools and measuring instruments
- cylinder head lifting equipment and attachments.

## AURTTJ003 Remove and replace wheel and tyre assemblies

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to remove and replace wheel and tyre assemblies. It requires the learner to plan and prepare the task; identify wheel and tyre assemblies; remove wheel and tyre assemblies; inspect components and identify their function; replace the wheel and tyre assembly; and maintain the work area, tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Competency Field

Mechanical Miscellaneous

### Unit Sector

Technical - Wheels and Tyres

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare to remove and replace wheel and tyre assemblies	<p>1.1 <b><i>Safety requirements</i></b> are sourced and interpreted</p> <p>1.2 Task instruction is interpreted and vehicle wheel and tyre assemblies to be worked on are identified</p> <p>1.3 Manufacturer specifications and workplace procedures for removing and replacing wheel and tyre assembly are sourced and interpreted</p> <p>1.4 Potential hazards and risks associated with task are identified and reported to workplace supervisor</p> <p>1.5 <b><i>Tools and equipment</i></b> required for wheel and tyre assembly removal and replacement are identified according to manufacturer specifications</p>
2. Remove and inspect vehicle wheel and tyre assemblies	<p>2.1 Tools, equipment and materials are selected and checked prior to use according to manufacturer specifications and safety requirements</p> <p>2.2 <b><i>Vehicle</i></b> is prepared for wheel removal according to workplace procedures and safety requirements</p> <p>2.3 <b><i>Wheel and tyre assemblies</i></b> are removed according to workplace procedures and manufacturer specifications, and without causing damage to components, tools or equipment</p> <p>2.4 Wheel and tyre assemblies are identified and inspected according to manufacturer specifications</p> <p>2.5 Wheel and tyre assembly inspection results are recorded</p>
3. Replace wheel and tyre assemblies	<p>3.1 Wheel and tyre assemblies are prepared for replacement</p> <p>3.2 Wheel and tyre assemblies are replaced according to workplace procedures, manufacturer specifications and safety requirements without causing damage to components, tools or equipment</p> <p>3.3 Wheel and tyre assembly on vehicle is checked for correct operation</p>
4. Complete work processes	<p>4.1 Final inspection is made to ensure work meets task instruction and workplace standards, and vehicle wheels and tyres are presented ready for use or storage according to workplace procedures</p> <p>4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according</p>

ELEMENTS	PERFORMANCE CRITERIA
	<p>to environmental requirements and workplace procedures</p> <p>4.3 Tools and equipment are checked and stored according to workplace procedures, or tagged and reported where necessary</p> <p>4.4 Workplace documentation is processed according to workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"><li>locate appropriate sources of wheel and tyre assembly information and assembly removal and replacement procedures.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>select and interpret key information from manufacturer specifications, safety requirements and workplace procedures to safely remove and replace wheel and tyre assemblies</li><li>select and interpret key information from environmental requirements and workplace procedures to ensure a clean and safe work site.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>legibly and accurately fill out workplace documentation using correct industry terminology and conventions.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>read and interpret metric and imperial systems of measurement</li><li>read and interpret numerical information in wheel and tyre identification codes</li><li>use specialist tools correctly, including pressure gauges, and report and record the results correctly using relevant mathematical symbols and conventions (e.g. kPa for kilopascals)</li><li>use basic mathematical operations, including addition and subtraction, to calculate length.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>plan own work requirements and prioritise actions to achieve required outcomes.</li></ul>
Self-management skills to:	<ul style="list-style-type: none"><li>recognise own limitations when selecting and using tools and equipment and seek timely advice.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>identify potential or actual hazards and take action to minimise risk</li><li>refer problems that cannot be readily resolved and seek assistance from workplace supervisor.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>set up and operate equipment and tools required to remove and replace wheel and tyre assemblies.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety requirements</i></b> must include:	<ul style="list-style-type: none"><li>• information about key aspects of work health and safety (WHS) and occupational health and safety (OHS) requirements, including:<ul style="list-style-type: none"><li>• use of personal protective equipment, including safety glasses, ear protection and safety footwear</li><li>• use of hand tools and lifting and supporting equipment</li><li>• application of procedures for handling wheel and tyre assemblies.</li></ul></li></ul>
<b><i>Tools and equipment</i></b> must include:	<ul style="list-style-type: none"><li>• automotive hand tools</li><li>• vehicle lifting and supporting equipment, including wheel chocks.</li></ul>
<b><i>Vehicles</i></b> must include one or more of the following:	<ul style="list-style-type: none"><li>• passenger motor vehicle</li><li>• motor cycle</li><li>• constructed vehicle.</li></ul>
<b><i>Wheel and tyre assemblies</i></b> must include:	<ul style="list-style-type: none"><li>• one vehicle fitted with steel wheels</li><li>• one vehicle fitted with alloy wheels.</li></ul>

## Unit Mapping Information

## Assessment Requirements for AURTTJ003 Remove and replace wheel and tyre assemblies

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- correctly remove and replace the wheel and tyre assemblies of at least two different vehicles.

### Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS) and occupational health and safety (OHS) requirements, including:
  - use of personal protective equipment, including safety glasses, ear protection and safety footwear
  - use of hand tools and lifting equipment
  - procedures for handling wheel and tyre assemblies
- types and application of wheel assemblies, including:
  - stamped or pressed steel wheels
  - alloy wheels
  - wheel studs and nuts
  - tyres, including cross-ply and radial tyres
- inspection procedures for tyre and wheel assemblies, including wheel inspection and tyre wear
- removal and replacement procedures and precautions
- tyre air pressure setting and test procedures
- work area clean-up and maintenance requirements.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles where they have removed and replaced wheel and tyre assemblies, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- a vehicle fitted with steel wheels
- a vehicle fitted with alloy wheels
- automotive hand tools and lifting equipment.

# AURTTX012 Dismantle and assemble conventional manual transmissions

## Modification History

Release	Comment
Release 1	New unit of competency

## Application

This unit describes the performance outcomes required to dismantle and reassemble a conventional manual transmission. It requires the learner to plan and prepare the task; dismantle the transmission and inspect the components; reassemble the transmission and check the transmission operation; and maintain the work area, tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Competency Field

Mechanical Miscellaneous

## Unit Sector

Technical - Transmission

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare to dismantle and assemble conventional manual transmission	<p>1.1 <b><i>Safety and environmental requirements</i></b> are sourced and interpreted</p> <p>1.2 Task instruction is interpreted and transmission to be worked on is identified</p> <p>1.3 Manufacturer specifications and workplace procedures for conventional manual transmission dismantle and assembly are sourced and interpreted</p> <p>1.4 Potential hazards and risks associated with task are identified and reported to workplace supervisor</p> <p>1.5 <b><i>Tools and equipment</i></b> required for conventional manual transmission dismantle and reassembly are identified according to manufacturer specifications</p>
2. Dismantle a conventional manual transmission	<p>2.1 Tools, equipment and materials are selected and checked prior to use according to manufacturer specifications and safety requirements</p> <p>2.2 <b><i>Manual transmission</i></b> is dismantled according to workplace procedures and safety and environmental requirements, and without causing damage to components, tools or equipment</p> <p>2.3 Transmission components are cleaned and arranged for identification according to workplace procedures</p>
3. Inspect and identify gears and bearings	<p>3.1 Measuring equipment and tools are selected and checked according to manufacturer specifications and workplace safety procedures</p> <p>3.2 Gears and bearings are inspected and measured, and measurements are compared against manufacturer specifications</p> <p>3.3 Transmission bearing information is sourced and interpreted, and bearing type and associated loads are identified</p> <p>3.4 Gear types are identified and gear ratios calculated and recorded</p>
4. Inspect components and re-assemble transmission	<p>4.1 Transmission seals, sealants and gasket information is sourced and interpreted; and seals, sealants and gaskets are identified</p> <p>4.2 Transmission component's inspection results are recorded</p> <p>4.3 Transmission components are prepared for assembly according to manufacturer specifications and safety and environmental requirements</p> <p>4.4 Transmission is assembled according to manufacturer specifications and requirements</p>

ELEMENTS	PERFORMANCE CRITERIA
5. Complete work processes	<p>5.1 Final inspection is made to ensure work meets task instruction and workplace standards, and conventional manual transmission is presented ready for use or storage according to workplace procedures</p> <p>5.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures</p> <p>5.3 Tools and equipment are checked and stored according to workplace procedures, or tagged and reported where necessary</p> <p>5.4 Workplace documentation is processed according to workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> <li>locate appropriate sources of vehicle transmission information and transmission dismantle and reassembly procedures.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>select and interpret key information from manufacturer specifications, safety requirements and workplace procedures to safely dismantle and assemble a conventional manual transmission</li> <li>select and interpret key information from environmental requirements and workplace procedures to ensure a clean and safe work site.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>legibly and accurately fill out workplace documentation using correct industry terminology and conventions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>read and interpret numerical information in transmission information</li> <li>use specialist tools and measuring equipment correctly, including verniers, micrometers and torque wrenches, and report and record the results correctly using relevant mathematical symbols and conventions (e.g. mm for millimeters)</li> <li>use basic mathematical operations, including addition, subtraction, multiplication and division, to calculate clearances and ratios.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>plan own work requirements and prioritise actions to achieve required outcomes.</li> </ul>
Self-management skills to:	<ul style="list-style-type: none"> <li>recognise own limitations when selecting and using tools and equipment and seek timely advice.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>identify potential or actual hazards and take action to minimise risk</li> <li>refer problems that cannot be readily resolved and seek assistance from workplace supervisor.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>set up and operate equipment and tools required to dismantle and assemble a conventional manual transmission.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety and environmental requirements</i></b> must include:	<ul style="list-style-type: none"><li>• work health and safety (WHS) and occupational health and safety (OHS) requirements, including:<ul style="list-style-type: none"><li>• use of personal protective equipment, including safety glasses, ear protection and safety footwear</li><li>• applying procedures for disposing of used oil, lubricants and coolants.</li></ul></li></ul>
<b><i>Tools and equipment</i></b> must include:	<ul style="list-style-type: none"><li>• micrometers and other measurement instruments</li><li>• torque wrench.</li></ul>
<b><i>Manual transmission</i></b> must include:	<ul style="list-style-type: none"><li>• a complete conventional manual transmission, with at least four gears.</li></ul>

## Assessment Requirements for AURTTX012 Dismantle and assemble conventional manual transmissions

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- dismantle and re-assemble a minimum of two different conventional manual transmissions.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:
  - use of personal protective equipment, including safety glasses, ear protection and safety footwear
  - procedures for disposing of used oil and lubricants
- types of manual transmissions, including:
  - conventional
  - transaxle
- transmission operating principles, including:
  - types of gears
  - gear ratios
  - transmission bearings, seals and gaskets
  - transmission oils
- construction and operation of transmissions, including:
  - power flows
  - gear selector mechanisms and interlocks
  - synchromesh units
- transmission dismantling procedures
- transmission inspection procedures
- transmission reassembly procedures
- work area clean-up and maintenance requirements.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to dismantling and re-assembling a conventional manual transmission e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- two different conventional manual transmissions with at least four gears
- tools and special equipment, including lifting equipment.

## AURTTX013 Remove and replace clutch assemblies

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to remove and replace the clutch assembly of a vehicle. It requires the learner to plan and prepare the task; remove the clutch assembly and inspect it and its associated components; replace the clutch assembly and check the clutch operation; and maintain the work area, tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Competency Field

Mechanical Miscellaneous

### Unit Sector

Technical - Transmission

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare to remove and replace clutch assembly	<p>1.1 <b><i>Safety and environmental requirements</i></b> are sourced and interpreted</p> <p>1.2 Task instruction is interpreted and clutch assembly to be worked on is identified</p> <p>1.3 Manufacturer specifications and workplace procedures for clutch assembly removal and replacement are sourced and interpreted</p> <p>1.4 Potential hazards and risks associated with task are identified and reported to workplace supervisor</p> <p>1.5 Tools and equipment required for removing and replacing clutch assembly are identified according to manufacturer specifications</p>
2. Remove clutch assembly	<p>2.1 <b><i>Tools, equipment and materials</i></b> are selected and checked prior to use according to manufacturer specifications and safety requirements</p> <p>2.2 <b><i>Clutch assembly</i></b> is removed according to workplace procedures and safety and environmental requirements, and without causing damage to components, tools or equipment</p> <p>2.3 Clutch components are identified and inspected according to manufacturer specifications</p> <p>2.4 Clutch assembly component inspection results are recorded</p>
3. Replace clutch assembly	<p>3.1 Clutch assembly components are prepared for assembly</p> <p>3.2 Clutch is replaced according to safety and environmental requirements, workplace procedures and manufacturer specifications, and without causing damage to components, tools or equipment</p> <p>3.3 Clutch assembly finger height is measured and compared to manufacturer specifications</p>
4. Complete work processes	<p>4.1 Final inspection is made to ensure work meets task instruction and workplace standards, and clutch assembly is presented ready for use or storage according to workplace procedures</p> <p>4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures</p> <p>4.3 Tools and equipment are checked and stored according to workplace procedures, or tagged and reported where necessary</p> <p>4.4 Workplace documentation is processed according to workplace</p>

ELEMENTS	PERFORMANCE CRITERIA
	procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"><li>locate appropriate sources of vehicle clutch assembly information and clutch assembly removal and replacement procedures.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>select and interpret key information from manufacturer specifications, safety requirements and workplace procedures to safely remove and replace clutch assemblies</li><li>select and interpret key information from environmental requirements and workplace procedures to ensure a clean and safe work site.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>legibly and accurately fill out workplace documentation using correct industry terminology and conventions.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>read and interpret numerical information in clutch system information</li><li>use specialist tools and measuring equipment correctly, including verniers and torque wrenches, and report and record the results correctly using relevant mathematical symbols and conventions (e.g. mm for millimeters)</li><li>use basic mathematical operations, including addition, subtraction, multiplication and division, to calculate length and clearances.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>plan own work requirements and prioritise actions to achieve required outcomes.</li></ul>
Self-management skills to:	<ul style="list-style-type: none"><li>recognise own limitations when selecting and using tools and equipment and seek timely advice.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>identify potential or actual hazards and take action to minimise risk</li><li>refer problems that cannot be readily resolved and seek assistance from workplace supervisor.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>set up and operate equipment and tools required to remove and replace a clutch assembly.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety and environmental requirements</i></b> must include:	<ul style="list-style-type: none"><li>• information about key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:<ul style="list-style-type: none"><li>• use of personal protective equipment, including safety glasses, ear protection and safety footwear</li><li>• use of hand tools and lifting equipment</li><li>• application of procedures for handling used transmission fluid and asbestos-based products, including brake dust.</li></ul></li></ul>
<b><i>Tools, equipment and materials</i></b> must include:	<ul style="list-style-type: none"><li>• automotive hand tools</li><li>• transmission lifting equipment</li><li>• clutch aligning tool</li><li>• cleaning agents.</li></ul>
<b><i>Clutch assembly</i></b> must include:	<ul style="list-style-type: none"><li>• the complete clutch assembly from one of the following:<ul style="list-style-type: none"><li>• passenger or light commercial motor vehicle</li><li>• heavy vehicle</li><li>• motorcycle</li><li>• constructed vehicle.</li></ul></li></ul>

## Assessment Requirements for AURTTX013 Remove and replace clutch assemblies

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- correctly remove and replace a clutch assembly from an operating vehicle with a manual transmission.

### Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:
  - use of personal protective equipment, including safety glasses, ear protection and safety footwear
  - use of hand tools and lifting equipment
  - safety data sheets (SDS) and procedures for handling and disposing of waste brake fluid, lubricants and asbestos-based products, including brake dust
- clutch assembly types, application and basic operation, including:
  - diaphragm clutch
  - coil spring clutch
- clutch assembly removal procedures
- clutch assembly and associated component inspection procedures
- clutch assembly replacement procedures, including:
  - clutch aligning
  - clutch finger height measurement
- work area clean-up and maintenance requirements.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the clutch assemblies that they have removed and replaced, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- an appropriate vehicle fitted with a manual transmission and clutch assembly
- automotive hand tools
- transmission lifting machine
- clutch aligning tool
- cleaning agents.

## AURVNA003 Review vehicle repair quotations

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to review a vehicle repair quotation. It involves reviewing cost and time requirements in the repairer's quote to ensure that they accurately represent the repair method to reinstate the vehicle to pre-damage condition, and to determine that the repair cost is fair and reasonable. It also involves ensuring that quotation figures are accurate and completing the required documentation.

The unit applies to those reviewing a body repair shop quotation to repair a damaged vehicle in the loss assessment environment. Vehicles to be repaired may include light vehicles, commercial vehicles, heavy vehicles, agricultural and plant equipment, recreational vehicles and motorcycles.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Competency Field

Vehicle Body

### Unit Sector

Loss Assessment and Repair Quoting

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare for work	1.1 <b><i>Quotation</i></b> and workplace policies and procedures are located 1.2 Quotation information and supporting documents are collected
2. Review time requirements	2.1 Viable repair time requirements are estimated 2.2 Turn-around time for subcontracted specialist services is estimated 2.3 Total time for <b><i>repair work</i></b> is estimated 2.4 Time requirement estimations are documented
3. Review part requirements	3.1 Viability of replacement parts compared to repair is determined while meeting quality standards, <b><i>legal requirements</i></b> , <b><i>safety requirements</i></b> , and workplace practices 3.2 Relevance of identified parts for the repair is checked 3.3 Potential variations to the original parts costing is determined 3.4 Cost of parts and consumables is estimated using industry and workplace pricing standards 3.5 Findings relating to parts are documented
4. Review subcontract specialist services work	4.1 Nature and scope of subcontract testing, service and repair work are determined 4.2 Completed subcontracted repair work is checked 4.3 Potential variations to subcontract work costing are identified 4.4 Cost of subcontract testing, service and repair work is estimated using industry and workplace pricing standards 4.5 Subcontract testing, parts, service and repair work requirements are documented
5. Agree on quotation with repairer	5.1 Time requirements and costs are negotiated and agreed with repairer in a fair and transparent manner 5.2 Quotation adjustments are made if required 5.3 Quotation is agreed and finalised 5.4 Authorisation to proceed with the repair is provided as required to reinstate the vehicle to pre-damage condition following workplace policies and procedures
6. Finalise quotation review	6.1 Findings are documented using workplace-approved quotation format 6.2 Findings and repair authorisation documentation are reported to appropriate persons as required by workplace policies and

ELEMENTS	PERFORMANCE CRITERIA
	procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Reading skills to:	<ul style="list-style-type: none"><li>review a vehicle repair quotation to:<ul style="list-style-type: none"><li>interpret technical information</li><li>research information</li><li>understand common industry terminology</li><li>understand manufacturer and component specifications.</li></ul></li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>discuss and finalise quotation with repairer</li><li>discuss quotation with supervisor, subcontractors and customers</li><li>report work outcomes and problems.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>estimate costs, time requirements and subcontract work.</li></ul>
Digital literacy skills to:	<ul style="list-style-type: none"><li>access repair and time data</li><li>document and review quotation results.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>identify technical and procedural problems</li><li>prevent time and material wastage problems.</li></ul>
Teamwork skills to:	<ul style="list-style-type: none"><li>work effectively and cooperatively with others to optimise workflow and productivity.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Quotations</i></b> must include:	<ul style="list-style-type: none"> <li>• customer details</li> <li>• labour cost estimates</li> <li>• replacement parts required and their cost</li> <li>• subcontracted or specialist work</li> <li>• vehicle details</li> <li>• work to be performed.</li> </ul>
<b><i>Repair work</i></b> must include:	<ul style="list-style-type: none"> <li>• all vehicle damage, including minor and extensive damage.</li> </ul>
<b><i>Legal requirements</i></b> are to be in accordance with applicable commonwealth, state, or territory legislation, regulations, certification requirements and codes of practice, and must include:	<ul style="list-style-type: none"> <li>• environmental regulations</li> <li>• intellectual property.</li> </ul>
<b><i>Safety requirements</i></b> are to be in accordance with applicable commonwealth, state or territory Workplace Health and Safety Act or Occupational Health and Safety Act and must include:	<ul style="list-style-type: none"> <li>• ensuring safe location of vehicle to be inspected</li> <li>• following workplace safety procedures</li> <li>• identifying potential safety hazards.</li> </ul>

## Assessment Requirements for AURVNA003 Review vehicle repair quotations

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- review a minimum of two vehicle repair quotations for vehicle repair jobs, one relating to minor damage, the other to extensive damage.
- for each quotation:
  - agreeing on a final quotation with repairer
  - completing a vehicle assessment report.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- motor vehicle mechanical, electrical, paint, panel and structural:
  - extensive damage, which is damage that affects the safety and roadworthiness of a vehicle and includes:
    - body panel damage
    - bolt-on vehicle component damage
    - mechanical component damage
    - structural component damage
    - structural damage
    - welded or bonded key structural components, such as chassis rails damage
  - faults
  - dismantling and repair methods
  - minor damage, which is damage that does not affect the safety and roadworthiness of a vehicle and includes:
    - bumper bar graze
    - hail damage
    - panel damage
- types of specialist services, including:
  - air conditioning
  - automotive glaziers
  - battery electric vehicle (BEV)
  - brake systems
  - cooling systems
  - electrical and electronic systems
  - hybrids
  - liquid petroleum gas (LPG)
  - suspension and wheel alignments
  - transmission
  - trimming
- basic principles of estimating and costing
- methods for sourcing current retail costs of vehicles and vehicle components and materials
- current assessing and quoting methodologies
- relevant automotive websites to locate information on current best practice and future trends in the vehicle loss assessment environment
- general insurance industry knowledge, including relevant sections of:
  - contract and insurance law
  - Insurance Contracts Act
  - Motor Vehicle Insurance and Repair Industry Code of Conduct
  - state or territory fair Trading Act
- applicable commonwealth, state or territory laws, regulations and standards relating to reviewing a vehicle repair quotation, including:
  - commercial-in-confidence practices
  - environmental regulations
  - intellectual property

- personal legal liability
- applicable Workplace Health and Safety Act or Occupational Health and Safety Act
- workplace policies and procedures relating to reviewing a vehicle repair quotation, including:
  - recording and reporting procedures
  - use of digital images.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third party evidence, individuals must provide evidence that links them to the vehicle repair quotes that they have reviewed, e.g. assessment reports.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- a range of motor vehicles with both minor and extensive damage
- relevant information:
  - original equipment manufacturer (OEM)
  - recognised agency information
  - design specification
  - repair procedures
  - body repair manuals
- relevant materials, resources and safety equipment, including digital camera, paperwork and personal protective equipment kit
- relevant safety materials, including workplace safety procedures
- vehicle assessment information, including assessment notification, digital images and quotes
- Repair Times manuals.

## AURVNA005 Inspect quality of vehicle repair work

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to inspect vehicle repair work to ensure that it is being undertaken as agreed by the insurer and repairer.

The unit applies to those involved in inspecting the technical quality of repair work in the vehicle loss assessment environment, at the request of either the customer or the repairer. Repair work may be to light vehicles, commercial vehicles, heavy vehicles, agricultural and plant equipment, recreational vehicles and motorcycles.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.

### Competency Field

Vehicle Body

### Unit Sector

Loss Assessment and Repair Quoting

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare for vehicle inspection	1.1 Vehicle information is accessed and reviewed 1.2 Vehicle to be inspected is identified and checked against vehicle information 1.3 Appropriate <b><i>vehicle inspection method</i></b> is determined 1.4 Materials and equipment required to conduct vehicle inspection are identified and prepared
2. Inspect vehicle	2.1 Original equipment manufacturer (OEM) or authorised agencies and <b><i>component specifications</i></b> are interpreted and applied 2.2 Vehicle is inspected to determine that repair has been undertaken to an acceptable industry standard in line with compliance requirements 2.3 Safety and workplace procedures are interpreted and complied with 2.4 Vehicle inspection personal protective equipment (PPE) is used 2.5 Repair faults are identified 2.6 Faults requiring <b><i>rectification action</i></b> are decided and repair work plan is prepared
3. Authorise further action	3.1 Repair faults and recommended repair methods are discussed with current or new repairer 3.2 Cost and quotation variations are agreed with current or new repairer 3.3 Corrective work process is authorised with current or new repairer
4. Complete work processes	4.1 Actions undertaken are documented as required under the relevant code of practice 4.2 Vehicle inspection report is completed and provided to appropriate person 4.3 Reports are processed as required by workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"><li>• identify workplace procedures relating to inspecting repair quality.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret OEM or authorised agencies' repair procedures</li><li>• interpret vehicle technical information and specifications, including vehicle inspection reports.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• communicate with customers, repairers and insurance organisations</li><li>• confirm inspection requirements</li><li>• question and listen to others regarding repair work</li><li>• reach agreement on cost and quotation variations.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• interpret vehicle specifications</li><li>• interpret pre- and post-repair measurements</li><li>• identify OEM or authorised agencies' recommended repair measurements</li><li>• identify cost variations.</li></ul>
Digital literacy skills to:	<ul style="list-style-type: none"><li>• interpret vehicle repair and diagnostic data</li><li>• use communication devices and computerised equipment to document and report results.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>• coordinate communication between customer, repairers and insurance organisation.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>• use electronic devices to inspect the quality of mechanical, body and paint repair work</li><li>• use electronic vehicle repair measuring systems.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Vehicle inspection method</i></b> must include at least one of the following:	<ul style="list-style-type: none"><li>• physically checking and inspecting damage to vehicle and components</li><li>• referring to reports, publications and OEM or authorised agencies' specifications</li><li>• using digital images of damage to vehicle and components.</li></ul>
<b><i>Component specifications</i></b> must include at least one of the following:	<ul style="list-style-type: none"><li>• vehicle design specifications and drawings</li><li>• repair instructions and procedures</li><li>• component replacement instructions and procedures.</li></ul>
<b><i>Rectification action</i></b> must include one or more of the following:	<ul style="list-style-type: none"><li>• repairing the vehicle at the original repairer</li><li>• repairing the vehicle at a new repairer and seeking recovery from the original repairer</li><li>• declaring the vehicle a total loss and disposing of the vehicle at auction</li><li>• declaring the vehicle a total loss and selling vehicle in its present condition back to the original repairer.</li></ul>

## Unit Mapping Information

## Assessment Requirements for AURVNA005 Inspect quality of vehicle repair work

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- inspect vehicle repair work on a minimum of two occasions, where:
  - one repair involves rectification action undertaken at the original repairer
  - the other repair involves rectification action undertaken at a new repairer.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- type and use of personal protection equipment (PPE) required when inspecting repair work
- types of rectification action and process, including:
  - repairing the vehicle at original repairer
  - repairing the vehicle at a new repairer and seeking recovery from the original repairer
  - declaring the vehicle a total loss and disposing of the vehicle at auction
  - declaring the vehicle a total loss and selling the vehicle in its present condition back to the original repairer
- motor vehicle mechanical, electrical, paint, panel and structural repairs, including:
  - damage and faults
  - dismantling and repair methods
- current assessing and quoting methodologies
- vehicle inspection and damage assessment procedures and methodologies, including repair set-up and dismantling procedures
- general insurance industry knowledge, including relevant sections of:
  - contract and insurance law
  - Insurance Contracts Act
  - Motor Vehicle Insurance and Repair Industry Code of Conduct
  - state or territory Fair Trading Act
- methods for sourcing original equipment manufacturer (OEM) or authorised agencies' repair procedures and component supplier specifications, workshop manuals and repair guides
- applicable commonwealth, state or territory laws, regulations and standards relating to inspecting quality of vehicle repair work, including:
  - commercial-in-confidence practices
  - environmental regulations
  - intellectual property
  - personal legal liability
  - applicable Workplace Health and Safety Act or Occupational Health and Safety Act
- workplace procedures relating to inspecting the quality of vehicle repair work, including:
  - recording and reporting procedures
  - use of digital images.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles that they have inspected, e.g. reports.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace location or simulated workplace
- a range of vehicles with both satisfactory and unsatisfactory repair work
- relevant materials, resources and safety equipment, including digital camera, paperwork and PPE kit
- relevant information, including OEM or authorised agencies' repair specifications, workshop manuals and repair guides
- vehicle details.

## **AURVNA007 Apply automotive mechanical and electrical knowledge to vehicle loss assessments**

### **Modification History**

<b>Release</b>	<b>Comment</b>
Release 1	New unit of competency

### **Application**

This unit describes the performance outcomes required to apply automotive mechanical and electrical knowledge to identify mechanical and electrical damage resulting from a vehicular accident.

It applies to those applying specialist automotive knowledge to a vehicle loss assessment in the loss assessment environment. Loss assessment may relate to light vehicles, commercial vehicles, heavy vehicles, agricultural and plant equipment, recreational vehicles and motorcycles.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.

### **Competency Field**

Vehicle Body

### **Unit Sector**

Loss Assessment and Repair Quoting

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Develop and apply an understanding of automotive mechanical knowledge	<p>1.1 Knowledge of the operating principles of <i>suspension and steering systems, brake systems, transmission and driveline assembly</i>, and <i>engine and fuel systems</i> is developed</p> <p>1.2 Knowledge of suspension and steering systems, brake systems, transmission and driveline assembly, and engine and fuel systems is applied to loss assessment processes, procedures and policies</p> <p>1.3 Mechanical damage is identified</p>
2. Develop and apply an understanding of automotive electrical knowledge	<p>2.1 Knowledge of the operating principles of <i>electrical and electronic systems</i> is developed</p> <p>2.2 Knowledge of electrical and electronic systems is applied to loss assessment processes, procedures and policies</p> <p>2.3 Electrical damage is identified</p>
3. Develop and apply an understanding of advanced specialist vehicle knowledge	<p>3.1 Knowledge of specific vehicle types is developed, clarified where necessary, and applied to loss assessment processes, procedures and policies</p> <p>3.2 Knowledge of <i>latest technology</i> relating to automotive mechanical and electrical systems is developed, clarified where necessary, and applied to loss assessment processes, procedures and policies</p> <p>3.3 <i>Research techniques</i> and advanced specialist knowledge are employed to identify vehicle damage</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Reading skills to:	<ul style="list-style-type: none"><li>• apply loss assessment processes, procedures and policies</li><li>• research, interpret and apply automotive mechanical, electrical and advanced specialist vehicle knowledge.</li></ul>
Oral Communication skills to:	<ul style="list-style-type: none"><li>• engage with repairers and specialist providers.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• interpret technical measurements.</li></ul>
Digital Literacy skills to:	<ul style="list-style-type: none"><li>• use communication devices and computerised equipment to research advanced specialist vehicle information.</li></ul>
Problem Solving skills to:	<ul style="list-style-type: none"><li>• clarify problems relating to:<ul style="list-style-type: none"><li>• brake systems</li><li>• engine and fuel systems</li><li>• electrical and electronic systems</li><li>• latest automotive technology</li><li>• specific vehicle types</li><li>• suspension and steering systems</li><li>• transmission and driveline assembly</li></ul></li><li>• clarify knowledge of specific vehicle types and latest technology relating to automotive mechanical and electrical problems.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Suspension and steering systems</i></b> must include at least two of the following:	<ul style="list-style-type: none"> <li>• dependant suspension</li> <li>• double wishbone suspension</li> <li>• independent suspension</li> <li>• McPherson strut suspension.</li> </ul>
<b><i>Brake systems</i></b> must include at least two of the following:	<ul style="list-style-type: none"> <li>• air braking system</li> <li>• anti-lock braking system (ABS)</li> <li>• autonomous braking system</li> <li>• hydraulic braking system</li> <li>• stability control.</li> </ul>
<b><i>Transmission and driveline assembly</i></b> must include:	<ul style="list-style-type: none"> <li>• automatic and manual transmission</li> <li>• clutch assembly</li> <li>• driveline</li> <li>• final drive assembly.</li> </ul>
<b><i>Engine and fuel systems</i></b> must include:	<ul style="list-style-type: none"> <li>• cooling system</li> <li>• emission control system</li> <li>• engine components</li> <li>• fuel system.</li> </ul>
<b><i>Electrical and electronic systems</i></b> must include:	<ul style="list-style-type: none"> <li>• batteries</li> <li>• charging systems</li> <li>• electrical circuits</li> <li>• electronic body management systems</li> <li>• electronic drive management systems</li> <li>• electronic spark ignition engine management system</li> <li>• ignition systems</li> <li>• lights</li> <li>• starting systems</li> <li>• vehicle sensors.</li> </ul>
<b><i>Latest technology</i></b> must include:	<ul style="list-style-type: none"> <li>• battery electric vehicle</li> <li>• hybrid vehicle.</li> </ul>

## Assessment Requirements for AURVNA007 Apply automotive mechanical and electrical knowledge to vehicle loss assessments

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria and foundation skills:

- apply automotive mechanical and electrical knowledge to vehicle loss assessment processes, procedures and policies
- apply latest automotive technology knowledge and knowledge of specific vehicle types to vehicle loss assessment processes, procedures and policies
- identify vehicle mechanical and electrical damage.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- motor vehicle:
  - mechanical systems and components:
    - damage and faults
    - dismantling and repair methods
  - operating principles of electrical and electronic systems and components, including:
    - damage and faults
    - dismantling and repair methods
  - operating principles of mechanical systems and components, including:
    - brake systems
    - engine and fuel systems
    - suspension and steering systems
    - transmission and driveline assembly
- technical knowledge relating to a specific vehicle type, including light vehicles, heavy vehicles, agricultural and plant equipment, recreational vehicles and motorcycles
- technical knowledge of latest technology relating to mechanical, electrical and electronic motor vehicle repair, including repair of battery electric vehicles (BEV) and hybrid vehicles
- vehicle inspection and damage assessment procedures and methodologies, including repair set-ups and dismantling procedures
- current assessing and quoting methodologies
- relevant automotive websites to locate current best practice and future trends information
- methods of sourcing OEM or authorised agencies repair procedures, component supplier specifications and repair guides
- applicable commonwealth, state or territory laws, regulations and standards relating to vehicle loss assessment and reporting requirements, including:
  - environmental regulations
  - intellectual property
  - legislation
  - applicable Workplace Health and Safety Act or Occupational Health and Safety Act
- workplace policies and procedures relating to vehicle loss assessment and reporting requirements, including:
  - recording and reporting procedures
  - use of digital images.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third party evidence, individuals must provide evidence that links them to the vehicles that they have assessed, e.g. assessment reports.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- a range of vehicles with mechanical and electrical damage
- relevant information including OEM or authorised agencies repair procedures, component supplier specifications and repair guides
- relevant materials and resources.

## AURVNA008 Apply automotive body and paint knowledge to vehicle loss assessments

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to apply automotive body and paintwork knowledge to identify body and paint damage.

The unit applies to those applying specialist body and paint knowledge to a vehicle loss assessment in the loss assessment environment. Vehicles and components may include light vehicles, commercial vehicle, heavy vehicles, agricultural and plant equipment, recreational vehicles and motorcycles.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.

### Competency Field

Vehicle Body

### Unit Sector

Loss Assessment and Repair Quoting

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Develop and apply an understanding of automotive paintwork knowledge	<p>1.1 Knowledge of operating principles of <b><i>paint preparation, application</i></b>, and refinishing process and techniques, including <b><i>paint products</i></b> and imperfection identification is developed</p> <p>1.2 Knowledge of paint preparation and paint product is applied to loss assessment processes</p> <p>1.3 Paintwork damage is identified using <b><i>colour matching techniques</i></b></p>
2. Develop and apply an understanding of automotive body knowledge	<p>2.1 Knowledge of operating principles of <b><i>vehicle structure</i></b> is developed</p> <p>2.2 knowledge of operating principles of vehicle <b><i>supplementary restraint systems</i></b> (SRS) is developed</p> <p>2.3 Knowledge of operating principles of <b><i>vehicle body repair procedures</i></b> is developed</p> <p>2.4 Knowledge of vehicle structure, SRS and body repair procedures is applied to loss assessment processes, procedures and policies</p> <p>2.5 Bodywork damage is identified</p>
3. Develop and apply an understanding of advanced specialist vehicle information	<p>3.1 Knowledge of <b><i>specific vehicle types</i></b> is developed, clarified where necessary, and applied to loss assessment processes, procedures and policies</p> <p>3.2 Knowledge of <b><i>latest technology</i></b> relating to automotive paint and bodywork is developed, clarified where necessary, and applied to loss assessment processes, procedures and policies</p> <p>3.3 <b><i>Research techniques</i></b> and advanced specialist vehicle knowledge are employed in order to identify vehicle damage</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"><li>source information on loss assessment processes, procedures and policies.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>research and interpret automotive paintwork, body, and advanced specialist vehicle information.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>discuss with repairers and specialist providers problems relating to:<ul style="list-style-type: none"><li>latest automotive technology</li><li>specific vehicle types</li><li>vehicle body</li><li>vehicle paintwork.</li></ul></li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>interpret technical measurements in order to determine extent of damage.</li></ul>
Digital literacy skills to:	<ul style="list-style-type: none"><li>use communication devices and computerised equipment to research advanced specialist vehicle information.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Paint preparation and application</i></b> must include:	<ul style="list-style-type: none"> <li>• colour matching</li> <li>• paint film thickness gauge</li> <li>• paint code list</li> <li>• paint mixing</li> <li>• masking</li> <li>• surface preparation, including:               <ul style="list-style-type: none"> <li>• sanding</li> <li>• degreasing.</li> </ul> </li> </ul>
<b><i>Paint products</i></b> must include:	<ul style="list-style-type: none"> <li>• acrylic enamel</li> <li>• air dry enamel</li> <li>• clear over base (COB)</li> <li>• multi-layer</li> <li>• pearls</li> <li>• polyurethane</li> <li>• primers and fillers</li> <li>• special effects</li> <li>• two-pack paint</li> <li>• waterborne paint.</li> </ul>
<b><i>Colour matching techniques</i></b> must include at least one of the following:	<ul style="list-style-type: none"> <li>• eye</li> <li>• formula</li> <li>• colour cards</li> <li>• colour spectrometer.</li> </ul>
<b><i>Vehicle structure</i></b> must include:	<ul style="list-style-type: none"> <li>• alloys</li> <li>• collision energy management</li> <li>• composite materials</li> <li>• foams structural and non-structural</li> <li>• glass components</li> <li>• metals</li> <li>• plastics</li> <li>• vehicle structural integrity and component interrelationship.</li> </ul>
<b><i>Supplementary restraint systems</i></b> must include:	<ul style="list-style-type: none"> <li>• airbag systems, including:               <ul style="list-style-type: none"> <li>• console</li> <li>• curtain</li> <li>• dash</li> <li>• knee</li> <li>• pillar</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• seat</li> <li>• side</li> <li>• steering wheel</li> <li>• seat belt tensioners</li> <li>• sensors, actuators and control modules.</li> </ul>
<b>Vehicle body repair procedures</b> must include:	<ul style="list-style-type: none"> <li>• alignment systems</li> <li>• panel repair, including the application of filler</li> <li>• measuring systems</li> <li>• methods and types of: <ul style="list-style-type: none"> <li>• bonding</li> <li>• fastening</li> <li>• riveting</li> <li>• welding.</li> </ul> </li> </ul>
<b>Specific vehicle types</b> must include at least one of the following:	<ul style="list-style-type: none"> <li>• agricultural and plant equipment</li> <li>• heavy vehicles</li> <li>• commercial vehicles</li> <li>• light vehicles</li> <li>• motorcycles</li> <li>• recreational vehicles.</li> </ul>
<b>Latest technology</b> must include:	<ul style="list-style-type: none"> <li>• alloy steel technology</li> <li>• aluminium technology</li> <li>• composite materials</li> <li>• electrical and electronic systems</li> <li>• high strength steels</li> <li>• painting preparation and procedures.</li> </ul>
<b>Research techniques</b> must include:	<ul style="list-style-type: none"> <li>• internet</li> <li>• reference material, including: <ul style="list-style-type: none"> <li>• original equipment manufacturer (OEM) or authorised agency repair guides</li> <li>• paint code list</li> <li>• repair guides</li> </ul> </li> <li>• subject matter experts.</li> </ul>

## Assessment Requirements for AURVNA008 Apply automotive body and paint knowledge to vehicle loss assessments

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria and foundation skills:

- apply specialist automotive knowledge to vehicle loss assessment processes and procedures on a minimum of two occasions, including:
  - automotive paintwork and body knowledge
  - latest automotive technology knowledge
  - specific vehicle type knowledge
  - identification of vehicle body and paint damage.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- operating principles of paint preparation and refinishing process and techniques, including:
  - colour matching
  - imperfection identification
  - paint products
- operating principles of supplementary restraint systems (SRS)
- operating principles of vehicle structural repair and procedures, including:
  - measuring and alignment systems
  - welding, bonding and fastening methods and types
- operating principles of vehicle structure, including:
  - alloys
  - metals
  - other materials
- paintwork and body:
  - damage and faults
  - dismantling and repair methods
  - technical knowledge relating to a specific vehicle type
- technical knowledge of latest technology relating to vehicle paintwork and body repair, including:
  - composite materials
  - high-strength steels
  - waterborne paints
  - painting preparation and procedures
  - SRS
- vehicle inspection and damage assessment procedures and methodologies, including repair set-up and dismantling procedures
- current assessing and quoting methodologies
- relevant automotive websites to locate information on current best practice and future trends in vehicle loss assessment
- methods for sourcing original equipment manufacturer (OEM) or authorised agencies' repair procedures, component supplier specifications and repair guides
- applicable commonwealth, state or territory laws, regulations and standards relating to vehicle loss assessment and reporting requirements, including:
  - environmental regulations
  - intellectual property
  - applicable Workplace Health and Safety Act or Occupational Health and Safety Act
- workplace policies and procedures relating to vehicle loss assessment and reporting requirements, including:
  - recording and reporting procedures
  - use of digital images.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles that they have assessed, e.g. assessment reports.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- a range of vehicles with paint and body damage
- relevant information, including OEM or authorised agencies' repair procedures, component supplier specifications and repair guides
- relevant materials and resources.

## AURVNN001 Evaluate vehicle bodywork for damage and identify repair requirements

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to evaluate the bodywork of a vehicle for damage and to identify the materials, equipment and processes required to repair it. It involves using vehicle paint, body and mechanical technical knowledge; and locating, evaluating and documenting relevant information when selecting materials, equipment and processes.

The unit applies to those evaluating the bodywork of a vehicle for damage and selecting materials, equipment and processes to repair the vehicle in a vehicle repair or vehicle loss assessment environment. Vehicles may include light vehicles, commercial vehicles, heavy vehicles, agricultural and plant equipment, recreational vehicles and motorcycles.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.

### Competency Field

Vehicle Body

### Unit Sector

Loss Assessment and Repair Quoting - Body

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare for work	1.1 Work instructions are used to determine job requirements 1.2 Workplace and workplace <b><i>safety requirements</i></b> are read and complied with 1.3 <b><i>Workplace policies and procedures, legal requirements, and component supplier specifications</i></b> are read and interpreted 1.4 Safety equipment, tooling equipment, and <b><i>materials and equipment</i></b> are selected and checked
2. Assess vehicle bodywork for damage	2.1 Vehicle to be inspected is located 2.2 Preferred dismantling and inspection methods are determined that conform to workplace policies and procedures, legal requirements, and vehicle manufacturer and component supplier specifications 2.3 Vehicle system and components are dismantled and inspected to determine <b><i>vehicle damage</i></b> and faults 2.4 Vehicle is inspected in line with workplace policies and procedures, legal requirements, vehicle manufacturer and component supplier specifications, safety requirements and workplace environmental practices 2.5 Suitability of vehicle for insurance is determined according to workplace policies and procedures
3. Gather data and specifications	3.1 Bodywork process specifications are identified and documented 3.2 Staff and management are consulted to identify additional or altered specifications 3.3 Existing materials and equipment are evaluated 3.4 Data and specifications are compiled and documented
4. Evaluate and select materials, equipment and processes	4.1 Materials and equipment options are determined 4.2 Materials and equipment are assessed for quality finish and conformity to standards 4.3 Specifications of materials and equipment are compared for performance and cost 4.4 Commercial, environmental and safety impact of materials and equipment selection are determined 4.5 Materials, equipment and processes are selected based on performance, cost, specifications and impact comparison 4.6 Evaluation process is documented as required by organisational policies and procedures, and legal requirements

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Reading skills to:	<ul style="list-style-type: none"><li>• interpret technical specifications</li><li>• analyse information relating to bodywork materials and equipment</li><li>• analyse regulatory, environmental and safety procedures, best practice and future trends</li><li>• research evaluation results.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>• consult with staff and management to inform research and data gathering.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>• organise activities</li><li>• systematically identify, research and evaluate options.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>• identify potential technical and procedural problems and variables.</li></ul>
Teamwork skills to:	<ul style="list-style-type: none"><li>• work effectively and cooperatively with others in identifying specifications that contribute to evaluation of vehicle repair requirements.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety requirements</i></b> are to be in accordance with applicable commonwealth, state or territory Workplace Health and Safety Act or Occupational Health and Safety Act and must include:	<ul style="list-style-type: none"> <li>ensuring safe location of vehicle to be inspected</li> <li>following workplace safety procedures</li> <li>identifying potential safety hazards.</li> </ul>
<b><i>Workplace policies and procedures</i></b> must include:	<ul style="list-style-type: none"> <li>environment and sustainability</li> <li>job specifications</li> <li>manufacturer specifications and industry codes of practice</li> <li>quality policies and procedures, including Australian standards</li> <li>reporting and recording procedures</li> <li>safe work procedures.</li> </ul>
<b><i>Legal requirements</i></b> are to be in accordance with applicable commonwealth, state, or territory legislation, regulations, certification requirements and codes of practice, and must include:	<ul style="list-style-type: none"> <li>environmental regulations</li> <li>intellectual property.</li> </ul>
<b><i>Component supplier specifications</i></b> must include at least one of the following:	<ul style="list-style-type: none"> <li>vehicle design specifications and drawings</li> <li>repair instructions and procedures</li> <li>component replacement instructions and procedures.</li> </ul>
<b><i>Materials and equipment</i></b> must include:	<ul style="list-style-type: none"> <li>digital camera</li> <li>electronic or paper-based information and reports</li> <li>elcometer</li> <li>hoist</li> <li>internet connection</li> <li>maps</li> <li>personal computer, laptop or tablet</li> <li>personal protective equipment (PPE) kit</li> <li>portable light</li> <li>protective covers.</li> </ul>

<b>Vehicle damage</b> must include:	<ul style="list-style-type: none"><li>• all vehicle damage, including minor and extensive damage.</li></ul>
-------------------------------------	---

## Unit Mapping Information

No equivalent unit.

## Assessment Requirements for AURVNN001 Evaluate vehicle bodywork for damage and identify repair requirements

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria and foundation skills:

- evaluate the damage on bodywork of a minimum of two vehicles and identify repair requirements, with at least one evaluation relating to minor damage and the other relating to extensive damage
- for each evaluation:
  - determine the impact of decisions in terms of commercial and safety risks
  - document bodywork materials, equipment and processes.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- motor vehicle mechanical, electrical, paint, panel and structural:
  - extensive damage, which is damage that affects the safety and roadworthiness of a vehicle and includes:
    - body panel damage
    - bolt-on vehicle component damage
    - mechanical component damage
    - structural component damage
    - structural damage
    - welded or bonded key structural components, such as chassis rails damage
  - faults
  - dismantling and repair methods
  - minor damage, which is damage that does not affect the safety and roadworthiness of a vehicle and includes:
    - bumper bar graze
    - hail damage
    - panel damage
- methods for sourcing current retail costs of vehicles and vehicle components and materials
- vehicle inspection and damage assessment procedures and methodologies, including repair set-up and dismantling procedures
- current assessing and quoting methodologies
- vehicle testing machines and procedures
- current vehicle materials and retail costs
- relevant automotive websites to locate information on current best practice and future trends in the vehicle loss assessment environment
- general insurance industry knowledge, including relevant sections of:
  - contract and insurance law
  - Insurance Contracts Act
  - intellectual property
  - Motor Vehicle Insurance and Repair Industry Code of Conduct
  - state or territory Fair Trading Act
- methods for sourcing original equipment manufacturer (OEM) or recognised agency information, component supplier specifications, workshop manuals and repair guides
- applicable commonwealth, state or territory laws, regulations and standards relating to evaluating vehicle damage, and suggesting repair materials, equipment and processes, including:
  - commercial-in-confidence practices
  - environmental regulations
  - intellectual property
  - personal legal liability
  - applicable Workplace Health and Safety Act or Occupational Health and Safety Act
- workplace policies and procedures relating to evaluating vehicle damage, and suggesting repair materials, equipment and processes, including:
  - recording and reporting procedures

- use of digital images.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles that they have assessed, e.g. assessment reports

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- a range of vehicles with both minor and extensive vehicle damage
- computer hardware, software and calculators
- internet access
- necessary tools and equipment
- relevant information, including OEM or recognised agency information and repair procedures, workshop and body repair manuals
- workplace technology.

## AURVNP001 Evaluate vehicle paintwork for damage and identify refinish requirements

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to evaluate vehicle paintwork for damage and identify the paint refinish required to repair a vehicle. It involves using technical understanding of paint applications and procedures; and locating, evaluating and documenting relevant information.

The unit applies to those evaluating the paintwork on a vehicle for damage and identifying appropriate paint refinish to repair the vehicle in a vehicle repair or vehicle loss assessment environment. Vehicles may include light vehicles, commercial vehicles, heavy vehicles, agricultural and plant equipment, recreational vehicles and motorcycles.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.

### Competency Field

Vehicle Body

### Unit Sector

Loss Assessment and Repair Quoting - Paint

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare for work	<p>1.1 Work instructions are used to determine job requirements</p> <p>1.2 Workplace <i>safety requirements</i> and <i>workplace environmental practices</i> and policies are read and complied with</p> <p>1.3 <i>Workplace policies and procedures, legal requirements</i>, and <i>component supplier specifications</i> are read and interpreted</p> <p>1.4 Safety equipment, <i>tools, materials and other equipment</i> are selected and checked</p>
2. Assess vehicle paintwork for damage	<p>2.1 Vehicle to be inspected is located</p> <p>2.2 Preferred inspection method is determined that conforms to workplace policies and procedures, legal requirements, and specifications of vehicle manufacturer or component suppliers</p> <p>2.3 Paintwork is inspected to identify <i>vehicle paintwork damage</i> and potential <i>paint problems</i></p> <p>2.4 Vehicle is inspected in line with workplace policies and procedures, legal requirements, specification of vehicle manufacturer or component suppliers, safety requirements and workplace environmental practices</p>
3. Gather data and specifications	<p>3.1 Painting specifications are identified and documented</p> <p>3.2 Staff and management are consulted to identify additional or altered specifications</p> <p>3.3 Existing paint refinishing materials and equipment are evaluated</p> <p>3.4 Data and specifications are compiled and documented</p>
4. Evaluate and select materials, equipment and processes	<p>4.1 Materials and equipment options are determined</p> <p>4.2 Materials and equipment are assessed for quality finish and conformity to standards</p> <p>4.3 Specifications of materials and equipment are compared for performance and cost</p> <p>4.4 Commercial, environmental and safety impact of materials and equipment selected is determined</p> <p>4.5 Materials, equipment and processes are selected based on performance, cost, specifications and impact comparison</p> <p>4.6 Evaluation report detailing required specifications and repair process is completed according to workplace policies and procedures, and legal requirements</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Reading skills to:	<ul style="list-style-type: none"><li>analyse information relating to paintwork materials and equipment</li><li>interpret technical specifications</li><li>analyse regulatory, environmental and safety procedures, best practice and future trends</li><li>research evaluation results.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>consult with staff and management to inform research and data gathering.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>organise activities</li><li>systematically identify, research and evaluate options.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>identify and resolve potential technical and procedural problems and variables within scope of own responsibility.</li></ul>
Teamwork skills to:	<ul style="list-style-type: none"><li>work effectively and cooperatively with others in identifying specifications that contribute to evaluation of paintwork repair requirements.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety requirements</i></b> are to be in accordance with applicable commonwealth, state or territory Workplace Health and Safety Act or Occupational Health and Safety Act and must include:	<ul style="list-style-type: none"> <li>ensuring safe location of vehicle to be inspected</li> <li>following workplace safety procedures</li> <li>identifying potential safety hazards.</li> </ul>
<b><i>Workplace policies and procedures</i></b> must include:	<ul style="list-style-type: none"> <li>environment and sustainability</li> <li>job specifications</li> <li>manufacturer specifications and industry codes of practice</li> <li>quality policies and procedures, including Australian standards</li> <li>reporting and recording procedures</li> <li>safe work procedures.</li> </ul>
<b><i>Legal requirements</i></b> are to be in accordance with applicable commonwealth, state, or territory legislation, regulations, certification requirements and codes of practice, and must include:	<ul style="list-style-type: none"> <li>environmental regulations</li> <li>intellectual property.</li> </ul>
<b><i>Component supplier specifications</i></b> must include at least one of the following:	<ul style="list-style-type: none"> <li>vehicle design specifications and drawings</li> <li>repair instructions and procedures</li> <li>component replacement instructions and procedures.</li> </ul>
<b><i>Tools, materials and other equipment</i></b> must include:	<ul style="list-style-type: none"> <li>calculators and general office equipment</li> <li>computer hardware and software</li> <li>digital camera</li> <li>paint code list</li> <li>portable light</li> <li>recording equipment, such as a laptop or notebook</li> <li>specialist tools, including: <ul style="list-style-type: none"> <li>colour spectrometer</li> <li>paint film thickness gauge.</li> </ul> </li> </ul>
<b><i>Vehicle paintwork damage</i></b>	<ul style="list-style-type: none"> <li>bolt-on vehicle painted components</li> </ul>

must include:	<ul style="list-style-type: none"><li>• paint blend</li><li>• welded vehicle painted components.</li></ul>

## Assessment Requirements for AURVNP001 Evaluate vehicle paintwork for damage and identify refinish requirements

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria and foundation skills:

- evaluate vehicle paintwork for damage and identify refinish requirements on a minimum of two different damaged vehicles
- determine the impact of decisions in terms of commercial, environmental and safety risks
- document refinish materials, equipment and processes.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- motor vehicle paintwork damage and refinishing techniques, including:
  - damage and faults
  - paint problems, including:
    - blistering
    - delaminating
    - flaking
    - humidity bubbles
    - inclusions
    - incorrect:
      - colour
      - film build
      - mottle
      - orange peel
      - poor cover or hiding
  - paint types:
    - acrylic enamel
    - air dry enamel
    - clear over base (COB)
    - fillers
    - multi-layer
    - pearls
    - polyurethane
    - special effects
    - waterborne paint
    - two-pack paint
- current assessing and quoting methodologies
- vehicle paint testing equipment and procedures
- current vehicle material allowances
- relevant automotive websites to locate information on current best practice and future trends in the vehicle loss assessment environment
- general insurance industry knowledge, including relevant sections of:
  - contract and insurance law
  - Insurance Contracts Act
  - intellectual property
  - Motor Vehicle Insurance and Repair Industry Code of Conduct
  - state or territory Fair Trading Act
- methods for sourcing paint manufacturer specifications
- applicable commonwealth, state or territory laws, regulations and standards relating to evaluating the paintwork of a damaged vehicle, and suggesting repair materials, equipment and processes, including:
  - commercial-in-confidence practices
  - environmental regulations
  - intellectual property

- personal legal liability
- applicable Workplace Health and Safety Act or Occupational Health and Safety Act
- workplace policies and procedures relating to evaluating paintwork of a damaged vehicle, and suggesting refinish materials, equipment and processes, including:
  - recording and reporting procedures.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles that they have evaluated, e.g. evaluation reports.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- a range of vehicles with both minor and extensive paint damage
- computer hardware, software and calculators
- internet access
- paint testing equipment
- relevant information, including paint manufacturer specifications
- workplace technology.

## AURVTA005 Clean vehicles

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to clean a vehicle. It requires the learner to plan and prepare the task; clean the vehicle interior, exterior and engine bay; and maintain the work area, tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Competency Field

Vehicle Body

### Unit Sector

Technical

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare to clean vehicle	<p>1.1 <b><i>Safety and environmental requirements</i></b> are sourced and interpreted</p> <p>1.2 <b><i>Vehicle</i></b> to be worked on is identified and manufacturer specifications and workplace procedures for vehicle cleaning are sourced and interpreted</p> <p>1.3 Potential hazards and risks associated with task are identified and reported to workplace supervisor</p> <p>1.4 <b><i>Tools and equipment</i></b> required for vehicle cleaning are identified according to manufacturer specifications</p>
2. Clean vehicle interior and fittings	<p>2.1 Tools, equipment and materials are selected and checked according to manufacturer specifications and workplace procedures</p> <p>2.2 Vehicle is prepared prior to cleaning interior and fittings according to safety and environmental requirements</p> <p>2.3 <b><i>Interior surfaces</i></b> are cleaned and vacuumed using correct cleaning materials and equipment, without causing damage to components, tools or equipment</p>
3. Clean vehicle exterior and fittings	<p>3.1 Tools, equipment and materials are selected and checked according to manufacturer specifications</p> <p>3.2 Vehicle is prepared prior to cleaning exterior and fittings according to safety and environmental requirements</p> <p>3.3 Vehicle exterior and fittings are cleaned using correct techniques and without causing damage to components, tools or equipment</p>
4. Clean engine bay	<p>4.1 Tools, equipment and materials are selected and checked according to manufacturer specifications and workplace procedures</p> <p>4.2 Vehicle is prepared prior to cleaning engine bay according to safety and environmental requirements</p> <p>4.3 Electronic components and electrical connections are protected from water ingress</p> <p>4.4 Engine bay is cleaned without causing damage to components, tools or equipment</p>
5. Complete work processes	5.1 Final inspection is made to ensure work is to workplace standards and vehicle is presented ready for use or storage according to

ELEMENTS	PERFORMANCE CRITERIA
	<p>workplace procedures</p> <p>5.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures</p> <p>5.3 Tools and equipment are checked and stored according to workplace procedures, or tagged and reported where necessary</p> <p>5.4 Problems with cleaning equipment or tools are reported according to workplace procedures</p> <p>5.5 Workplace documentation is processed according to workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Reading skills to:	<ul style="list-style-type: none"><li>select and interpret key information from manufacturer specifications, safety requirements and workplace procedures for cleaning a vehicle</li><li>select and interpret key information from environmental requirements and workplace procedures to ensure a clean and safe work site.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>legibly and accurately fill out workplace documentation using correct industry terminology and conventions.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>use basic mathematical operations, including addition, subtraction, multiplication and division, to calculate ratios and amounts of cleaning products.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>plan own work requirements and prioritise actions to complete the vehicle cleaning task.</li></ul>
Self-management skills to:	<ul style="list-style-type: none"><li>recognise own limitations when selecting and using tools and equipment and seek timely advice.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>identify potential or actual hazards and take action to minimise risk</li><li>refer problems that cannot be readily resolved and seek assistance from workplace supervisor.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>set up and operate equipment and tools required to clean a vehicle.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Italicised wording, if used in the performance criteria, is detailed below.**

<b><i>Safety and environmental requirements</i></b> must include:	<ul style="list-style-type: none"> <li>information about key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:               <ul style="list-style-type: none"> <li>use of personal protective equipment, including safety glasses, ear protection, gloves and safety footwear</li> <li>applying procedures for preventing waste water from entering storm water systems.</li> </ul> </li> </ul>
<b><i>Vehicle</i></b> must include one or more of the following:	<ul style="list-style-type: none"> <li>passenger motor vehicle</li> <li>light commercial</li> <li>heavy vehicle</li> <li>motor cycle</li> <li>constructed vehicle.</li> </ul>
<b><i>Tools and equipment</i></b> must include:	<ul style="list-style-type: none"> <li>hoses and washing equipment</li> <li>chemicals and cleaning solutions</li> <li>polishing equipment.</li> </ul>
<b><i>Interior surfaces</i></b> must include:	<ul style="list-style-type: none"> <li>cloth</li> <li>glass</li> <li>leather.</li> </ul>

## Unit Mapping Information

No equivalent unit.

## Assessment Requirements for AURVTA005 Clean vehicles

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria and foundation skills:

- safely and correctly clean a minimum of two different vehicles.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:
  - personal protective equipment, including safety glasses, gloves, ear protection and safety footwear
  - operation of equipment and tools, including pressurised hoses
  - safety data sheets (SDS) and types, use and location of cleaning products
  - procedures for preventing waste water from entering storm water system
  - disposal of chemicals, oil and rubbish
- identification and location of vehicle components, including:
  - engine bay
  - engine electrical components
  - interior and exterior fittings
- types of vehicle body finishes
- vehicle cleaning procedures, including:
  - types, application and use of vehicle cleaning areas and vehicle bays
  - types, application and use of cleaning equipment and materials
  - component protection procedures, including:
    - protection of engine bay air intake and electrical and electronic components
    - protection of body electrical components
  - vehicle interior, exterior, fitting and engine bay cleaning procedures
  - cloth and leather interior surfaces cleaning procedures
  - chrome and polished alloy wheels cleaning procedures
- clean-up and maintenance requirements for vehicle cleaning area.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles that they have cleaned, e.g. job card.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- a minimum of two different vehicles with cloth, glass and leather interior components, requiring cleaning
- vehicle cleaning tools, equipment and materials, including:
  - hoses and washing equipment
  - chemicals and cleaning solutions
  - polishing equipment
- vehicle cleaning area.

## AURVTP029 Prepare surface and prime repaired body panels

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to prepare and prime a repaired body panel of a vehicle. It requires the learner to plan and prepare the task; identify types of automotive abrasives; remove protective waxes and surface contaminants; feather paint edges; apply filler; and maintain the work area, tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Competency Field

Vehicle Body

### Unit Sector

Technical - Paint

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1.1 Prepare to prime a repaired body panel	1.1 <b><i>Safety and environmental requirements</i></b> are sourced and interpreted 1.2 Task instruction is interpreted and vehicle body panel to be worked on is identified 1.3 Manufacturer specifications and workplace procedures for removing paint and preparing surface are sourced and interpreted 1.4 Potential hazards and risks associated with task are identified and reported to workplace supervisor 1.5 Tools and equipment required for priming body panel are identified according to manufacturer specifications
2. Prepare body panel for priming	2.1 <b><i>Tools, equipment and materials</i></b> for priming body panel are selected and checked prior to use according to manufacturer specifications and safety requirements 2.2 <b><i>Vehicle body panel</i></b> is prepared for priming according to workplace procedures and safety and environmental requirements, and without causing damage to components, tools or equipment 2.3 Body panel is inspected according to manufacturer specifications 2.4 Body panel inspection results are recorded
3. Apply primer to body panel	3.1 Primer is prepared for application according to manufacturer specifications and safety and environmental requirements 3.2 Primer is applied according to workplace procedures, manufacturer specifications, and safety and environmental requirements 3.3 Primer is applied to body panel without causing damage to body panel, components, tools or equipment 3.4 Body panel is inspected to ensure correct application of primer to body panel 3.5 Body panel inspection results are recorded
4. Complete work processes	4.1 Final inspection is made to ensure work meets task instruction and workplace standards, and body panels are primed ready for use or storage according to workplace procedures 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures 4.3 Tools and equipment are checked and stored according to

ELEMENTS	PERFORMANCE CRITERIA
	workplace procedures, or tagged and reported where necessary 4.4 Workplace documentation is processed according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> <li>locate appropriate sources of vehicle panel and priming information and procedures.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>select and interpret key information from manufacturer specifications, safety requirements and workplace procedures for priming a repaired body panel</li> <li>select and interpret key information from environmental requirements and workplace procedures to ensure a clean and safe work site.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>legibly and accurately fill out workplace documentation using correct industry terminology and conventions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>read and interpret numerical information in paint information</li> <li>use basic mathematical operations, including addition, subtraction, multiplication and division, to calculate volumes and ratios.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>plan own work requirements and prioritise actions to achieve required outcomes.</li> </ul>
Self-management skills to:	<ul style="list-style-type: none"> <li>recognise own limitations when selecting and using tools and equipment and seek timely advice.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>identify potential or actual hazards and take action to minimise risk</li> <li>refer problems that cannot be readily resolved and seek assistance from workplace supervisor.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>set up and operate equipment and tools required to prime repaired body panels.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety and environmental requirements</i></b> must include:	<ul style="list-style-type: none"> <li>information about key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including: <ul style="list-style-type: none"> <li>use of personal protective equipment, including safety glasses, ear protection and safety footwear</li> <li>use of hand tools</li> <li>procedures for handling and disposing of used primer, emulsions and solvents</li> <li>procedures for extracting fumes.</li> </ul> </li> </ul>
<b><i>Tools, equipment and materials</i></b> must include:	<ul style="list-style-type: none"> <li>preparation and spray areas with fume extraction</li> <li>spray gun equipment</li> <li>wet and dry paper</li> <li>spray gun equipment</li> <li>sanding discs</li> <li>emulsion materials</li> <li>filler</li> <li>primers, including: <ul style="list-style-type: none"> <li>etch primer</li> <li>primer surfacer.</li> </ul> </li> </ul>
<b><i>Vehicle body panel</i></b> must include:	<ul style="list-style-type: none"> <li>a major body panel from one of the following: <ul style="list-style-type: none"> <li>passenger vehicle</li> <li>light commercial vehicle</li> <li>heavy vehicle</li> <li>constructed vehicle.</li> </ul> </li> </ul>

## Assessment Requirements for AURVTP029 Prepare surface and prime repaired body panels

### Modification History

Release	Comment
Release 1	New unit of competency

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria and foundation skills:

- correctly surface prepare and prime a minimum of two major vehicle body panels.

### Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:
  - use of personal protective equipment, including safety glasses, ear protection and safety footwear
  - use of hand tools, including air and electric sanders
  - safety data sheets (SDS) and procedures for handling and disposing of used primer, emulsions and solvents
  - procedures for extraction of fumes
- types, grades and uses of abrasives and sandpaper
- workplace procedures for:
  - wet and dry sanding
  - surface preparation
  - paint feather edging and precautions
- types of filler and primers and their use
- filler and primer application procedures
- work area clean-up and maintenance requirements.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the repaired body panels that they have surface prepared and primed, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- two major vehicle body panels
- tools, equipment and materials, including:
  - preparation and spray areas with fume extraction
  - spray gun equipment
  - wet and dry paper
  - spray gun equipment
  - sanding discs
  - emulsion materials
  - filler
  - primers, including:
    - etch primer
    - primer surfacer
  - solvents.

## AURVTW010 Set up and use welding equipment

### Modification History

Release	Comment
Release 1	New unit of competency

### Application

This unit describes the performance outcomes required to set up and use welding equipment to weld a range of materials. It requires the learner to plan and prepare the task; select and set up the correct welding equipment; weld using different welding techniques; and maintain the work area, tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Competency Field

Vehicle Body

### Unit Sector

Technical - Welding, Grinding, Machining and Soldering

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare to set up and use welding equipment	<p>1.1 <b><i>Safety and environmental requirements</i></b> are sourced and interpreted</p> <p>1.2 Task instruction is interpreted and welding equipment, tools and materials needed to complete the task are determined</p> <p>1.3 Manufacturer specifications and workplace procedures for use of welding equipment and associated materials are sourced and interpreted</p> <p>1.4 Potential hazards and risks associated with task are identified and reported to workplace supervisor</p>
2. Set up welding equipment and materials	<p>2.1 Identified <b><i>welding equipment, tools and materials</i></b> are sourced and checked according to manufacturer specifications, workplace procedures and safety requirements</p> <p>2.2 <b><i>Welding equipment is set up</i></b> according to manufacturer specifications, workplace procedures and safety requirements</p> <p>2.3 Materials to be welded are identified and sourced</p>
3. Use welding equipment	<p>3.1 Welding equipment and materials set up for the task are checked prior to use according to manufacturer specifications, workplace procedures and safety requirements</p> <p>3.2 Welding method and precautions outlined in the task instruction are interpreted and followed</p> <p>3.3 <b><i>Welding task and demonstration</i></b> are carried out correctly according to manufacturer specifications, workplace procedures and safety requirements</p>
4. Complete work processes	<p>4.1 Final inspection is made to ensure work is completed according to task instruction and workplace standards</p> <p>4.2 Welding equipment and tools are checked and stored in a condition ready for use according to workplace procedures, or tagged and reported where necessary</p> <p>4.3 Problems with welding equipment or tools are reported according to workplace procedures</p> <p>4.4 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures</p>

ELEMENTS	PERFORMANCE CRITERIA
	4.5 Workplace documentation is processed according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> <li>locate appropriate sources of welding information and procedures.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>select and interpret key information from manufacturer specifications, safety requirements and workplace procedures to set up and safely operate welding equipment</li> <li>select and interpret key information from environmental requirements and workplace procedures to ensure a clean and safe work site.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>legibly and accurately fill out workplace documentation using correct industry terminology and conventions.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>use basic mathematical operations, including addition, subtraction, multiplication, division to calculate percentages, and to calculate, calibrate and set equipment settings</li> <li>read and interpret numerical information in welding equipment identification figures.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>plan own work and prioritise actions to set up, undertake and complete the welding task.</li> </ul>
Self-management skills to:	<ul style="list-style-type: none"> <li>recognise own limitations when selecting and using tools and welding equipment and seek timely advice.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>identify hazards or potential hazards and take action to minimise risk</li> <li>refer problems that cannot be readily resolved and seek assistance from workplace supervisor.</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>set up and operate equipment and tools required to complete the welding task.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Safety and environmental requirements</i></b> must include:	<ul style="list-style-type: none"> <li>information about key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including: <ul style="list-style-type: none"> <li>use of personal protective equipment, including safety glasses and welding helmets, ear protections and safety footwear</li> <li>use of fume extraction system and welding bay</li> <li>disposal of welding material and wastes.</li> </ul> </li> </ul>
<b><i>Welding equipment, tools and materials</i></b> must include:	<ul style="list-style-type: none"> <li>one of the following welders: <ul style="list-style-type: none"> <li>metal arc welder</li> <li>gas metal arc (MIG) welder</li> </ul> </li> <li>welding bay, curtains and fume extraction</li> <li>fluxes, gases, welding rods and wire.</li> </ul>
<b><i>Setting up welding equipment</i></b> must include:	<ul style="list-style-type: none"> <li>checking for leaks from gas bottles</li> <li>checking and adjusting gas pressures</li> <li>checking gas plant earth straps and clamps.</li> </ul>
<b><i>Welding task and demonstration</i></b> must include:	<ul style="list-style-type: none"> <li>producing the following types of welds: <ul style="list-style-type: none"> <li>butt weld</li> <li>lap weld</li> <li>bead run</li> </ul> </li> </ul>

# Assessment Requirements for AURVTW010 Set up and use welding equipment

## Modification History

Release	Comment
Release 1	New unit of competency

## Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria and foundation skills:

- set up and use welding equipment on at least two occasions.

## Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:
  - safety data sheets (SDS) and toxic chemicals and gases used and produced in welding
  - potential hazards and risks relating to welding, including fire hazards and ultraviolet skin and eye damage
  - use of personal protective equipment, including safety glasses and welding helmets, ear protections and safety footwear
  - use of fume extraction system and welding bay
  - disposal of welding material and wastes
- types of welding equipment, including:
  - metal arc
  - gas metal arc
- types of fluxes and gases used in welding
- welding equipment set-up procedures
- types and purposes of different welding techniques
- key steps in different welding techniques.

## Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to welding activities, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application

The following resources must be made available:

- automotive workplace or simulated workplace
- welding equipment and tools, including at least one of the following:
- metal arc welder
- MIG welder
- welding bay, curtains and fume extraction
- fluxes, gases, welding rods and wire.

## BSBCUS301B Deliver and monitor a service to customers

### Modification History

Release	Comments
Release 1	<p>This version first released with <i>BSB07 Business Training Package version 6.0</i></p> <p>Revised unit. Performance criteria amended so that the learner is not required to 'incorporate evidence of customer satisfaction in decision to modify products or services'. Required skills updated to focus on learning and development practices and compliance with policy and procedures.</p> <p>Replaces BSBCUS301A Deliver and monitor a service to customers</p>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify customer needs and monitor service provided to customers. Operators may exercise discretion and judgement using appropriate theoretical knowledge of customer service to provide technical advice and support to customers over either a short or long term interaction.

### Application of the Unit

This unit applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify customer needs	<p>1.1 Use <i>appropriate interpersonal skills</i> to accurately identify and clarify <i>customer needs and expectations</i></p> <p>1.2 Assess customer needs for urgency to determine priorities for service delivery according to <i>organisational requirements</i></p> <p>1.3 Use <i>effective communication</i> to inform customers about available choices for meeting their needs and assist in the selection of preferred options</p> <p>1.4 Identify limitations in addressing customer needs and seek appropriate assistance from <i>designated individuals</i></p>
2. Deliver a service to customers	<p>2.1 Provide prompt service to customers to meet identified needs in accordance with organisational requirements</p> <p>2.2 Establish and maintain appropriate rapport with customers to ensure completion of quality service delivery</p> <p>2.3 Sensitively and courteously handle <i>customer complaints</i> in accordance with organisational requirements</p> <p>2.4 Provide assistance or respond to customers with <i>specific needs</i> according to organisational requirements</p> <p>2.5 Identify and use available <i>opportunities</i> to promote and enhance services and products to customers</p>
3. Monitor and report on service delivery	<p>3.1 Regularly review customer satisfaction with service delivery using <i>verifiable evidence</i> according to organisational requirements</p> <p>3.2 Identify opportunities to enhance the quality of service and products, and pursue within organisational requirements</p> <p>3.3 Monitor procedural aspects of service delivery for effectiveness and suitability to customer requirements</p> <p>3.4 Regularly seek customer feedback and use to improve the provision of products and services</p> <p>3.5 Ensure reports are clear, detailed and contain recommendations focused on critical aspects of service delivery</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to identify trends and positions of products and services
- communication skills to monitor and advise on customer service strategies
- literacy skills to:
  - edit and proofread texts to ensure clarity of meaning and accuracy of grammar and punctuation
  - prepare general information and papers according to target audience
  - read and understand a variety of texts
- problem-solving skills to deal with customer enquiries or complaints
- technology skills to select and use technology appropriate to a task
- self-management skills to:
  - comply with policies and procedures
  - consistently evaluate and monitor own performance
  - seek learning opportunities.

### Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - financial legislation
  - occupational health and safety (OHS)
- organisational policy and procedures for customer service including handling customer complaints
- service standards and best practice models
- public relations and product promotion
- techniques for dealing with customers, including customers with specific needs.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• identifying needs and priorities of customers</li> <li>• distinguishing between different levels of customer satisfaction</li> <li>• treating customers with courtesy and respect</li> <li>• responding to and reporting on, customer feedback</li> <li>• knowledge of organisational policy and procedures for customer service.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and resources</li> <li>• examples of customer complaints</li> <li>• examples of documents relating to customer service standards and policies.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of reports on customer service delivery</li> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• oral or written questioning to assess knowledge of customer service strategies.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Appropriate interpersonal skills</i></b> may include:	<ul style="list-style-type: none"> <li>• listening actively to what the customer is communicating</li> <li>• providing an opportunity for the customer to confirm their request</li> <li>• questioning to clarify and confirm customer needs</li> <li>• seeking feedback from the customer to confirm understanding of needs</li> <li>• summarising and paraphrasing to check understanding of customer message</li> <li>• using appropriate body language.</li> </ul>
<b><i>Customers</i></b> may include:	<ul style="list-style-type: none"> <li>• corporate customers</li> <li>• individual members of the organisation</li> <li>• individual members of the public</li> <li>• internal or external</li> <li>• other agencies.</li> </ul>
<b><i>Customer needs and expectations</i></b> may include:	<ul style="list-style-type: none"> <li>• accuracy of information</li> <li>• advice or general information</li> <li>• complaints</li> <li>• fairness/politeness</li> <li>• further information</li> <li>• making an appointment</li> <li>• prices/value</li> <li>• purchasing organisation's products and services</li> <li>• returning organisation's products and services</li> <li>• specific information.</li> </ul>
<b><i>Organisational requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• access and equity principles and practice</li> <li>• anti-discrimination and related policy</li> <li>• defined resource parameters</li> <li>• goals, objectives, plans, systems and processes</li> <li>• legal and organisational policies, guidelines and requirements</li> <li>• OHS policies, procedures and programs</li> <li>• payment and delivery options</li> <li>• pricing and discount policies</li> <li>• quality and continuous improvement processes and</li> </ul>

	standards <ul style="list-style-type: none"> <li>• quality assurance and/or procedures manuals</li> <li>• replacement and refund policy and procedures</li> <li>• who is responsible for products or services.</li> </ul>
<b>Effective communication</b> may include:	<ul style="list-style-type: none"> <li>• giving customers full attention</li> <li>• maintaining eye contact, except where eye contact may be culturally inappropriate</li> <li>• speaking clearly and concisely</li> <li>• using active listening techniques</li> <li>• using appropriate language and tone of voice</li> <li>• using clear written information/communication</li> <li>• using non-verbal communication e.g. body language, personal presentation (for face-to-face interactions)</li> <li>• using open and/or closed questions.</li> </ul>
<b>Designated individuals</b> may include:	<ul style="list-style-type: none"> <li>• colleagues</li> <li>• customers</li> <li>• line management</li> <li>• supervisor.</li> </ul>
<b>Customer complaints</b> may include:	<ul style="list-style-type: none"> <li>• administrative errors such as incorrect invoices or prices</li> <li>• customer satisfaction with service quality</li> <li>• damaged goods or goods not delivered</li> <li>• delivery errors</li> <li>• product not delivered on time</li> <li>• service errors</li> <li>• warehouse or store room errors such as incorrect product delivered.</li> </ul>
<b>Specific needs</b> of customers may relate to:	<ul style="list-style-type: none"> <li>• age</li> <li>• beliefs/values</li> <li>• culture</li> <li>• disability</li> <li>• gender</li> <li>• language</li> <li>• religious/spiritual observances.</li> </ul>
<b>Opportunities</b> to promote and enhance services and products may include:	<ul style="list-style-type: none"> <li>• extending time lines</li> <li>• packaging procedures</li> <li>• procedures for delivery of goods</li> <li>• returns policy</li> <li>• system for recording complaints</li> <li>• updating customer service charter.</li> </ul>
<b>Verifiable evidence</b> may include:	<ul style="list-style-type: none"> <li>• customer satisfaction questionnaires</li> <li>• audit documentation and reports</li> </ul>

	<ul style="list-style-type: none"><li>• quality assurance data</li><li>• returned goods</li><li>• lapsed customers</li><li>• service calls</li><li>• complaints.</li></ul>

## BSBCUS501C Manage quality customer service

### Modification History

Release	Comments
Release 1	<p>New release of this Qualification released with <i>version 6 of BSB07 Business Services Training Package</i>.</p> <p>Revised unit. Required skills updated to focus on learning and development practices and compliance with policy and procedures.</p>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop strategies to manage organisational systems that ensure products and services are delivered and maintained to standards agreed by the organisation.

Operators may have staff involved in delivering customer service and are responsible for the quality of their work. In many instances the work will occur within the organisation's policies and procedures framework. At this level, the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies, will be required.

### Application of the Unit

Many managers are involved in ensuring that products and services are delivered and maintained to standards agreed by the organisation.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Plan to meet internal and external customer requirements	<p>1.1 Investigate, identify, assess, and include the needs of <b>customers</b> in planning processes</p> <p>1.2 Ensure plans achieve the <b>quality</b>, time and cost specifications agreed with customers</p>
2. Ensure delivery of quality products and services	<p>2.1 Deliver <b>products and services</b> to customer specifications within organisation's business plan</p> <p>2.2 Monitor team performance to consistently meet the organisation's quality and delivery standards</p> <p>2.3 Assist colleagues to overcome difficulty in meeting customer service standards</p>
3. Monitor, adjust and review customer service	<p>3.1 Develop and use <b>strategies</b> to monitor progress in achieving product and/or service targets and standards</p> <p>3.2 Develop and use strategies to obtain customer feedback to improve the provision of products and services</p> <p>3.3. Develop, procure and use <b>resources</b> effectively to provide quality products and services to customers</p> <p>3.4 Make decisions to overcome problems and to adapt customer services, products and service delivery in consultation with appropriate individuals and groups</p> <p>3.5 Manage records, reports and recommendations within the organisation's systems and processes</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to identify trends and positions of products and services
- communication skills to:
  - coach and mentor staff and colleagues
  - monitor and advise on customer service strategies
- literacy skills to:
  - edit and proofread texts to ensure clarity of meaning and accuracy of grammar and punctuation
  - prepare general information and papers according to target audience
  - read and understand a variety of texts
- problem-solving skills to:
  - deal with customer enquiries or complaints
  - deal with complex and non-routine difficulties
- technology skills to select and use technology appropriate to a task
- self-management skills to:
  - comply with policies and procedures
  - consistently evaluate and monitor own performance
  - seek learning opportunities.

### Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - Australian consumer law
  - ethical principles
  - codes of practice
  - privacy laws
  - financial legislation
  - occupational health and safety (OHS)
- organisational policy and procedures for customer service including handling customer complaints
- service standards and best practice models
- public relations and product promotion
- techniques for dealing with customers, including customers with specific needs
- techniques for solving complaints including the principles and techniques involved in the management and organisation of:
  - customer behaviour
  - customer needs research
  - customer relations
  - ongoing product and/or service quality
  - problem identification and resolution

- quality customer service delivery
- record keeping and management methods
- strategies for monitoring, managing and introducing ways to improve customer service relationships
- strategies to obtain customer feedback.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>plans, policies or procedures for delivering quality customer service</li> <li>demonstrated techniques in solving complex customer complaints and system problems that lead to poor customer service</li> <li>knowledge of techniques for solving complaints.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>access to appropriate documentation and resources normally used in the workplace.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>assessment of written reports</li> <li>demonstration of techniques</li> <li>direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>observation of performance in role plays</li> <li>evaluation of leadership, supervision, coaching and mentoring used to assist colleagues to overcome difficulty in meeting customer service standards</li> <li>review of strategies developed and used to monitor progress in achieving product and/or service targets and standards</li> <li>review of records, reports and recommendations about managing customer service.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Customers</i></b> may be:	<ul style="list-style-type: none"> <li>• Board members</li> <li>• clients, purchasers of services</li> <li>• co-workers, peers and fellow frontline managers</li> <li>• members of the general public who make contact with the organisation, such as prospective purchasers of services</li> <li>• potential funding bodies</li> <li>• supervisors</li> <li>• suppliers of goods and services and contractors providing goods and services.</li> </ul>
<b><i>Quality</i></b> may refer to:	<ul style="list-style-type: none"> <li>• characteristics of a product, system, service or process that meet the requirements of customers and interested parties.</li> </ul>

Follow up outstanding accounts	<p>6.1.Maintain accounts receivable ledger system, in accordance with organisational requirements, to reflect current credit situation</p> <p>6.2.Conduct aged analysis of accounts receivable to identify outstanding accounts and to determine collection procedures, in accordance with organisational requirements</p> <p>6.3.Report or follow-up outstanding accounts in accordance with organisational policy and procedures</p> <p>6.4.Monitor and review <i>credit terms</i> in accordance with credit policy and procedures</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills to read and understand financial procedures
- numeracy skills to:
  - use knowledge of mathematical concepts
  - interpret, compare and calculate with whole numbers and money
  - use decimal fractions and percentages
- problem-solving skills to use approximation to check for discrepancies and ensure calculations are correct.

#### Required knowledge

- key provisions of relevant legislation and regulations from all forms of government, standards and codes that may affect aspects of business operations, such as:
  - Australian Taxation Office regulations
  - Goods and Services Tax (GST) regulations
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - finance legislation
  - privacy laws
  - occupational health and safety
- limit of scope of own responsibility
- organisational accounting systems and procedures.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>maintaining journals and subsidiary ledger systems</li> <li>accurately entering data into journal and subsidiary ledger system</li> <li>reconciling subsidiary ledger system with journal or general ledger data.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>access to an actual workplace or simulated environment</li> <li>access to office equipment and resources, such as:             <ul style="list-style-type: none"> <li>calculator</li> <li>computer equipment and relevant software</li> </ul> </li> <li>access to examples of cash journals, credit journals, accounts payable and accounts receivable subsidiary ledgers</li> <li>access to workplace reference materials such as procedural manuals and company policy.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>analysis of responses to case studies and scenarios</li> <li>demonstration of techniques</li> <li>direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>review of authenticated documents from the workplace or training environment</li> <li>oral or written questioning to assess knowledge of accounting procedures and techniques.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>other financial administration units.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain asset register	<p>1.1.Prepare a register of property, plant and equipment from fixed asset transactions in accordance with organisational policy and procedures</p> <p>1.2.Determine method of <b>calculating depreciation</b> in accordance with organisational requirements</p> <p>1.3.Maintain asset register and associated depreciation schedule in accordance with organisational policy, procedures and accounting requirements</p>
2. Record general journal entries for balance day adjustments	<p>2.1.Record depreciation of non-current assets and disposal of fixed assets in accordance with organisational policy, procedures and accounting requirements</p> <p>2.2.Adjust <b>expense accounts</b> and <b>revenue accounts</b> for <b>prepayments and accruals</b></p> <p>2.3.Record <b>bad and doubtful debts</b> in accordance with organisational policy, procedures and accounting requirements</p> <p>2.4.Adjust ledger accounts for <b>inventories</b>, if required, and transfer to <b>final accounts</b></p>
3. Prepare final general ledger accounts	<p>3.1.Enter general journal entries for balance day adjustments in general ledger system in accordance with organisational policy, procedures and accounting requirements</p> <p>3.2.Post revenue and expense account balances to final general ledger accounts system</p> <p>3.3.Prepare final general ledger accounts to reflect gross and net profits for reporting period</p>
4. Prepare end of period financial reports	<p>4.1.Prepare <b>revenue statement</b> in accordance with organisational requirements to reflect operating profit for <b>reporting period</b></p> <p>4.2.Prepare <b>balance sheet</b> to reflect financial position of business at end of reporting period</p> <p>4.3.Identify and correct, or refer errors for resolution in accordance with organisational policy and procedures</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to clarify reporting requirements and obtain required data
- literacy skills to:
  - identify financial information
  - follow the Australian Accounting and Auditing Standards
  - follow the organisation's accounting procedures
- numeracy skills to calculate percentages, addition and subtraction.

#### Required knowledge

- double-entry bookkeeping principles
- general journal and general ledger entries
- key provisions of relevant legislation and regulations from all forms of government, standards and codes that may affect aspects of business operations, such as:
  - Australian Taxation Office regulations
  - accounting and auditing standards
  - Goods and Services Tax (GST) regulations
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - finance legislation
  - privacy laws
  - occupational health and safety
- organisational accounting systems
- organisational policies, procedures and accounting requirements.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• preparing financial reports</li> <li>• applying the Australian Accounting and Auditing Standards</li> <li>• applying double-entry principles.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to office equipment and resources, such as:</li> <li>• calculator</li> <li>• computer equipment and relevant software</li> <li>• Australian Accounting and Auditing Standards</li> <li>• access to samples of financial data</li> <li>• access to workplace reference materials such as procedural manuals and company policy.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of authenticated documents from the workplace or training environment</li> <li>• oral or written questioning to assess knowledge of accounting procedures and techniques.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other financial administration units.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b><i>Calculating depreciation</i></b> may include:	<ul style="list-style-type: none"> <li>• reducing balance method</li> <li>• straight-line method</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan financial management approaches	<p>1.1. Access <b><i>budget/financial plans</i></b> for the work team</p> <p>1.2. Clarify budget/financial plans with <b><i>relevant personnel</i></b> within the organisation to ensure that documented outcomes are achievable, accurate and comprehensible</p> <p>1.3. Negotiate any changes required to be made to budget/financial plans with relevant personnel within the organisation</p> <p>1.4. Prepare <b><i>contingency plans</i></b> in the event that initial plans need to be varied</p>
2. Implement financial management approaches	<p>2.1. Disseminate relevant details of the agreed budget/financial plans to team members</p> <p>2.2. Provide <b><i>support</i></b> to ensure that team members can competently perform <b><i>required roles</i></b> associated with the management of finances</p> <p>2.3. Determine and access <b><i>resources and systems</i></b> to manage financial management processes within the work team</p>
3. Monitor and control finances	<p>3.1. Implement <b><i>processes</i></b> to monitor actual expenditure and to control costs across the work team</p> <p>3.2. Monitor expenditure and costs on an agreed cyclical basis to identify cost variations and expenditure overruns</p> <p>3.3. Implement, monitor and modify contingency plans as required to maintain financial objectives</p> <p>3.4. <b><i>Report</i></b> on budget and expenditure in accordance with organisational protocols</p>
4. Review and evaluate financial management processes	<p>4.1. Collect and collate for analysis, <b><i>data and information on the effectiveness of financial management processes</i></b> within the work team</p> <p>4.2. Analyse data and information on the effectiveness of financial management processes within the work team and identify, document and recommend any improvements to existing processes</p> <p>4.3. Implement and monitor agreed improvements in line with financial objectives of the work team and the organisation</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- numeracy skills to read and understand a budget and to update a budget
- technology skills to use software associated with financial record keeping.

#### Required knowledge

- basic accounting principles
- organisational requirements related to financial management
- relevant legislation and current requirements of the Australian Taxation Office, including GST
- requirements for organisational record keeping and auditing
- principles and techniques involved in:
  - budgeting
  - cash flows
  - electronic spreadsheets
  - GST
  - ledgers and financial statements
  - profit and loss statements.

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- financial skills required to work with and interpret budgets, ageing summaries, cash flow, petty cash, GST, and profit and loss statements
- knowledge of the record keeping requirements for the ATO and for auditing purposes.

#### Context of and specific resources for assessment

Assessment must ensure:

- access to appropriate documentation and resources normally used in the workplace.

#### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- assessment of written reports indicating broad knowledge of managing budgets and managing financial resources in the organisation
- demonstration of techniques using financial record keeping software
- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- oral or written questioning to assess knowledge of requirements for organisational record keeping and auditing
- review of contingency plans
- review of identification of cost variations and expenditure overruns
- evaluation of documentation reporting on budget and expenditure
- review of documentation identifying and recommending improvements to financial management processes.

#### Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

**EVIDENCE GUIDE**

- other units from the Diploma of Management.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Budget/financial plans*** may include:

- cash flow projections
- long-term budgets/plans
- operational plans
- short-term budgets/plans
- spreadsheet-based financial projections
- targets or key performance indicators for production, productivity, wastage, sales, income and expenditure

***Relevant personnel*** may include:

- financial managers, accountants or financial controllers
- supervisors, other frontline managers

***Contingency plans*** may include:

- contracting out or outsourcing human resources and other functions or tasks
- diversification of outcomes
- finding cheaper or lower quality raw materials and consumables
- increasing sales or production
- recycling and re-using
- rental, hire purchase or alternative means of procurement of required materials, equipment and stock
- restructuring of organisation to reduce labour costs
- risk identification, assessment and management processes
- seeking further funding
- strategies for reducing costs, wastage, stock or consumables
- succession planning

***Support*** may include:

- access to specialist advice
- documentation of procedures
- help desk or identified experts within the organisation
- information briefings or sessions

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• intranet-based information</li> <li>• training including mentoring, coaching and shadowing</li> </ul>
<b>Required roles</b> may include:	<ul style="list-style-type: none"> <li>• arranging for use of corporate credit cards</li> <li>• banking</li> <li>• debt collection</li> <li>• ensuring security, accuracy and currency of financial operations</li> <li>• invoicing clients, customers and consumers</li> <li>• maintaining journals, ledgers and other record keeping systems</li> <li>• maintaining petty cash system</li> <li>• purchasing and procurement</li> <li>• wages and salaries payments and record keeping</li> </ul>
<b>Resources and systems</b> may include:	<ul style="list-style-type: none"> <li>• hardware and software</li> <li>• human, physical or financial resources</li> <li>• record keeping systems (electronic and paper-based)</li> <li>• specialist advice or support</li> </ul>
<b>Processes</b> to monitor actual expenditure and to control costs across the work team include:	<ul style="list-style-type: none"> <li>• reporting of:               <ul style="list-style-type: none"> <li>• assets</li> <li>• consumables</li> <li>• equipment</li> <li>• expenditure</li> <li>• income</li> <li>• stock</li> <li>• wastage</li> </ul> </li> </ul>
<b>Reporting</b> may include data from:	<ul style="list-style-type: none"> <li>• bank statements</li> <li>• credit card statements</li> <li>• financial reports</li> <li>• invoices and receipts</li> <li>• ledgers and journals</li> <li>• logs</li> <li>• petty cash records</li> <li>• spreadsheet-based records</li> </ul>
<b>Data and information on the effectiveness of financial management processes</b> may include records (paper-based and	<ul style="list-style-type: none"> <li>• bank account records</li> <li>• cash flow data</li> <li>• contracts</li> </ul>

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to team outcomes	<p>1.1.Consult team members to identify <b><i>team purpose, roles, responsibilities, goals, plans and objectives</i></b></p> <p>1.2.Support team members to meet expected outcomes</p>
2. Support team cohesion	<p>2.1.Encourage team members to participate in the planning, decision making and operational aspects of the work team to their level of responsibility</p> <p>2.2.Encourage team members to take responsibility for their own work and to assist each other in undertaking required roles and responsibilities</p> <p>2.3.Provide <b><i>feedback</i></b> to team members to encourage, value and reward team members' efforts and contributions</p> <p>2.4.Identify and address issues, concerns and problems identified by team members to <b><i>relevant persons</i></b> as required</p>
3. Participate in work team	<p>3.1.Actively encourage and support team members to participate in team activities and communication processes and to take <b><i>responsibility for their actions</i></b></p> <p>3.2.Support the team to identify and resolve problems which impede its performance</p> <p>3.3.Utilise own contribution to work team to serve as a role model for others and enhance the organisation's image within the work team, the organisation and with clients/customers</p>
4. Communicate with management	<p>4.1.Maintain open <b><i>communication</i></b> with <b><i>line manager/management</i></b> at all times</p> <p>4.2.Communicate information from line manager/management to the team</p> <p>4.3.Communicate <b><i>unresolved issues</i></b> to line manager/management and follow-up to ensure action is taken in response to these matters</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

##### Required skills

- ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communication skills, including listening
- basic training skills, including mentoring and coaching
- planning and organising skills
- problem solving skills
- attributes:
  - empathic
  - communicative
  - self aware
  - supportive
  - trusting
  - open
  - flexible
  - accommodating
  - initiating
  - loyal
  - fair
  - adaptable

#### Required knowledge

##### Required knowledge

- relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety and environmental issues, equal opportunity, industrial relations and anti-discrimination
- organisational policies and procedures
- organisational goals, objectives and plans at both tactical and strategic levels
- organisational structure including organisational chart
- learning and development options available within and through organisation
- a general understanding of the principles and techniques of:
  - group dynamics and processes
  - motivation
  - planning

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish relationship with franchisor	<p>1.1. Identify the <i>franchisor's representative/s or liaison person/s</i></p> <p>1.2. Identify <i>communication channels</i> with the franchisor's representative/s or liaison person/s</p> <p>1.3. Establish <i>schedule of contact</i> with the franchisor's representative/s or liaison person/</p> <p>1.4. Hold initial meeting with the franchisor's representative/s or liaison person/s to initiate ongoing relationship</p> <p>1.5. Ensure participation in the franchisee advisory council meetings and relevant activities</p>
2. Determine services available from franchisor	<p>2.1. Consult with the franchisor's representative/s or liaison person/s to determine the range of <i>services available through the franchisor</i></p> <p>2.2. Establish schedule for accessing services of the franchisor</p> <p>2.3. Access services available through the franchisor according to schedule and as needs arise in the course of business operations</p> <p>2.4. Maintain currency of information relating to services available through the franchisor</p>
3. Implement strategies for meeting franchisor financial obligations	<p>3.1. Identify <i>franchisee financial obligations</i> to the franchisor</p> <p>3.2. Develop and implement strategies and procedures to meet franchisee financial obligations</p> <p>3.3. Undertaken planning to facilitate <i>ongoing management of franchise</i></p>
4. Resolve disputes with franchisor	<p>4.1. Identify disputes with the franchisor and enter into negotiations with the franchisor's representative/s or liaison person/s in line with complaints handling procedure as described in the Franchising Code of Conduct</p> <p>4.2. Seek assistance of third parties or mediators to facilitate resolution of disputes arising with the franchisor and in line with the complaints handling procedure</p> <p>4.3. Resolve disputes and document courses of agreed action</p> <p>4.4. Implement agreed courses of action to resolve disputes</p>

ELEMENT	PERFORMANCE CRITERIA
	4.5. Use lessons learned from disputes to guide future business operations and to facilitate positive relationships with the franchisor

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- communication and negotiation skills to resolve disputes
- problem-solving skills to address disputes arising in the course of business operations.

#### Required knowledge

- occupational health and safety (OHS) requirements:
  - specific to nature and type of franchise
  - generic to all workplaces
  - specific to own safety such as manual handling
- legislation, codes of practice and national standards, for example:
  - Franchising Code of Conduct
  - legislation covering fire safety, OHS, employment of staff, company law, anti-discrimination and fair trading
  - required permits (under commonwealth, state/territory and local government regulations and legislation)
- franchise specific obligations as per franchise agreement, specifically financial obligations.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• implementing processes to manage the relationship between franchisor and self</li> <li>• identifying and resolving disputes</li> <li>• financial planning to meet franchisor requirements</li> <li>• knowledge of relevant legislation, codes of practice and national standards.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to business documentation</li> <li>• access to feedback from franchisor</li> <li>• access to an actual workplace or simulated environment</li> <li>• access to equipment and resources.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• evaluation of strategies and procedures implemented to meet franchisee financial obligations</li> <li>• analysis of responses to case studies and scenarios</li> <li>• observation of presentations</li> <li>• oral or written questioning to assess knowledge of franchising arrangements</li> <li>• review of documented courses of agreed action taken to resolve disputes.</li> </ul>
<b>Guidance information for assessment</b>	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b><i>Franchisor's representative/s or liaison person/s</i></b> may include:	<ul style="list-style-type: none"> <li>• franchisor's appointed representative</li> <li>• specialist personnel within franchisor organisation including financial advisers, training personnel and marketing advisers</li> </ul>
<b><i>Communication channels</i></b> may include:	<ul style="list-style-type: none"> <li>• email address</li> <li>• meeting schedules</li> <li>• mobile and office based telephone numbers</li> <li>• other emergency contact channels</li> <li>• pager number</li> <li>• workshops for franchisees</li> </ul>
<b><i>Schedule of contact</i></b> may include:	<ul style="list-style-type: none"> <li>• occasional visits</li> <li>• regular meetings</li> <li>• training schedules and franchisee network meetings</li> <li>• visits by representative/s</li> </ul>
<b><i>Services available through the franchisor</i></b> may include:	<ul style="list-style-type: none"> <li>• equipment repair and replacement</li> <li>• financial advice</li> <li>• IT support</li> <li>• market intelligence</li> <li>• marketing and promotional activities</li> <li>• product updates</li> <li>• purchasing of stock</li> <li>• training programs</li> </ul>
<b><i>Franchisee financial obligations</i></b> may include:	<ul style="list-style-type: none"> <li>• payment schedules</li> <li>• fixed price</li> <li>• percentage of turnover</li> <li>• percentage of income</li> </ul>
<b><i>Ongoing management of franchise</i></b> may include:	<ul style="list-style-type: none"> <li>• planning for life of agreement</li> <li>• planning for extinction of agreement</li> </ul>

## BSBHRM405A Support the recruitment, selection and induction of staff

### Modification History

Release	Comments
Release 1	<p>This version first released with <i>BSB07 Business Services Training Package Version 8.0</i>.</p> <p>Replaces BSBHRM402A Recruit, select and induct staff.</p>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to execute tasks associated with the recruitment cycle. Performance of the work described in this unit will be underpinned by in-depth knowledge of the work of the organisation, and how recruitment and selection practices fit with other human resources functions.

### Application of the Unit

This unit applies to those with a supporting role in recruitment, selection and induction functions who work under the direction of a human resources manager.

Individuals at this level would not necessarily have staff reporting to them, although this may be the case.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Plan for recruitment	<p>1.1 Obtain approval to fill position and clarify time lines and requirement for appointment</p> <p>1.2 Assist in preparing <i>job descriptions</i> that accurately reflect the role requirements, according to organisational <i>policies</i> and procedures and <i>legislation, codes, national standards</i> and <i>workplace health and safety (WHS) considerations</i></p> <p>1.3 Consult with relevant personnel about job descriptions and <i>workforce strategy</i></p> <p>1.4 Assist in ensuring that job descriptions comply with legislative requirements and reflect the organisation's requirements for a diverse workforce</p> <p>1.5 Obtain approvals to advertise position</p>
2. Plan for selection	<p>2.1 Choose appropriate <i>channels and technology</i> to advertise vacancies and/or identify potential talent pool</p> <p>2.2 Advertise vacancies for <i>staffing requirements</i> according to organisational policies and procedures</p> <p>2.3 Consult with relevant personnel to convene selection panel and develop interview questions</p> <p>2.4 Assist in ensuring that interview questions comply with legislative requirements</p> <p>2.5 Assist in short-listing applicants</p> <p>2.6 Schedule interviews and advise relevant people of times, dates and venues</p>
3. Support selection process	<p>3.1 Participate in interview process and assess candidates against agreed selection criteria</p> <p>3.2 Discuss assessment with other selection panel members</p> <p>3.3 Correct biases and deviations from agreed procedures and negotiate for preferred candidate</p> <p>3.4 Contact referees for referee reports</p> <p>3.5 Prepare selection report and make recommendations to senior personnel for appointment</p> <p>3.6 Advise unsuccessful candidates of outcomes and respond to any queries</p> <p>3.7 Secure preferred candidate's agreement</p> <p>3.8 Complete necessary documentation according to organisational procedures, observing confidentiality and privacy requirements</p>

4. Induct successful candidate	<p>4.1 Provide successful candidate with employment contract and other documentation</p> <p>4.2 Advise manager and work team of new appointment</p> <p>4.3 Advise managers and staff of candidate's starting date and make necessary administrative arrangements for pay and employee record keeping</p> <p>4.4 Arrange successful candidate's <i>induction</i> according to organisational policy</p>
--------------------------------	--

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - use networks to source suitable applicants
  - actively listen to what is being said in interviews
  - advise on the outcomes of the selection process
  - support line managers in recruitment and selection functions
- literacy skills to:
  - work with job descriptions to devise suitable questions for interviews
  - make job offers and prepare letters for unsuccessful applicants
  - review legislation to ensure requirements are reflected in job descriptions
- organising and scheduling skills to arrange interviews and venues
- technology skills to:
  - advertise jobs
  - communicate with applicants and new appointments
  - maintain information in the human resources information system.

### Required knowledge

- documentation required for recruitment, selection and induction
- human resources functions, human resources life cycle and the place of recruitment and selection in that life cycle
- principles of equity and diversity and relevant legislation
- range of interviewing techniques and other selection processes and their application.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• work with job descriptions to support sourcing, selecting and appointing suitable staff</li> <li>• participate in interviews and other selection techniques, and demonstrate awareness of EEO and anti-discrimination requirements</li> <li>• use different advertising channels to promote vacancies and/or establish a potential talent pool.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an appropriate range of documentation and resources normally used in the workplace.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• analysis of responses to case studies and scenarios</li> <li>• assessment of reports on recruitment and selection</li> <li>• demonstration of selection techniques</li> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate</li> <li>• observation of interviewing techniques</li> <li>• review of job description and advertisements for staffing vacancies</li> <li>• review of documentation provided to successful candidate</li> <li>• oral or written questioning to assess knowledge of selection processes.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other units from the Certificate IV in Human Resources.</li> </ul>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Job descriptions</i></b> may include:	<ul style="list-style-type: none"> <li>• attributes</li> <li>• competencies required by staff</li> <li>• job or person specifications</li> <li>• job title and purpose of position</li> <li>• necessary skills and knowledge</li> <li>• required qualifications</li> <li>• selection criteria</li> <li>• tasks or duties associated with the position.</li> </ul>
<b><i>Policies</i></b> may include:	<ul style="list-style-type: none"> <li>• anti-discrimination</li> <li>• diversity</li> <li>• equal employment opportunity (EEO)</li> <li>• privacy and confidentiality.</li> </ul>
<b><i>Legislation, codes and national standards</i></b> may include:	<ul style="list-style-type: none"> <li>• award and enterprise agreements, and relevant industrial instruments</li> <li>• relevant industry codes of practice</li> <li>• relevant legislation from all levels of government that affects business operation, especially in regard to WHS and environmental issues, EEO, industrial relations and anti-discrimination.</li> </ul>
<b><i>Workplace health and safety considerations</i></b> may include:	<ul style="list-style-type: none"> <li>• establishing and maintaining WHS training, records and induction processes</li> <li>• performance against WHS legislation and organisation's WHS system, especially policies, procedures and work instructions.</li> </ul>
<b><i>Workforce strategies</i></b> may include:	<ul style="list-style-type: none"> <li>• targets for specific groups to ensure workforce diversity in, for example: <ul style="list-style-type: none"> <li>• age</li> <li>• ethnicity</li> <li>• experience</li> <li>• gender</li> <li>• other forms of differences, such as learning styles, personality types, working styles, etc.</li> </ul> </li> <li>• targets for specific qualifications, capabilities or attributes</li> <li>• recruiting for new strategic directions.</li> </ul>
<b><i>Channels and</i></b>	<ul style="list-style-type: none"> <li>• government job search agencies</li> </ul>

<b><i>technology</i></b> may include:	<ul style="list-style-type: none"><li>• industry-specific websites and journals</li><li>• internal communications, such as newsletters, intranet and emails</li><li>• newspaper advertisements</li><li>• recruitment agencies</li><li>• recruitment websites</li><li>• social media sites.</li></ul>
<b><i>Staffing requirements</i></b> may include:	<ul style="list-style-type: none"><li>• casual, permanent or temporary</li><li>• full-time or part-time.</li></ul>
<b><i>Induction</i></b> may include:	<ul style="list-style-type: none"><li>• initial orientation of new employee</li><li>• initial training of new employee to meet the requirements of the position.</li></ul>

Workforce Development – Human Resource Management

## BSBHRM505B Manage remuneration and employee benefits

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to implement an organisation's remuneration and benefit plans. It incorporates all functions associated with remuneration, including packaging, salary benchmarking, market rate reviews, bonuses and the legislative aspects of remuneration and employee benefits.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to human resources managers responsible for overseeing an organisation's remuneration process.</p>
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop organisation's remuneration strategy	<p>1.1. Analyse strategic and operational plans to determine the scope of <b>remuneration and benefits</b> plans</p> <p>1.2. Undertake research on current practice, recent developments and legislative parameters for the remuneration strategy</p> <p>1.3. Develop options for consideration by relevant managers</p> <p>1.4. Present options showing the link to organisational strategic objectives</p> <p>1.5. Ensure remuneration policies and incentive plans are agreed and recorded</p> <p>1.6. Ensure that organisation is positioned as an <b>employer of choice</b> and regarded as a desirable workplace</p>
2. Implement remuneration strategy	<p>2.1. Research occupational groups to determine those which are industrial agreement based</p> <p>2.2. Access or undertake <b>market rates surveys</b> regularly to ensure the organisation's required level of competitiveness for particular occupational groups is maintained</p> <p>2.3. Align remuneration and benefits plans with performance management system</p> <p>2.4. Ensure that employees receive at least their minimum entitlements according to organisational policies and legal requirements</p> <p>2.5. Ensure <b>salary packages</b> comply with organisational policies and legal requirements, including fringe benefits tax (FBT) and superannuation</p> <p>2.6. Ensure <b>incentive arrangements</b>, if included, comply with the organisation's remuneration strategy</p>
3. Review and update remuneration strategy	<p>3.1. Consult managers and employees about the effectiveness of the remuneration strategy</p> <p>3.2. Amend strategy and plans as necessary to meet organisational policies and legal requirements</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- interpersonal skills to:
  - communicate sensitively about remuneration
  - observe confidentiality
- numeracy and technology skills to:
  - calculate costs to the organisation
  - graph salary costs
  - link salaries to budgets
- research skills to determine appropriate models of remuneration and benefits for particular occupational groups and individuals

#### Required knowledge

- award structures for industrial agreements
- ethical practices relating to remuneration and benefits strategies
- leasing arrangements, including novated leases
- models for bonus and incentive schemes, including gain sharing or profit sharing
- relevant legislation, for example equal employment opportunity, diversity and anti-discrimination legislation
- remuneration principles or models and strategies
- requirements of the Australian Taxation Office in relation to income tax, superannuation reporting, FBT and bonus payments.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• compliance with the legal aspects of managing remuneration and benefits</li> <li>• application of remuneration strategies for different occupational groups and circumstances</li> <li>• application of awards and agreements to structure remuneration processes</li> <li>• application of the requirements of the Australian Taxation Office in relation to income tax, superannuation reporting, FBT and bonus payments.</li> </ul>
<b>Context of and specific resources for assessment</b>	Assessment must ensure access to appropriate documentation and resources normally used in the workplace.
<b>Method of assessment</b>	<p>The following assessment methods are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• assessment of reports on remuneration models and approaches</li> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate</li> <li>• review of research undertaken on current practice, recent developments and legislative parameters for the remuneration strategy</li> <li>• review of remuneration options developed for consideration by relevant managers</li> <li>• oral or written questioning to assess knowledge of legislation and the taxation system.</li> </ul>
<b>Guidance information for assessment</b>	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Remuneration and benefits</i></b> may include:	<ul style="list-style-type: none"> <li>• allowances</li> <li>• annual leave</li> <li>• bonuses or incentives</li> <li>• competency-based progression</li> <li>• employee share plans</li> <li>• ex gratia payments</li> <li>• expense reimbursement</li> <li>• family and carer's leave</li> <li>• flexible work arrangements</li> <li>• fringe benefits</li> <li>• leave without pay</li> <li>• long service leave</li> <li>• motor vehicle</li> <li>• salaries and wages</li> <li>• share options</li> <li>• sick leave</li> <li>• special leave</li> <li>• study leave</li> <li>• superannuation.</li> </ul>
<b><i>Employer of choice</i></b> may include:	<ul style="list-style-type: none"> <li>• ability to attract and retain high performing staff</li> <li>• flexible and inclusive work environment supported by the chief executive officer and managers</li> <li>• policies and practices that discourage harassment or discrimination</li> <li>• reputation for good workplace relationships, a culture of trust and good pay and conditions</li> <li>• reputation for being fair, flexible, innovative and engendering employee engagement</li> <li>• training and development programs that encourage people to plan and follow a career pathway.</li> </ul>
<b><i>Market rate surveys</i></b> may include:	<ul style="list-style-type: none"> <li>• data from remuneration specialists</li> <li>• general community surveys</li> <li>• industry salary benchmarking</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• surveys conducted by the organisation.</li> </ul>
<i>Salary packages:</i>	<ul style="list-style-type: none"> <li>• may include payment arrangement where the total remuneration and benefits payable to an employee are calculated as total cost of employment, including:               <ul style="list-style-type: none"> <li>• salary</li> <li>• allowances</li> <li>• motor vehicle</li> <li>• superannuation</li> <li>• fringe benefits</li> </ul> </li> <li>• do not include payroll tax or workers compensation insurance.</li> </ul>
<i>Incentive arrangements</i> may include:	<ul style="list-style-type: none"> <li>• commission</li> <li>• bonuses</li> <li>• share plans</li> <li>• share options</li> <li>• gain sharing</li> <li>• profit sharing.</li> </ul>

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive and distribute incoming mail	<p>1.1.Ensure that <i>incoming mail</i> is <i>checked</i> and <i>registered</i> in accordance with organisational policies and procedures</p> <p>1.2.Identify titles and locations of company personnel and departments</p> <p>1.3.Identify and <i>distribute urgent and confidential mail</i> in accordance with organisational requirements</p> <p>1.4.<i>Sort</i> and despatch mail to <i>nominated person/location</i> in accordance with organisational requirements</p> <p>1.5.Record and/or report <i>damaged, suspicious or missing items</i> and take <i>appropriate action</i> in accordance with organisational policies and procedures</p>
2. Collect and despatch outgoing mail	<p>2.1.Collect, check and sort outgoing mail to ensure all items are <i>correctly prepared for despatch</i> in accordance with organisational policies and procedures</p> <p>2.2.<i>Record</i> and <i>process</i> outgoing <i>mail for despatch</i> in accordance with <i>organisational requirements</i></p> <p>2.3.Despatch mail to meet designated time lines</p>
3. Organise urgent and same day deliveries	<p>3.1.Evaluate <i>delivery options</i> and select <i>best option</i></p> <p>3.2.Prepare items for urgent delivery in accordance with organisational requirements and carrier specifications</p> <p>3.3.Organise lodgement or pick up of emergency deliveries and follow-up if necessary</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to receive instructions of several steps to complete task, to give information to others, and to consult with or question supervisor and peers to clarify information
- literacy skills to keep records, to check accuracy of written material and to follow policies and procedures
- numeracy skills to check weights and addresses; and to sort, collate and estimate time for mail despatches and bulk mail outs
- problem-solving skills to choose appropriate method for urgent delivery
- technology skills to use electronic mail.

#### Required knowledge

- Australian geography and postal codes
- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety (OHS)
- organisational policies and procedures specific to handling electronic mailprocedural requirements for receiving/despatching and prioritising correspondence
- range of mail services available.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• working with a variety of incoming and outgoing mail</li> <li>• applying carriers' and organisational requirements (e.g. postal and courier)</li> <li>• knowledge of relevant legislation.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and resources</li> <li>• examples of correspondence and parcels for sorting and despatch.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of incoming and outgoing mail registers</li> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• oral or written questioning to assess knowledge of procedural requirements for receiving/despaching and prioritising correspondence.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• general administration units</li> <li>• other information management units.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Incoming mail</i></b> may include:	<ul style="list-style-type: none"> <li>• confidential/personal</li> <li>• electronic (e.g. faxes, emails to central address)</li> <li>• external</li> <li>• internal</li> <li>• journals/magazines</li> <li>• letters</li> <li>• paper-based</li> <li>• urgent</li> <li>• other forms of correspondence</li> </ul>
<b><i>Checking mail</i></b> may include:	<ul style="list-style-type: none"> <li>• enclosures</li> <li>• mail marked confidential, urgent or personal</li> <li>• mail sent express post or registered</li> <li>• mail that has been damaged</li> <li>• mail that looks suspicious</li> </ul>
<b><i>Registering mail</i></b> may include:	<ul style="list-style-type: none"> <li>• assigning file number</li> <li>• addressee</li> <li>• condition of mail item (e.g. damaged, no return address)</li> <li>• contents e.g. cheque</li> <li>• date received</li> <li>• sender</li> <li>• subject</li> </ul>
<b><i>Distributing urgent and confidential mail</i></b> may include:	<ul style="list-style-type: none"> <li>• immediate, hand delivery, express post, registered</li> <li>• separating and prioritising urgent mail</li> </ul>
<b><i>Sorting mail</i></b> may include:	<ul style="list-style-type: none"> <li>• adding a circulation slip</li> <li>• separating by order of importance for each individual</li> <li>• separating internal (organisational) mail and external mail</li> <li>• separating junk mail</li> <li>• separating urgent mail to be distributed first</li> <li>• sorting by departments</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• sorting by location</li> <li>• sorting by seniority of personnel</li> <li>• sorting invoices, cheques and accounts</li> </ul>
<i>Nominated person/location</i> may include:	<ul style="list-style-type: none"> <li>• administrative support person</li> <li>• department</li> <li>• individual addressee</li> </ul>
<i>Damaged, suspicious or missing items</i> may include:	<ul style="list-style-type: none"> <li>• mail exposed to weather (e.g. water damage from rain)</li> <li>• mail roughly handled (e.g. broken contents, torn address labels)</li> <li>• mail that looks like it has been interfered with (re-sealed mail)</li> <li>• mail that looks unusual</li> <li>• mail that makes noises</li> <li>• mail that smells strange</li> <li>• pilfered mail (contents may be missing, parcels slit open)</li> </ul>
<i>Appropriate action</i> in relation to damaged, missing or suspicious items may include:	<ul style="list-style-type: none"> <li>• immediately calling supervisor or security staff</li> <li>• contacting sender to ensure everything sent was received</li> <li>• filling out forms for sender's insurance company</li> <li>• negotiating replacement of missing or damaged items with sender</li> <li>• not touching or moving suspicious mail</li> </ul>
<i>Correctly preparing items for despatch</i> may include:	<ul style="list-style-type: none"> <li>• checking enclosures</li> <li>• checking letter and envelope are addressed to same person</li> <li>• checking the address is not obscured</li> <li>• checking letter has been signed</li> <li>• checking return address is included</li> <li>• checking address details and layout are correct</li> <li>• determining most appropriate carrier</li> <li>• ensuring correct requirements for chosen carrier are being followed</li> <li>• preparing bulk mail outs</li> </ul>
<i>Recording</i> outgoing mail may include:	<ul style="list-style-type: none"> <li>• electronic (specialist software, database, spreadsheet systems)</li> <li>• paper-based (mail book, form, file)</li> </ul>
<i>Processing mail for despatch</i> may	<ul style="list-style-type: none"> <li>• calculating and paying for postage</li> </ul>

<b>RANGE STATEMENT</b>	
include:	<ul style="list-style-type: none"> <li>• DX mail</li> <li>• registering mail</li> </ul>
<i>Processing</i> in accordance with <i>organisational requirements</i> may include:	<ul style="list-style-type: none"> <li>• addressee/organisation</li> <li>• appropriate carrier (courier, normal mail, express post)</li> <li>• date of despatch</li> <li>• receipts attached where appropriate</li> <li>• reference number</li> <li>• sender</li> <li>• sender's department</li> </ul>
<i>Delivery options</i> may include:	<ul style="list-style-type: none"> <li>• courier</li> <li>• express mail</li> <li>• overnight bag</li> </ul>
<i>Best option</i> may include:	<ul style="list-style-type: none"> <li>• cost</li> <li>• delivery location</li> <li>• nature of contents (bulky, fragile, confidential)</li> <li>• quantity of delivery items</li> <li>• time constraints</li> </ul>

## Co-requisite units

<b>Co-requisite units</b>	

## BSBINN301A Promote innovation in a team environment

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to be an effective and pro active member of an innovative team.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies individuals who play a pro active role in demonstrating, encouraging or supporting innovation in a team environment. The individual may be a team participant or a team leader.</p> <p>The team may 'make itself' or be constructed by others. It may have core members and members who participate at certain times or for particular purposes. It may be permanent or temporary, or come together at different times to work on specific projects.</p> <p>The team could consist of a team of contractors/freelancers, permanent staff, clients and service providers, or any combination of these groups. It may operate within an organisation or across several organisations - or simply across a group of individuals.</p> <p>The key focus of the unit is on what makes for an innovative team, what keeps it working well, how the structure of work can make a difference and what skills and knowledge are needed to maximise opportunities for innovation. Where a greater focus on team leadership is required this unit should be combined with units such as BSBLED401A Develop teams and individuals.</p>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Create opportunities to maximise innovation within the team	1.1. Evaluate and reflect on <i>what the team needs and wants to achieve</i> 1.2. Check out <i>information about current or potential team members' work</i> in the context of developing a more innovative team 1.3. Bring people into the team or make suggestions for team members based on what needs to be achieved and the potential for cross-fertilising ideas 1.4. Acknowledge, respect and discuss the <i>different ways that different people may contribute</i> to building or enhancing the team
2. Organise and agree effective ways of working	2.1. Jointly establish <i>ground rules</i> for how the team will operate 2.2. Agree and communicate responsibilities in ways that encourage and reinforce <i>team-based innovation</i> 2.3. Agree and share tasks and activities to ensure the best use of skills and abilities within the team 2.4. Plan and schedule activities to allow time for thinking, challenging and collaboration 2.5. Establish personal reward and stimulation as an integral part of the team's way of working
3. Support and guide colleagues	3.1. Model <i>behaviour that supports innovation</i> 3.2. Seek <i>external stimuli and ideas</i> to feed into team activities 3.3. Pro-actively share information, knowledge and experiences with other team members 3.4. Challenge and test ideas within the team in a positive and collaborative way 3.5. Pro-actively discuss and explore ideas with other team members on an ongoing basis
4. Reflect on how the team is working	4.1. De-brief and reflect on activities and on opportunities for improvement and innovation 4.2. Gather and use feedback from within and outside the team to generate discussion and debate 4.3. Discuss the <i>challenges of being innovative</i> in a constructive and open way 4.4. Take ideas for improvement, build them into future activities and communicate key issues to relevant colleagues 4.5. Identify, promote and celebrate successes and

ELEMENT	PERFORMANCE CRITERIA
	examples of successful innovation

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to work collaboratively as part of a team, to provide guidance and support to others, and to participate in open and constructive discussions
- creative thinking skills to generate, explore, test and challenge ideas
- learning skills to stretch boundaries of own knowledge and skills
- literacy skills to analyse a wide range of information from varied sources
- planning and organisational skills to participate in the effective allocation of work in a team context
- problem-solving skills to work constructively to overcome issues and challenges of both a practical and conceptual nature and to make ideas become realities
- self-management skills to take a pro-active team role and to reflect on own performance in modelling and encouraging behaviour that supports innovation.

#### Required knowledge

- barriers to innovation that can occur within a team and broader barriers that sometimes hinder innovation
- broad concepts of innovation including what innovation is, different types of innovation and the benefits of innovation
- characteristics of teams that are more likely to be innovative and characteristics of broader environments that support and encourage innovation
- different roles that people may play within a team, how this impacts on the way a team works and what it might achieve
- group dynamics in a team.

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- active participation in a team where the team takes a pro-active and considered approach to innovation and innovative practice
- collaborative and open communication within the team
- knowledge and understanding of the internal and external factors that contribute to a team becoming and remaining innovative.

#### Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills as part of a team.

#### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- direct observation of team interactions
- evaluation of reports by the candidate or the team (could be oral or written) discussing the ideas, challenges and opportunities associated with teams, and how they can be more innovative
- evaluation of feedback from other people in the team about the candidate's communication approaches and abilities
- oral or written questioning to assess knowledge of the characteristics of innovative teams, innovation concepts more broadly and the ways in which innovation can be encouraged
- review of jointly established 'groundrules' for how the team will operate.

#### Guidance information for assessment

Innovation does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is highly recommended.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***What the team needs and wants to achieve*** may relate to:

- addressing particular customer feedback
- conceiving and implementing a particular project
- developing new services or products
- generating ongoing ideas within the work unit
- improving budgetary performance
- improving or changing work conditions
- new ideas that impact beyond the workplace (e.g. that have a broader social or community impact)

***Information about current or potential team members' work*** may relate to:

- interests
- lifestyle preferences
- past jobs
- technical strengths
- work preferences
- working styles

***Different ways that different people may contribute*** may relate to individual strengths around:

- creating positive energy within the team
- fundamental literacy strengths (e.g. particularly strong in visual literacy, written or spoken communication)
- generating ideas
- networks or spheres of influence
- particular ways of thinking
- powers of persuasion
- problem-solving capacities
- specific technical skills or knowledge

***Ground rules*** may relate to:

- boundaries or lack of boundaries for team activities and ideas
- confidentiality
- copyright, moral rights or intellectual property
- regularity of communication
- key roles and responsibilities
- time lines

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>ways of communicating</li> </ul>
<i>Team-based innovation</i> may be encouraged through:	<ul style="list-style-type: none"> <li>accessing training and learning opportunities</li> <li>enough but not too much guidance and structure</li> <li>equitable sharing of workload</li> <li>follow-through with ideas</li> <li>supportive communication</li> </ul>
<i>Behaviour that supports innovation</i> may include being:	<ul style="list-style-type: none"> <li>collaborative</li> <li>equitable</li> <li>fair</li> <li>fun</li> <li>hardworking</li> <li>reflective</li> <li>responsible</li> <li>sympathetic</li> </ul>
<i>External stimuli and ideas</i> might be from:	<ul style="list-style-type: none"> <li>Australia or overseas</li> <li>colleagues outside of the team</li> <li>family and friends</li> <li>internet</li> <li>journals</li> <li>networks or technical experts</li> <li>other organisations</li> </ul>
<i>Challenges of being innovative</i> may relate to:	<ul style="list-style-type: none"> <li>budgetary or other resource constraints</li> <li>competing priorities</li> <li>organisational culture</li> <li>problems with breaking old patterns of behaviour or thinking</li> <li>time pressures</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Lead innovation by example	<p>1.1. Make innovation an integral part of <b><i>leadership and management activities</i></b></p> <p>1.2. Demonstrate positive reception of ideas from others and provide constructive advice</p> <p>1.3. Establish and maintain relationships based on mutual respect and trust</p> <p>1.4. Take considered <b><i>risks</i></b> to open up opportunities for innovation</p> <p>1.5. Regularly evaluate own approaches for consistency with the wider organisational or project context</p>
2. Establish work practices that support innovation	<p>2.1. Consult on and establish <b><i>working conditions</i></b> that reflect and encourage innovative practice</p> <p>2.2. Introduce and maintain <b><i>workplace procedures</i></b> that foster innovation and allow for rigorous <b><i>evaluation of innovative ideas</i></b></p> <p>2.3. Facilitate and participate in <b><i>collaborative work arrangements</i></b> to foster innovation</p> <p>2.4. Build and lead teams to work in <b><i>ways that maximise opportunities for innovation</i></b></p>
3. Promote innovation	<p>3.1. Acknowledge suggestions, improvements and innovations from all colleagues</p> <p>3.2. Find appropriate <b><i>ways of celebrating and promoting innovation</i></b></p> <p>3.3. Promote and reinforce the value of innovation according to the vision and objectives of the organisation or project</p> <p>3.4. Promote and support the evaluation of innovative ideas within the wider organisational or project context</p>
4. Create a physical environment which supports innovation	<p>4.1. Evaluate the <b><i>impact of the physical environment</i></b> in relation to innovation</p> <p>4.2. Collaborate with colleagues about ideas for enhancing the physical work environment before taking action</p> <p>4.3. Consider potential for supporting innovation when selecting physical resources and equipment</p> <p>4.4. Design, fit-out and decorate workspaces to encourage creative mindsets, collaborative working and the development of positive workplace relationships</p>

ELEMENT	PERFORMANCE CRITERIA
5. Provide learning opportunities	<p>5.1.Pro-actively share relevant information, knowledge and skills with colleagues</p> <p>5.2.Provide or encourage <i>formal and informal learning opportunities</i> to help develop the skills needed for innovation</p> <p>5.3.Create opportunities in which individuals can learn from the experience of others</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, consultation and negotiation skills to model and lead, open and collaborative relationships
- comprehension skills to interpret and develop information that may deal with complex ideas and relate to issues both within and outside a given workplace context
- planning and organisational skills to implement wide-ranging practical processes and procedures that support innovation
- problem-solving skills to assess and respond to challenges and risks around innovation at an operational management level
- self-management and learning skills to evaluate and enhance personal effectiveness, and to promote a culture of ongoing learning and development.

#### Required knowledge

- benefits of providing coaching and learning opportunities in relation to innovation
- concept of innovation, what it is and what it means for different people either working independently or within an organisation
- context for innovation in the relevant workplace context including core business values, overall objectives, broader environmental context and the need to ensure the value and benefit of innovative ideas and projects
- different ways of rewarding performance
- factors and tools that can motivate individuals to use creative thinking and apply innovative work practices
- legislative framework that impacts on operations in the relevant workplace context
- management principles and leadership styles, including the impact of different approaches on innovation
- typical challenges and barriers to innovation within teams and organisations, and ways of overcoming these
- ways in which workplace climate can affect individual attitudes and performance.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>establishment of procedures and practices (for a project or a workplace) which support and foster innovative work practice and include sound evaluation processes</li> <li>modelling of behaviour that supports innovative work practice</li> <li>knowledge and understanding of the role of leaders and managers in encouraging innovation, and the issues and challenges associated with building and sustaining an innovative work environment.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>involvement of a team for which the candidate provides leadership and guidance.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>evaluation of outcomes and processes from activities managed by the candidate, particularly in relation to how innovation and innovative practice was encouraged and supported</li> <li>oral or written questioning to assess knowledge of ways that innovation can be fostered and the typical challenges and barriers to innovation.</li> </ul>
<b>Guidance information for assessment</b>	Innovation does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is highly recommended.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Leadership and management activities</i></b> may include:	<ul style="list-style-type: none"> <li>• people management practices</li> <li>• planning processes</li> <li>• regular management meetings</li> <li>• review processes</li> </ul>
<b><i>Risks</i></b> may include:	<ul style="list-style-type: none"> <li>• budgetary issues</li> <li>• challenging changes in relationships, work practices and general workplace climate</li> <li>• unforeseen impacts of innovative ideas</li> </ul>
<b><i>Working conditions</i></b> may include:	<ul style="list-style-type: none"> <li>• family-friendly leave entitlements</li> <li>• flexible working hours</li> <li>• social leave</li> <li>• study leave</li> <li>• time provided for coming up with ideas</li> </ul>
<b><i>Workplace procedures</i></b> may relate to:	<ul style="list-style-type: none"> <li>• briefing processes</li> <li>• client relations</li> <li>• performance management</li> <li>• project management</li> <li>• staff meetings</li> <li>• training</li> </ul>
<b><i>Evaluation of innovative ideas</i></b> may relate to:	<ul style="list-style-type: none"> <li>• analysing consistency with overall goals, values or vision</li> <li>• assessing resource requirements and practicalities</li> <li>• assessing the potential to find 'champions' or supporters</li> <li>• evaluating the external factors that may impact on the idea</li> <li>• exploring the implications of ideas that may stretch or change existing ways of doing things</li> </ul>
<b><i>Collaborative work arrangements</i></b> might be:	<ul style="list-style-type: none"> <li>• cross section</li> <li>• vertical teams</li> <li>• within a section</li> <li>• working with supplier organisations or partner</li> </ul>

RANGE STATEMENT	
	organisations
<i>Ways that maximise opportunities for innovation</i> may relate to:	<ul style="list-style-type: none"> <li>• collaborating</li> <li>• collecting data</li> <li>• creative thinking</li> <li>• future scanning</li> <li>• getting feedback</li> <li>• making suggestions</li> <li>• networking</li> </ul>
<i>Ways of celebrating and promoting innovation</i> may include:	<ul style="list-style-type: none"> <li>• congratulating the project team</li> <li>• ensuring management acknowledgment</li> <li>• providing a newsletter story about the idea</li> <li>• using the idea to help foster other ideas</li> <li>• well-planned group incentive schemes</li> </ul>

## BSBITS401B Maintain business technology

### Modification History

Release	Comments
Release 1	<p>This version first released with <i>BSB07 Business Training Package version 6.0</i>.</p> <p>Revised unit. Required skills updated to focus on learning and development practices and compliance with policy and procedures.</p> <p>Replaces BSBITS401A Maintain business technology</p>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to maintain the effectiveness of business technology in the workplace. It includes maintaining existing technology and planning for future technology requirements.

### Application of the Unit

This unit applies to individuals with a broad knowledge of business technology who contribute well developed skills in creating solutions to maintenance and upgrade issues with existing technology. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Maintain performance of hardware and software	<p>1.1 Monitor and evaluate system effectiveness to ensure it meets <b><i>organisational and system requirements</i></b></p> <p>1.2 Use operating system, drive and disk structure, reports and files to identify performance problems</p> <p>1.3 <b><i>Maintain disk drives and peripherals</i></b> according to manufacturers' and organisational requirements</p> <p>1.4 Replace <b><i>consumables</i></b> in accordance with manufacturers' and organisational requirements</p>
2. Provide basic system administration	<p>2.1 Carry out system back-up procedure at regular intervals according to organisational and system requirements</p> <p>2.2 Install and operate <b><i>software</i></b> applications in accordance with developers' and organisational requirements</p> <p>2.3 Maintain and update security access procedures in line with organisational requirements</p> <p>2.4 Ensure that licence for use of software is used, checked and recorded in accordance with organisational requirements</p> <p>2.5 Regularly maintain and update virus programs in accordance with organisational requirements</p>
3. Identify future technology requirements	<p>3.1 Maintain knowledge of current and new <b><i>technology</i></b> by regularly accessing <b><i>sources of information</i></b></p> <p>3.2 Identify and develop <b><i>improved technology systems</i></b> using feedback from clients and colleagues</p> <p>3.3 Assess existing technology against newly available technology to determine future needs and priorities</p> <p>3.4 Identify and select new technologies to achieve and maintain continuous organisational development</p> <p>3.5 Obtain management and budget approval for new selected technologies</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to explain the operation and troubleshooting of technology in the work environment
- literacy skills to interpret and evaluate the purposes and objectives of various uses of technology; to display logical organisation of written information
- problem-solving skills to address routine and non-routine faults with hardware and software
- research and analytical skills to analyse and identify organisation's future technology requirements.

### Required knowledge

- costs and benefits of technology maintenance strategies
- general features and capabilities of current industry accepted hardware and software products
- principles of environmental sustainable practice in implementing business technology
- importance of back-up and security procedures; maintenance and diagnostic procedures; licensing, installation and purchasing procedures
- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - environmental issues
  - occupational health and safety (OHS).

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>installing software and hardware</li> <li>organising and accessing software, materials and consumables</li> <li>maintaining technology security and maintenance systems</li> <li>knowledge of costs and benefits of technology maintenance strategies.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>access to an actual workplace or simulated environment</li> <li>access to office equipment and resources</li> <li>access to examples of technology maintenance and security procedures.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>analysis of responses to case studies and scenarios</li> <li>demonstration of techniques</li> <li>oral or written questioning to assess knowledge of general features and capabilities of current industry accepted hardware and software products.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>other information and communications technology or general administration units.</li> </ul>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Organisational and system requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• back-up procedures</li> <li>• Code of Conduct</li> <li>• ethical standards</li> <li>• legal and organisational policy/guidelines and requirements</li> <li>• maintenance of customised software</li> <li>• OHS policies, procedures and programs</li> <li>• quality assurance and/or procedures manuals</li> <li>• register of licenses</li> <li>• restore procedures</li> <li>• security and confidentiality procedures</li> <li>• software licence documentation</li> <li>• storage of information technology documentation</li> <li>• storage retrieval and type of product licenses</li> <li>• updating of virus protection systems.</li> </ul>
<b><i>Disk drive and peripherals maintenance</i></b> may include:	<ul style="list-style-type: none"> <li>• backing up files before major maintenance</li> <li>• checking hard drive for errors</li> <li>• cleaning dust from internal and external surfaces</li> <li>• creating more free space on the hard disk</li> <li>• defragmenting the hard disk</li> <li>• deleting unwanted files</li> <li>• reviewing programs</li> <li>• using up-to-date anti-virus programs.</li> </ul>
<b><i>Consumables</i></b> may include:	<ul style="list-style-type: none"> <li>• disks</li> <li>• magnetic tape and cassettes</li> <li>• print heads</li> <li>• print media</li> <li>• printer ribbons and cartridges.</li> </ul>
<b><i>Software</i></b> may include:	<ul style="list-style-type: none"> <li>• accounting applications</li> <li>• commercial software applications</li> <li>• database applications</li> <li>• internet/intranet/extranet related programs</li> <li>• organisation-specific software</li> <li>• presentation applications</li> </ul>

	<ul style="list-style-type: none"> <li>• spreadsheet applications</li> <li>• word processing applications.</li> </ul>
<b>Technology</b> may include:	<ul style="list-style-type: none"> <li>• client services</li> <li>• computers</li> <li>• data transfer devices</li> <li>• modems</li> <li>• peripherals, including: <ul style="list-style-type: none"> <li>• printers, scanners, tape cartridges</li> <li>• speakers, multimedia kits</li> <li>• personal computer, modems</li> <li>• input equipment such as mouse, touch pad, keyboard, pens</li> <li>• mobile phones, palmtops and personal digital assistants (PDAs), laptops and desktop computers</li> <li>• Bluetooth devices, universal serial bus (USB), Firewire (IEEE 1394)</li> </ul> </li> <li>• photocopiers</li> <li>• printers</li> <li>• scanners</li> <li>• software.</li> </ul>
<b>Sources of information</b> may include:	<ul style="list-style-type: none"> <li>• computer hardware manufacturers</li> <li>• computer magazines and journals</li> <li>• computer software designers</li> <li>• industry associations</li> <li>• internal/external clients</li> <li>• internet</li> <li>• retail outlets</li> <li>• seminars, workshops and training sessions</li> <li>• trade fairs.</li> </ul>
<b>Improved technology systems</b> may include:	<ul style="list-style-type: none"> <li>• access protocols</li> <li>• cable data transmissions</li> <li>• delivery and installation systems</li> <li>• hardware upgrades</li> <li>• implementing a new system</li> <li>• maintenance options</li> <li>• multimedia</li> <li>• networking options</li> <li>• new hardware</li> <li>• new software</li> <li>• resource usage monitoring</li> <li>• software upgrades</li> </ul>

	<ul style="list-style-type: none"><li>• environmentally sustainable design practices.</li></ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and investigate online service provider	1.1.Undertake online research to identify <i>suppliers</i> of required <i>products/services</i> 1.2.Assess service provider <i>confidentiality, security</i> and <i>privacy</i> facilities in accordance with individual and organisational requirements 1.3.Assess potential products/services for authenticity
2. Perform online transactions	2.1.Confirm organisational requirements for products/services to be obtained 2.2.Ensure authentication information is secured in accordance with organisational requirements 2.3.Use appropriate online functions to obtain required products/services 2.4.Report any difficulties in accessing or using online facilities to the service provider 2.5.Complete transaction and ensure that products/services are received in accordance with terms of online transaction
3. Maintain records of online transactions	3.1.Maintain records of transactions in accordance with organisational policy, procedures and level of authority 3.2.Compare organisational records with online records and deal with irregularities according to organisational policy and procedures
4. Review online transactions	4.1.Review obtained products/services rendered to determine quality, timeliness and level of customer service in relation to advertised profile 4.2.Make recommendations regarding continued or future use of online service provider, as supported by transaction history

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to negotiate with online service provider/s.
- literacy skills to read and analyse information for its relevance and sufficiency, and to follow policies and procedures
- numeracy skills to work with and evaluate monetary figures
- technology skills to operate computer and software appropriate to transaction being performed.

#### Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety
- policies and procedures relating to use of the internet and online purchasing
- service provider requirements
- legal and ethical requirements relating to a range of online transactions.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• identification and selection of appropriate services to meet defined needs</li> <li>• use of appropriate security considerations</li> <li>• knowledge of policies and procedures relating to the use of the internet and online purchasing.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and resources.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• oral or written questioning to assess knowledge of legal and ethical requirements relating to a range of online transactions</li> <li>• review of recommendations made regarding continued or future use of online service provider.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other information and communications technology units.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Suppliers</i></b> may include:	<ul style="list-style-type: none"> <li>• banks or other financial institutions</li> <li>• e-auction</li> <li>• e-brokerage service</li> <li>• e-mail</li> <li>• e-procurement service</li> <li>• e-shop</li> <li>• third party marketplace</li> </ul>
<b><i>Products/services</i></b> may include:	<ul style="list-style-type: none"> <li>• financial services</li> <li>• goods</li> <li>• insurance</li> <li>• loans</li> <li>• shares</li> </ul>
<b><i>Confidentiality, security and privacy</i></b> may include:	<ul style="list-style-type: none"> <li>• access to independent reviews of financial services such as:             <ul style="list-style-type: none"> <li>• Australian Competition and Consumer Commission (ACCC)</li> <li>• Financial Planning Association of Australia (FPA)</li> </ul> </li> <li>• authentication services</li> <li>• disclaimers</li> <li>• firewall protection</li> <li>• jurisdiction</li> <li>• level of encryption</li> <li>• limit of liability</li> <li>• personal identification number (PIN)</li> <li>• physical site security of web server</li> <li>• receipting</li> <li>• terms and conditions of website use</li> <li>• use of 'cookies' - small files automatically downloaded from a web server to the computer of someone browsing a website - information stored in cookies can be accessed any time computer returns to the site</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine development needs	<p>1.1. Systematically identify and implement <i>learning and development needs</i> in line with <i>organisational requirements</i></p> <p>1.2. Ensure that a learning plan to meet individual and group training and development needs is collaboratively developed, agreed to and implemented</p> <p>1.3. Encourage individuals to self-evaluate performance and identify areas for improvement</p> <p>1.4. Collect <i>feedback on performance</i> of team members from relevant sources and compare with established team learning needs</p>
2. Develop individuals and teams	<p>2.1. Identify learning and development program goals and objectives, ensuring a match to the specific knowledge and skill requirements of competency standards relevant to the industry</p> <p>2.2. Ensure that <i>learning delivery methods</i> are appropriate to the learning goals, the learning style of participants, and availability of <i>equipment and resources</i></p> <p>2.3. Provide workplace learning opportunities, and <i>coaching and mentoring assistance</i> to facilitate individual and team achievement of competencies</p> <p>2.4. Create development opportunities that incorporates a range of activities and support materials appropriate to the achievement of identified competencies</p> <p>2.5. Identify and approve resources and time lines required for learning activities in accordance with organisational requirements</p>
3. Monitor and evaluate workplace learning	<p>3.1. Use feedback from individuals or teams to identify and implement improvements in future learning arrangements</p> <p>3.2. Assess and record outcomes and performance of individuals/teams to determine the effectiveness of development programs and the extent of additional development support</p> <p>3.3. Negotiate modifications to learning plans to improve the efficiency and effectiveness of learning</p> <p>3.4. Document and maintain records and reports of competency according to organisational requirements</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to receive and report on feedback, to maintain effective relationships and to manage conflict
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- leadership skills to gain trust and confidence of clients and colleagues
- literacy skills to read, write and understand a variety of texts; and to edit and proofread documents to ensure clarity of meaning, accuracy and consistency of information
- negotiation skills to achieve mutually acceptable outcomes
- technology skills to support effective communication and presentation.

#### Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety (OHS)
- facilitation techniques to encourage team development and improvement
- organisational policies, plans and procedures
- career paths and competency standards relevant to the industry.

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- identifying and implementing learning opportunities for others
- giving and receiving feedback from team members to encourage participation in and effectiveness of team
- creating learning plans to match skill needs
- knowledge of relevant legislation.

#### Context of and specific resources for assessment

Assessment must ensure:

- access to an actual workplace or simulated environment
- access to office equipment and resources
- examples of learning and development plans, policies and procedures
- examples of documents relating to diversity policies and procedures.

#### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- analysis of responses to case studies and scenarios
- oral or written questioning to assess knowledge of career paths and competency standards relevant to the industry
- review of records and reports of competency.

#### Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- management units
- other learning and development units.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Learning and development needs</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• career planning/development</li> <li>• coaching, mentoring and/or supervision</li> <li>• formal/informal learning programs</li> <li>• internal/external training provision</li> <li>• performance appraisals</li> <li>• personal study</li> <li>• recognition of current competence/skills recognition</li> <li>• work experience/exchange/opportunities</li> <li>• workplace skills assessment</li> </ul>
<p><b><i>Organisational requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• access and equity principles and practices</li> <li>• anti-discrimination and related policy</li> <li>• business and performance plans</li> <li>• confidentiality and security requirements</li> <li>• defined resource parameters</li> <li>• ethical standards</li> <li>• goals, objectives, plans, systems and processes</li> <li>• legal and organisational policies, guidelines and requirements</li> <li>• OHS policies, procedures and programs</li> <li>• quality and continuous improvement processes and standards</li> <li>• quality assurance and/or procedures manuals</li> </ul>
<p><b><i>Feedback on performance</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• formal/informal performance appraisals</li> <li>• obtaining feedback from clients</li> <li>• obtaining feedback from supervisors and colleagues</li> <li>• personal, reflective behaviour strategies</li> <li>• routine organisational methods for monitoring service delivery</li> </ul>
<p><b><i>Learning delivery methods</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• conference and seminar attendance</li> <li>• formal course participation</li> <li>• induction</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• involvement in professional networks</li> <li>• on-the-job coaching or mentoring</li> <li>• presentations/demonstrations</li> <li>• problem-solving</li> <li>• work experience</li> </ul>
<i>Equipment and resources</i> may include:	<ul style="list-style-type: none"> <li>• facilities</li> <li>• funding</li> <li>• guest speakers</li> <li>• technological tools and equipment</li> <li>• time</li> <li>• training equipment such as whiteboards and audio-visual equipment</li> </ul>
<i>Coaching and mentoring assistance</i> may include:	<ul style="list-style-type: none"> <li>• fair and ethical practice</li> <li>• non-discriminatory processes and activities</li> <li>• presenting and promoting a positive image of the collective group</li> <li>• problem-solving</li> <li>• providing encouragement</li> <li>• providing feedback to another team member</li> <li>• respecting the contribution of all participants and giving credit for achievements</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement financial plan	<p>1.1. Identify <i>financial information</i> requirements and obtain <i>specialist services</i>, as required, to profitably operate and extend the business in accordance with the business plan</p> <p>1.2. Produce financial budgets/projections, including <i>cash flow</i> estimates, as required for each forward period, and distribute to <i>relevant people</i> in accordance with legal requirements</p> <p>1.3. Negotiate, secure and manage business capital to best enable implementation of the business plan and to meet the requirements of <i>financial backers</i></p> <p>1.4. Develop and maintain strategies to enable adequate financial provision for taxation in accordance with legal requirements</p> <p>1.5. Develop, monitor and maintain client <i>credit policies</i>, including contingencies for debtors in default, to maximise cash flow</p> <p>1.6. Select key performance indicators to enable ongoing monitoring of financial performance</p> <p>1.7. Record and communicate financial procedures to relevant people to facilitate implementation of the business plan</p>
2. Monitor financial performance	<p>2.1. Regularly monitor and report on financial performance targets and analyse data to establish the extent to which the <i>financial plan</i> has been met</p> <p>2.2. Monitor marketing and operational strategies for their effects on the financial plan</p> <p>2.3. Calculate and evaluate <i>financial ratios</i> according to own/industry benchmarks</p> <p>2.4. Assess financial plan to determine whether variations or alternative plans are needed, and change as required</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to interpret financial data
- communication skills to negotiate capital and to report on performance
- literacy skills to interpret legal requirements and financial reports
- numeracy skills to calculate costs, prices, profit and other financial information.

#### Required knowledge

The following knowledge must be assessed as part of this unit:

- benchmarking
- financial decision making relevant to the business
- financial indicators
- purpose of financial reports
- preparation and interpretation of budget/actual reports
- principles for preparation of balance sheets and their interpretation
- principles for preparation of profit and loss statements and their interpretation
- stock records/stock control relevant to the business.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• development, implementation and review of strategies for the ongoing management of finance</li> <li>• maintenance of day-to-day financial management of the business as well as implementation of broad financial strategies</li> <li>• knowledge of purpose of financial reports.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to relevant documentation</li> <li>• candidate's individual circumstances and work in the context of establishing or running a small business, are the basis for assessment.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• portfolio of evidence including financial reports</li> <li>• preparation and review of financial ratios</li> <li>• review of cash flow projections</li> <li>• analysis of development, monitoring and maintenance of client credit policies</li> <li>• oral or written questioning to assess knowledge of principles for preparation of balance sheets and their interpretation.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• BSBSMB402A Plan small business finances</li> <li>• BSBSMB405A Monitor and manage small business operations.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Financial plan*** may include:

- analysis of sales by product/service, identifying where they were sold and to whom
- cash flow estimates for each forward period
- current financial state of the enterprise (or owner/operator)
- estimates of profit and loss projections for each forward period
- financial performance to date (if applicable)
- likely return on investment
- monthly, quarterly or annual returns
- non-recurrent assets calculations
- profit, turnover, capital and equity targets
- projected profit targets, pricing strategies, margins
- projections of likely financial results (budgeting)
- projections, which may vary depending on the importance of such information and the stage in the life of the business
- resources required to implement the proposed marketing and production strategies (staff, materials, plant and equipment)
- review of financial inputs required (sources and forms of finance)
- risks and measures to manage or minimise risks
- working, fixed, debt and equity capital
- working in conjunction with external consultants e.g. investment analysts, accountants, financiers

***Financial information*** may include:

- accrual of staff leave/entitlements
- asset management strategies which may include:
  - owning, leasing, sharing, syndicating
  - maintaining and deploying assets
- asset registers
- balance sheets
- bookkeeping/accounting/stock/job costing records

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• business activity statements</li> <li>• business capital</li> <li>• cash book</li> <li>• cash flow forecasts</li> <li>• financial budgets</li> <li>• financial indicators, which may be short-, medium- and/or long-term</li> <li>• payroll records, superannuation entitlements</li> <li>• profit and loss statements</li> <li>• ratios for profitability, liquidity/efficiency/financial structure</li> <li>• risk management</li> <li>• statements/forecasts</li> <li>• taxation returns including goods and services tax</li> </ul>
<i>Specialist services</i> may include:	<ul style="list-style-type: none"> <li>• accountants</li> <li>• business brokers/business consultants</li> <li>• government agencies</li> <li>• industry/trade associations</li> <li>• lawyers and providers of legal advice</li> <li>• mentors</li> <li>• online gateways</li> <li>• providers of training in accounting software</li> </ul>
<i>Cash flow</i> may include:	<ul style="list-style-type: none"> <li>• anticipated payments</li> <li>• anticipated receipts</li> <li>• customer credit policy/debt recovery</li> <li>• taxation provisions</li> </ul>
<i>Relevant people</i> may include:	<ul style="list-style-type: none"> <li>• family members</li> <li>• financial backers</li> <li>• franchise agency</li> <li>• owner/operator</li> <li>• partners</li> <li>• regulatory bodies</li> <li>• trade or industry associations</li> </ul>
<i>Financial backers</i> may include:	<ul style="list-style-type: none"> <li>• financiers/banks/lending institutions</li> <li>• leasing and hire purchase financiers</li> <li>• providers of venture capital</li> <li>• shareholders/partners/owners/family/friends</li> </ul>
<i>Credit policies</i> may include:	<ul style="list-style-type: none"> <li>• collateral</li> <li>• credit limits</li> <li>• credit references</li> </ul>

## BSBMGT502B Manage people performance

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to manage the performance of staff who report to them directly. Development of key result areas and key performance indicators and standards, coupled with regular and timely coaching and feedback, provide the basis for performance management.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to all managers and team leaders who manage people. It covers work allocation and the methods to review performance, reward excellence and provide feedback where there is a need for improvement.</p> <p>The unit makes the link between performance management and performance development, and reinforces both functions as a key requirement for effective managers.</p> <p>This is a unit that all managers/prospective managers who have responsibility for other employees should strongly consider undertaking.</p>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Allocate work	1.1.Consult relevant groups and individuals on work to be allocated and resources available 1.2.Develop work plans in accordance with operational plans 1.3.Allocate work in a way that is efficient, cost effective and outcome focussed 1.4.Confirm <b>performance standards, Code of Conduct</b> and work outputs with relevant teams and individuals 1.5.Develop and agree <b>performance indicators</b> with relevant staff prior to commencement of work 1.6.Conduct <b>risk analysis</b> in accordance with the organisational risk management plan and legal requirements
2. Assess performance	2.1.Design <b>performance management</b> and review processes to ensure consistency with organisational objectives and policies 2.2.Train participants in the performance management and review process 2.3.Conduct performance management in accordance with organisational protocols and time lines 2.4.Monitor and evaluate performance on a continuous basis
3. Provide feedback	3.1.Provide informal feedback to staff on a regular basis 3.2.Advise relevant people where there is poor performance and take necessary actions 3.3.Provide on-the-job coaching when necessary to improve performance and to confirm <b>excellence in performance</b> 3.4.Document performance in accordance with the organisational performance management system 3.5.Conduct formal structured feedback sessions as necessary and in accordance with organisational policy
4. Manage follow up	4.1.Write and agree performance improvement and development plans in accordance with organisational policies 4.2.Seek assistance from human resources specialists where appropriate 4.3.Reinforce excellence in performance through recognition and continuous feedback

ELEMENT	PERFORMANCE CRITERIA
	<p>4.4. Monitor and coach individuals with poor performance</p> <p>4.5. Provide support services where necessary</p> <p>4.6. Counsel individuals who continue to perform below expectations and implement the disciplinary process if necessary</p> <p>4.7. <i>Terminate</i> staff in accordance with legal and organisational requirements where serious misconduct occurs or ongoing poor-performance continues</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to articulate expected standards of performance, to provide effective feedback and to coach staff who need development
- risk management skills to analyse, identify and develop mitigation strategies for identified risks
- planning and organisation skills to ensure a planned and objective approach to the performance management system.

#### Required knowledge

- relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety and environmental issues, equal opportunity, industrial relations and anti-discrimination
- relevant awards and certified agreements
- performance measurement systems utilised within the organisation
- unlawful dismissal rules and due process
- staff development options and information.

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- documented performance indicators and a critical description and analysis of performance management system from the workplace
- techniques in providing feedback and coaching for improvement in performance
- knowledge of relevant awards and certified agreements.

#### Context of and specific resources for assessment

Assessment must ensure:

- access to appropriate documentation and resources normally used in the workplace.

#### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- analysis of responses to case studies and scenarios
- assessment of written reports
- demonstration of techniques in providing feedback and coaching
- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- review of work plans, performance indicators, risk analysis, performance management and review processes, performance improvement and development plans.

#### Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- other management units.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Performance standards</i></b> mean:	<ul style="list-style-type: none"> <li>level of performance sought from an individual or group which may be expressed either quantitatively or qualitatively</li> </ul>
<b><i>Code of Conduct</i></b> means:	<ul style="list-style-type: none"> <li>agreed (or decreed) set of rules relating to employee behaviour/conduct with other employees or an agreed (or decreed) set of rules relating to employee behaviour/conduct with other employees or customers</li> </ul>
<b><i>Performance indicators</i></b> mean:	<ul style="list-style-type: none"> <li>measures against which performance outcomes are gauged</li> </ul>
<b><i>Risk analysis</i></b> means:	<ul style="list-style-type: none"> <li>determination of the likelihood of a negative event preventing the organisation meeting its objectives and the likely consequences of such an event on organisational performance</li> </ul>
<b><i>Performance management</i></b> means:	<ul style="list-style-type: none"> <li>in accordance with relevant industrial agreements</li> <li>process or set of processes for establishing a shared understanding of what an individual or group is to achieve, and managing and developing individuals in a way which increases the probability it will be achieved in both the short- and long-term</li> </ul>
<b><i>Excellence in performance</i></b> means:	<ul style="list-style-type: none"> <li>regularly and consistently exceeding the performance targets established while meeting the organisation's performance standards</li> </ul>
<b><i>Termination</i></b> means:	<ul style="list-style-type: none"> <li>cessation of the contract of employment between an employer and an employee, at the initiative of the employer within relevant industrial agreements</li> </ul>

## BSBMGT515A Manage operational plan

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to develop and monitor implementation of the operational plan to provide efficient and effective workplace practices within the organisation's productivity and profitability plans.</p> <p>Management at a strategic level requires systems and procedures to be developed and implemented to facilitate the organisation's operational plan.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to people who manage the work of others and operate within the parameters of a broader strategic and/or business plan. The task of the manager at this level is to develop and implement an operational plan to ensure that the objectives and strategies outlined in the strategic and/or business plan are met by work teams. However in some larger organisations operational plans may be developed by a strategic planning unit.</p> <p>At this level work will normally be carried out within complex and diverse methods and procedures, which require the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.</p>
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop operational plan	<p>1.1. Research, analyse and document <b>resource requirements</b> and develop an operational plan in consultation with <b>relevant personnel, colleagues and specialist resource managers</b></p> <p>1.2. Develop and/or implement <b>consultation processes</b> as an integral part of the operational planning process</p> <p>1.3. Ensure details of the operational plan include the development of <b>key performance indicators</b> to measure organisational performance</p> <p>1.4. Develop and implement <b>contingency plans</b> at appropriate stages of operational planning</p> <p>1.5. Ensure the development and presentation of proposals for resource requirements is supported by a variety of information sources and seek specialist advice as required</p> <p>1.6. Obtain approval for plan from relevant parties and ensure understanding among work teams involved</p>
2. Plan and manage resource acquisition	<p>2.1. Develop and implement strategies to ensure that employees are recruited and/or inducted within the organisation's human resources management policies and practices</p> <p>2.2. Develop and implement strategies to ensure that physical resources and services are acquired in accordance with the <b>organisation's policies, practices and procedures</b></p>
3. Monitor and review operational performance	<p>3.1. Develop, monitor and review performance systems and processes to assess progress in achieving profit and productivity plans and targets</p> <p>3.2. Analyse and interpret budget and actual financial information to monitor and review profit and productivity performance</p> <p>3.3. Identify areas of under performance, recommend solutions, and take prompt action to rectify the situation</p> <p>3.4. Plan and implement systems to ensure that mentoring and coaching are provided to support individuals and teams to effectively, economically and safely use resources</p> <p>3.5. Negotiate recommendations for variations to operational plans and gain approval from <b>designated persons/groups</b></p>

ELEMENT	PERFORMANCE CRITERIA
	3.6. Develop and implement systems to ensure that procedures and records associated with documenting performance are managed in accordance with organisational requirements

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills to access and use workplace information and to write a succinct and practical plan
- technology skills to use software to produce and monitor the plan against performance indicators
- planning and organisational skills
- coaching skills to work with people with poor performance
- numeracy skills to allocate and manage financial resources.

#### Required knowledge

- models and methods for operational plans
- budgeting processes
- alternative approaches to improving resource usage and eliminating resource inefficiencies and waste.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>development of an operational plan with details of how it will be implemented and monitored</li> <li>knowledge of models and methods for operational plans.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>access to appropriate documentation and resources normally used in the workplace.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>oral or written questioning to assess knowledge of budgeting processes</li> <li>review of operational plan, key performance indicators and contingency plans</li> <li>evaluation of employee recruitment and induction strategies</li> <li>evaluation of processes implemented to acquire physical resources and services.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>other units from the Diploma of Management.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b><i>Resource requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• goods and services to be purchased and ordered</li> <li>• human, physical and financial resources - both current and projected</li> <li>• stock requirements and requisitions</li> </ul>
<b><i>Relevant personnel, colleagues and specialist resource managers</i></b> may include:	<ul style="list-style-type: none"> <li>• employees at the same level or more senior managers</li> <li>• managers</li> <li>• occupational health and safety committee/s and other people with specialist responsibilities</li> <li>• supervisors</li> <li>• union or employee representatives</li> </ul>
<b><i>Consultation processes</i></b> may refer to:	<ul style="list-style-type: none"> <li>• email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual operational plans</li> <li>• mechanisms used to provide feedback to the work team in relation to outcomes of consultation</li> <li>• meetings, interviews, brainstorming sessions</li> </ul>
<b><i>Operational plans</i></b> may also be termed:	<ul style="list-style-type: none"> <li>• action plans</li> <li>• annual plans</li> <li>• management plans</li> <li>• tactical plans</li> </ul>
<b><i>Key performance indicators</i></b> may refer to:	<ul style="list-style-type: none"> <li>• measures for monitoring or evaluating the efficiency or effectiveness of a system which may be used to demonstrate accountability and to identify areas for improvements</li> </ul>
<b><i>Contingency plans</i></b> may include:	<ul style="list-style-type: none"> <li>• contracting out or outsourcing human resources and other functions or tasks</li> <li>• diversification of outcomes</li> <li>• finding cheaper or lower quality raw materials</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>and consumables</li> <li>• increasing sales or production</li> <li>• recycling and re-using</li> <li>• rental, hire purchase or alternative means of procurement of required materials, equipment and stock</li> <li>• restructuring of organisation to reduce labour costs</li> <li>• risk identification, assessment and management processes</li> <li>• seeking further funding</li> <li>• strategies for reducing costs, wastage, stock or consumables</li> <li>• succession planning</li> </ul>
<i>Organisation's policies, practices and procedures</i> may include:	<ul style="list-style-type: none"> <li>• organisational culture</li> <li>• organisational guidelines which govern and prescribe operational functions, such as the acquisition and management of human and physical resources</li> <li>• Standard Operating Procedures</li> <li>• undocumented practices in line with organisational operations</li> </ul>
<i>Designated persons/groups</i> may include:	<ul style="list-style-type: none"> <li>• groups designated in workplace policies and procedures</li> <li>• managers or supervisors whose roles and responsibilities include decision making on operations</li> <li>• other stakeholders such as Board members</li> <li>• other work groups or teams whose work will be affected by recommendations for variations</li> </ul>

------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to individuals working in a supervisory or management marketing or advertising role within a marketing or advertising team or media organisation.</p>
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine marketing communication requirements	1.1. Confirm <b>marketing communication purpose</b> and objectives with the client 1.2. Obtain comprehensive <b>client and product information</b> 1.3. Review outcomes of previous marketing communication with the client 1.4. Confirm budget allocation with the client
2. Develop a marketing communication brief	2.1. Develop a brief, ensuring it contains a client profile, purpose statement and objectives that reflect client needs 2.2. State <b>marketing communication objectives</b> in measurable terms and provide specific guidelines on what is to be accomplished by the marketing communication 2.3. Define key characteristics, competitive factors and the market situation facing the product or service 2.4. Include a summary of <b>information on the target audience</b> , and <b>legal and ethical constraints</b>
3. Design the integrated marketing communication strategy	3.1. Select <b>marketing communication options</b> appropriate for the marketing communication brief 3.2. Critically analyse the advantages and disadvantages of each marketing communications variable and <b>media vehicles</b> for the product or service 3.3. Determine <b>media characteristics</b> that match the requirements of the brief 3.4. Analyse media consumption habits for primary and supplementary marketing media among target audiences 3.5. Evaluate media styles as they relate to brand character of the product or service being marketed 3.6. Compare the <b>advantages and disadvantages of selecting multiple media</b> in a media plan 3.7. Develop and apply <b>criteria</b> for selecting multiple media combinations
4. Select and recommend media for the marketing strategy	4.1. Select media vehicles that match the requirements of the marketing brief for the product or service 4.2. Recommend primary and secondary marketing media that meet target audience preferences 4.3. Ensure recommended media meet the brief, client's requirements, and legal and ethical constraints

ELEMENT	PERFORMANCE CRITERIA
5. Develop a creative brief	<p>5.1. Identify <i>creative content</i> for the chosen media using consumer language in the brief</p> <p>5.2. Identify <i>pitch or appeal</i> for the product or service in the brief that meets client requirements</p> <p>5.3. Identify <i>supporting information</i> required for consumer understanding of the product or service in the brief</p> <p>5.4. Ensure that budget for creative work, consistent with the overall marketing budget, is contained in the brief</p> <p>5.5. Incorporate a deadline for creative work that is consistent with the overall media schedule in the brief</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to question, clarify and report when creating marketing and creative briefs
- learning skills to evaluate and learn from previous marketing communication to contribute to the marketing communication plan
- literacy skills to:
  - read and interpret marketing briefs
  - write reports with complex concepts and ideas
- numeracy skills to develop budgets
- organisational and time-management skills to sequence tasks and meet timelines
- research and data-collection skills to evaluate the suitability of media to the product or service, and brand and marketing objectives
- technology skills to use a wide range of office equipment and software to create a marketing brief

#### Required knowledge

- economic, social and industry trends relevant to the choice of appropriate media options
- industry products or services in order to recommend appropriate media options
- overview knowledge to identify key provisions of relevant legislation, codes of practice and national standards that affect business operations as they relate to marketing, such as:
  - anti-discrimination legislation
  - consumer protection laws
  - copyright legislation
  - ethical principles
  - fair trading laws
  - privacy laws
  - Trade Practices Act
- principles of consumer behaviour and influences on buyer behaviour
- range of marketing communication options for different markets
- range of media vehicles for marketing communication options

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>production of an integrated strategic marketing communication plan for presentation to a client which includes: <ul style="list-style-type: none"> <li>purpose statement</li> <li>definition of the target audience</li> <li>analysis of the product or service</li> <li>legal and ethical constraints</li> <li>marketing communication functions and media vehicles chosen, with rationale for each</li> <li>creative brief for the media options</li> <li>schedule for the creative work</li> <li>budgetary allocation for each media vehicle.</li> </ul> </li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>a workplace or simulated work environment</li> <li>office equipment and resources</li> <li>required documentation, including marketing brief.</li> </ul>
<b>Method of assessment</b>	<p>The following assessment methods are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>review of portfolio of evidence of actions taken to produce a strategic marketing communication plan</li> <li>assessment of documented strategic marketing communication plan</li> <li>oral or written questioning to assess actions taken to produce the marketing communication plan</li> <li>analysis of responses to case studies and scenarios.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>BSBADV507B Develop a media plan.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Marketing communication purpose</i></b> may include:	<ul style="list-style-type: none"> <li>communicating a message to a particular audience</li> <li>differentiating features or benefits</li> <li>promoting image</li> <li>providing information</li> <li>recruiting staff</li> <li>retaining customers</li> <li>stimulating demand for a product or service.</li> </ul>

## BSBPRO401A Develop product knowledge

### Modification History

Release	Comments
Release 2	New release of this Qualification released with <i>version 6 of BSB07 Business Services Training Package</i> .  Outdated advice removed

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop product knowledge in preparation for the sales process.

### Application of the Unit

This unit applies to individuals in a sales related position in a small, medium or large enterprise across a wide variety of industries and contexts who develop their product knowledge prior to undertaking selling activities. They may provide advice and support about aspects of sales solutions to support a sales team.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Acquire knowledge of products in a specified area	1.1. Identify <b><i>information sources</i></b> about <b><i>products</i></b> in a specified area and evaluate them for reliability and validity 1.2. Identify product purpose/s and use/s 1.3. Identify key <b><i>features</i></b> of the product/s 1.4. Identify product strengths and weaknesses 1.5. Articulate guarantees and warranties and identify service support details
2. Convert product knowledge into benefits	2.1. Identify features of the product which have potential buyer appeal 2.2. Present features of the product which have buyer appeal as benefits to the buyer 2.3. Present product benefits within the context of <b><i>organisational requirements</i></b> and legislation
3. Evaluate competitors' products	3.1. Use a range of information sources to identify competitors' products 3.2. Compare features, benefits, strengths and weaknesses of competitors' products with own products 3.3. Establish relative standing of the organisation's product with the competitors' product/s and communicate differences to the buyer

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

<b>Required skills</b>
<ul style="list-style-type: none"><li>• information management skills to summarise information verbally and non-verbally</li><li>• literacy and numeracy skills to interpret sales data and to summarise information obtained from a variety of verbal and non-verbal sources.</li></ul>
<b>Required knowledge</b>
<ul style="list-style-type: none"><li>• features, benefits, strengths and weaknesses of own organisation's and competitors' products</li><li>• industry competitors, trends and developments</li><li>• organisational structure/s, roles and responsibilities, policies, procedures, product labelling and descriptions</li><li>• potential buyer markets</li><li>• processes used when buying and selling products and services</li><li>• identification and overview knowledge of key provisions of relevant legislation from all levels of government that affects business operations, codes of practice and national standards, such as:<ul style="list-style-type: none"><li>• anti-discrimination</li><li>• consumer protection</li><li>• contract law legislation</li></ul></li><li>• ethical principles<ul style="list-style-type: none"><li>• privacy laws</li><li>• Trade Practices Act.</li></ul></li></ul>

## Evidence Guide

*The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• comparison of the key features and benefits of product/s with competitor offerings</li> <li>• demonstration of product knowledge offered by an organisation</li> <li>• presentation of key features and benefits of own product/s.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to information sources about an organisation's and competitors' products, services or ideas</li> <li>• access to office equipment and resources.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• observation of presentation of key features and benefits to customers or simulated customers</li> <li>• oral or written questioning to assess knowledge of features, benefits, strengths and weaknesses of organisation's and competitors' products</li> <li>• review of evaluation of identification of information sources about products in a specified area</li> <li>• evaluation of strengths and weaknesses established for competitors' products.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Information sources</b> may include:	<ul style="list-style-type: none"> <li>• associations</li> <li>• catalogues</li> <li>• claims of competitive sales people</li> <li>• competitor websites</li> <li>• competitor sales literature</li> <li>• external sales data sources such as warehouse withdrawals</li> <li>• internal sales data records</li> <li>• other company personnel</li> <li>• sales conventions</li> <li>• trade association magazines</li> <li>• trade shows</li> </ul>
<b>Products</b> may include:	<ul style="list-style-type: none"> <li>• goods</li> <li>• ideas</li> <li>• services</li> </ul>
<b>Features</b> may include:	<ul style="list-style-type: none"> <li>• brand</li> <li>• colour</li> <li>• country of origin</li> <li>• covenant</li> <li>• manufacturer</li> <li>• product care details</li> <li>• safety aspect</li> <li>• shelf life</li> <li>• size</li> <li>• style</li> <li>• warnings</li> </ul>
<b>Organisational requirements</b> may include:	<ul style="list-style-type: none"> <li>• level of client service required</li> <li>• policies and procedures which are formally documented and are available for reference within the workplace</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Negotiate terms of contracts with suppliers	1.1. Offer advice and undertake negotiations without prejudice 1.2. Advise suppliers of the organisation's intent to accept their offers 1.3. Negotiate <i>issues</i> with suppliers 1.4. Determine desired outcomes, negotiation plans and schedules for negotiations 1.5. Undertake negotiations and reach agreements with suppliers in accordance with plans 1.6. Negotiate and document contract requirements to the satisfaction of the organisation and suppliers
2. Prepare contracts	2.1. Draft required <i>contracts</i> using legal expertise if required 2.2. Distribute draft contracts to <i>relevant personnel</i> and suppliers 2.3. Ensure any discrepancies or disagreements are clarified and resolved to the satisfaction of all parties 2.4. Ensure <i>checks</i> of the legality and validity of draft contracts are made 2.5. Obtain approvals to sign contracts
3. Finalise contracts	3.1. Ensure contracts are signed and exchanged between the organisation and suppliers 3.2. Ensure contracts and related documents are stored and safeguarded 3.3. Advise relevant personnel of contract requirements 3.4. Advise unsuccessful suppliers of non-acceptance of offers

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- communication and negotiation skills to liaise with suppliers and reach agreement with suppliers on contracts
- literacy skills to draft concepts and write reports containing complex concepts
- technology application skills to use a range of software programs relevant to purchasing and contracting.

#### Required knowledge

- identification and overview knowledge of key provisions of relevant legislation from all levels of government that affects business operations, codes of practice and national standards, such as:
  - consumer protection legislation
  - contract law
  - import of goods and services, where relevant
  - sale of goods legislation
  - Trade Practices Act
- organisational practices, policies and procedures for purchasing
- product knowledge about the goods and services being supplied
- purchasing and procurement principles for:
  - accountability
  - probity and transparency
  - risk management
  - value for money.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• documented agreement of terms with suppliers</li> <li>• drafting and completion of a contract with a supplier for goods and services</li> <li>• informing of successful and unsuccessful suppliers.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and resources</li> <li>• organisation's purchasing strategies and relevant purchasing records.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• analysis of responses to case studies and scenarios</li> <li>• assessment of draft and finalised contracts for the supply of goods and services</li> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• observation of contacting successful and unsuccessful suppliers about the awarding of the contract</li> <li>• oral or written questioning to assess knowledge</li> <li>• review testimony from team members, colleagues, supervisors or managers</li> <li>• review of authenticated documents from the workplace or training environment.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other purchasing units.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Issues</i></b> may include:	<ul style="list-style-type: none"> <li>• issues relating to non-compliance with invitation to offer requirements</li> <li>• issues relating to occupational health and safety (OHS) performance standards</li> <li>• issues relating to the form and specific requirements of contract documentation</li> </ul>
<b><i>Contracts</i></b> may include:	<ul style="list-style-type: none"> <li>• agreements for one-off or ongoing supply of goods or services</li> <li>• agreements with Australian or overseas individuals, contractors, corporations, individuals and government agencies</li> <li>• electronic or paper-based agreements</li> <li>• memoranda of understanding/agreement</li> </ul>
<b><i>Relevant personnel</i></b> may include:	<ul style="list-style-type: none"> <li>• CEO</li> <li>• managers</li> <li>• leaders</li> <li>• coordinators</li> <li>• OHS specialists</li> <li>• supervisors</li> <li>• other persons authorised to commit the organisation to purchases</li> <li>• internal users of purchased goods and services</li> <li>• owner</li> <li>• Board</li> <li>• specialist personnel involved in purchasing, asset maintenance and finance</li> </ul>
<b><i>Checks</i></b> may include:	<ul style="list-style-type: none"> <li>• referring the contract to others such as:             <ul style="list-style-type: none"> <li>• external legal representative for organisation</li> <li>• legal officer within organisation</li> <li>• purchasing manager</li> </ul> </li> </ul>

Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Gather and organise information	<p>1.1. Gather and organise <b>information</b> in a format suitable for analysis, interpretation and dissemination in accordance with <b>organisational requirements</b></p> <p>1.2. Access information held by the organisation ensuring accuracy and relevance in line with established organisational requirements</p> <p>1.3. Ensure that <b>methods of collecting information</b> are reliable and make efficient use of resources in accordance with organisational requirements</p> <p>1.4. Identify research requirements for combining online research with non-electronic sources of information</p> <p>1.5. Use <b>business technology</b> to access, organise and monitor information in accordance with organisational requirements</p> <p>1.6. Update, modify, maintain and store information, in accordance with organisational requirements</p>
2. Research and analyse information	<p>2.1. Clearly define <b>objectives of research</b> ensuring consistency with organisational requirements</p> <p>2.2. Ensure that data and <b>research strategies</b> used are valid and relevant to the requirements of the research and make efficient use of available resources</p> <p>2.3. Identify <b>key words and phrases</b> for use as part of any online search strategy, including the use of <b>Boolean operators</b> and other search tools</p> <p>2.4. Use reliable <b>methods of data analysis</b> that are suitable to research purposes</p> <p>2.5. Ensure that assumptions and conclusions used in analyses are clear, justified, supported by evidence and consistent with research and <b>business objectives</b></p>
3. Present information	<p>3.1. Present recommendations and issues in an appropriate format, style and structure using suitable business technology</p> <p>3.2. Structure and format reports in a clear manner that conforms to organisational requirements</p> <p>3.3. Report and distribute research findings in accordance with organisational requirements</p> <p>3.4. Obtain <b>feedback</b> and comments on suitability and sufficiency of findings in accordance with organisational requirements</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills to read, write and understand a variety of texts; and to edit and proofread documents to ensure clarity of meaning, accuracy and consistency of information
- problem-solving skills to deal with information which is contradictory, ambiguous, inconsistent or inadequate
- technology skills to select and use technology appropriate to a task
- research skills to identify and access information.

#### Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety (OHS)
- organisational record keeping/filing systems, security procedures and safe recording practices
- organisational policies and procedures relating to distribution of workplace information, and legal and ethical obligations
- research processes and strategies to identify new sources (online and print) of information and to use them most efficiently and effectively.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• presenting information and data</li> <li>• maintaining and handling data and documents systematically</li> <li>• analysing and interpreting data to support organisational activities</li> <li>• knowledge of research processes and strategies to identify new sources of information.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and resources</li> <li>• examples of research tasks and resources.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• observation of presentations</li> <li>• review of documentation outlining recommendations and issues</li> <li>• review of reports outlining research findings.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• general administration units</li> <li>• IT use units</li> <li>• Governance units</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Information*** may include:

- demographic data
- service delivery records
- computer databases (library catalogue, customer records, subscription database, internet)
- computer files (letters, memos and other documents)
- correspondence (faxes, memos, letters, email)
- financial figures
- forms (insurance forms, membership forms)
- information on training needs
- invoices (from suppliers, to debtors)
- marketing reports/plans/budgets
- personnel records (personal details, salary rates)
- production targets
- sales records (monthly forecasts, targets achieved)

***Organisational requirements*** may include:

- anti-discrimination and related policy
- business and performance plans
- Code of Conduct/Code of Ethics
- defined resource parameters
- ethical standards
- goals, objectives, plans, systems and processes
- information protocols
- legal and organisational policies, guidelines and requirements
- management and accountability channels
- OHS policies, procedures and programs
- procedures for updating records
- quality assurance and/or procedures manuals
- security and confidentiality requirements

***Methods of collecting***

- checking research provided by others

<b>RANGE STATEMENT</b>	
<b><i>information</i></b> may include:	<ul style="list-style-type: none"> <li>• checking written material including referrals and client files</li> <li>• individual research</li> <li>• information from other organisations</li> <li>• interviews with community members, colleagues/customers</li> <li>• observation and listening</li> <li>• previous file records</li> <li>• questioning (in person or indirect)</li> <li>• recruitment applications and other forms</li> </ul>
<b><i>Business technology</i></b> may include:	<ul style="list-style-type: none"> <li>• answering machine</li> <li>• computer</li> <li>• fax machine</li> <li>• photocopier</li> <li>• telephone</li> </ul>
<b><i>Objectives of research</i></b> may include:	<ul style="list-style-type: none"> <li>• comparative analysis</li> <li>• hypothesis testing</li> <li>• identification of trends</li> <li>• industry pricing policies</li> <li>• process mapping</li> <li>• situational diagnosis</li> </ul>
<b><i>Research strategies</i></b> may include:	<ul style="list-style-type: none"> <li>• data analysis</li> <li>• documentation reviews</li> <li>• focus groups</li> <li>• interviewing colleagues and clients</li> <li>• online searching</li> <li>• product sampling</li> <li>• subscription databases</li> </ul>
<b><i>Key words and phrases</i></b> may include:	<ul style="list-style-type: none"> <li>• American spellings when searching online</li> <li>• cultural or geographic terms</li> <li>• using different thesauri in different databases</li> </ul>
<b><i>Boolean operators</i></b> may include:	<ul style="list-style-type: none"> <li>• exclude - / NOT</li> <li>• include +/ AND</li> <li>• or</li> <li>• phrase searching " "( )</li> <li>• variations, depending on the resource being used</li> </ul>
<b><i>Methods of data analysis</i></b> may include:	<ul style="list-style-type: none"> <li>• data sampling</li> <li>• feedback on results</li> <li>• peer review</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• review of previous research</li> <li>• statistical analysis</li> </ul>
<b>Business objectives</b> may include:	<ul style="list-style-type: none"> <li>• community capacity building</li> <li>• community development</li> <li>• service provision</li> <li>• business planning</li> <li>• financial performance</li> <li>• flexibility, responsiveness</li> <li>• interpersonal communication</li> <li>• marketing and customer service</li> <li>• organisational values and behaviours</li> <li>• people management</li> <li>• work procedures and quality assurance manuals</li> </ul>
<b>Feedback</b> may include:	<ul style="list-style-type: none"> <li>• audit documentation and reports</li> <li>• comments from community, board members, clients and colleagues</li> <li>• customer satisfaction questionnaires</li> <li>• quality assurance data</li> <li>• returned goods</li> </ul>

## BSBRKG304B Maintain business records

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to maintain the records of a business or records system in good order on a day to day basis.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to individuals requiring some understanding of relevant theoretical knowledge relating to recordkeeping functions. It is not assumed that individuals at this level would have responsibility for supervising the work of others; however it is assumed that as a recordkeeping practitioner their work will support effective recordkeeping and governance practices across the organisation.</p> <p>The application is in relation to the maintenance of records from an existing business or records system that has guidelines and processes to assist in the process. Work carried out in the interest of system maintenance will be performed under supervision or in consultation with more senior staff or users of the system.</p>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collate business records	<ul style="list-style-type: none"><li>1.1. Identify individual <i>records</i> or <i>information</i> which should be incorporated into <i>business or records system</i> according to organisational criteria</li><li>1.2. Sort records in accordance with workplace requirements</li><li>1.3. Adhere to <i>security and access requirements</i> in accordance with organisational procedures</li></ul>
2. Update business or records system	<ul style="list-style-type: none"><li>2.1. Identify and record control information for describing new records to be incorporated into business or records system</li><li>2.2. Update control information describing movement or use of records within business or records system</li><li>2.3. Accurately record and update control information in business or records system</li><li>2.4. Identify and remove records of completed business activities from current system for disposal</li></ul>
3. Prepare reports from the business or records system	<ul style="list-style-type: none"><li>3.1. Interpret requests for <i>reports</i> and clarify the content and frequency sought, where necessary</li><li>3.2. Prepare reports from business or records system in accordance with instructions or request</li><li>3.3. Prepare reports in accordance with organisational security and access procedures</li></ul>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to explain and clarify procedures, and to interview users to identify their records/information needs
- literacy skills to read and interpret nature of record content, functions and problems
- problem-solving and analysis skills to identify and manage records.

#### Required knowledge

- key provisions of relevant legislation from all forms of government, regulations, standards and documentation that may affect aspects of business operations, such as:
  - AS 5044.1:2002 AGLS Metadata element set
  - AS 5090:2003 Work process analysis for recordkeeping
  - AS ISO 15489:2004 Records management
  - AS ISO 23081.1:2006 Information and documentation - Records management processes - Metadata for records - Principles
  - Australian Stock Exchange(ASX) Principles of Good Corporate Governance
  - ethical principles
  - codes of practice
  - privacy and freedom of information
  - archives and records legislation
  - occupational health and safety
- general principles and processes of records management and records management systems, such as:
  - systems of control
  - records continuum theory
  - mandate and ownership of business process
  - environmental context
  - records characteristics.

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- complying with organisational procedures and workplace requirements
- knowledge and understanding of business or records systems
- accurately recording information.

#### Context of and specific resources for assessment

Assessment must ensure:

- access to an actual workplace or simulated work environment
- access to office equipment and resources
- access to examples of records, recordkeeping systems and policies
- access to workplace reference materials such as procedural manuals and company policies.

#### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- analysis of responses to case studies and scenarios
- demonstration of techniques
- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- review of authenticated documents from the workplace or training environment
- oral or written questioning to assess knowledge of general principles and processes of business or records systems.

#### Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- administration units
- other knowledge management units.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. ## BSBSLS407A Identify and plan sales prospects

### Modification History

Release	Comments
Release 2	New release of this Qualification released with <i>version 6 of BSB07 Business Services Training Package</i> .  Outdated advice removed

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify potential sales prospects by applying prospecting methods, and to manage own sales performance by establishing a sales plan and managing stress, time and sales-related paperwork.

### Application of the Unit

This unit applies to individuals working in a sales-related position in a small, medium or large enterprise in a wide variety of industries who identify, collate and follow up sales prospect information that can be used to generate leads. Individuals undertaking this unit may be at entry level or have experience in sales sufficient to provide advice and support about aspects of sales solutions as part of a sales team.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable

## Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Employ prospecting methods and qualify prospects	<p>1.1. Identify, consider and evaluate the strengths and limitations of a range of primary and secondary <i>prospecting methods</i></p> <p>1.2. Select prospecting methods to match the market to which the product or service is targeted</p> <p>1.3. Target present, previous and new <i>clients</i> through chosen prospecting methods</p> <p>1.4. Research and establish criteria for qualifying leads according to buyer accessibility, <i>buyer motives</i>, product affordability, purchase authority, legal compliance and return for the seller</p> <p>1.5. Ensure the established criteria represent a standard against which the buying potential of individuals and groups is gauged</p>
2. Manage prospect information	<p>2.1. Develop and implement a system for recording prospect information</p> <p>2.2. Monitor and evaluate the effectiveness of the system for recording prospect information</p> <p>2.3. Refine the system for recording prospect information based on evaluation</p>
3. Establish an individualised sales plan	<p>3.1. Establish individual sales goals and quotas to focus work activities based on organisational sales and marketing objectives</p> <p>3.2. Establish consultation and communication structures with clients and supervisors</p> <p>3.3. Plan and document an individualised sales plan to achieve sales goals and quotas within a work system that is constructed against clear timeframes</p> <p>3.4. Monitor and adjust sales plan in relation to established goals and quotas</p> <p>3.5. Evaluate sales plan and adjust where necessary</p>
4. Complete sales paperwork and reports	<p>4.1. Establish a system to collect, record and organise data associated with the sales process</p> <p>4.2. Complete routine reports at regular intervals according to organisational requirements</p> <p>4.3. Use <i>available technology</i> to facilitate record keeping and production of sales reports</p>
5. Organise workload effectively	<p>5.1. Establish routines to provide structure for work and to manage workload</p> <p>5.2. Allocate time for specific <i>work tasks</i> and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>unanticipated events and activities</p> <p>5.3. Conduct an analysis of the time spent on work-related activities and adjust time spent on tasks if required</p> <p>5.4. Apply time-management strategies to minimise non-productive sales activities</p> <p>5.5. Delegate tasks to individuals or sales team members to share workload as appropriate</p> <p>5.6. Monitor <i>symptoms of stress</i> and establish a plan to reduce stress</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- learning skills to evaluate effectiveness of sales plan and make improvements to contribute to the organisation's operations and outcomes
- literacy and information management skills to collect, record and organise data to:
  - establish a sales plan
  - complete sales reports
- planning skills to establish, monitor and adjust sales plan as required
- research and data analysis skills to determine prospect requirements
- self-evaluation skills to identify symptoms of negative stress
- technological skills to use a range of software and business equipment to:
  - collect and record prospect and sales information
  - design and record formats to facilitate information storage and retrieval
- self-management skills to manage own performance and set priorities
- time-management skills to:
  - meet sales time lines
  - sequence tasks
  - set priorities

### Required knowledge

- information management strategies used to manage prospect and sales data
- key principles associated with self-management
- overview knowledge to identify key provisions of relevant legislation, codes of practice and national standards that affect business operations as they relate to sales, such as:
  - anti-discrimination
  - ethical principles
  - consumer protection
  - contract law
  - privacy laws
  - Trade Practices Act
- prospecting methods used in the sales process
- principles of buyer motives
- strategies and techniques to prevent and manage stress

## Evidence Guide

*The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• demonstration of the use and management of different prospecting methods targeting a present, previous and new client</li> <li>• research and establishment of criteria used in qualifying leads identified through prospecting methods</li> <li>• recording, storage and retrieval of prospect information</li> <li>• development and documentation of a sales plan for a specified time period, including: <ul style="list-style-type: none"> <li>• sales goals</li> <li>• quotas</li> <li>• monitoring and evaluation strategies</li> </ul> </li> <li>• organisation of own workload.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• a workplace or simulated work environment</li> <li>• organisational sales prospect information, databases and records</li> <li>• office equipment and resources.</li> </ul>

## BSBSLS408A Present, secure and support sales solutions

### Modification History

Release	Comments
Release 3	New release of this Unit with <i>version 7.0 of BSB07 Business Services Training Package</i> .  Trade Practices Act replaced with Competition and Consumer Act 2010 in the Required Knowledge
Release 2	New release of this Unit with <i>version 6.0 of BSB07 Business Services Training Package</i> .  Outdated advice removed
Release 1	Initial release of this Unit.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to present sales solutions that respond to the specific buying needs of a client, and to use sales processes associated with securing prospect commitment to proceed with a sale. The unit also includes attending to post-sales activities that build and strengthen the partnership between a salesperson and the client, and enhance the prospect of future sales.

### Application of the Unit

This unit applies to individuals working in a sales-related position in a small, medium or large enterprise in a wide variety of industries who use specific sales techniques to present a sales solution to meet buyer needs, secure a prospect's commitment to purchase a product or service, and build post-sale and long-term relationships to establish an ongoing relationship with clients. They may provide sales solutions individually, or provide advice and support about aspects of sales solutions to support a sales team.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

Not applicable

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Prepare for a sales presentation	<p>1.1 Obtain and organise products, ideas and services for use within a sales presentation</p> <p>1.2 Review product information to ensure familiarity with products</p> <p>1.3 Identify sales tactic options, and assess and choose them in terms of their ability to meet the needs and preferences of the prospect</p> <p>1.4 Consider a variety of sales solutions and prepare to meet buyer needs</p> <p>1.5 Identify and select <i>sales aids</i></p> <p>1.6 Identify alternatives for prospects and assess them in relation to anticipated buyer needs</p>
2. Present a sales solution	<p>2.1 Use gestures, posture, body language, facial expressions and voice to create a supportive selling environment</p> <p>2.2 Use listening skills and open-ended questions to identify buyer needs, preferences, motives and objections</p> <p>2.3 Adjust presentation to match the needs and preferences of the buyer</p> <p>2.4 Use persuasive communication techniques to secure buyer interest</p> <p>2.5 Ensure the presentation demonstrates and communicates the key features of the product and emphasises benefits in relation to identified buyer needs</p> <p>2.6 Obtain and present <i>proof of benefits</i> through product purchase</p> <p>2.7 Use sales aids to build buyer understanding of how the product is aligned with needs</p>
3. Respond to buyer signals	<p>3.1 Identify and assess <i>verbal</i> and <i>non-verbal buying signals</i></p> <p>3.2 Use probing to identify <i>source of buyer resistance</i></p> <p>3.3 Identify the strengths and limitations of <i>buyer resistance strategies</i></p> <p>3.4 Select and implement a strategy for managing buyer resistance</p> <p>3.5 Use trial closes strategically during different stages of the sales process</p>
4. Negotiate and finalise	<p>4.1 Initiate <i>formal close</i> to the sales process following one or</p>

the sale	<p>more trial closes</p> <p>4.2 Select a strategy to close the sale and use supportive and confirming language to support the closure of the sales process</p> <p>4.3 Negotiate <b>conditions</b> of the agreement, outline a summary of the agreement to the buyer, and confirm the buyer's decision</p> <p>4.4 Provide advice on financing arrangements if required</p> <p>4.5 Prepare and complete sales documents, and process and monitor client order</p> <p>4.6 Identify and present cross-selling opportunities to the buyer</p>
5. Support post-sale activities	<p>5.1 Ensure contact is made with the buyer post-sale to ensure agreed expectations have been met</p> <p>5.2 Provide technical assistance or advice and assist clients to access appropriate after-sales support</p> <p>5.3 Use <b>feedback solicitation methods</b> on the sales process and product satisfaction</p> <p>5.4 Address and resolve service problems and difficulties identified through feedback</p> <p>5.5 Develop and implement <b>client loyalty strategies</b> to secure buyer loyalty and facilitate ongoing contact</p> <p>5.6 Offer and implement additional sales solutions and benefits to clients when opportunities arise</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- learning skills to develop and maintain knowledge of products, ideas and services for use within a sales presentation
- literacy and numeracy skills to:
  - prepare sales documentation
  - process sales transactions
  - calculate financing arrangements
  - keep client sales records
  - use sales statistics to support a verbal argument
- organisational and time-management skills to schedule follow-up contacts
- verbal communication skills to:
  - demonstrate how product benefits and key features fulfil buyers' needs
  - develop rapport and build relationships with clients
  - manage conflict and customer dissatisfaction
  - negotiate to manage buyer resistance
  - question clients to determine client needs and preferences
  - use persuasive and assertive language in promoting product features and benefits
- technological skills to use equipment to assist in presenting sales information.

### Required knowledge

- detailed product knowledge, including product:
  - advantages and disadvantages
  - features
  - service benefits
- identification and overview knowledge of key provisions of relevant legislation and codes of practice that relate to sales, for example:
  - anti-discrimination
  - ethical principles
  - consumer protection
  - contract law
  - privacy laws
- materials and aids that support presentations
- Competition and Consumer Act 2010
- organisational policies and procedures relating to orders and client services
- principles of achieving an effective sales presentation mix
- statistical methods to demonstrate sales performance
- strategies to manage client accounts, to build client goodwill and to develop client loyalty.

## Evidence Guide

*The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>demonstration of principles of effective sales presentation mix and sales closure techniques through presentation of a sales solution</li> <li>demonstration of support for post-sale activities.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>a workplace or simulated work environment</li> <li>product information and sales records and documentation</li> <li>office equipment, machines and sales support materials to make a presentation.</li> </ul>
<b>Method of assessment</b>	<p>The following assessment method is appropriate for this unit:</p> <ul style="list-style-type: none"> <li>analysis of responses to case studies and scenarios</li> <li>observations of presentations of sales solutions</li> <li>direct questioning combined with portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate</li> <li>oral or written questioning to assess knowledge of sales tactic options, proposed sales solutions and ways to overcome buyer resistance</li> <li>observation of persuasive communication techniques and listening skills used when presenting a sales solution and closing a sale</li> <li>review of sales aids identified, selected and used</li> <li>evaluation of strategies implemented to manage buyer resistance.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Sales aids</i></b> may include:	<ul style="list-style-type: none"> <li>• drawings</li> <li>• electronic media</li> <li>• graphs</li> <li>• models</li> <li>• photographs</li> <li>• printed materials</li> <li>• products</li> <li>• product samples</li> <li>• transparencies</li> <li>• whiteboards.</li> </ul>
<b><i>Proof of benefits</i></b> may include:	<ul style="list-style-type: none"> <li>• anecdotes and examples</li> <li>• comparisons</li> <li>• statistics</li> <li>• testimonials.</li> </ul>
<b><i>Verbal buying signals</i></b> of the prospect may include:	<ul style="list-style-type: none"> <li>• confirmations</li> <li>• questions</li> <li>• statements of requirement.</li> </ul>
<b><i>Non-verbal buying signals</i></b> of the prospect may include:	<ul style="list-style-type: none"> <li>• close examination of the product</li> <li>• moving closer to where a product is to be installed</li> <li>• smiling and nodding.</li> </ul>
<b><i>Source of buyer resistance</i></b> may include:	<ul style="list-style-type: none"> <li>• company resistance</li> <li>• no perceived need</li> <li>• price resistance</li> <li>• salesperson resistance</li> <li>• service dissatisfaction</li> <li>• timing issues</li> <li>• uncertainty about the product.</li> </ul>
<b><i>Buyer resistance strategies</i></b> may include:	<ul style="list-style-type: none"> <li>• assertive messages</li> <li>• boomerang</li> <li>• checking perceptions</li> <li>• direct denial</li> <li>• incentives offer</li> <li>• indirect denial</li> </ul>

	<ul style="list-style-type: none"> <li>• requesting additional information from buyers</li> <li>• open and closed questions</li> <li>• superior benefit</li> <li>• trial offer.</li> </ul>
<b>Formal close</b> may include:	<ul style="list-style-type: none"> <li>• inducement</li> <li>• narrative close</li> <li>• offering alternative choices</li> <li>• salesperson request to the prospect to agree to purchase the product or service</li> <li>• summary of product benefits.</li> </ul>
<b>Conditions</b> may include:	<ul style="list-style-type: none"> <li>• client loyalty</li> <li>• delivery</li> <li>• length of contract</li> <li>• payment options</li> <li>• price.</li> </ul>
<b>Feedback solicitation methods</b> may include:	<ul style="list-style-type: none"> <li>• email dialogue</li> <li>• focus groups</li> <li>• one-on-one interviews</li> <li>• surveys</li> <li>• telephone interviews.</li> </ul>
<b>Client loyalty strategies</b> may include:	<ul style="list-style-type: none"> <li>• client clubs</li> <li>• client reward schemes</li> <li>• credit or discount facilities</li> <li>• formal letter of thanks</li> <li>• handwritten note thanking the client</li> <li>• offering promotional items</li> <li>• phone call thanking the client for the business.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop staffing plan	<p>1.1.Determine <i>staffing requirements</i> to allow the business to run effectively, in accordance with the business requirements as outlined in the business plan</p> <p>1.2.Identify and compare the existing skills/competencies of owner/s and staff with business requirements to identify any gaps</p> <p>1.3.Develop <i>policies and procedures</i> for owner/s and staff, in accordance with the business plan</p>
2. Recruit, induct, train and retain the team	<p>2.1.Develop job/position descriptions, competencies required and selection criteria to meet the needs of the business</p> <p>2.2.Judge information obtained from each candidate against specified selection criteria and decide selection in accordance with business needs and legal requirements</p> <p>2.3.Induct new staff members in accordance with the policies and procedures of the business</p> <p>2.4.Make team members aware of their responsibilities and performance requirements as soon as practicable and take opportunities to coach team members who are unfamiliar with the procedures of the business</p> <p>2.5.Develop and implement a <i>staff development program and career paths</i> based on the requirements of business and staff competencies</p> <p>2.6.<i>Advertise staff vacancies</i> appropriately in accordance with staffing plan</p>
3. Comply with INDUSTRIAL RELATIONS obligations	<p>3.1.Clarify workplace rights and obligations of employers and employees, in accordance with <i>legal requirements and codes of practice</i></p> <p>3.2.Counsel staff, if required, in a positive and constructive manner and record outcomes accurately</p>
4. Maintain staff records	<p>4.1.Develop <i>staff records system</i> to provide timely and accurate information, in accordance with confidentiality, legal and taxation requirements</p> <p>4.2.Monitor and accurately maintain the system for recording and retrieving personnel and payroll information and seek specialist advice where required</p>
5. Manage staff	<p>5.1.Regularly review contribution and skills of self and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>other team members to ensure performance is in line with agreed <i>performance measures</i></p> <p>5.2. Monitor and adjust staffing requirements to respond to any changes in tasks and functions required by the business</p> <p>5.3. Support and encourage staff, and acknowledge and reward their contribution to the business</p> <p>5.4. Regularly provide opportunities for staff to discuss work related issues</p> <p>5.5. Develop <i>contingency plans</i> to cope with unexpected or extreme situations and take appropriate corrective action as required</p>
6. Review team performance	<p>6.1. Develop positive and constructive relationships with and between <i>team members</i></p> <p>6.2. Review and update team objectives in support of business goals on a regular basis in consultation with team members</p> <p>6.3. Identify strengths and weaknesses of team against current and expected work requirements</p> <p>6.4. Schedule time, on a regular basis, for team members to review work operations in order to maintain and improve operational efficiency</p> <p>6.5. Encourage team members to monitor their own performance, suggest improvements and to identify professional development needs, in accordance with personal and business requirements</p> <p>6.6. Monitor and review staff turnover rate</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to identify workplace skill gaps
- coaching skills
- communication skills to relate to staff
- conflict resolution skills
- literacy skills to interpret legal requirements, to compile reports and to prepare a job/position description
- team building and motivation skills.

#### Required knowledge

- commonwealth, state/territory and local government legislative requirements relating to business operation, especially in regard to occupational health and safety (OHS) and environmental issues, equal employment opportunity (EEO), industrial relations and anti-discrimination
- OHS responsibilities and procedures for managing hazards
- relevant industry awards/enterprise agreements
- staff development and career planning
- staff counselling, grievance and disciplinary procedures
- unfair dismissal legislation and procedures.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>managing a small team including staff selection, staff records, induction, training and development</li> <li>developing and maintaining team performance to enhance business operations</li> <li>knowledge of relevant legislative requirements affecting business operation.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>access to relevant documentation</li> <li>candidate's individual circumstances and work in the context of running a small business, are the basis for assessment.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>portfolio of evidence including staff policies and records, and contingency plans</li> <li>oral or written questioning to assess knowledge of staff recruitment procedures, staff development and review programs</li> <li>review of job/position descriptions and selection criteria developed</li> <li>review of documentation monitoring and reviewing staff turnover rate.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>BSBSMB405A Monitor and manage small business operations.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Staffing requirements</i> may include:	<ul style="list-style-type: none"> <li>• full-time, part-time, permanent, temporary or casual</li> <li>• number of staff</li> <li>• responsibilities, competencies required</li> <li>• self, other owners, family and/or friends</li> <li>• sub-contractors or external advisors/consultants</li> <li>• time commitment, performance expectations</li> </ul>
<i>Policies and procedures</i> must include:	<ul style="list-style-type: none"> <li>• complaint and grievance procedures</li> <li>• culturally appropriate entitlements e.g. funeral leave, national/religious days</li> <li>• culturally appropriate procedures e.g. how business will enact cultural requirements for relationships between owner/operator, employees and service providers</li> <li>• employment conditions, equal opportunity, anti-discrimination, cultural diversity</li> <li>• induction and training</li> <li>• OHS</li> <li>• recruitment and selection</li> <li>• performance measures</li> <li>• professional development</li> </ul>
<i>Staff development program and career paths</i> may include	<ul style="list-style-type: none"> <li>• attendance at courses</li> <li>• career planning</li> <li>• coaching</li> <li>• flexible learning</li> <li>• job rotation</li> <li>• mentoring</li> <li>• on-the-job training</li> <li>• professional development</li> <li>• staff exchanges</li> <li>• succession planning</li> </ul>
<i>Advertising staff vacancies</i> may	<ul style="list-style-type: none"> <li>• electronic (radio, television and internet)</li> </ul>

<b>RANGE STATEMENT</b>	
include:	<ul style="list-style-type: none"> <li>• noticeboards</li> <li>• print media</li> <li>• word-of-mouth</li> </ul>
<b><i>Industrial relations</i></b> may include:	<ul style="list-style-type: none"> <li>• awards and/or industrial agreements and relevant industrial instruments</li> <li>• counselling, dismissal procedures</li> </ul>
<b><i>Legal requirements and codes of practice</i></b> may include:	<ul style="list-style-type: none"> <li>• award and enterprise agreements and relevant industrial instruments</li> <li>• commonwealth, state/territory and local government legislative requirements affecting business operation, especially in regard to OHS and environmental issues, EEO, industrial relations and anti-discrimination</li> <li>• relevant industry codes of practice</li> </ul>
<b><i>Staff records system</i></b> must include:	<ul style="list-style-type: none"> <li>• disciplinary and grievance procedures</li> <li>• employee records (including tax file number, remuneration, leave and training records)</li> <li>• job/position descriptions</li> <li>• OHS record</li> <li>• records of taxation and superannuation payments made</li> </ul>
<b><i>Performance measures</i></b> may include:	<ul style="list-style-type: none"> <li>• overall staff productivity</li> <li>• percentage of chargeable hours/days per week</li> <li>• performance of key people</li> <li>• ratio of direct workers to those who support, supervise or manage them</li> <li>• ratio of sales dollars per employee</li> <li>• staff morale, work ethic, work satisfaction</li> </ul>
<b><i>Contingency plans</i></b> may include:	<ul style="list-style-type: none"> <li>• accidents or emergencies</li> <li>• environmental issues</li> <li>• fluctuating workloads</li> <li>• OHS</li> <li>• unpredicted customer demand/busy periods</li> <li>• unpredicted staff shortages</li> </ul>
<b><i>Team members</i></b> may include:	<ul style="list-style-type: none"> <li>• employees, trainees/apprentices, sub-contractors or external advisers/consultants</li> <li>• owner/s, partners, family members</li> </ul>

## BSBWHS301A Maintain workplace safety

### Modification History

Release	Comments
Release 1	<p>This Unit first released with <i>BSB07 Business Training Package version 7.0</i>.</p> <p>Replaces and is equivalent to BSBCMN311B Maintain workplace safety.</p>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to implement and monitor the organisation's work health and safety (WHS) policies, procedures and programs as part of a small work team.

### Application of the Unit

This unit applies to workers who have a key role in maintaining workplace safety in an organisation. In their role they closely monitor aspects of work associated with the safe delivery of products and services, and they have an important responsibility in influencing ongoing safety in the workplace.

At this level, work will normally be carried out within known routines, methods and procedures but may also involve a number of complex or non-routine activities that require some discretion and judgement.

*NOTE: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.*

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Assist with incorporating WHS policies and procedures into work team processes	<p>1.1 Use <b>WHS legislation</b> as the basis for meeting the health and safety requirements of a small work team</p> <p>1.2 Assist in providing and clearly explaining information to the work team about the organisation's <b>WHS policies, procedures, programs and legislative requirements</b>, including the legal duties, powers, rights, obligations and responsibilities of individuals and parties inside and outside the workplace</p> <p>1.3 Assist in regularly providing and clearly explaining information to the work team about <b>identifying hazards</b> and the outcomes of <b>risk assessment</b></p>
2. Support participative arrangements for managing WHS	<p>2.1 Implement and monitor <b>organisational consultative procedures</b> to facilitate participation of the work team in managing work area hazards</p> <p>2.2 Promptly deal with issues raised through consultation according to organisational procedures for issue resolution</p> <p>2.3 Encourage and assist work team members to contribute to managing WHS</p> <p>2.4 Engage with individuals and work teams to identify and implement improvements in managing WHS feedback</p>
3. Support the organisation's procedures for providing WHS training	<p>3.1 Provide advice on <b>WHS training needs</b> of individuals and the work team</p> <p>3.2 Provide advice on strategies and opportunities for developing work team's WHS competence</p> <p>3.3 Provide <b>coaching and mentoring assistance</b> to work team members to support the effective development of individual and team WHS competence</p>
4. Participate in identifying hazards, and assessing and controlling risks for the work area	<p>4.1 Provide advice on <b>hazards in the work area</b> according to organisational policies and procedures, and WHS legal requirements</p> <p>4.2 Support the implementation of <b>procedures to control risks</b> using the hierarchy of control and according to organisational procedures and WHS legal requirements</p> <p>4.3 Identify and report inadequacies in existing risk control measures according to organisational procedures, the hierarchy of control and WHS legal requirements</p> <p>4.4 Accurately complete and maintain WHS incident records in the work area according to organisational procedures and WHS legislative requirements</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - assess resources required to apply risk controls
  - assist with environmental monitoring
  - identify hazards and assess risks appropriate to own work area and job role
  - monitor incidents and hazards
  - evaluate effectiveness of risk controls
- coaching and mentoring skills to provide support to colleagues
- communication skills to communicate with people from a range of backgrounds and with a range of abilities
- literacy skills to understand workplace procedures and work instructions for identifying and reporting hazards, and for interpreting WHS signs and symbols.

### Required knowledge

- characteristics and composition of the work team
- hazards and associated risks in the workplace
- organisational policies and procedures relating to WHS, including hazard management, fire, emergencies, evacuation, incident investigation and reporting
- relevant Acts, regulations and codes of practice from all levels of government that impact on business operations, especially with regard to WHS and environmental issues, equal opportunity, industrial relations and anti-discrimination
- WHS aspects of other organisational systems and procedures.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"><li>• implementing organisational management systems and WHS procedures in own work area</li><li>• understanding of and meeting WHS legal and organisational requirements as they apply to own work area and job role</li><li>• knowledge of procedures for identifying hazards in the work area</li><li>• knowledge of procedures for assessing and controlling risks to health and safety associated with those hazards according to organisational WHS procedures.</li></ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"><li>• safety processes relevant to the area of work</li><li>• relevant information and documentation on compliance requirements, such as:<ul style="list-style-type: none"><li>• organisational policies and procedures, standard operating procedures and plans</li><li>• relevant Acts, regulations, codes of practice, licensing requirements and standards</li></ul></li><li>• relevant internal and external information</li><li>• appropriate office equipment and resources used in the identification and rectification of WHS compliance breaches.</li></ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"><li>• direct questioning combined with review of portfolios of evidence and third-party reports of on-the-job performance by the candidate</li><li>• review of documents on WHS Acts, regulations, codes of practice, standards, policies and</li></ul>

	<p>procedures developed and communicated to workers</p> <ul style="list-style-type: none"><li>• analysis of responses to case studies and scenarios</li><li>• demonstration of applying WHS legislation</li><li>• oral or written questioning to assess knowledge of research and data-collection methods to obtain evidence of compliance with WHS legislation</li><li>• assessment of duty of care arrangements.</li></ul>
<b>Guidance information for assessment</b>	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>WHS legislation</i></b> may include:	<ul style="list-style-type: none"> <li>• WHS Acts, regulations and codes of practice</li> <li>• components of Acts and regulations, such as: <ul style="list-style-type: none"> <li>• dangerous goods</li> <li>• environmental protection</li> <li>• equal opportunity and anti-discrimination</li> <li>• industrial relations</li> <li>• privacy</li> <li>• workers' compensation.</li> </ul> </li> </ul>
<b><i>WHS policies, procedures, programs and legislative requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• consultative arrangements for workers in the work area</li> <li>• emergency plan and procedures</li> <li>• first aid provision, and medical practitioner contact and attention</li> <li>• hazard reporting procedures</li> <li>• incident investigation</li> <li>• plant and equipment maintenance and use</li> <li>• procedures for hazard identification</li> <li>• procedures for risk assessment, and the selection and implementation of risk control measures</li> <li>• purchasing policy and procedures</li> <li>• safe operating procedures and instructions</li> <li>• site access and egress</li> <li>• transport and storage of dangerous goods</li> <li>• use and care of personal protective equipment</li> <li>• use and storage of hazardous substances</li> <li>• WHS arrangements for on-site contractors, visitors and members of the public</li> <li>• WHS audits and safety inspections.</li> </ul>
<b><i>Individuals and parties</i></b> may include:	<ul style="list-style-type: none"> <li>• contractors and subcontractors</li> <li>• customers</li> <li>• persons conducting businesses or undertakings (PCBUs) or their officers</li> <li>• workers</li> <li>• other persons at a workplace</li> </ul>

	<ul style="list-style-type: none"> <li>• WHS entry permit holders</li> <li>• WHS inspectors</li> <li>• WHS regulators.</li> </ul>
Methods for <i>identifying hazards</i> and <i>risk assessment</i> include:	<ul style="list-style-type: none"> <li>• as specified in WHS Acts, regulations and codes of practice</li> <li>• checking equipment before and during work</li> <li>• consulting work team members</li> <li>• housekeeping</li> <li>• reviewing records, for example:               <ul style="list-style-type: none"> <li>• equipment maintenance</li> <li>• hazardous chemicals, including labels and safety data sheet (SDS) register, and dangerous goods storage list</li> <li>• injury</li> <li>• training plan</li> </ul> </li> <li>• workplace inspections in area of responsibility.</li> </ul>
<i>Organisational consultative procedures</i> may include:	<ul style="list-style-type: none"> <li>• attendance of health and safety representatives at management meetings</li> <li>• counselling and disciplinary processes</li> <li>• early response to worker suggestions, requests, reports and concerns put forward to management</li> <li>• formal and informal meetings</li> <li>• health and safety committees</li> <li>• other committees, for example planning and purchasing.</li> </ul>
<i>WHS training needs</i> may include:	<ul style="list-style-type: none"> <li>• coaching, mentoring and/or supervision</li> <li>• formal and informal learning programs</li> <li>• internal and external training programs</li> <li>• personal study.</li> </ul>
<i>Coaching and mentoring assistance</i> may include:	<ul style="list-style-type: none"> <li>• explaining and clarifying</li> <li>• presenting and promoting a safe workplace</li> <li>• problem solving</li> <li>• providing encouragement</li> <li>• providing feedback to another team member</li> <li>• respecting the contribution of all participants and giving credit for achievements.</li> </ul>

<p><b><i>Hazards in the work area</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• anything that has the potential to cause harm</li> <li>• as specified in WHS Acts, regulations and codes of practice</li> <li>• blocked exits</li> <li>• ergonomically unsuitable workstations and task design, for example:             <ul style="list-style-type: none"> <li>• repetitive work</li> <li>• poor lighting or glary surfaces</li> <li>• non-adjustable work surfaces and seating</li> </ul> </li> <li>• internal or external threat of occupational violence or bullying</li> <li>• lack of adequate storage</li> <li>• reliance on low order control measure (such as personal protective equipment) to reduce worker risk exposure, instead of controlling the hazard itself</li> <li>• slippery and uneven floors</li> <li>• unguarded and poorly maintained machinery and equipment</li> <li>• unlabelled chemicals and substances</li> <li>• untidy or noisy work areas.</li> </ul>
<p><b><i>Procedures to control risks</i></b> may include actions, such as:</p>	<ul style="list-style-type: none"> <li>• as specified in WHS Acts, regulations and codes of practice</li> <li>• application of the hierarchy of control, namely:             <ul style="list-style-type: none"> <li>• eliminate the risk</li> <li>• reduce or minimise the risk through:                 <ul style="list-style-type: none"> <li>• engineering controls</li> <li>• administrative controls</li> <li>• personal protective equipment</li> </ul> </li> </ul> </li> <li>• regular consultation with workers.</li> </ul>

## Unit Sector(s)

Regulation, Licensing and Risk – Work Health and Safety

## BSBWHS401A Implement and monitor WHS policies, procedures and programs to meet legislative requirements

### Modification History

Release	Comments
Release 1	<p>This Unit first released with <i>BSB07 Business Training Package version 7.0</i>.</p> <p>Replaces BSBOHS407A Monitor a safe workplace.</p>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to implement and monitor the organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area in order to meet legislative requirements.

### Application of the Unit

This unit applies to workers with supervisory responsibilities for implementing and monitoring the organisation's WHS policies, procedures and programs in a work area.

The unit applies to individuals with a broad knowledge of WHS policies who contribute well-developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. These workers provide supervision and guidance to others and have limited responsibility for the output of others.

*NOTE: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.*

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Provide information to the work team about WHS policies and procedures	<p>1.1 Accurately explain to the work team, relevant provisions of <b>WHS Acts, regulations and codes of practice</b></p> <p>1.2 Provide information about the <b>organisation's WHS policies, procedures and programs</b>, and ensure it is readily accessible to and understandable by the work team</p> <p>1.3 Regularly provide and clearly explain to the work team, <b>information</b> about identified hazards and the outcomes of risk assessment and control</p>
2. Implement and monitor participation arrangements for managing WHS	<p>2.1 Communicate to workplace parties the importance of effective consultation mechanisms in managing health and safety risks in the workplace</p> <p>2.2 Apply <b>consultation procedures</b> to facilitate participation of the work team in managing work area hazards</p> <p>2.3 Promptly deal with issues raised through consultation, according to organisational consultation procedures and WHS legislative and regulatory requirements</p> <p>2.4 Promptly record and communicate to the work team the outcomes of consultation over WHS issues</p>
3. Implement and monitor organisational procedures for providing WHS training	<p>3.1 Identify WHS training needs according to organisational requirements, and WHS legislative and regulatory requirements</p> <p>3.2 Make arrangements to meet WHS training needs of team members in consultation with relevant individuals</p> <p>3.3 Provide workplace learning opportunities, and coaching and mentoring assistance, to facilitate team and individual achievement of identified WHS training needs</p> <p>3.4 Identify and report to management the costs associated with providing training for work team, for inclusion in financial and management plans</p>
4. Implement and monitor organisational procedures and legal requirements for identifying hazards and assessing and controlling risks	<p>4.1 Identify and report on hazards in work area according to WHS policies and procedures, and WHS legislative and regulatory requirements</p> <p>4.2 Promptly action team member hazard reports according to organisational procedures and WHS legislative and regulatory requirements</p> <p>4.3 Implement <b>procedures to control risks</b> using the hierarchy of control, according to organisational and WHS legislative requirements</p> <p>4.4 Identify and report inadequacies in existing risk controls according to hierarchy of control and WHS legislative</p>

	requirements  4.5 Monitor outcomes of reports on inadequacies, where appropriate, to ensure a prompt organisational response
5. Implement and monitor organisational procedures for maintaining WHS records for the team	5.1 Accurately complete and maintain <b>WHS records</b> of incidents of occupational injury and disease in work area, according to WHS policies, procedures and legislative requirements  5.2 Use aggregate information and data from work area records to identify hazards and monitor risk control procedures in work area

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical and problem solving skills to:
  - identify hazards
  - assess risks in the work area
  - review information relating to monitoring and evaluating incidents, and the effectiveness of risk controls
- coaching and mentoring skills to provide support to colleagues
- literacy skills to understand and interpret documentation, and to interpret WHS requirements.

### Required knowledge

- hazards and associated risks in the workplace
- key provisions of relevant WHS Acts, regulations and codes of practice that apply to the business
- organisational policies and procedures relating to hazard management, fire, emergency, evacuation, incident investigation and reporting
- relevance of consultation and participation as key mechanisms for improving WHS and culture
- WHS legislative responsibilities, duties and obligations of managers, supervisors, persons conducting businesses or undertakings (PCBUs) or their officers, and workers in the workplace.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"><li>• applying organisational WHS management systems and procedures in the work team area</li><li>• applying procedures for assessing and controlling risks to health and safety associated with those hazards, according to the hierarchy of control and as specified in commonwealth and state or territory WHS Acts, regulations and codes of practice</li><li>• providing specific, clear and accurate information and advice on workplace hazards to work team</li><li>• knowledge of legal responsibilities of managers, supervisors, PCBU's or their officers and workers in the workplace.</li></ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"><li>• an actual workplace or simulated environment</li><li>• office equipment and resources</li><li>• examples of documentation relating to hazards in the workplace</li><li>• examples of documents relating to workplace safety, hazard identification and risk assessment.</li></ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"><li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate</li><li>• review of records communicating the outcomes of consultation over WHS issues to the work team</li><li>• analysis of responses to case studies and scenarios</li><li>• review of reports to management on the costs associated with providing training for the work team</li></ul>

	<ul style="list-style-type: none"><li>• oral or written questioning to assess knowledge of workplace safety and hazards</li><li>• examples of risk assessments</li><li>• evaluation of actioning of team member hazard reports</li><li>• review of WHS records of occupational injury and disease incidents in work area.</li></ul>
<b>Guidance information for assessment</b>	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>WHS Acts, regulations and codes of practice</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• applicable commonwealth and state or territory WHS Acts, regulations and codes of practice</li> <li>• common law duties to meet general duty of care requirements</li> <li>• duty holders, as specified in WHS Acts: <ul style="list-style-type: none"> <li>• PCBUs or their officers</li> <li>• workers</li> <li>• other persons at a workplace</li> </ul> </li> <li>• WHS legislative and regulatory requirements for effective management of hazards</li> <li>• WHS legislative and regulatory requirements for establishing consultation arrangements, including those for health and safety representatives and health and safety committees</li> <li>• WHS legislative and regulatory requirements for providing information and training, including: <ul style="list-style-type: none"> <li>• training in safe operating procedures</li> <li>• procedures for workplace hazards</li> <li>• hazard identification</li> <li>• risk assessment and risk control</li> <li>• emergency and evacuation procedures</li> </ul> </li> <li>• WHS legislative, regulatory and other requirements for the maintenance and confidentiality of records of occupational injury and disease.</li> </ul>
<p><b><i>Organisation's WHS policies, procedures and programs</i></b> may address:</p>	<ul style="list-style-type: none"> <li>• acquisition, use, storage and disposal of hazardous chemicals</li> <li>• alcohol and other drug intoxication</li> <li>• consultation arrangements for workers in work area</li> <li>• emergency and evacuation procedures</li> <li>• family-friendly environment</li> <li>• first aid provision and medical treatment</li> <li>• hazard reporting procedures</li> <li>• incident investigation</li> <li>• life-work balance strategies</li> <li>• maintenance and use of plant and equipment</li> </ul>

	<ul style="list-style-type: none"> <li>• procedures for hazard identification</li> <li>• procedures for risk assessment, and selection and implementation of risk controls</li> <li>• purchasing policy and procedures</li> <li>• requirements of applicable commonwealth and state or territory WHS Acts, regulations and codes of practice</li> <li>• safe operating procedures and instructions</li> <li>• site access and egress</li> <li>• transport and storage of dangerous goods</li> <li>• use and care of personal protective equipment</li> <li>• WHS arrangements for on-site contractors and subcontractors, visitors and members of the public</li> <li>• WHS audits and inspections.</li> </ul>
<b>Information</b> may result from:	<ul style="list-style-type: none"> <li>• examining commonwealth and state or territory WHS Acts, regulations and codes of practice</li> <li>• checking equipment before and during work</li> <li>• consulting work team members through daily informal worker consultation and regular formal meetings</li> <li>• housekeeping</li> <li>• reviewing health and safety records, including hazard reports, hazardous substances and dangerous goods registers, and injury records</li> <li>• WHS audits and review of audit reports</li> <li>• workplace inspections in area of responsibility.</li> </ul>
<b>Consultation procedures</b> may include:	<ul style="list-style-type: none"> <li>• attendance of health and safety representatives at management and WHS planning meetings</li> <li>• early response to worker suggestions, requests, reports and concerns put forward to management</li> <li>• election of health and safety representatives according to legislative requirements</li> <li>• formal and informal meetings</li> <li>• health and safety committees</li> <li>• individual performance management processes</li> <li>• other committees, for example planning and purchasing</li> <li>• requirements as specified in commonwealth and state or territory WHS Acts, regulations and codes of practice.</li> </ul>
<b>Procedures to control risks</b> may include:	<ul style="list-style-type: none"> <li>• as specified in commonwealth and state or territory WHS Acts, regulations and codes of practice</li> <li>• consultation with workers and their representatives</li> <li>• redesign of job, process or workplace, for example:</li> </ul>

	<ul style="list-style-type: none"> <li>• introducing mechanical handling equipment</li> <li>• raising or lowering work platforms</li> <li>• rearranging material flow, timing and/or scheduling</li> <li>• removing the cause of a risk at its source (eliminating the hazard), for example removing stored goods permanently from emergency exit passageways</li> <li>• selecting controls according to the hierarchy of risk control, for example working through the hierarchy from the most effective to least effective control.</li> </ul>
<b>WHS records</b> may include:	<ul style="list-style-type: none"> <li>• any record of alcohol or drug use</li> <li>• as specified in commonwealth and state or territory WHS Acts, regulations and codes of practice</li> <li>• audit and inspection reports</li> <li>• consultation, for example: <ul style="list-style-type: none"> <li>• meetings of health and safety committees</li> <li>• work team meeting agendas, including WHS items and actions</li> </ul> </li> <li>• first aid/medical post records</li> <li>• hazardous chemicals registers</li> <li>• induction, instruction and training</li> <li>• manufacturer and supplier information, including dangerous goods storage lists</li> <li>• plant and equipment maintenance and testing reports</li> <li>• workers' compensation and rehabilitation records</li> <li>• workplace environmental monitoring records.</li> </ul>

## Unit Sector(s)

Regulation, Licensing and Risk – Work Health and Safety

## BSBWHS501A Ensure a safe workplace

### Modification History

Release	Comments
Release 1	<p>This Unit first released with <i>BSB07 Business Training Package version 7.0</i>.</p> <p>Replaces and is equivalent to BSBOHS509A Ensure a safe workplace.</p>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to establish, maintain and evaluate the organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area according to WHS legislative requirements.

### Application of the Unit

This unit applies to managers working in a range of contexts. It takes a systems approach and addresses compliance with relevant legislative requirements.

Those who have or are likely to have responsibility for WHS as part of their broader management role should undertake this unit.

The unit is relevant for people with obligations under WHS legislation, for example persons conducting a business or undertaking (PCBUs) or their officers (as defined by relevant legislation).

*NOTE: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.*

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Establish and maintain a WHS management system	<p>1.1 Locate, adapt, adopt and communicate WHS policies that clearly define the organisation's commitment to complying with <b>WHS legislation</b></p> <p>1.2 Identify <b>duty holders</b> and define WHS responsibilities for all workplace personnel according to WHS legislation, policies, procedures and programs</p> <p>1.3 Identify and approve financial and human resources required by the WHS management system (WHSMS)</p>
2. Establish and maintain effective and compliant participation arrangements for managing WHS	<p>2.1 Work with workers and their representatives to set up and maintain participation arrangements according to relevant WHS legislation</p> <p>2.2 Appropriately resolve issues raised through participation and consultation arrangements according to relevant WHS legislation</p> <p>2.3 Promptly provide information about the outcomes of participation and consultation to workers and ensure it is easy for them to access and understand</p>
3. Establish and maintain procedures for effectively identifying hazards, and assessing and controlling risks	<p>3.1 Develop procedures for ongoing hazard identification, and assessment and <b>control of associated risks</b></p> <p>3.2 Include hazard identification at the planning, design and evaluation stages of any change in the workplace to ensure that new hazards are not created by the proposed changes and existing hazards are controlled</p> <p>3.3 Develop and maintain procedures for selecting and implementing risk controls according to the hierarchy of control and WHS legislative requirements</p> <p>3.4 Identify inadequacies in existing risk controls according to the hierarchy of control and WHS legislative requirements, and promptly provide resources to enable implementation of new measures</p> <p>3.5 Identify requirements for expert WHS advice, and request this advice as required</p>
4. Evaluate and maintain a WHS management system	<p>4.1 Develop and provide a WHS induction and training program for all workers as part of the organisation's training program</p> <p>4.2 Use a system for <b>WHS recordkeeping</b> to allow identification of patterns of occupational injury and disease in the organisation, and to maintain a record of WHS decisions made, including reasons for the decision</p> <p>4.3 Measure and evaluate the WHSMS in line with the organisation's quality systems framework</p>

	<p>4.4 Develop and implement improvements to the WHSMS to achieve organisational WHS objectives</p> <p>4.5 Ensure compliance with the WHS legislative framework so that, as a minimum, WHS legal requirements are achieved</p>
--	--

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical and problem solving skills to examine relevant workplace information and data to identify hazards, and to assess and control risks
- communication skills to consult with staff and to promote a safe workplace
- information technology skills to store and retrieve relevant workplace information and data
- literacy skills to adapt and communicate WHS policies that reflect WHS legislative requirements
- problem-solving skills to deal with complex and non-routine difficulties.

### Required knowledge

- hazard identification and risk-management processes
- hierarchy of risk control
- in-house and WHS legislative reporting requirements
- relevant WHS Acts, regulations and codes of practice that apply to the business operation.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• detailed knowledge and application of all relevant WHS Acts, regulations and codes of practice</li> <li>• establishing and maintaining arrangements for managing WHS within the organisation's business systems and practices</li> <li>• identifying requirements for expert WHS advice.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• appropriate documentation and resources normally used in the workplace.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• analysis of responses to case studies and scenarios</li> <li>• assessment of written reports</li> <li>• demonstration of techniques</li> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate</li> <li>• review of WHS policies, information provided on the WHSMS, and information about the outcomes of participation and consultation provided to workers</li> <li>• oral or written questioning to assess knowledge of WHS and WHS legislation</li> <li>• evaluation of WHS induction and training</li> <li>• review of WHS recordkeeping system.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>WHS legislation</i></b> may include:	<ul style="list-style-type: none"> <li>• applicable commonwealth and state or territory WHS Acts, regulations and codes of practice</li> <li>• common law duties to meet general duty of care requirements</li> <li>• WHS legislative and regulatory requirements for: <ul style="list-style-type: none"> <li>• effectively managing hazards</li> <li>• establishing consultation arrangements, including those for health and safety representatives and health and safety committees</li> <li>• providing information and training, including training in safe operating procedures; procedures for workplace hazards; hazard identification, risk assessment and risk control; and emergency and evacuation procedures</li> </ul> </li> <li>• WHS legislative, regulatory and other requirements for the maintenance and confidentiality of records of occupational injury and disease.</li> </ul>
<b><i>Duty holders</i></b> may include:	<ul style="list-style-type: none"> <li>• as specified in WHS Acts: <ul style="list-style-type: none"> <li>• officers</li> <li>• PCBU's or their officers</li> <li>• workers</li> <li>• other persons at a workplace.</li> </ul> </li> </ul>
<b><i>Control of associated risks</i></b> may include:	<ul style="list-style-type: none"> <li>• administrative</li> <li>• as specified in WHS Acts, regulations and codes of practice</li> <li>• counselling/disciplinary processes, such as those associated with alcohol and other drugs</li> <li>• education about alcohol and other drugs work-related issues</li> <li>• engineering</li> <li>• hazard elimination</li> <li>• housekeeping and storage</li> <li>• issue resolution</li> <li>• personal protective equipment</li> </ul>

	<ul style="list-style-type: none"><li>• purchasing of supplies and equipment</li><li>• workplace inspections, including plant and equipment.</li></ul>
<b>WHS recordkeeping</b> may relate to:	<ul style="list-style-type: none"><li>• audit and inspection reports</li><li>• consultation, such as:<ul style="list-style-type: none"><li>• meetings of health and safety committees</li><li>• work team meeting agendas, including WHS items and actions</li></ul></li><li>• first aid/medical post records</li><li>• hazardous chemicals registers</li><li>• induction, instruction and training</li><li>• manufacturer and supplier information, including dangerous goods storage lists</li><li>• plant and equipment maintenance and testing reports</li><li>• workers' compensation and rehabilitation records</li><li>• workplace environmental monitoring records.</li></ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise work schedule	<p>1.1.Negotiate and agree upon work goals and plans with assistance from <i>appropriate persons</i></p> <p>1.2.Develop an understanding of the relationship between individual work goals and plans, and organisational goals and plans</p> <p>1.3.Plan and prioritise workload within allocated timeframes</p>
2. Complete work tasks	<p>2.1.Complete tasks within designated time lines and in accordance with <i>organisational requirements</i> and instructions</p> <p>2.2.Use effective questioning to seek assistance from <i>colleagues</i> when difficulties arise in achieving allocated tasks</p> <p>2.3.Identify <i>factors affecting work requirements</i> and take appropriate action</p> <p>2.4.Use <i>business technology</i> efficiently and effectively to complete work tasks</p> <p>2.5.Communicate progress of task to supervisor or colleagues as required</p>
3. Review work performance	<p>3.1.Seek <i>feedback</i> on work performance from supervisors or colleagues</p> <p>3.2.Monitor and adjust work according to <i>feedback</i> obtained through supervision and comparison with established team and organisational <i>standards</i></p> <p>3.3.Identify and plan <i>opportunities for improvement</i> in liaison with colleagues</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills to use written and oral information about workplace requirements
- organising skills to arrange work priorities and arrangements
- problem-solving skills to solve routine problems
- technology skills to select and use technology appropriate for a task.

#### Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety (OHS)
- organisational policies, plans and procedures.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• organising and completing own work activities</li> <li>• seeking and acting on feedback from clients, colleagues and supervisors</li> <li>• using available business technology appropriate to the task, under direct instruction</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and resources</li> <li>• examples of work plans, policies and procedures.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• review of documentation planning and prioritising workload</li> <li>• evaluation of time line required to complete tasks</li> <li>• review of documentation planning opportunities for improvement.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• administration units.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Appropriate persons</i></b> may include:	<ul style="list-style-type: none"> <li>• colleagues</li> <li>• other staff members</li> <li>• supervisors, mentors or trainers</li> </ul>
<b><i>Organisational requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• access and equity principles and practice</li> <li>• anti-discrimination and related policy</li> <li>• business and performance plans</li> <li>• ethical standards</li> <li>• goals, objectives, plans, systems and processes</li> <li>• legal and organisation policies, guidelines and requirements</li> <li>• OHS policies, procedures and programs</li> <li>• quality and continuous improvement processes and standards</li> </ul>
<b><i>Colleagues</i></b> may include:	<ul style="list-style-type: none"> <li>• coach/mentor</li> <li>• other members of the organisation</li> <li>• peers/work colleagues/team</li> <li>• supervisor or manager</li> </ul>
<b><i>Factors affecting work requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• changes to procedures or new procedures</li> <li>• competing work demands</li> <li>• environmental factors such as time, weather</li> <li>• other work demands</li> <li>• resource issues</li> <li>• technology/equipment breakdowns</li> </ul>
<b><i>Business technology</i></b> may include:	<ul style="list-style-type: none"> <li>• computer applications</li> <li>• computers</li> <li>• electronic diaries</li> <li>• facsimile machines</li> <li>• photocopiers</li> <li>• printers</li> <li>• scanners</li> </ul>
<b><i>Feedback on performance</i></b> may include:	<ul style="list-style-type: none"> <li>• formal/informal performance appraisals</li> <li>• obtaining feedback from clients</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>obtaining feedback from supervisors and colleagues</li> <li>personal, reflective behaviour strategies</li> <li>routine organisational methods for monitoring service delivery</li> </ul>
<i>Standards</i> may include:	<ul style="list-style-type: none"> <li>Australian Standards</li> <li>legal and organisation policies, guidelines and requirements</li> <li>legislation</li> <li>organisational policies and procedures</li> <li>specified work standards</li> <li>standards set by work group</li> </ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select and use technology	<p>1.1. Select appropriate <b>technology</b> and <b>software applications</b> to achieve the requirements of the task</p> <p>1.2. Adjust workspace, furniture and equipment to suit user ergonomic requirements</p> <p>1.3. Use technology according to <b>organisational requirements</b> and in a way which promotes a safe work environment</p>
2. Process and organise data	<p>2.1. Identify, open, generate or amend files and records according to task and organisational requirements</p> <p>2.2. Operate <b>input devices</b> according to organisational requirements</p> <p>2.3. <b>Store data</b> appropriately and exit applications without damage to or loss of, data</p> <p>2.4. Use manuals, training booklets and/or online help or help-desks to overcome basic difficulties with applications</p>
3. Maintain technology	<p>3.1. Identify and replace used <b>technology consumables</b> in accordance with manufacturer's instructions and organisational requirements</p> <p>3.2. Carry out and/or arrange <b>routine maintenance</b> to ensure equipment is maintained in accordance with manufacturer's instructions and organisational requirements</p> <p>3.3. <b>Identify equipment faults</b> accurately and take action in accordance with manufacturer's instructions or report fault to designated person</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills to identify work requirements; to understand and process basic, relevant workplace information; and to follow written instructions
- communication skills to request advice, to receive feedback and to work with a team
- problem-solving skills to solve routine technology problems.

#### Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
- ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety (OHS)
- organisational policies, plans and procedures, especially in regard to file-naming and storage conventions
- organisational IT procedures including back-up and virus protection procedures
- basic technical terminology in relation to reading help-files and manuals.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• selection and application of appropriate equipment and software applications in relation to assigned task/s</li> <li>• access, retrieval and storage of required data</li> <li>• performance of basic maintenance on a range of office equipment</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and resources</li> <li>• examples of files and data for storage</li> <li>• manuals and training booklets for equipment.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• oral or written questioning to assess knowledge of office equipment</li> <li>• evaluation of maintaining technology.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• IT use units</li> <li>• other industry capability units.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Technology</i></b> may include:	<ul style="list-style-type: none"> <li>• computer technology, such as laptops and personal computers</li> <li>• digital cameras</li> <li>• modems</li> <li>• printers</li> <li>• scanners</li> <li>• zip drives</li> <li>• photocopiers</li> <li>• shredders</li> <li>• binders</li> <li>• laminators</li> <li>• cutters</li> </ul>
<b><i>Software applications</i></b> may include:	<ul style="list-style-type: none"> <li>• email, internet</li> <li>• word processing, spreadsheet, database, accounting or presentation packages</li> </ul>
<b><i>Organisational requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• correctly identifying and opening files</li> <li>• legal and organisation policies, guidelines and requirements</li> <li>• locating data</li> <li>• log-on procedures</li> <li>• manufacturer's guidelines</li> <li>• OHS policies, procedures and programs</li> <li>• saving and closing files</li> <li>• storing data</li> </ul>
<b><i>Input devices</i></b> may include:	<ul style="list-style-type: none"> <li>• keyboard</li> <li>• mouse</li> <li>• numerical key pad</li> <li>• scanner</li> </ul>
<b><i>Storage of data</i></b> may include:	<ul style="list-style-type: none"> <li>• appropriate storage/filing of hard copies of computer generated documents</li> <li>• storage in directories and sub-directories</li> <li>• storage on CD-ROMs, hard and floppy disk drives or back-up systems</li> </ul>

<b>RANGE STATEMENT</b>	
<i>Technology consumables</i> may include:	<ul style="list-style-type: none"> <li>• back-up tapes</li> <li>• CD-ROM</li> <li>• floppy disks</li> <li>• print heads</li> <li>• printer ribbons and cartridges</li> <li>• toner cartridges</li> <li>• zip disks</li> </ul>
<i>Routine maintenance</i> may include:	<ul style="list-style-type: none"> <li>• in-house cleaning and servicing of equipment according to manufacturer's guidelines</li> <li>• periodic servicing by qualified or manufacturer approved, technician</li> <li>• regular checking of equipment</li> <li>• replacing consumables</li> </ul>
<i>Identifying equipment faults</i> may include:	<ul style="list-style-type: none"> <li>• checking repairs have been carried out</li> <li>• encouraging feedback from work colleagues</li> <li>• keeping a log book of detected faults</li> <li>• preparing a maintenance program</li> <li>• regular back-ups of data</li> <li>• regular OHS inspections</li> <li>• routine checking of equipment</li> </ul>

# BSBWOR301B Organise personal work priorities and development

## Modification History

Release	Comments
Release 1	<p>This version first released with <i>BSB07 Business Training Package version 6.0</i></p> <p>Revised unit. Performance criteria and required skills updated to focus on learning and development practices, KPIs and compliance with policy and procedures.</p> <p>Replaces BSBWOR301A Organise personal work priorities and development</p>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to organise own work schedules, to monitor and obtain feedback on work performance, and to maintain required levels of competence. Operators may exercise discretion and judgement using appropriate theoretical knowledge of work scheduling and performance improvement to provide technical advice and support to a team.

## Application of the Unit

This unit applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Organise and complete own work schedule	<p>1.1 Ensure that <b>work goals, objectives</b> or <b>KPIs</b> are understood, negotiated and agreed in accordance with <b>organisational requirements</b></p> <p>1.2 Assess and prioritise workload to ensure tasks are completed within identified timeframes</p> <p>1.3 Identify <b>factors affecting the achievement of work objectives</b> and incorporate contingencies into work plans</p> <p>1.4 Use <b>business technology</b> efficiently and effectively to manage and monitor scheduling and completion of tasks</p>
2. Monitor own work performance	<p>2.1 Accurately monitor and adjust personal work performance through self-assessment to ensure achievement of tasks and compliance with legislation and work processes or KPIs</p> <p>2.2 Ensure that <b>feedback on performance</b> is actively sought and evaluated from colleagues and clients in the context of individual and group requirements</p> <p>2.3 Routinely identify and report on variations in the quality of and <b>products and services</b> according to organisational requirements</p> <p>2.4 Identify <b>signs of stress</b> and effects on <b>personal wellbeing</b></p> <p>2.5 Identify <b>sources of stress</b> and access appropriate <b>supports and resolution strategies</b></p>
3. Coordinate personal skill development and learning	<p>3.1 Identify personal learning and professional development needs and skill gaps using self-assessment and advice from colleagues and clients in relation to role and organisational requirements</p> <p>3.2 Identify, prioritise and plan opportunities for undertaking personal skill development activities in liaison with work groups and relevant personnel</p> <p>3.3 Access, complete and record <b>professional development opportunities</b> to facilitate continuous learning and career development</p> <p>3.4 Incorporate formal and informal feedback into review of further learning needs</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to give and receive constructive feedback relating to development needs
- literacy skills to read and understand the organisation's procedures
- planning skills to organise work priorities according to work goals and objectives
- problem-solving skills to solve routine problems
- self-management skills to:
  - comply with policies and procedures
  - consistently evaluate and monitor own performance
  - seek learning opportunities.

### Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety (OHS)
- organisational policies, plans and procedures
- methods to elicit, analyse and interpret feedback
- principles and techniques of goal setting, measuring performance, time management and personal assessment
- competency standards and how to interpret them in relation to self
- methods to identify and prioritise personal learning needs.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• preparing work plans</li> <li>• scheduling and prioritising work objectives and tasks</li> <li>• knowledge of the principles and techniques of goal setting, measuring performance, time management and personal assessment.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and resources</li> <li>• examples of work schedules and performance improvement plans.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of self-assessment documentation outlining learning and development needs</li> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• oral or written questioning to assess knowledge of methods to identify and prioritise personal learning needs</li> <li>• evaluation of planning for personal skill development activities and professional development opportunities.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Work goals and objectives</b> may include:	<ul style="list-style-type: none"> <li>• budgetary targets</li> <li>• production targets</li> <li>• reporting deadlines</li> <li>• sales targets</li> <li>• team and individual learning goals</li> <li>• team participation.</li> </ul>
<b>KPIs</b> may include:	<ul style="list-style-type: none"> <li>• key performance indicators on customer satisfaction</li> <li>• key performance indicators on customer effort</li> <li>• monitoring time taken to answer calls</li> <li>• operating within reporting protocols</li> <li>• score tools such as net promoter</li> <li>• understanding metrics.</li> </ul>
<b>Organisational requirements</b> may include:	<ul style="list-style-type: none"> <li>• access and equity principles and practice</li> <li>• business and performance plans</li> <li>• defined resource parameters</li> <li>• ethical standards</li> <li>• goals, objectives, plans, systems and processes</li> <li>• legal and organisational policies, guidelines and requirements</li> <li>• OHS policies, procedures and programs</li> <li>• quality and continuous improvement processes and standards</li> <li>• quality assurance and/or procedures manuals.</li> </ul>
<b>Factors affecting the achievement of work objectives</b> may include:	<ul style="list-style-type: none"> <li>• budget constraints</li> <li>• competing work demands</li> <li>• environmental factors such as time, weather</li> <li>• resource and materials availability</li> <li>• technology/equipment breakdowns</li> <li>• unforeseen incidents</li> <li>• workplace hazards, risks and controls.</li> </ul>
<b>Business technology</b> may include:	<ul style="list-style-type: none"> <li>• computer applications</li> <li>• computers</li> <li>• email</li> <li>• facsimile machines</li> </ul>

	<ul style="list-style-type: none"> <li>• internet/extranet/intranet</li> <li>• modems</li> <li>• personal schedulers</li> <li>• photocopiers</li> <li>• printers</li> <li>• scanners.</li> </ul>
<b><i>Feedback on performance</i></b> may include:	<ul style="list-style-type: none"> <li>• formal/informal performance appraisals</li> <li>• obtaining feedback from clients</li> <li>• obtaining feedback from supervisors and colleagues</li> <li>• personal, reflective behaviour strategies</li> <li>• routine organisational methods for monitoring service delivery.</li> </ul>
<b><i>Products and services</i></b> may include:	<ul style="list-style-type: none"> <li>• either products or services</li> <li>• goods</li> <li>• ideas</li> <li>• infrastructure</li> <li>• private or public sets of benefits.</li> </ul>
<b><i>Signs of stress</i></b> may include:	<ul style="list-style-type: none"> <li>• absence from work</li> <li>• alcohol or other substance abuse</li> <li>• conflict</li> <li>• poor work performance.</li> </ul>
<b><i>Personal wellbeing</i></b> may include:	<ul style="list-style-type: none"> <li>• cultural</li> <li>• emotional</li> <li>• social</li> <li>• spiritual.</li> </ul>
<b><i>Sources of stress</i></b> may include:	<ul style="list-style-type: none"> <li>• complex tasks</li> <li>• cultural issues</li> <li>• work and family conflict</li> <li>• workloads.</li> </ul>
<b><i>Supports and resolution strategies</i></b> may include:	<ul style="list-style-type: none"> <li>• awareness raising</li> <li>• counselling</li> <li>• employee assistance programs (EAP)</li> <li>• family support</li> <li>• group activities</li> <li>• job design</li> <li>• mediation</li> <li>• sharing load</li> <li>• time off</li> <li>• training.</li> </ul>
<b><i>Professional development opportunities</i></b> may include:	<ul style="list-style-type: none"> <li>• career planning/development</li> <li>• coaching, mentoring and/or supervision</li> </ul>

	<ul style="list-style-type: none"><li>• formal/informal learning programs</li><li>• internal/external training provision</li><li>• performance appraisals</li><li>• personal study</li><li>• quality assurance assessments and recommendations</li><li>• recognition of current competence/skills recognition</li><li>• work experience/exchange/opportunities</li><li>• workplace skills assessment.</li></ul>

## BSBWOR401A Establish effective workplace relationships

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to collect, analyse and communicate information and to use that information to develop and maintain effective working relationships and networks, with particular regard to communication and representation.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>Frontline managers play an important role in developing and maintaining positive relationships in internal and external environments so that customers, suppliers and the organisation achieve planned outputs and outcomes. They play a prominent part in motivating, mentoring, coaching and developing team cohesion through providing leadership for the team and forming the bridge between the management of the organisation and team members.</p> <p>At this level, work will normally be carried out within routine and non routine methods and procedures, which require planning and evaluation, and leadership and guidance of others.</p>
--------------------------------	---

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collect, analyse and communicate information and ideas	<p>1.1. Collect relevant <b>information</b> from appropriate sources and analyse and share with the work team to improve work performance</p> <p>1.2. Communicate ideas and information in a manner which is appropriate and sensitive to the cultural and social diversity of the audience and any specific needs</p> <p>1.3. Implement <b>consultation processes</b> to encourage employees to contribute to issues related to their work, and promptly relay feedback to the work team in regard to outcomes</p> <p>1.4. Seek and value contributions from internal and external sources in developing and refining new ideas and approaches</p> <p>1.5. Implement <b>processes</b> to ensure that issues raised are resolved promptly or referred to <b>relevant personnel</b> as required</p>
2. Develop trust and confidence	<p>2.1. Treat all internal and external contacts with integrity, respect and empathy</p> <p>2.2. Use the <b>organisation's social, ethical and business standards</b> to develop and maintain effective relationships</p> <p>2.3. Gain and maintain the trust and confidence of <b>colleagues, customers and suppliers</b> through competent performance</p> <p>2.4. Adjust interpersonal styles and methods to meet organisation's social and cultural environment</p> <p>2.5. Encourage other members of the work team to follow examples set, according to <b>organisation's policies and procedures</b></p>
3. Develop and maintain networks and relationships	<p>3.1. Use <b>networks</b> to identify and build relationships</p> <p>3.2. Use networks and other work relationships to provide identifiable benefits for the team and organisation</p>
4. Manage difficulties into positive outcomes	<p>4.1. Identify and analyse difficulties, and take action to rectify the situation within the requirements of the organisation and relevant legislation</p> <p>4.2. Guide and support colleagues to resolve work difficulties</p> <p>4.3. Regularly review and improve <b>workplace outcomes</b></p>

ELEMENT	PERFORMANCE CRITERIA
	<p>in consultation with relevant personnel</p> <p>4.4. Manage <i>poor work performance</i> within the organisation's processes</p> <p>4.5. Manage conflict constructively within the organisation's processes</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- coaching and mentoring skills to provide support to colleagues
- literacy skills to research, analyse, interpret and report information
- relationship management and communication skills to:
  - deal with people openly and fairly
  - forge effective relationships with internal and/or external people, and to develop and maintain these networks
  - gain the trust and confidence of colleagues
  - respond to unexpected demands from a range of people
  - use supportive and consultative processes effectively.

#### Required knowledge

- relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety (OHS), and environmental issues, equal opportunity, industrial relations and anti-discrimination
- theory associated with managing work relationships to achieve planned outcomes:
  - developing trust and confidence
  - maintaining consistent behaviour in work relationships
  - understanding the cultural and social environment
  - identifying and assessing interpersonal styles
  - establishing, building and maintaining networks
  - identifying and resolving problems
  - resolving conflict
  - managing poor work performance
  - monitoring, analysing and introducing ways to improve work relationships.

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- range of methods and techniques for communicating information and ideas to a range of stakeholders
- range of methods and techniques for developing positive work relationships that build trust and confidence in the team
- accessing and analysing information to achieve planned outcomes
- techniques for resolving problems and conflicts and dealing with poor performance
- knowledge of the theory associated with managing work relationships to achieve planned outcomes.

#### Context of and specific resources for assessment

Assessment must ensure:

- access to appropriate documentation and resources normally used in the workplace.

#### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- demonstration of techniques in managing poor performance and communicating effectively
- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- observation of performance in role plays
- observation of presentations
- oral or written questioning to assess knowledge of relevant legislation
- review of consultation processes implemented to encourage employees to contribute to issues related to their work
- review of documentation outlining reviewing of workplace outcomes.

#### Guidance information for

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended,

**EVIDENCE GUIDE****assessment**

for example:

- other units from the Certificate IV in Frontline Management.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Information</i></b> may include:	<ul style="list-style-type: none"> <li>• data appropriate to work roles and organisational policies that is shared and retrieved in writing or verbally, electronically or manually such as:               <ul style="list-style-type: none"> <li>• archived, filed and historical background data</li> <li>• individual and team performance data</li> <li>• marketing and customer related data</li> <li>• planning and organisational documents including the outcomes of continuous improvement and quality assurance</li> <li>• policies and procedures</li> </ul> </li> </ul>
<b><i>Consultation processes</i></b> may include:	<ul style="list-style-type: none"> <li>• feedback to the work team and relevant personnel in relation to outcomes of the consultation process</li> <li>• opportunities for all employees to contribute to ideas and information about organisational issues</li> </ul>
<b><i>Processes</i></b> to ensure that issues raised are resolved promptly or referred may include:	<ul style="list-style-type: none"> <li>• conducting informal meetings</li> <li>• coordinating surveys or questionnaires</li> <li>• distributing newsletters or reports</li> <li>• exchanging informal dialogue with relevant personnel</li> <li>• participating in planned organisational activities</li> </ul>
<b><i>Relevant personnel</i></b> may include:	<ul style="list-style-type: none"> <li>• managers</li> <li>• OHS committee and other people with specialist responsibilities</li> <li>• other employees</li> <li>• supervisors</li> <li>• union representatives/groups</li> </ul>
<b><i>Organisation's social, ethical and business standards</i></b> may refer to:	<ul style="list-style-type: none"> <li>• implied standards such as honesty and respect relative to the organisational culture and generally accepted within the wider</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>community</li> <li>rewards and recognition for high performing staff</li> <li>standards expressed in legislation and regulations such as anti-discrimination legislation</li> <li>written standards such as those expressed in: <ul style="list-style-type: none"> <li>code of workplace conduct/behaviour</li> <li>dress code</li> <li>policies</li> <li>statement of workplace values</li> <li>vision and mission statements</li> </ul> </li> </ul>
<i>Colleagues, customers and suppliers</i> may include:	<ul style="list-style-type: none"> <li>both internal and external contacts</li> <li>employees at the same level and more senior managers</li> <li>people from a wide variety of social, cultural and ethnic backgrounds</li> <li>team members</li> </ul>
<i>Organisation's policies and procedures</i> may refer to:	<ul style="list-style-type: none"> <li>Materials Safety Data Sheets</li> <li>organisational tasks and activities undertaken to meet performance outcomes</li> <li>sets of accepted actions approved by the organisation</li> <li>Standard Operating Procedures</li> </ul>
<i>Networks</i> may be:	<ul style="list-style-type: none"> <li>established structures or unstructured arrangements and may include business or professional associations</li> <li>informal or formal and with individuals or groups</li> <li>internal and/or external</li> </ul>
<i>Workplace outcomes</i> may include:	<ul style="list-style-type: none"> <li>OHS processes and procedures</li> <li>performance of the work team</li> </ul>
<i>Poor work performance</i> may refer to:	<ul style="list-style-type: none"> <li>individual team members</li> <li>organisation as a whole</li> <li>self</li> <li>whole work team</li> </ul>

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and complete own work schedule	<p>1.1.Prepare <b>Workgroup</b> plans which reflect consideration of resources, client needs and workgroup targets</p> <p>1.2.Analyse and incorporate <b>Work objectives</b> and priorities into personal schedules and responsibilities</p> <p>1.3.Identify <b>Factors affecting the achievement of work objectives</b> and establish contingencies and incorporate them into work plans</p> <p>1.4.Efficiently and effectively use <b>Business technology</b> to manage and monitor planning completion and scheduling of tasks</p>
2. Monitor own work performance	<p>2.1.Identify and analysed personal performance through self-assessment and feedback from others on the achievement of work objectives</p> <p>2.2.Seek and evaluate <b>Feedback on performance</b> from colleagues and clients in the context of individual and group requirements</p> <p>2.3.Routinely identify and report on variations in the quality of service and performance in accordance with organisational requirements</p>
3. Coordinate professional development	<p>3.1.Assess personal knowledge and skills against organisational benchmarks to determine development needs and priorities</p> <p>3.2.Research and identify sources and plan for opportunities for improvement in consultation with colleagues</p> <p>3.3.Use <b>Feedback</b> to identify and develop ways to improve competence within available opportunities</p> <p>3.4.Identify, access and complete <b>professional development activities</b> to assist career development</p> <p>3.5.Store and maintain records and documents relating to achievements and assessments in accordance with organisational requirements</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- learning skills to recognise and develop new and necessary skills and knowledge
- literacy skills to understand the organisation's policies, procedures and communications, to write personal work plans and professional development plans, and to request and receive feedback about performance
- organising skills to prioritise, manage time and meet deadlines
- problem solving skills to develop contingency plans

#### Required knowledge

- knowledge of relevant business technology applications to schedule tasks and plan work
- knowledge of techniques to prepare personal plans and establish priorities
- methods to identify and prioritise personal learning needs
- understanding of a range of professional development options
- understanding of methods to elicit, analyse and interpret feedback
- understanding of methods to evaluate own performance

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• preparing and communicating own work plan</li> <li>• scheduling work objectives and tasks to support the achievement of goals</li> <li>• seeking and acting on feedback from clients and colleagues</li> <li>• reviewing own work performance against achievements through self-assessment</li> <li>• accessing learning opportunities to extend own personal work competencies</li> <li>• using business technology to monitor self development.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• the learner and trainer should have access to appropriate documentation and resources normally used in the workplace</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• observation of performance in role plays</li> <li>• observation of presentations</li> <li>• review of work and professional development plans.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• Other units from the Certificate IV in Frontline Management.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b><i>Workgroup plans</i></b> may include:	<ul style="list-style-type: none"> <li>• budgetary plans</li> <li>• production plans</li> <li>• reporting plans</li> <li>• sales plans</li> <li>• team and individual learning goals</li> <li>• team participation</li> <li>• work schedules</li> </ul>
<b><i>Work objectives</i></b> may include:	<ul style="list-style-type: none"> <li>• budgetary targets</li> <li>• production targets</li> <li>• reporting deadlines</li> <li>• sales targets</li> <li>• team and individual learning goals</li> <li>• team participation</li> </ul>
<b><i>Factors affecting the achievement of work objectives</i></b> may include:	<ul style="list-style-type: none"> <li>• budget constraints</li> <li>• competing work demands</li> <li>• environmental factors such as time, weather, etc</li> <li>• personnel</li> <li>• resource and materials availability</li> <li>• technology/equipment breakdowns</li> <li>• unforeseen incidents</li> </ul>
<b><i>Business technology</i></b> may include:	<ul style="list-style-type: none"> <li>• computer applications</li> <li>• computers</li> <li>• email and internet/intranet/extranet</li> <li>• facsimile machines</li> <li>• modems</li> <li>• personal schedules</li> <li>• photocopiers</li> <li>• printers</li> <li>• scanners</li> </ul>
<b><i>Feedback on performance</i></b> may include:	<ul style="list-style-type: none"> <li>• formal/informal performance appraisals</li> <li>• obtaining comments from clients</li> <li>• obtaining comments from supervisors and</li> </ul>

RANGE STATEMENT	
	colleagues <ul style="list-style-type: none"> <li>• personal, reflective behaviour strategies</li> <li>• routine organisational methods for monitoring service delivery</li> </ul>
<i>Professional development activities</i> may include:	<ul style="list-style-type: none"> <li>• career planning/development</li> <li>• coaching, mentoring and/or supervision</li> <li>• formal/informal learning programs</li> <li>• internal/external training provision</li> <li>• performance appraisals</li> <li>• personal study</li> <li>• Recognition of Prior Learning</li> <li>• work experience/exchange/opportunities</li> <li>• workplace skills assessment</li> </ul>

## BSBWOR501B Manage personal work priorities and professional development

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to manage own performance and professional development. Particular emphasis is on setting and meeting priorities, analysing information and using a range of strategies to develop further competence.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to managers and focuses on the need for managers to be organised, focussed and skilled, in order to effectively manage the work of others. As such it is an important unit for most managers, particularly as managers serve as role models and have a significant influence on the work culture and patterns of behaviour.</p>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish personal work goals	<p>1.1. Serve as a positive role model in the workplace through personal work planning and organisation</p> <p>1.2. Ensure personal work goals, plans and activities reflect the organisation's plans, and <b><i>own responsibilities and accountabilities</i></b></p> <p>1.3. Measure and maintain personal performance in varying work conditions, work contexts and contingencies</p>
2. Set and meet own work priorities	<p>2.1. Take initiative to prioritise and facilitate competing demands to achieve personal, team and organisational goals and objectives</p> <p>2.2. Use <b><i>technology</i></b> efficiently and effectively to manage work priorities and commitments</p> <p>2.3. Maintain appropriate work-life balance, and ensure stress is effectively managed and health is attended to</p>
3. Develop and maintain professional competence	<p>3.1. Assess personal knowledge and skills against <b><i>competency standards</i></b> to determine development needs, priorities and plans</p> <p>3.2. Seek feedback from employees, <b><i>clients and colleagues</i></b> and use this feedback to identify and develop ways to improve competence</p> <p>3.3. Identify, evaluate, select and use <b><i>development opportunities</i></b> suitable to personal learning style/s to develop competence</p> <p>3.4. Undertake participation in networks to enhance personal knowledge, skills and work relationships</p> <p>3.5. Identify and develop new skills to achieve and maintain a competitive edge</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to receive, analyse and report on feedback
- literacy skills to interpret written and verbal information about workplace requirements
- organisational skills to set and achieve priorities.

#### Required knowledge

- principles and techniques involved in the management and organisation of:
  - performance measurement
  - personal behaviour, self-awareness and personality traits identification
  - personal development plan
  - personal goal setting
  - time management
- management development opportunities and options for self
- organisation's policies, plans and procedures
- types of learning style/s and how they relate to the individual
- types of work methods and practices that can improve personal performance.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• systems and processes (electronic or paper-based) used to organise and prioritise tasks, which show how work is managed</li> <li>• personal development plan, with career objectives and an action plan</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to appropriate documentation and resources normally used in the workplace.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• analysis of responses to case studies and scenarios</li> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• observation of presentations</li> <li>• oral or written questioning to assess knowledge of work methods and practices that can improve personal performance</li> <li>• review of personal work goals, plans and activities</li> <li>• evaluation of work-life balance</li> <li>• review of documentation assessing personal knowledge and skills against competency standards.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other units from the Diploma of Management.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b><i>Own responsibilities and accountabilities</i></b> may include:	<ul style="list-style-type: none"> <li>• expectations of workplace performance as expressed in a performance plan</li> <li>• outputs as expressed in position descriptions or duty statements</li> <li>• statement of conduct outlining an individual's responsibilities/actions/performance</li> </ul>
<b><i>Technology</i></b> may include:	<ul style="list-style-type: none"> <li>• computerised systems and software, databases, project management and word processing</li> <li>• electronic diary</li> <li>• personal digital assistant (PDA)</li> </ul>
<b><i>Competency standards</i></b> may include:	<ul style="list-style-type: none"> <li>• enterprise-specific units of competency consistent with work requirements</li> <li>• nationally endorsed units of competency consistent with work requirements</li> </ul>
<b><i>Clients and colleagues</i></b> may be:	<ul style="list-style-type: none"> <li>• colleagues at the same level and more senior managers</li> <li>• internal or external customers</li> <li>• people from a wide range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities</li> <li>• team members</li> </ul>
<b><i>Development opportunities</i></b> may include:	<ul style="list-style-type: none"> <li>• action learning</li> <li>• coaching</li> <li>• exchange/rotation</li> <li>• induction</li> <li>• mentoring</li> <li>• shadowing</li> <li>• structured training programs</li> </ul>

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish team performance plan	<p>1.1. <b>Consult</b> team members to establish a common understanding of team purpose, roles, responsibilities and <b>accountabilities</b> in accordance with organisational goals, plans and objectives</p> <p>1.2. Develop <b>performance plans</b> to establish expected <b>outcomes, outputs, key performance indicators</b> and goals for work team</p> <p>1.3. <b>Support</b> team members in meeting expected performance outcomes</p>
2. Develop and facilitate team cohesion	<p>2.1. Develop <b>strategies</b> to ensure team members have input into planning, decision making and operational aspects of work team</p> <p>2.2. Develop <b>policies and procedures</b> to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities</p> <p>2.3. Provide feedback to team members to encourage, value and reward individual and team efforts and contributions</p> <p>2.4. Develop <b>processes</b> to ensure that issues, concerns and problems identified by team members are recognised and addressed</p>
3. Facilitate teamwork	<p>3.1. Encourage team members and individuals to participate in and to take responsibility for team activities, including communication processes</p> <p>3.2. Support the team in identifying and resolving work performance problems</p> <p>3.3. Ensure own contribution to work team serves as a role model for others and enhances the organisation's image for all <b>stakeholders</b></p>
4. Liaise with stakeholders	<p>4.1. Establish and maintain open communication processes with all stakeholders</p> <p>4.2. Communicate information from <b>line manager/management</b> to the team</p> <p>4.3. Communicate unresolved issues, concerns and problems raised by team members and follow-up with line manager/management and other relevant stakeholders</p> <p>4.4. Evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to explain team goals, to address team conflict and to build an environment of trust
- planning and organisational skills to keep team on track and focussed on work outcomes.

#### Required knowledge

- group behaviour
- strategies for mentoring and coaching to informally guide and instruct team members
- issue resolution
- strategies for gaining consensus.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• range of techniques that can be used to build work teams, strengthen communications in the team and resolve issues</li> <li>• methods for engaging with stakeholders and obtaining advice from outside the work team, to ensure team is focussed and on track</li> <li>• knowledge of group behaviour.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to appropriate documentation and resources normally used in the workplace.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• analysis of responses to case studies and scenarios</li> <li>• assessment of written reports</li> <li>• demonstration of team building techniques</li> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• observation of performance in role plays</li> <li>• review of performance plans developed for work team</li> <li>• review of policies and procedures developed to ensure team members take responsibility for own work.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other units from the Diploma of Management.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Consultation</i></b> may refer to:	<ul style="list-style-type: none"> <li>conducting meetings, interviews, brainstorming sessions, email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual performance plans</li> <li>mechanisms used to provide feedback to the work team in relation to outcomes of consultation</li> </ul>
<b><i>Accountabilities</i></b> may refer to:	<ul style="list-style-type: none"> <li>responsibilities as defined in position descriptions, codes of conduct/behaviour, duty statements or similar</li> <li>statement of conduct outlining responsibilities/actions/performance</li> </ul>
<b><i>Performance plans</i></b> may refer to:	<ul style="list-style-type: none"> <li>individual performance plans linked to team goals</li> <li>team plans based on work assignments and responsibilities</li> </ul>
<b><i>Outcomes, outputs, key performance indicators</i></b> may refer to agreed:	<ul style="list-style-type: none"> <li>changes in work roles and responsibilities</li> <li>improved individual and team, performance and participation</li> <li>improvements to systems, operations</li> <li>measures for monitoring and evaluating the efficiency or effectiveness of systems or services</li> <li>quality standards and expectations</li> <li>targets for productivity improvements such as reduced downtime, higher production levels, decreases in absenteeism</li> <li>targets for training and development</li> </ul>
<b><i>Support</i></b> may include:	<ul style="list-style-type: none"> <li>Coaching</li> <li>Mentoring</li> <li>Training and development opportunities</li> <li>Clarification of roles and expectations</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• Long term or short term plans</li> <li>• Meetings</li> </ul>
<i>Strategies</i> may refer to:	<ul style="list-style-type: none"> <li>• clarification of roles and expectations</li> <li>• electronic communication devices and processes, such as intranet and email communication systems, to facilitate input</li> <li>• long-term or short-term plans factoring in opportunities for team input</li> <li>• mentoring and 'buddy' systems to support team members in providing input</li> <li>• newsletters and briefings</li> <li>• training and development activities</li> </ul>
<i>Policies and procedures</i> may refer to:	<ul style="list-style-type: none"> <li>• organisational guidelines and systems that govern operational functions</li> <li>• procedures that detail the activities that must be carried out for the completion of actions and tasks</li> <li>• Standard Operating Procedures</li> </ul>
<i>Processes</i> may refer to:	<ul style="list-style-type: none"> <li>• brainstorming options with the team for addressing concerns</li> <li>• creating a matrix of issues and concerns and distributing for comment</li> <li>• discussions with individuals regarding their concerns</li> <li>• distributing drafts for comment with a range of options for resolution of concerns</li> <li>• training and development sessions</li> </ul>
<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> <li>• Board members</li> <li>• business or government contacts</li> <li>• funding bodies</li> <li>• union/employee groups and representatives</li> <li>• work team</li> </ul>
<i>Line manager/management</i> may refer to:	<ul style="list-style-type: none"> <li>• chief executive officer</li> <li>• direct superior</li> <li>• other management representatives</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop appropriate strategies and solutions	<p>1.1. An appropriate strategy to provide for <b><i>identified needs and outcomes</i></b> is determined from analysis of products, client <b><i>risk profile</i></b> and assessment of their needs</p> <p>1.2. Relevant research, analysis and product modelling is conducted and an appropriate solution, plan, policy or transaction is drafted for presentation to the client demonstrating understanding of the ASIC identified generic and specialist knowledge relevant to the products being offered</p>
2. Present appropriate strategies and solutions to client	<p>2.1. The proposed transaction is explained and discussed with the client in a clear and unambiguous way demonstrating product knowledge appropriate for the service or product offered</p> <p>2.2. Relevant details, terms and conditions of product or service are reinforced to client with impacts and possible risks of the solution disclosed in a clear and concise manner</p> <p>2.3. Client is provided with written supporting <b><i>documentation</i></b> and guided through the key aspects of the documentation</p>
3. Negotiate financial plan, policy or transaction with client	<p>3.1. <b><i>Concerns or issues</i></b> the client has regarding the proposed plan, policy or transaction are discussed and clarified</p> <p>3.2. Confirmation is sought from client that they understand the proposed plan, policy or transaction</p>
4. Coordinate implementation of agreed plan, policy or transaction	<p>4.1. The client's formal agreement to the proposed plan, policy or transaction is gained</p> <p>4.2. Associated fee and cost structures and timeframes for execution and processing are clearly explained and confirmation of understanding gained from the client</p>
5. Complete and maintain necessary documentation	<p>5.1. Proposal and all other statutory and transactional documents are completed and signed off by the client</p> <p>5.2. Copies of appropriate documentation and the signed agreement are exchanged</p>
6. Provide ongoing service where requested by client	<p>6.1. Type and form of ongoing service including reporting on performance and review of plan, policy or transaction is agreed with the client</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>6.2.Fees and costs for ongoing and specifically defined service are clearly explained and confirmation of understanding gained from the client</p> <p>6.3.Ongoing service is provided as required</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to:
  - determine and confirm client requirements, using questioning and active listening as required
  - present products and services to clients clearly and thoroughly
  - negotiate agreed outcomes with clients
  - use language and concepts appropriate to cultural differences
- numeracy and IT skills to:
  - identify and use financial product information
  - access and use appropriate software such as spreadsheets and databases
  - use internet information
- literacy skills for analysing information and products to ensure appropriateness to client needs, currency and accuracy
- analytical skills to determine client risk profiles and undertake a needs analysis
- interpersonal skills to establish rapport with clients and to liaise with other team members
- organisational and time management skills to sequence tasks, meet timelines and arrange meetings

#### Required knowledge

##### Generic knowledge requirements

- the economic environment and characteristics and impact of economic and business cycles including:
  - interest rates
  - exchange rates
  - inflation
  - government monetary and fiscal policies
- the operation of financial markets, the roles played by intermediaries and issuers, structure and inter-relationships within the financial markets, and inter-relationship between industry sectors
- financial products, including:
  - the concept of a financial product
  - general definition
  - specific inclusions and exclusions
  - types of financial investment products
  - types of financial risk products

## REQUIRED SKILLS AND KNOWLEDGE

- taxation issues in relation to the products and markets in which they operate
- advisory functions, including:
  - the role of the representative or adviser
  - participants in the advisory services market
  - range of services provided
  - profile and financial information of the client
  - appropriateness of a risk assessment
- the legal environment and disclosure and compliance including:
  - relevant legal principles (e.g. Corporations Act, Financial Services Reform Act (FSRA), Trade Practices Act)
  - the relationship between ethics and regulatory requirements (e.g. good faith, utmost good faith, full disclosure of remuneration/fees and any other conflicts of interest which may influence the adviser's recommendation)
- relevant industry codes of practice and conduct
- complaints resolution procedures (internal and external)
- ASIC regulatory guidelines

### Specialist knowledge requirements

- the specific industry or product in which they are operating. For general insurance products this includes:
  - types of general insurance products and policies
  - standard cover (and deviations)
  - policy wordings
  - taxes and charges
  - insurance claims
  - premium rating and risk selection
  - reporting
  - product development
  - underwriting
- for deposit products and non-cash payment facilities this includes:
  - types of products and facilities
  - product and facility characteristics

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• interpret and comply with industry regulations and codes of practice including, for insurance products, the required approval or authority to accept the transfer of risk</li> <li>• explain the characteristics, benefits and impacts of financial products and services to clients</li> <li>• present appropriate financial products and services to clients and negotiate a plan, policy or transaction successfully.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• competency is demonstrated in the context of the financial services work environment and conditions specified in the range statement either in a relevant workplace or a closely simulated work environment</li> <li>• access to and the use of a range of common office equipment, technology, software and consumables</li> <li>• access to financial services product information.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples, in combination, are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluating an integrated activity which combines the elements of competency for the unit or a cluster of related units of competency</li> <li>• observing processes and procedures in workplaces or role plays</li> <li>• verbal or written questioning on underpinning knowledge and skills</li> <li>• setting and reviewing workplace projects and business simulations or scenarios</li> <li>• accessing and validating third party reports.</li> </ul>
<b>Guidance information for assessment</b>	

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Identified needs and outcomes*** may include:

- business needs
- debt position
- expectations of access to product
- expectations of income from this product
- expectations of lifecycle and length of product
- family income
- security.

***Risk profile*** might include:

- access restrictions on product
- borrowing risk and gearing
- economic
- market and sector risks:
  - economic cycle
  - fixed interest
  - property
  - stock market
- risk factors and return expectations
- specific product risk
- volatility of income and capital.

***Documentation*** might include:

- disclaimers
- disclosures
- product application forms
- written advice.

Client ***concerns and issues*** might include:

- personal involvement:
  - active
  - passive
- risk profile:
  - conservative
  - speculator
  - moderate
- their beliefs about performance
- expectations of fluctuations in income or capital

**RANGE STATEMENT**

	<ul style="list-style-type: none"> <li>• being a long-term or short-term investor</li> <li>• need for security.</li> </ul>

# ICAWEB201A Use social media tools for collaboration and engagement

## Modification History

Version	Comments
ICAWEB201A	This version first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to establish a social networking presence using social media tools and applications.

The unit specifically identifies the requirement to review, compare and use different types of social networking tools and applications.

## Application of the Unit

This unit applies to information and communications technology (ICT) personnel who need to develop a social networking web presence for a small or large office environment using social media tools and applications.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Describe different types of social media tools and applications	1.1 Explain characteristics of the term <b><i>social media</i></b> 1.2 Identify different types of <b><i>social-media tools and applications</i></b> 1.3 Illustrate some of the <b><i>issues</i></b> associated with the use of social media tools and applications
2. Compare different types of social media tools and applications	2.1 Select one social media type for review 2.2 Review most popular tools and applications within that social media type 2.3 Itemise benefits across a range of the most popular tools and applications 2.4 Select most appropriate social media tool or application
3. Set up and use popular social media tools and applications	3.1 Identify social media tools and applications for possible implementation 3.2 Initiate preferred social media tools and applications for use 3.3 Establish social media interface using <b><i>text and file content</i></b> 3.4 Initiate <b><i>social networking</i></b> interaction 3.5 Test and evaluate tools and applications for <b><i>ease of use</i></b> 3.6 Present findings

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
- literacy skills to:
  - interpret user online manuals and help functions
  - read and write basic documents and instructions
- problem-solving skills to address problems when using applications
- technical skills to:
  - access the internet
  - operate a personal computer (PC) and printer
  - to enter text and numerical data
  - use social media application packages.

### Required knowledge

- basic technical terminology in relation to social networking and social media applications and tools
- basic knowledge of uploading images, text files, PDF files, audio files, video files and link associated files
- features and functions of social media applications
- import and export software functions
- linking documents
- OHS principles and responsibilities for ergonomics, including work periods and breaks
- tagging to facilitate collaborative folksonomy
- social media applications and procedures for connecting to social networking sites
- use of input and output devices
- use of RSS feeds to connect a social network.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify different types of social media tools and applications, and issues associated with their use</li> <li>• access the internet, set up a social networking presence and upload and link a wide variety of files</li> <li>• use OHS principles and responsibilities for ergonomics, such as work periods and breaks.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• PC and printer</li> <li>• internet</li> <li>• social-media tools and applications</li> <li>• online instructional documents</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of types of social media tools and applications, and social-networking sites</li> <li>• direct observation of candidate accessing and interacting with a variety of social-networking sites</li> <li>• review of social-media tools and application evaluations.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p>

	In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Social media</i></b> may include:	<ul style="list-style-type: none"> <li>web applications that facilitate:             <ul style="list-style-type: none"> <li>information sharing</li> <li>interoperability</li> <li>user-centred design.</li> </ul> </li> </ul>
<b><i>Social-media tools and applications</i></b> may include:	<ul style="list-style-type: none"> <li>blogs</li> <li>folksonomies</li> <li>hosted services</li> <li>mashups</li> <li>social networking sites:             <ul style="list-style-type: none"> <li>YouTube</li> <li>Flickr</li> <li>Facebook</li> <li>Twitter</li> </ul> </li> <li>video sharing sites</li> <li>web applications</li> <li>wikis.</li> </ul>
<b><i>Issues</i></b> may include:	<ul style="list-style-type: none"> <li>copyright</li> <li>privacy</li> <li>security</li> <li>trust.</li> </ul>
<b><i>Text and file content</i></b> may include:	<ul style="list-style-type: none"> <li>applications, including:             <ul style="list-style-type: none"> <li>.exe</li> <li>.pdf</li> <li>.ppt</li> <li>.rtf</li> <li>.zip</li> </ul> </li> <li>audio, including:             <ul style="list-style-type: none"> <li>.mid</li> <li>.mp3</li> <li>.wav</li> </ul> </li> <li>graphics, including:             <ul style="list-style-type: none"> <li>.bmp</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• .gif</li> <li>• .jpg</li> <li>• .swf</li> <li>• .tif</li> <li>• text, including: <ul style="list-style-type: none"> <li>• .htm</li> <li>• .txt</li> </ul> </li> <li>• video, including: <ul style="list-style-type: none"> <li>• .avi</li> <li>• .mov</li> <li>• .mpg</li> </ul> </li> <li>• web, including: <ul style="list-style-type: none"> <li>• .asp</li> <li>• .xml.</li> </ul> </li> </ul>
<i><b>Social networking</b></i> is being connected by one or more specific types of interdependency, such as:	<ul style="list-style-type: none"> <li>• common interest</li> <li>• financial exchange</li> <li>• knowledge</li> <li>• personal relationships</li> <li>• prestige</li> <li>• relationships of beliefs.</li> </ul>
<i><b>Ease of use</b></i> may include:	<ul style="list-style-type: none"> <li>• affordability</li> <li>• desirable features for an online presence: <ul style="list-style-type: none"> <li>• bulletin boards</li> <li>• direct mailing to customers</li> <li>• online forums</li> <li>• selling of products online</li> </ul> </li> <li>• ease of communications</li> <li>• flexibility for placement of text, links and images</li> <li>• reasons for an external online presence: <ul style="list-style-type: none"> <li>• communication with potential customers</li> <li>• promotion of products and services</li> <li>• recruitment of volunteers and new staff</li> </ul> </li> <li>• reasons for an internal online presence: <ul style="list-style-type: none"> <li>• regular staff communications</li> <li>• enterprise cohesion</li> <li>• display of staff achievements</li> </ul> </li> <li>• reliability</li> <li>• set-up ease.</li> </ul>

## MEM05004C Perform routine oxy acetylene welding

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers preparing materials and performing routine oxy acetylene welding.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies in a maintenance or manufacturing environment where the welding is not required to meet an Australian standard or equivalent. Fillet and butt welds would typically be performed on low carbon/mild steels.</p> <p>Where welding is required to meet Australian Standard 1554 General Purpose or equivalent codes, OHS regulations and/or licensing requirements, Unit MEM05022C (Perform advanced welding using oxy acetylene process) should be selected.</p> <p><b>Band: A</b></p> <p><b>Unit Weight: 2</b></p>
--------------------------------	---

### Licensing/Regulatory Information

Refer to Application of the Unit

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

Employability skills	This unit contains employability skills.
----------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify weld requirements	1.1.Weld requirements are identified from job instructions. 1.2.Location of welds is identified in accordance with standard operating procedures and job specifications.
2. Prepare materials for welding	2.1.Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1.Welding equipment is set up correctly. 3.2.Settings and consumables are selected.
4. Perform routine welding using <i>oxy acetylene</i>	4.1.Safe welding practices are applied. 4.2.Materials are welded to job requirements. 4.3.Welds are cleaned in accordance with standard operating procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- preparing materials
- setting up welding equipment
- welding with oxy acetylene fuel gas
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instructions
- using measurement skills for joint preparation and routine oxy acetylene welding

#### Required knowledge

Look for evidence that confirms knowledge of:

- preparatory requirements
- materials and consumables properties and characteristics
- equipment and equipment settings
- fuel gas properties and applications

**REQUIRED SKILLS AND KNOWLEDGE**

- post welding treatments
- weld characteristics
- any applicable industry standards, NOHSC guides, State/Territory regulatory codes of practice/standards
- safe work practices and procedures
- safe welding practices
- use and application of personal protective equipment for routine oxy acetylene welding

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to prepare materials and carry out routine oxy acetylene welding.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

#### Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing routine oxy acetylene welding or other units requiring the exercise of the skills and knowledge covered by this unit.

#### Method of assessment

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

#### Guidance information for

**EVIDENCE GUIDE**

assessment

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Materials</b>	Mild and low carbon steel and cast iron
<b>Prepared</b>	Preheating, setting up jigs, fixtures, clamps, joint preparation
<b>Equipment</b>	Hoses, blowpipes, regulators
<b>Consumables</b>	Filler rods, fluxes
<b>Oxy acetylene</b>	The term 'oxy-acetylene' is used here to describe a range of fuel gases, including acetylene, LPG, hydrogen etc.
<b>Cleaned</b>	Fluxes

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare materials and equipment	1.1.Job requirements are determined from specifications and/ or instructions. 1.2.Materials are correctly prepared using appropriate tools and techniques. 1.3.Materials are correctly assembled/aligned to meet specifications as required. 1.4.Distortion prevention measures are identified and appropriate action is taken as required. 1.5.Heating equipment is assembled and set up safely and correctly in accordance with standard operating procedures. 1.6.Correct and appropriate consumables are selected and prepared. 1.7.Test run is undertaken and verified as required.
2. Braze and/or silver solder	2.1.The correct process is selected to meet specifications. 2.2.Materials are preheated as required. 2.3.Consumables are applied using correct techniques. 2.4.Jointing material is applied correctly and in appropriate quantities to meet job/specifications. 2.5.Material temperature is annealed using correct and appropriate techniques.
3. Inspect joints	3.1.Excess jointing materials are removed using correct and appropriate techniques. 3.2.Inspection of joints is undertaken to standard operating procedures. 3.3.Inspection results are reported/recorded using standard operating procedures as required.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

**REQUIRED SKILLS AND KNOWLEDGE**

- preparing materials
- performing brazing, braze welding, silver soldering
- undertaking visual inspection
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instructions

**Required knowledge**

Look for evidence that confirms knowledge of:

- the reasons for selecting specific methods of assembly/alignment
- the procedures for minimising distortion of the materials being brazed/braze welded/silver soldered
- the procedures for assembling and setting up the specific heating equipment
- the reasons for selecting specific heating equipment
- the reasons for selecting specific consumables
- conducting test runs
- typical applications of brazing/braze welding and silver soldering processes
- the procedures and precautions for preheating the materials to be joined
- the effects of the use of inappropriate techniques on the performance of the jointed materials
- the effect of inappropriate quantities of jointing material on the performance of the jointed materials
- the procedures for normalising the temperature of jointed materials
- the consequences of using inappropriate techniques to normalise the temperature of the joint
- the procedures for removing excess jointing material
- the procedures for inspecting brazed/braze welded/silver soldered joints
- use and application of personal protective equipment for silver soldering and brazing/braze welding
- safe work practices and procedures

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assemble/disassemble plant and equipment	1.1. Accessories and equipment are correctly selected and assembled for manual heating and thermal cutting.
2. Operate heating and thermal cutting equipment	2.1. Cutting process and/or procedure appropriate for material is selected. 2.2. All safety procedures are observed. 2.3. Equipment start-up procedures are followed correctly to standard operating procedures. 2.4. Equipment adjustments are made correctly using standard operating procedures. 2.5. Appropriate cutting allowances are made. 2.6. Material is used in the most economical way. 2.7. Defects are identified and corrective action is taken to standard operating procedures. 2.8. Material is heated and cut to specification. 2.9. Shape/size/length is to accepted workplace standards.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- performing pre-start checks
- safely starting equipment
- following standard operating procedures
- adjusting equipment to operating specifications
- making cutting allowances
- economising material and minimising wastage
- identifying cutting defects and taking corrective action
- heating and cutting materials to specifications
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures. May include drawings

**REQUIRED SKILLS AND KNOWLEDGE**

- following oral instructions
- performing measurements needed to meet the requirements of this unit
- entering routine and familiar information onto proformas and standard workplace forms

**Required knowledge**

Look for evidence that confirms knowledge of:

- cutting processes appropriate to various materials
- heating and cutting specifications
- procedures for heating and cutting
- the tools, equipment and techniques for heating and cutting
- assembling procedures for equipment and accessories
- hazards and control measures associated with manual heating and thermal cutting
- use and application of personal protective clothing and equipment
- equipment pre-checks and operation
- procedures for adjusting heating and cutting equipment
- cutting allowances and reasons for applying them
- procedures for minimising waste material
- reasons for minimising waste material
- cutting defects and their causes
- procedures for correcting cutting defects
- tools, equipment and techniques required to correct cutting defects
- use and application of personal protective equipment
- safe work practices and procedures

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to perform manual heating and thermal cutting.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

#### Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with manual heating/thermal cutting or other units requiring the exercise of the skills and knowledge covered by this unit.

#### Method of assessment

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questions should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

## Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers determining the job requirements and sequence of operations, selecting and mounting tools, performing the machining, measuring the components, and adjusting and maintaining a range of standard machine tools.
------------------------	--

## Application of the Unit

<b>Application of the unit</b>	<p>The unit of competency applies to the use of machinery to shape metal including lathes, mills, planers, shapers, radial arm drills, slotters and surface grinders.</p> <p>This unit has been developed to support Engineering Tradesperson - Mechanical apprenticeship training and the recognition of trade level skills in machining operations. Skills covered by this unit are generally applied in occupational and work situations associated with fitting and machining. It may also apply to other trade occupations requiring general machining skills. It may also apply in some circumstances to senior operators who have responsibility for machine set up, selection of materials and lubricants, establishment of datum points and basic marking out, and setting of speeds, feeds and other machining parameters.</p> <p>This unit has application in the MEM30205 Certificate III in Engineering - Mechanical qualification and other qualifications requiring a basic trade level of machining skills. It may also apply to MEM20205 Certificate II in Engineering - Production Technology and MEM30105 Certificate III in Engineering - Production Systems and other qualifications requiring machining skills.</p> <p>Machining is undertaken on one or more of a range of standard machine tools. Machines are not computer numerical controlled (CNC) machines.</p> <p>Where machining is undertaken without undertaking any set up including mounting of tools, setting of speeds, feeds and other operational parameters then either MEM07024B Operate and monitor machine/process or MEM07025B Perform advanced machine/process operation should be selected.</p> <p>Drilling operations in this unit exclude those covered by</p>
--------------------------------	--

	<p>MEM18002B Use power tools/hand held operations.</p> <p>Where substantial marking out is required, MEM12006C Mark off/out (general engineering) should be considered.</p> <p>Where precision measurement is required, MEM12003B Perform precision mechanical measurement should also be considered.</p> <p>For set-up and operation of electro-discharge (EDM) machines, refer to MEM07014B Perform electro-discharge (EDM) machining operations.</p> <p><b>Band: A</b></p> <p><b>Unit Weight: 8</b></p>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine job requirements	1.1. Drawings, instructions and specifications are interpreted and understood
2. Determine sequence of operations	2.1. Sequence of operations including job set-up is determined for maximum efficiency and to meet job specifications 2.2. Appropriate material is selected and datum established as required
3. Select and mount tools	3.1. Appropriate tools for job are selected, sharpened and shaped as required 3.2. Tools are mounted and positioned correctly
4. Perform machining operations	4.1. Basic marking out techniques are used where required 4.2. Machining parameters are set for job requirements and maximum tool life 4.3. Work is held or correctly clamped without damage to product, and all safety requirements are met 4.4. Machining is performed in a safe manner utilising all guards, safety procedures and personal protective clothing and equipment
5. Measure components	5.1. Components are checked with instruments or gauges appropriate to the measurement requirements to ensure compliance with specifications
6. Adjust and maintain machine	6.1. Routine maintenance and adjustments are carried out as required which may include slide and collar adjustment, cleaning and lubrication

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- reading and interpreting routine information on written job instructions, specifications and standard operating procedures which may include drawings

**REQUIRED SKILLS AND KNOWLEDGE**

- following oral instruction
- planning and sequencing operations
- preparing operational work plan
- sharpening and shaping cutting tools
- identifying worn or damaged cutting tools
- correct mounting and positioning of cutting tools
- basic marking out of materials
- setting machining parameters to achieve the job requirements and maximise tool life
- using appropriate and sufficient clamping/mounting of the work piece
- using coolant/lubricant correctly
- checking for conformance to specifications
- measuring to specified tolerances and dimensions

**Required knowledge**

Required knowledge includes:

- reasons for selecting the chosen sequence of operations
- methods of work holding
- basic marking out techniques including datum points/lines
- geometry of cutting tools for a range of materials and applications
- benefits of using correctly sharpened cutting tools
- machine operation
- selection of feeds and speeds to suit a range of materials and operations within the scope of this unit
- correct methods of mounting a variety of cutting tools
- safety issues with regard to correct clamping, guards and shields
- tolerances and limits of size
- situations indicating the need for machine adjustment, lubrication and cleaning
- techniques, tools and equipment to measure materials and machined components
- use and application of personal protective equipment
- safe work practices and procedures
- hazards and control measures associated with general machining

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to perform general machining including responsibility for selecting and mounting tooling and setting machining parameters. Competency in this unit cannot be claimed until all prerequisites have been satisfied

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently apply the skills covered in this unit of competency in new and different situations and contexts. Critical aspects of assessment and evidence include:

- correct job planning including identifying job requirements from drawings, instructions or specifications and sequence of operations
- identifying any required tooling, measuring equipment and accessories
- selecting and mounting required tooling
- selecting material and marking out if required
- setting machining parameters
- checking machined components for conformance to specifications.

#### Context of and specific resources for assessment

This unit has been developed to support training in and recognition of trade level competency in general machining as applied to a trade level fitting and machining, other trade or senior operator work environment. Assessment should emphasise a workplace context and procedures found in the candidate's workplace.

The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

#### Method of assessment

Typically Engineering Tradespersons - Mechanical and other persons engaged in general machining work are required to apply their machining skills and techniques across a range of jobs and specifications.

**EVIDENCE GUIDE**

	<p>A single assessment event is not appropriate. On the job assessment should be included as part of the assessment process wherever possible. Where assessment occurs off the job, judgement must consider evidence of the candidate's performance in a productive work environment that includes a sufficient range of appropriate tasks and materials to cover the scope of application for this unit.</p> <p>Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</p>
<b>Guidance information for assessment</b>	<p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing general machining or other units requiring the exercise of the skills and knowledge covered by this unit.</p> <p>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</p>

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and

**RANGE STATEMENT**

regional contexts) may also be included.

<b>Operations</b>	<p>Operations may include:</p> <ul style="list-style-type: none"> <li>• parallel cutting</li> <li>• slotting</li> <li>• planing</li> <li>• drilling</li> <li>• knurling</li> <li>• cutting flats</li> <li>• non-precision surface grinding operations</li> </ul>
<b>Materials</b>	Materials may include ferrous and non-ferrous
<b>Tools</b>	<p>Tools may include:</p> <ul style="list-style-type: none"> <li>• cutting tools and accessories</li> <li>• measuring devices</li> </ul>
<b>Marking out techniques</b>	Marking out techniques may include basic marking out techniques using calipers, steel rules, dividers and scribes
<b>Machining parameters</b>	<p>Machining parameters may include:</p> <ul style="list-style-type: none"> <li>• speeds</li> <li>• feeds</li> <li>• stops</li> <li>• coolant and cutting lubricants</li> </ul>
<b>Machines</b>	<p>Machines may include:</p> <ul style="list-style-type: none"> <li>• lathes</li> <li>• mills</li> <li>• planers</li> <li>• shapers</li> <li>• radial arm drills</li> <li>• slotters</li> <li>• surface grinder</li> </ul>
<b>Maintenance and adjustments</b>	<p>Maintenance and adjustments may include:</p> <ul style="list-style-type: none"> <li>• slide and collar adjustment</li> <li>• cleaning and lubrication</li> </ul>

## MEM09002B Interpret technical drawing

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers interpreting technical drawing applying to any of the full range of engineering disciplines.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>Technical drawings may utilise perspective, exploded views or hidden view techniques. Drawings are provided to Australian Standard 1100 and/or Australian Standard 1102 and their equivalents from the full range of engineering disciplines.</p> <p>Standard symbols to Australian Standard 1100 and/or Australian Standard 1102 or equivalent are recognised in field of employment. Technical drawings may include symbol glossaries.</p> <p>Where any drawing, sketch, chart, diagram is only used as the technique for communication, then this unit does not apply: see Unit MEM12023A (perform engineering measurements) or Unit MEM16006A (Organise and communicate information).</p> <p><b>Band: A</b></p> <p><b>Unit Weight: 4</b></p>
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

## Pre-Requisites

Prerequisite units		

## Employability Skills Information

Employability skills	This unit contains employability skills.
----------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select correct technical drawing	1.1.Drawing is checked and validated against job requirements or equipment. 1.2.Drawing version is checked and validated.
2. Interpret technical drawing	2.1.Components, assemblies or objects are recognised as required. 2.2.Dimensions are identified as appropriate to field of employment. 2.3.Instructions are identified and followed as required. 2.4.Material requirements are identified as required. 2.5.Symbols are recognised in the drawing as appropriate.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- checking the drawing against job requirements/related equipment in accordance with standard operating procedures
- confirming the drawing version as being current in accordance with standard operating procedures
- where appropriate, obtaining the current version of the drawing in accordance with standard operating procedures
- reading, interpreting information on the drawing, written job instructions, specifications, standard operating procedures, charts, lists and other applicable reference documents
- checking and clarifying task related information
- undertaking numerical operations, geometry and calculations/formulae within the scope of this unit

#### Required knowledge

Look for evidence that confirms knowledge of:

- application of AS1100.101 in accordance with standard operating procedures
- relationship between the views contained in the drawing

**REQUIRED SKILLS AND KNOWLEDGE**

- objects represented in the drawing
- units of measurement used in the preparation of the drawing
- dimensions of the key features of the objects depicted in the drawing
- understanding of the instructions contained in the drawing
- the actions to be undertaken in response to those instructions
- the materials from which the object(s) are made
- any symbols used in the drawing as described in range statement
- hazard and control measures associated with interpreting technical drawings, including housekeeping
- safe work practices and procedures

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to interpret technical drawings as described.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

#### Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with interpreting technical drawings or other units requiring the exercise of the skills and knowledge covered by this unit.

#### Method of assessment

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

#### Guidance information for assessment

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Interpret technical drawing

AS1100.101 is an extensive work and the candidate is not required to have complete familiarity with all its contents, the application of AS1100 would usually be in line with standard operating procedures; interpretation may require guidance particularly in respect to any geometric tolerancing

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select appropriate device or equipment	1.1.Measurement requirements are determined from specifications. 1.2.Appropriate device or equipment is selected according to standard operating procedures, to achieve required outcome.
2. Obtain measurements using a range of measuring devices	2.1.Correct and appropriate measuring technique is used. 2.2.Measurements are accurately obtained . 2.3.Dimensions are determined or verified using basic calculations, where required.
3. Maintain measuring devices	3.1.Routine care and storage of devices is undertaken to manufacturers' specifications or standard operating procedures. 3.2.Routine adjustments to devices are made and checked.
4. Communicate measurements as required	4.1.Measurements are accurately recorded, where required. 4.2.Freehand sketch which depicts required information is prepared, as required.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- selecting the appropriate measuring device for given measuring tasks
- using appropriate measuring technique
- reading all measurements taken accurately to the finest graduation of the selected measuring device
- handling and storing measuring devices in accordance with manufacturers' specifications or standard operating procedures
- verifying all measuring devices before use
- making, where appropriate, routine adjustments to measuring devices
- reading, interpreting and following information on written job instructions,

**REQUIRED SKILLS AND KNOWLEDGE**

specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents

- planning and sequencing operations
- checking and clarifying task related information
- checking for conformance to specifications
- undertaking numerical operations involving addition, subtraction, multiplication, division, fractions and decimals within the scope of this unit
- preparing drawings as required

**Required knowledge**

Look for evidence that confirms knowledge of:

- correct application of a range of measuring devices
- correct and appropriate measuring technique for a range of measuring devices
- addition, subtraction, multiplication, division, fractions, decimals to the scope required by this unit
- procedures for handling and storing a range of measuring devices
- procedures for adjusting and zeroing a range of measuring devices
- methods of communicating measurements by drawings, as required
- safe work practices and procedures

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to perform engineering measurements.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

#### Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing engineering measurements or other units requiring the exercise of the skills and knowledge covered by this unit.

#### Method of assessment

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

ELEMENT	PERFORMANCE CRITERIA
1. Use power tools	<p>1.1.Power tools are selected appropriate to the task requirements.</p> <p>1.2.Power tools are used for a determined sequence of operations - which may include clamping, alignment and adjustment to produce desired outcomes - to job specifications which may include finish, size or shape.</p> <p>1.3.All safety requirements are adhered to before, during and after use.</p> <p>1.4.Unsafe or faulty tools are identified and marked for repair before, during and after use according to designated procedures.</p> <p>1.5.Operational maintenance of tools, including hand sharpening, is undertaken according to standard workplace procedures, principles and techniques.</p> <p>1.6.Power tools are stored safely in appropriate location according to standard workshop procedures and manufacturers' recommendations.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- reading and following information on standard operating procedures
- following verbal instructions
- selecting power tools appropriate to the task
- using power tools safely
- using clamping/securing devices
- identifying power tool defects
- maintaining power tools using appropriate techniques
- sharpening tools/tool bits within the scope of this unit
- storing power tools according to manufacturers'/ standard operating procedures.

#### Required knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

Look for evidence that confirms knowledge of:

- application of different power tools
- clamping/securing methods
- adjustments/alignments to a range of power tools
- common faults and/or defects in power tools
- procedures for marking unsafe or faulty power tools for repair
- routine maintenance requirements of a range of power tools
- tool sharpening techniques for a range of power tools
- storage location and procedures of a range of power tools
- hazards/control measures associated with power tools
- use and application of personal protective equipment
- safe work practices and procedures

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to use power tools/hand held operations.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

#### Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with using power tools/hand held operations or other units requiring the exercise of the skills and knowledge covered by this unit.

#### Method of assessment

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

<b>Prerequisite units</b>		
<b>Path 1</b>	MEM09002B	Interpret technical drawing
	MEM12023A	Perform engineering measurements
	MEM18001C	Use hand tools
	MEM18002B	Use power tools/hand held operations
	MEM18055B	Dismantle, replace and assemble

<b>Prerequisite units</b>		
		engineering components

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess lubrication system operation	1.1.Relevant information is obtained and correctly interpreted prior to any testing. 1.2.Checks are undertaken safely and to prescribed procedures. 1.3.Flows, pressures and temperatures are correctly determined and recorded. 1.4.Faults are correctly isolated to component level and appropriate corrective action is determined. 1.5.Lubricant fluid characteristics, terminology and applications are understood. 1.6.Test equipment is used correctly. 1.7.Results of spectrographic or laboratory analysis are correctly evaluated and recommendations are made regarding adjustments to future maintenance activities. 1.8.Auxiliary lubrication systems are assessed for correct operation.
2. Rectify faulty components	2.1.Replacement components are correctly selected using manufacturers' data. 2.2.Components are removed and refitted to engine by following prescribed procedures. 2.3.Final adjustments are made that bring system in line with specifications. 2.4.Test and rectification activities are accurately recorded. 2.5.Engine is free of lubricant leaks after repair work is carried out. 2.6.Component wear and clearances are correctly determined using appropriate test equipment and manufacturers' recommendations.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

**REQUIRED SKILLS AND KNOWLEDGE**

Look for evidence that confirms skills in:

- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- planning and sequencing operations
- checking task-related information
- checking for conformance to specification
- checking the lubrication system
- determining and recording oil flows, pressures and temperatures
- identifying faulty components
- using test equipment
- obtaining/interpreting the results of lubricating oil tests
- checking auxiliary lubrication systems for correct operation where appropriate
- selecting replacement components
- removing, refitting and adjusting lubrication system components
- reporting and recording test and work activities
- checking lubrication system components for wear and clearance
- undertaking calculations and numerical operations within the scope of this unit

**Required knowledge**

Look for evidence that confirms knowledge of:

- the operation of the lubrication system
- the procedures for testing/checking lubrication
- hazards and control measures associated with checking and rectifying lubrication systems, including housekeeping
- the tests to be undertaken and equipment and techniques to be used to determine oil flows, pressures and temperatures
- the procedures for recording lubrication system test results
- the specifications of the lubrication system components
- the appropriate corrective action for faulty components
- the characteristics of lubricants and application of a variety of lubricants
- the procedures and reasons for analysing lubricating oil samples
- the likely causes of a range of out of specification test results
- the appropriate corrective action to be taken
- the implications of out of specification test results on maintenance schedules and requirements
- the reasons for installing auxiliary lubrication systems on diesel plant and equipment
- the operation of the auxiliary lubrication system
- the procedures for removing/replacing lubrication system components

**REQUIRED SKILLS AND KNOWLEDGE**

- the procedures for adjusting lubrication systems
- the procedures for recording test and repair activities
- the procedures for checking lubrication systems for leaks
- the measuring equipment/techniques used to determine lubrication system component wear and clearances
- safe work practices and procedures

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to maintain engine lubrication systems. Competency in this unit cannot be claimed until all prerequisites have been satisfied.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

#### Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with maintaining engine lubrication systems, or other units requiring the exercise of the skills and knowledge covered by this unit.

#### Method of assessment

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

**EVIDENCE GUIDE**

<b>Guidance information for assessment</b>	
--	--

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Faults**

Typical symptoms of faults would be lubrication pressures/temperatures that are too low/high; excessive or too little consumption/flow, etc.

**Test equipment**

Pressure/temperature and/or flow meters

**Adjustments**

May include setting of bypass/regulating/relief valves to specified pressures of flows

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare inspection areas for basic penetrant testing	1.1. Inspection areas are cleaned and prepared for testing using appropriate procedures and materials. 1.2. Preparation processes are carried out in accordance with the relevant procedures and OH&S requirements. 1.3. Inspection areas are visually assessed and obvious discontinuities are identified.
2. Perform basic penetrant testing	2.1. Nominated test is identified from standard operating procedures. 2.2. Test equipment is prepared in accordance with standard operating procedures. 2.3. Test media is selected and applied in accordance with workplace practices and specifications. 2.4. Penetrant test is carried out in accordance with relevant work instructions and OH&S requirements. 2.5. Penetrant testing equipment is maintained and stored in accordance with standard operating procedures and OH&S requirements.
3. Report the results of penetrant test(s)	3.1. Basic indications are checked and defects are identified in accordance with enterprise standards and/or procedures. 3.2. Basic indications are confirmed in accordance with enterprise standards and/or procedures. 3.3. Test results are reported in accordance with enterprise standards and/or procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- preparing inspection areas
- identifying discontinuities
- applying procedures

## REQUIRED SKILLS AND KNOWLEDGE

- applying test media
- applying principles of penetrant testing techniques
- identifying defects
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures.
- following oral instructions
- entering routine and familiar information onto proformas and standard workplace forms

## Required knowledge

Look for evidence that confirms knowledge of:

- cleaning and preparation processes
- precleaning methods and their areas of use - solvents, vapour degrease, etching, detergents, paint removers, mechanical methods
- consequences of incorrect preparation
- procedures and OH&S requirements in relation to the preparation process
- basic concepts and principles of NDT; general terms, purpose of NDT and areas of application of NDT
- scope and basic description of test
- general properties of penetrants - penetrability, removability, visibility
- emulsifier types
- developer types
- use of standard test panels
- established inspection procedures and techniques
- types of discontinuities and their consequences
- procedure for carrying out penetrant testing
- penetrant application
- dwell times
- penetrant removal
- developer application
- dry powder
- development time
- factors affecting indications
- non-relevant indications
- post-cleaning methods and their areas of use
- basic maintenance and storage procedures for testing equipment
- OH&S requirements including storage requirements
- definition of a defect and common basic defects
- methods/procedures for reporting test results

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to perform basic penetrant testing. Competency in this unit cannot be claimed until all prerequisites have been satisfied.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use concepts of arithmetic in the solution of engineering problems	<p>1.1.Units of physical quantities are converted to facilitate engineering calculations.</p> <p>1.2.Calculations are performed to solve problems involving rational and irrational numbers.</p> <p>1.3.Scientific notation is used to represent numbers.</p> <p>1.4.Calculations are checked for reasonableness using estimating and approximating techniques.</p>
2. Solve engineering problems involving algebraic expressions with one independent variable	<p>2.1.Algebraic expressions are manipulated using mathematical operations in their correct order.</p>
3. Use two-dimensional geometry to solve practical problems	<p>3.1.Angles expressed in degrees are correctly converted to radians and vice versa.</p> <p>3.2.The perimeter, area, length and angles of a range of two-dimensional figures are correctly calculated.</p> <p>3.3.The volume and surface area of complex figures are correctly calculated.</p> <p>3.4.Points identified in terms of cartesian coordinates can be converted to polar coordinates and vice versa.</p>
4. Use trigonometry to solve practical problems	<p>4.1.Basic trigonometry functions are used to calculate the lengths of the sides of right-angled triangles.</p> <p>4.2.Inverse trigonometry functions are used to determine angles in a right-angled triangle given the lengths of two sides.</p> <p>4.3.The sine rule is used to determine the lengths of the sides of acute and obtuse angled triangles given one side and two angles.</p> <p>4.4.The cosine rule is used to determine the lengths of the sides of acute and obtuse angled triangles given two sides and one angle.</p>
5. Graph linear functions	<p>5.1.Linear functions are solved graphically and equations of straight lines are determined from the slope and one point, or two points.</p> <p>5.2.Two linear functions are solved simultaneously both algebraically and geometrically.</p> <p>5.3.The length and mid point of a line segment are determined.</p>
6. Solve quadratic	<p>6.1.Quadratic equations are solved.</p>

ELEMENT	PERFORMANCE CRITERIA
equations	6.2. Simultaneous linear and quadratic equations are solved.
7. Perform basic statistical calculations	7.1. Mean, median and mode are calculated from given data. 7.2. Standard deviation is calculated and interpreted employing graphical representation.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- using and applying mathematical formulas:
  - logical thinking
  - problem solving
  - calculating
  - applying statistics
  - using computer numerical methods
  - drawing graphs

#### Required knowledge

Look for evidence that confirms knowledge of:

- transposing and evaluating formulae
- polynomials
- straight line coordinate geometry
- introduction to indices
- introduction to trigonometry
- circular functions
- trigonometry of oblique triangles
- trigonometric identities
- introduction to functions and their graphs

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	A person who demonstrates competency in this unit must be able to apply mathematical skills and knowledge to simple engineering applications. Evidence from tasks and projects should/may be used to complement and demonstrate integration of competency.
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
<b>Context of and specific resources for assessment</b>	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with applying mathematical concepts to engineering applications, or other units requiring the exercise of the skills and knowledge covered by this unit.</p>

The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

## EVIDENCE GUIDE

### Guidance information for assessment

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Concepts of mathematics

Include arithmetic, algebraic expressions with one independent variable, two-dimensional geometry, trigonometry, linear functions, basic quadratic functions, basic statistical methods

#### Correct order

Refers to the correct procedure when expanding brackets, factorising algebraic expressions, factorising quadratic expressions, simplifying algebraic fractions, transposing formulae, solving simple one variable equations, finding the quotient and remainder given a linear division

#### Complex figures

May include cones, pyramids, spheres, frustums and intersections of figures singularly or in combination

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify current resource use and environmental issues.	<p>1.1. Identify workplace <b><i>environmental and resource efficiency issues</i></b>.</p> <p>1.2. Identify resources used in own work role.</p> <p>1.3. <b><i>Measure</i></b> and record current usage of resources using <b><i>appropriate techniques</i></b>.</p> <p>1.4. Identify and report workplace environmental hazards to appropriate personnel.</p>
2. Comply with environmental regulations.	<p>2.1. Follow <b><i>procedures</i></b> to ensure <b><i>compliance</i></b>.</p> <p>2.2. Report environmental <b>incidents</b> to appropriate personnel.</p>
3. Seek opportunities to improve environmental practices and resource efficiency.	<p>3.1. Follow <b><i>enterprise plans</i></b> to improve environmental practices and resource efficiency.</p> <p>3.2. Make <b><i>suggestions</i></b> for improvements to workplace practices in own work area.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include the ability to:

- report as required by procedures
- follow procedures and instructions and respond to change
- ask questions and seek clarifications relating to work requirements

Reading and writing is required in order to interpret required procedures and complete required workplace forms/reports.

Numeracy is required to interpret numeric workplace information, readings and measurements, handle data as required and complete numeric components of workplace forms/reports.

#### Required knowledge

Competency includes sufficient knowledge to:

- have a basic understanding of sustainability
- know the environmental hazards/risks, resource use and inefficiencies associated with own workplace (at an appropriate level)
- know the relevant environmental and resource efficiency systems and procedures for own work area
- know the impact of laws and regulations to a level relevant to the work context

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competence in this unit must be able to provide evidence of the ability to follow workplace procedures according to instructions given and to participate in the improvement of environmental and resource efficient work practices at own level of responsibility. Evidence must be strictly relevant to the particular workplace role.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- identify and measure resources used in their job
- identify situations likely to lead to an environmental incident
- follow procedures related to environmental performance.

Consistent performance should be demonstrated. For example, look to see that:

- work is routinely to procedures
- the minimum of resources is used consistent with the job requirements, good practice and the procedures.

#### Context of and specific resources for assessment

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Depending on the selected methods of assessment access may be required to:

- workplace procedures and plans
- documentation in relation to production, waste, overheads, hazard control/management
- reports from supervisors/managers
- case study/scenarios

#### Method of assessment

A holistic approach should be taken to the assessment.

Competence in this unit may be assessed:

- by demonstration in the workplace

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"><li>• using targeted questioning for appropriate portions</li><li>• by use of a suitable simulation and/or a range of case studies/scenarios</li><li>• by a combination of these techniques.</li></ul> <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment.</p>
<b>Guidance information for assessment</b>	<p>Assessors need to be aware of any cultural issues that may affect responses to questions. Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Procedures</b>	<p>All operations are performed in accordance with procedures including all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.</p>
<b>Environmental and resource efficiency issues</b>	<p>Environmental and resource efficiency issues include minimisation of environmental risks and maximisation of opportunities to improve business environmental performance and to promote more efficient production and consumption of natural resources, for example by:</p> <ul style="list-style-type: none"> <li>• minimisation of waste, through implementation of the waste management hierarchy</li> <li>• efficient and effective use of energy and other resources</li> <li>• seeking alternative sources of energy</li> <li>• efficient use of materials and appropriate disposal of waste</li> <li>• use of controls to minimise the risk of environmental damage from hazardous substances</li> <li>• efficient water use</li> <li>• reducing emissions</li> <li>• life cycle analysis applied to issues such as energy supply, materials, transport, production</li> </ul>
<b>Measure</b>	<p>Measure should be interpreted in a manner consistent with the scope of the job and may include things like:</p> <ul style="list-style-type: none"> <li>• counting the number of items entering/leaving a work area</li> <li>• reading indicators in the work area</li> <li>• obtaining relevant information from support</li> </ul>

<b>RANGE STATEMENT</b>	
	personnel <ul style="list-style-type: none"> <li>• other simple means</li> </ul>
<b>Appropriate techniques</b>	Appropriate techniques include: <ul style="list-style-type: none"> <li>• material fed to/consumed by plant/equipment</li> <li>• plant meters and gauges</li> <li>• job cards including kanbans</li> <li>• examination of invoices from suppliers</li> <li>• measurements made under different conditions</li> <li>• examination of relevant information and data.</li> </ul>
<b>Compliance</b>	Compliance includes meeting relevant federal, state and local government laws, by-laws, regulations and mandated codes of practice. It also includes any codes and standards that the enterprise applies voluntarily.
<b>Incidents</b>	Incidents include: <ul style="list-style-type: none"> <li>• breaches or potential breaches of regulations</li> <li>• occurrences outside of standard procedure which may lead to lower environmental performance.</li> </ul>
<b>Enterprise plans</b>	Enterprise plans include: <ul style="list-style-type: none"> <li>• documented policies and procedures</li> <li>• work plans to minimise waste, increase efficiency of water/energy use, minimise environmental hazards</li> </ul>
<b>Suggestions</b>	Suggestions include ideas that help to: <ul style="list-style-type: none"> <li>• prevent and minimise environmental risks and maximise opportunities</li> <li>• reduce emissions of greenhouse gases</li> <li>• reduce use of non-renewable resources</li> <li>• improve energy efficiency</li> <li>• increase use of renewable, recyclable, reusable and recoverable resources</li> <li>• reduce waste</li> <li>• increasing the reusability/recyclability of wastes/products</li> <li>• reduce water usage and/or water wastage.</li> </ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Investigate current practices in relation to resource usage.	1.1 Identify environmental regulations applying to the enterprise. 1.2 Assess procedures for assessing <i>compliance</i> with environmental regulations. 1.3 Collect information on environmental and resource efficiency systems and procedures, and provide to the work group where appropriate. 1.4 Measure and record current resource usage by members of the work group. 1.5 Analyse and record current purchasing strategies. 1.6 Analyse current work processes to access information and data and assist in identifying areas for improvement.
2. Set targets for improvements.	2.1 Seek input from stakeholders, key personnel and specialists. 2.2 Access external sources of information and data as required. 2.3 Evaluate alternative solutions to workplace environmental issues. 2.4 Set efficiency targets.
3. Implement performance improvement strategies.	3.1 Source <i>techniques/tools</i> to assist in achieving targets. 3.2 Apply continuous improvement strategies to own work area of responsibility and communicate ideas and possible solutions to the work group and management. 3.3 Integrate environmental and resource efficiency improvement plans for own work group with other operational activities and implement them. 3.4 Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon them where appropriate. 3.5 Implement costing strategies to fully value environmental assets.
4. Monitor performance.	4.1 Document outcomes and communicate reports on targets to key personnel and stakeholders. 4.2 Evaluate strategies. 4.3 Set new targets and investigate and apply new tools and strategies. 4.4 Promote successful strategies and reward participants where possible.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- using relevant environmental and resource efficiency systems, tools and procedures
- applying quality assurance systems relevant to own work area
- applying relevant supply chain procedures
- measurement and calculation techniques
- communication/consultation skills to ensure information is supplied to the work group

Reading and writing is required to comprehend documentation and interpret environmental and energy efficiency requirements and to document and maintain records

Numeracy is required to interpret numeric workplace information, readings and measurements, handle data as required and complete numeric components of workplace forms/reports.

#### Required knowledge

Required knowledge includes:

- how to access and use relevant environmental and resource efficiency systems, tools and procedures
- understanding of best practice approaches relevant to own area of responsibility
- strategies to maximise opportunities and minimise impacts relevant to own work area
- relevant environmental and resource efficiency issues specific to industry practices
- methods for measuring and calculating resource usage

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competence in this unit must be able to provide evidence of the ability to implement and monitor integrated environmental and resource efficiency management policies and procedures within an organisation.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- monitor and investigate current resource usage
- develop plans to improve sustainability
- implement environmental improvements.

Consistent performance should be demonstrated. For example, look to see that:

- environmental performance is routinely monitored and investigated
- areas for improvements are followed through and the implemented changes are in turn monitored and investigated.

#### Context of and specific resources for assessment

This section should be read in conjunction with the range of variables for this unit of competency. Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation.

A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified

<b>EVIDENCE GUIDE</b>	
	for people with disabilities.
<b>Method of assessment</b>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed:</p> <ul style="list-style-type: none"> <li>• by demonstration in the workplace</li> <li>• using targeted questioning for appropriate portions</li> <li>• through use of specific project(s)</li> <li>• by use of a suitable simulation and/or a range of case studies/scenarios</li> <li>• by a combination of these techniques.</li> </ul> <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment.</p>
<b>Guidance information for assessment</b>	<p>Assessors need to be aware of any cultural issues that may affect responses to questions.</p> <p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.</p>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

#### Environmental and resource efficiency issues

Environmental and resource efficiency issues include:

- addressing environmental and resource sustainability initiatives such as Environmental Management Systems, action plans, surveys and audits
- reference to standards, guidelines and approaches such as:
  - ISO 14001 Environmental Management Systems
  - Life Cycle Analyses
  - Cradle to cradle
  - Global Reporting Initiative
  - Ecological footprinting
  - Triple Bottom Line reporting
  - Product Stewardship
- determining enterprise's most appropriate waste treatment including waste to landfill, recycling, re-use and wastewater treatment
- applying the waste management hierarchy in the workplace
- initiating and/or maintaining appropriate enterprise procedures for operational energy consumption, including stationary energy and

<b>RANGE STATEMENT</b>	
	non stationary (transport) <ul style="list-style-type: none"> <li>• efficient use of water</li> <li>• minimising greenhouse gas emissions</li> <li>• use of controls to minimise the risk of environmental damage from hazardous substances</li> </ul>
<b>Measure</b>	Measuring techniques include: <ul style="list-style-type: none"> <li>• material fed to/consumed by plant/equipment</li> <li>• plant meters and gauges</li> <li>• job cards including kanbans</li> <li>• examination of invoices from suppliers</li> <li>• measurements made under different conditions</li> <li>• examination of relevant information and data</li> <li>• others as appropriate to the specific industry contexts.</li> </ul>
<b>Techniques and tools</b>	Techniques and tools may includeÂ : <ul style="list-style-type: none"> <li>• visual workplace concepts</li> <li>• measurement, display and/or recording devices</li> <li>• changed work practices/procedures</li> <li>• competence development and awareness training</li> <li>• process and equipment items</li> </ul>
<b>Compliance</b>	Compliance includes meeting relevant federal, state and local government laws, by-laws, regulations and codes of practice.
<b>Incidents</b>	Incidents include: <ul style="list-style-type: none"> <li>• breaches or potential breaches of regulations</li> <li>• occurrences outside of standard procedure which may lead to lower environmental performance</li> </ul>
<b>Purchasing strategies</b>	Purchasing strategies include: <ul style="list-style-type: none"> <li>• influencing suppliers to take up environmental sustainability</li> <li>• selecting materials/components with a lower environmental profile.</li> </ul>
<b>Stakeholders, key personnel and specialists</b>	Stakeholders, key personnel and specialists include individuals and groups both inside and outside the organisation that have some direct interest in the

<b>RANGE STATEMENT</b>	
	<p>enterprise's conduct, actions, products and services, including:</p> <ul style="list-style-type: none"> <li>• employees at all levels of the organisation</li> <li>• customers</li> <li>• suppliers</li> <li>• other organisations</li> <li>• key personnel within the organisation, and specialists outside it who may have particular technical expertise</li> </ul>
<b>Suggestions</b>	<p>Suggestions includes ideas that help to:</p> <ul style="list-style-type: none"> <li>• prevent and minimise environmental risks and maximise opportunities</li> <li>• reduce emissions of greenhouse gases</li> <li>• reduce use of non-renewable resources</li> <li>• make more efficient use of energy, water and other resources</li> <li>• maximise opportunities to re use and recycle materials</li> <li>• identify strategies to offset or mitigate environmental impacts. e.g. purchasing of carbon credits</li> <li>• express purchasing power through the selection of suppliers with improved environmental performance. e.g. purchasing renewable energy and materials with lower embedded carbon</li> <li>• eliminate the use of hazardous and toxic materials increasing the reusability/recyclability of wastes/products.</li> </ul>

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

<b>Prerequisite units</b>	This unit has <b>no</b> prerequisites	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop workplace sustainability policy.	1.1 Define <i>scope of sustainability policy</i> . 1.2 Identify and consult <i>stakeholders</i> as a key component of the policy development process. 1.3 Review environmental sustainability <i>strategies</i> relevant to all stages of work covered by the policy 1.4 Make recommendations for policy options based on likely effectiveness, timeframes and cost. 1.5 Develop policy is that reflects the organisation's commitment to sustainability as an integral part of the business planning and as a business opportunity. 1.6 Agree upon appropriate methods of implementation.
2. Communicate the policy.	2.1 Promote the policy, including its expected outcome to key stakeholders. 2.2 Inform those involved in implementing the policy as to outcomes expected, activities to be undertaken and responsibilities assigned.
3. Implement the policy.	3.1 Develop and communicate procedures to help implement the policy. 3.2 Implement <i>strategies</i> for continuous improvement in resource efficiency. 3.3 Establish record systems for tracking continuous improvements in sustainability approaches and assign responsibilities.
4. Review policy implementation	4.1 Record outcomes and provide feedback to key personnel and stakeholders. 4.2 Investigate success or otherwise of policy. 4.3 Monitor records to identify trends that may require remedial action, and use to promote continuous improvement of performance. 4.4 Modify policy and or <i>procedures</i> as required to ensure improvements are made.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- developing and implementing systems and procedures to aid in the achievement of sustainability in the workplace
- applying quality assurance systems relevant to own enterprise
- accessing and applying other relevant enterprise policies, procedures and protocols
- relevant industry competency
- interpreting business/strategic plans

This unit requires the ability to:

- read and evaluate complex and formal documents such as policy and legislation
- research, analyse and present information
- prepare written reports requiring precision of expression and language and structures suited to the intended audience
- adjust communication to suit different audiences
- deal with different points of view and dissenting stakeholders.

#### Required knowledge

Required knowledge includes:

- understanding of relevant policy development and implementation processes and practices
- understanding of the principles, practices and available tools and techniques of sustainability management relevant to the particular industry context
- best practice approaches relevant to own work area
- equal employment opportunity, equity and diversity principles and occupational health and safety implications of policy/s being developed

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competence in this unit must be able to provide evidence of the ability to develop and implement integrated sustainability policies and procedures within an enterprise. The review of the policy after implementation will also need to be evidenced.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- develop relevant policy and procedures that comply with the regulatory requirements and business plans
- develop a workable implementation strategy
- include measurable criteria for reviewing improvement.

Consistent performance should be demonstrated. For example, look to see that:

- policy implementation is reviewed
- policy is developed to become part of the routine practices of the organisation.

#### Context of and specific resources for assessment

This section should be read in conjunction with the range of variables for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation.

A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

#### Method of assessment

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by

<b>EVIDENCE GUIDE</b>	
	<p>the Elements, Performance Criteria and skills and knowledge.</p> <p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed:</p> <ul style="list-style-type: none"> <li>• by demonstration in the workplace</li> <li>• using targeted questioning for appropriate portions</li> <li>• through use of specific project(s)</li> <li>• by use of a suitable simulation and/or a range of case studies/scenarios</li> <li>• by a combination of these techniques.</li> </ul> <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment.</p>
<b>Guidance information for assessment</b>	<p>Assessors need to be aware of any cultural issues that may affect responses to questions.</p> <p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.</p>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

#### Scope of sustainability policy

Scope of sustainability policy include:

- The area/s of environmental sustainability to be targeted and whether social and economic sustainability will be incorporated
- The parts of the enterprise to which it is to apply, including whether it is for the whole enterprise, one site, one work area or combinations of these
- An investigation of the particular business and market context of the industry/ enterprise
- Addressing sustainability initiatives through reference to standards, guidelines and approaches such as:
  - ISO 14001 Environmental Management Systems
  - Life Cycle Analyses
  - Cradle to grave/cradle to cradle
  - Global Reporting Initiative
  - Ecological Footprint Assessment
  - Triple Bottom Line reporting
  - Product Stewardship.

#### Stakeholders

Stakeholders include individuals and groups both inside and outside the organisation that have some

**RANGE STATEMENT**

	<p>direct interest in the enterprise's conduct, actions, products and services, including:</p> <ul style="list-style-type: none"> <li>• employees at all levels of the organisation</li> <li>• customers</li> <li>• suppliers</li> <li>• regulators</li> <li>• other organisations.</li> </ul>
<b>Strategies</b>	<p>Implementation strategies include:</p> <ul style="list-style-type: none"> <li>• awareness raising among stakeholders</li> <li>• training of staff in principles and techniques of sustainability</li> <li>• promotional activities.</li> </ul> <p>Continuous improvement strategies include ongoing measuring, improving and monitoring such as:</p> <ul style="list-style-type: none"> <li>• Plan, do, check, act cycles</li> <li>• Kaizen (continuous improvement)</li> <li>• Kaizen blitz (breakthrough improvement event)</li> <li>• Six sigma approaches</li> </ul> <p>Environmental sustainability strategies include:</p> <ul style="list-style-type: none"> <li>• reducing toxic material and hazardous chemical use</li> <li>• minimising resource use through changes in processes, facility design and management</li> <li>• supply chain and life cycle management approaches</li> <li>• sourcing renewable energy and low carbon footprint materials</li> <li>• reducing, re-using, recycling and waste reduction</li> <li>• product and process improvements</li> <li>• carbon offsets</li> <li>• reducing greenhouse gas and other emissions</li> </ul>

# MSFGG2005 Apply basic glass handling

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers handling and moving sheets of flat glass by hand safely and efficiently in a production, processing or installation environment, as an individual and involving teamwork for lifting.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Glass and Glazing

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |                              |   |
|------------------------------|---|
| 1 Prepare for glass handling | 1.1 Work requirements in the form of type and quantity of glass to be relocated are identified from work instructions   |
|                              | 1.2 Work health and safety (WHS) requirements for movement of glass sheets by hand, including personal protective equipment, are observed throughout the work |
|                              | 1.3 Sheet glass to be moved is identified and weight, shape and points of balance, and dimensions estimated or calculated                                     |
|                              | 1.4 Tools and equipment and manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified                                 |
|                              | 1.5 Risks to self, others, material and equipment are identified  |

- arising from the required lifting, load carrying, set down or movement of the glass
- 1.6 Need for glass lifting equipment or team lifting is determined and team lifting processes are considered for application
  - 1.7 Glass is checked for imperfections and damage prior to movement
  - 2 Plan glass movement
    - 2.1 Locations for glass storage are identified and routes to be followed determined
    - 2.2 Required clearances are compared to available space and adjustments made, as required
    - 2.3 Process for relocating glass is planned, including predicting and planning for potential difficulties
    - 2.4 Proposed process is checked against advisory standards and workplace procedures for compliance
  - 3 Relocate glass
    - 3.1 Actions of lifting, lowering and carrying, pulling and pushing are carried out in accordance with approved advisory standards and workplace procedures
    - 3.2 Team lifting tasks (where used) are coordinated according to approved advisory standards
    - 3.3 Planned process and route are followed and glass is relocated without damage to material, personnel or equipment
    - 3.4 Glass is labelled and stored following workplace procedures ensuring there are no projections
    - 3.5 Relocation is checked to see that it meets work requirements, and any differences reported
  - 4 Complete work
    - 4.1 Work area is cleaned and rubbish disposed of, as appropriate
    - 4.2 Workplace documentation is completed, as required

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- |  |  |
|--|--|
| <b>Unit context includes:</b>                  | <ul style="list-style-type: none"><li>• WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent</li><li>• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements</li><li>• work requires individuals to demonstrate some discretion, judgement and problem solving</li></ul> |
| <b>Sheet glass includes:</b>                   | <ul style="list-style-type: none"><li>• glass for residential and commercial windows and doors</li><li>• tinted and heat reflecting</li><li>• mirrors and furniture applications</li><li>• annealed</li><li>• laminated glass</li></ul>  |
| <b>Tools and equipment include:</b>            | <ul style="list-style-type: none"><li>• glass handling equipment and hand tools</li><li>• lever and pump vacuum lifters</li><li>• slings</li><li>• trolleys</li></ul>  |

MSA Training Package Companion Volumes - <http://mskills.com.au/training-packages/info/>

# Assessment Requirements for MSFGG2005 Apply basic glass handling

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Demonstrate safety and inspection procedures prior to lifting
- Safely lift and relocate annealed and laminated glass up to, and including, 1.2 m<sup>2</sup> (17 kg)
- Safely team lift and relocate annealed and laminated glass up to, and including, 4.5 m<sup>2</sup> (68 kg)
- Load and unload glass safely and efficiently
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Qualities and characteristics of glass, including hazards and handling requirements and the behaviour of glass sheets when lifted and moved
- Work flow requirements in relation to the movement of glass by hand
- Principles, requirements and techniques of moving glass sheets by hand and loading and unloading glass to/from trucks and skips
- Workplace safety system requirements related to the moving of glass sheets by hand

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to glass sheet to be relocated, workplace operating procedures and personal protection equipment, and an appropriate work area.

# MSFGG3001 Store and handle glass

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers handling, relocating and storing sheet glass in the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Glass and Glazing

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |                                 |  |
|---------------------------------|--|
| 1 Identify storage requirements | 1.1 Work requirements in the form of type and quantity of glass to be handled and stored are identified from work instructions                             |
|                                 | 1.2 Work health and safety (WHS) requirements for storage and handling of glass, including personal protective equipment, are observed throughout the work |
|                                 | 1.3 Glass to be stored is checked against paperwork and any discrepancies reported according to workplace procedures                                       |
|                                 | 1.4 Storage requirements are identified from manufacturer instructions, statutory regulations and workplace procedures                                     |
|                                 | 1.5 Locations for glass storage are identified and checked for availability and suitability  |

- 1.6 The process and procedures for moving, handling and storing glass are identified
    - 1.7 Team lifting processes are considered for application, including nomination of a team leader and calculating the capacity of the team
- 2 Prepare for glass movement
  - 2.1 Work sequence is planned in a logical order to suit the job in accordance with workplace procedures
  - 2.2 Tools, equipment and materials are selected and checked prior to use to ensure they are appropriate for the work, serviceable and in a safe condition
  - 2.3 Planned route for relocating glass is determined and checked for hazards, and the work area is cleared of obstructions
  - 2.4 Risks to self and others are identified and acted upon according to statutory requirements and workplace procedures
  - 2.5 Required clearances are compared to available space and adjustments made
  - 2.6 Process for relocating glass is planned, including predicting and planning for potential difficulties
  - 2.7 Proposed process is checked against codes of practice and workplace procedures for compliance
- 3 Relocate glass
  - 3.1 Safety checks are carried out on required handling equipment, and any damaged or worn parts reported according to workplace practices
  - 3.2 Handling equipment is operated safely and correctly in accordance with manufacturer instructions and workplace procedures
  - 3.3 Planned process and route are followed and glass relocated without damage to material, personnel or equipment
  - 3.4 Glass is labelled and stored following workplace procedures ensuring there are no projections
  - 3.5 Relocation is checked to see that it meets work requirements, and any differences are reported

- |   |                           |     |  |
|---|---------------------------|-----|--|
| 4 | Complete job requirements | 4.1 | Handling equipment is cleaned, maintained and stored according to workplace procedures |
|   |                           | 4.2 | Work area is cleaned and rubbish disposed of, as appropriate                           |
|   |                           | 4.3 | Workplace documentation is completed, as required, according to workplace procedures   |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- |  |  |
|--|--|
| <b>Unit context includes:</b>                  | <ul style="list-style-type: none"><li>• WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent</li><li>• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements</li><li>• work requires individuals to demonstrate some discretion, judgement and problem solving</li></ul> |
| <b>Glass includes:</b>                         | <ul style="list-style-type: none"><li>• annealed</li><li>• laminated</li><li>• toughened</li><li>• patterned</li><li>• tinted</li><li>• heat reflecting</li><li>• domestic and commercial glass</li><li>• mirrors</li><li>• shower screens</li><li>• furniture glass</li><li>• safety glass</li><li>• patterned or specialty glass</li></ul>   |
| <b>Handling and storing glass includes:</b>    | <ul style="list-style-type: none"><li>• handling and storing of glass in quantities appropriate to the workplace requirement</li><li>• team lifting as well as the application of individual skills</li></ul>  |
| <b>Tools and equipment include:</b>            | <ul style="list-style-type: none"><li>• hand trolleys</li><li>• pallet truck</li><li>• gantry crane</li><li>• scissors</li><li>• slings</li><li>• air and tilt tables</li><li>• vacuum lifters</li><li>• crawler track</li><li>• articulating spider lifts</li></ul>   |
| <b>Personal protective equipment includes:</b> | <ul style="list-style-type: none"><li>• that prescribed under legislation, regulation and enterprise policies and practices:</li></ul>   |

**Information and procedures include:**

- gauntlets
  - gloves
  - safety glasses
  - hard hats
  - safety footwear
  - aprons and overalls
- 
- workplace procedures relating to the use of tools and equipment and personal protective equipment
  - work instructions, including job sheets, cutting lists, plans, drawings and designs
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures
  - quality standards, including AS/NZS 4667:2000 Quality requirements for cut-to-size and processed glass

**Unit Mapping Information**

Supersedes and is equivalent to LMFGG3001C Store and handle glass.

# Assessment Requirements for MSFGG3001 Store and handle glass

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Identify equipment for the handling and storage of glass and calculate the weight of glass
- Handle annealed and/or laminated glass up to, and including, 2.3 m<sup>2</sup> (17 kg)
- Team handle annealed and/or laminated glass up to, and including, 4.5 m<sup>2</sup> (68 kg)
- Relocate single sheets of glass by vacuum and/or scissor grabs up to 4.5 m<sup>2</sup> (170 kg)
- Safely load and secure glass
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Qualities and characteristics of glass, including hazards and handling requirements
- Work flow requirements in relation to the movement and storage of glass
- Glass storage requirements
- Correct identification of equipment, processes and procedures
- Workplace safety system requirements related to the handling, relocation and storage of glass

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to glass to be stored, workplace operating procedures, personal protective equipment, and an appropriate work area and others to assist, as required.

# MSFUP3001 Apply traditional foundations to upholstered furniture

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers applying traditional upholstery foundations to upholstered furniture.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Upholstery

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |                  |  |
|------------------|--|
| 1 Plan operation | 1.1 Work order or instructions are used to confirm type of traditional furniture foundations to be applied           |
|                  | 1.2 Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
|                  | 1.3 Attaching methods are identified and fitting sequence is determined  |
|                  | 1.4 Suitable work area is selected and prepared  |
|                  | 1.5 Tools and hardware for the application of the foundation are selected and checked for safe operation             |
|                  | 1.6 Traditional foundation components are selected as  |

- required
- 2 Prepare and attach traditional foundation
    - 2.1 Mounting points are measured and marked on the frame, as required
    - 2.2 Traditional foundation is positioned and appropriate fasteners are used to secure it to the item
    - 2.3 Appropriate fasteners are used to secure the traditional foundation, as required
    - 2.4 The applied foundation is inspected for fit, finish and quality with those requiring reworking/refitting being tagged for further reprocessing or recycling/disposal in accordance with workplace practices
    - 2.5 Process is monitored and conditions which may affect quality standards are noted
    - 2.6 Variations to normal activities are reported in accordance workplace procedures
    - 2.7 Authorised changes in standard operating procedures and work order or instructions are implemented
  - 3 Complete work
    - 3.1 Workplace documentation, including stock usage, is completed in accordance with workplace procedures
    - 3.2 Faulty and/or defective equipment is tagged and reported in accordance with workplace procedures
    - 3.3 Waste and scrap are removed in accordance with workplace procedures
    - 3.4 Tools and equipment used are cleaned, inspected for serviceable condition and stored appropriately in accordance with workplace procedures
    - 3.5 Equipment is maintained and work area is cleaned in accordance with workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- |  |  |
|--|--|
| <b>Unit context includes:</b>                  | <ul style="list-style-type: none"><li>• WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent</li><li>• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements</li><li>• work requires individuals to demonstrate some discretion, judgement and problem solving</li></ul> |
| <b>Tools and equipment include:</b>            | <ul style="list-style-type: none"><li>• tape measure</li><li>• web strainer</li><li>• scissors</li><li>• upholstery hammer</li><li>• tack lifter</li><li>• staple gun</li><li>• pincers</li><li>• long-nose pliers</li></ul>   |
| <b>Materials include:</b>                      | <ul style="list-style-type: none"><li>• webbing</li><li>• coil springs</li><li>• flock</li><li>• wadding</li><li>• coconut fibre</li><li>• bridle</li><li>• bridle ties</li><li>• solid timber base</li><li>• padded frames</li><li>• hard edge</li><li>• hessian</li><li>• calico</li><li>• lacing twine</li><li>• mattress twine</li></ul>   |
| <b>Personal protective equipment includes:</b> | <ul style="list-style-type: none"><li>• that prescribed under legislation, regulations and enterprise policies and practices:<ul style="list-style-type: none"><li>• safety glasses/goggle</li><li>• hair nets</li></ul></li></ul>   |

**Information and procedures include:**

- ear muffs/plugs
- gloves
- footwear and protective clothing
- workplace procedures relating to the use of tools and equipment
- work instructions, including job sheets, cutting lists, plans, drawings and designs
- workplace procedures relating to reporting and communication
- manufacturer specifications and operational procedures

## Unit Mapping Information

Supersedes and is equivalent to LMFUP3001B Apply traditional foundations to upholstered furniture.

# **Assessment Requirements for MSFUP3001 Apply traditional foundations to upholstered furniture**

## **Modification History**

Release 1 - New unit of competency

## **Performance Evidence**

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Interlace and turn back jute webbing, tie off and lace up coil springs, fit hessian bridles (loose and/or deep), coconut fibre, wadding and a stitched edge (one blind, one top) in a minimum of two (2) items of traditional upholstered furniture
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## **Knowledge Evidence**

- Work flow in relation to furniture production and refurbishment
- Features of range of traditional foundation types and fittings
- Materials and techniques used in the application of traditional foundations to upholstered furniture
- Materials used in the application of traditional foundations
- Identification of equipment, processes and procedures required for the application of traditional foundations to upholstered furniture

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to furniture frames and traditional fittings, such as webbing stock, coil springs, padding materials, and a work order.

## **MSS403030A Improve cost factors in work practices**

### **Modification History**

New unit, superseding MSACMT430A Improve cost factors in work practices - Equivalent

### **Unit Descriptor**

This unit of competency covers the skills and knowledge required to evaluate the product or process outcomes of a team in terms of their cost components and to be able to determine, in general terms, the cost impacts of alternative actions.

### **Application of the Unit**

This unit applies to a person who is required to assess the relative costs of alternatives and use this as one of the key factors in decision making. Typical decisions include the efficient organisation of own work and that of others in a work area or within a team and the improvement of throughput and cycle times.

Decisions are made within the scope of the authority of the individual and other employees in the area or team and according to procedures.

This unit primarily requires the application of skills associated with communication and information gathering, teamwork and problem solving to analyse the cost components of work processes. Initiative and enterprise, and planning and organising are also required to identify opportunities for improved cost-efficiency. This unit also requires a degree of self-management and learning to effectively operate and maintain skills and performance.

### **Licensing/Regulatory Information**

Not applicable.

### **Pre-Requisites**

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1	Analyse cost components of work area or team function	1.1	Identify cost components in the product or process
		1.2	Identify costs factors under control of area or employees in the team
		1.3	Identify causes of variability in costs
		1.4	Analyse impact of costs on production or process activities undertaken
2	Improve cost-efficiency of processes and procedures	2.1	Identify methods of improving productivity and/or reducing costs within area or team's responsibility
		2.2	Determine cost/benefit ratio of alternative methods of improving productivity and/or reducing costs
		2.3	Consult with all relevant stakeholders regarding possible changes
		2.4	Recommend changes which will increase productivity and reduce cost and variability
		2.5	Implement recommended changes in consultation with relevant stakeholders

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills include:

- identifying fixed and variable costs in products or processes
- analysing costs and determining those that can be controlled by the individuals in an area or team
- analysing costs over time and identifying variability in cost components
- determining cost/benefit ratios
- communicating and negotiating with others on changes using a variety of mediums

### Required knowledge

Required knowledge includes:

- cost components of products made
- costs concepts, such as expense, income and cost/benefit
- major cost contributors to product (e.g. energy, materials, labour and distribution, and so on) depending on the product and process)
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"><li>• identify the scope of their own work and the team or area work and relate it to the overall flow of work in the organisation</li><li>• express cost factors in specific terms (e.g. cost per item, process and task)</li><li>• identify and express cost factors in basic financial</li></ul>
---	--

	<p>terms</p> <ul style="list-style-type: none"> <li>analyse variability in costs and recommend improvements</li> <li>use cost/benefit to select preferred improvement strategies.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> <li>workplace procedures and plans relevant to work area</li> <li>specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee</li> <li>documentation and information in relation to production, waste, overheads and hazard control/management</li> <li>reports from supervisors/managers</li> <li>case studies and scenarios to assess responses to contingencies.</li> </ul>
<b>Method of assessment</b>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> <li>demonstration in the workplace</li> <li>workplace project(</li> <li>suitable simulation</li> <li>case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on)</li> <li>targeted questioning</li> <li>reports from supervisors, peers and colleagues (third-party reports)</li> <li>portfolio of evidence.</li> </ul> <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
<b>Guidance information for assessment</b>	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being</p>

	performed.
--	------------

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Competitive systems and practices</b>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• lean operations</li> <li>• agile operations</li> <li>• preventative and predictive maintenance approaches</li> <li>• monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems</li> <li>• statistical process control systems, including six sigma and three sigma</li> <li>• Just in Time (JIT), kanban and other pull-related operations control systems</li> <li>• supply, value, and demand chain monitoring and analysis</li> <li>• 5S</li> <li>• continuous improvement (kaizen)</li> <li>• breakthrough improvement (kaizen blitz)</li> <li>• cause/effect diagrams</li> <li>• overall equipment effectiveness (OEE)</li> <li>• takt time</li> <li>• process mapping</li> <li>• problem solving</li> <li>• run charts</li> <li>• standard procedures</li> <li>• current reality tree</li> </ul> <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> <li>• the stage of implementation of competitive systems and practices,</li> </ul>
--	--

	<ul style="list-style-type: none"> <li>the size of the enterprise</li> <li>the work organisation, culture, regulatory environment and the industry sector</li> </ul>
<b>Cost components</b>	<p>Cost components may include:</p> <ul style="list-style-type: none"> <li>fixed and variable costs, such as power/energy, materials, plant and equipment, salary and wages, and office expenses (e.g. telephone)</li> <li>government taxes and charges</li> </ul>
<b>Variability in costs</b>	<p>Variability in costs should be assessed over a suitable time. The time should be sufficient to identify:</p> <ul style="list-style-type: none"> <li>fluctuations in variable costs related to different volumes of sales, production or operations</li> <li>abnormal cost fluctuations due to poor design of product or process, poor scheduling, faults, breakdowns and other waste</li> </ul>
<b>Process</b>	<p>Process includes all functions that go to meet customer requirements as well as other required functions (e.g. regulatory related functions). Examples include:</p> <ul style="list-style-type: none"> <li>design</li> <li>production</li> <li>maintenance</li> <li>logistics</li> <li>office processes</li> </ul>
<b>Procedures</b>	<p>Procedures may include:</p> <ul style="list-style-type: none"> <li>work instructions</li> <li>standard operating procedures</li> <li>drawings and specifications</li> <li>manuals</li> <li>formulas/recipes</li> <li>batch sheets</li> <li>temporary instructions and similar instructions provided for the smooth running of the organisation</li> <li>good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care)</li> <li>government regulations</li> </ul> <p>Procedures may be:</p> <ul style="list-style-type: none"> <li>written, verbal, computer based or in some other format</li> </ul>
<b>Benefits</b>	<p>Benefits should include:</p>

	<ul style="list-style-type: none"><li>positive benefits as well as negative benefits, such as quality, safety, reliability and similar issues which may be impacted by a cost saving</li></ul>
--	--

## Unit Sector(s)

Unit sector

Competitive systems and practices

## Custom Content Section

Not applicable.

## PSPTRAN501A Provide specialist vehicle technical advice

### Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

### Unit Descriptor

This unit covers detailed technical inspections and specialist vehicle technical advice for situations that may include court proceedings, coronial inquiries, police and other agencies. It includes conducting a detailed technical inspection, interpreting the inspection data to inform an opinion, conducting technical research on inspection data, and formulating and providing an expert opinion on the results.

In practice, providing specialist vehicle technical advice may overlap with other generalist or specialist public sector work activities such as promoting ethical practice and compliance with legislation, coordinating resources, undertaking research and analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Application of the Unit

Not applicable.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Conduct a detailed vehicle inspection	<p>1.1 Suitable location for detailed <i>vehicle</i> examination is confirmed and other relevant personnel are notified.</p> <p>1.2 Materials and <i>equipment</i> required to conduct the vehicle <i>examination</i> are prepared.</p> <p>1.3 Other relevant motor vehicle documentation is accessed and reviewed to establish key information on the vehicle under examination.</p> <p>1.4 Vehicle identity is verified.</p> <p>1.5 All relevant vehicle structure and components are examined and tested as necessary.</p> <p>1.6 Occupational health and safety requirements applicable to the examination are applied.</p> <p>1.7 Vehicle irregularities are recorded in accordance with legislative requirements and standard procedures.</p>
2. Interpret examination data	<p>2.1 All relevant data/ information is gathered, recorded and confirmed.</p> <p>2.2 All relevant information is interpreted and analysed to assist in the identification of the issue/s.</p>
3. Undertake technical research	<p>3.1 Relevant standards and specifications are identified and accessed.</p> <p>3.2 Research is undertaken on all the information gathered relevant to the examination.</p> <p>3.3 Advice is sought to clarify any unclear findings in accordance with organisational policy and procedures.</p> <p>3.4 Research findings are reported and presented in appropriate language, style and format to suit the intended audience.</p> <p>3.5 Supporting information and explanations are provided as required.</p>
4. Form and provide an opinion	<p>4.1 Options related to the provision of advice are identified and evaluated.</p> <p>4.2 An opinion is formed that is logical, reasoned and defensible, and documented in accordance with legislation, policy and procedures.</p> <p>4.3 When appropriate, opinions on actions to be taken are offered.</p> <p>4.4 A comprehensive report supporting the opinions is provided.</p>

## Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

### Skill requirements

Look for evidence that confirms skills in:

- assessing vehicle standards
- using diagnostic techniques
- researching, interpreting and analysing information and data
- writing complex reports
- using personal computer, Internet, word processing and databases for research, analysis and interpretation
- using effective communication including presentation, and listening skills
- responding to diversity, including gender and disability
- tailoring information to suit the needs of diverse audiences
- applying public sector legislation such as occupational health and safety and environmental procedures in the context of providing specialist vehicle technical advice

### Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- specialist technical area
- State/Territory and Commonwealth legislation and regulations
- Australian Design Rules (ADRs), Australian Vehicle Standards Rules (AVSR), modification codes, vehicle standards, manufacturers' standards
- chain of evidence provisions
- codes of practice
- written off vehicle register (WOVR)
- occupational health and safety relating to the provision of specialist vehicle technical advice
- contingency management - process for unplanned events
- court protocols

## Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

### Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV504B Undertake research and analysis
  - PSPGOV507A Undertake negotiations
  - PSPGOV508A Manage conflict
  - PSPLEGN501B Promote compliance with legislation in the public sector
  - PSPOHS501A Monitor and maintain workplace safety

### Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- provision of specialist vehicle technical advice in a range of (3 or more) contexts (or occasions, over time)

### Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to specialist vehicle technical advice
- case studies and workplace scenarios to capture the range of situations likely to be encountered when providing specialist vehicle technical advice

### Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when providing specialist vehicle technical advice, including coping with difficulties, irregularities and breakdowns in routine

- provision of specialist vehicle technical advice in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

**For consistency of assessment**

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

## Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

***Vehicles*** may be:

- loaded or unloaded during inspection
- all types, including special purpose vehicles
- imported vehicles
- modified and other high risk vehicles

***Equipment*** may include:

- micrometer
- roller brake tester
- shaker plates
- jacking equipment
- gauges

***Examinations*** may be:

- undertaken on all types of vehicles
- carried out alone or in conjunction with other personnel
- undertaken in full range of diverse conditions
- in response to police request, coronial or other inquiries

## Unit Sector(s)

Not applicable.

## Competency field

Road Transport Compliance.

## RIICOM201D Communicate in the workplace

### Modification History

Release	Comment
1	This unit replaces RIICOM201A Communicate in the workplace
2	Editorial corrections.
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

### Application

This unit describes a participant's skills and knowledge required to communicate in the workplace within the Resources and Infrastructure Industries. This unit is appropriate for those working in operational roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Elements and Performance Criteria

1 Plan and prepare for workplace communication using equipment and systems	<p>1.1 Access, interpret and apply communication site documentation and ensure the work activity is compliant</p> <p>1.2 Identify and access communication equipment and system components</p> <p>1.3 Establish and maintain communication with others</p> <p>1.4 Access and apply communication equipment and systems safety procedures</p>
2 Communicate using communication equipment and systems	<p>2.1 Identify and select the most appropriate method of communication</p> <p>2.2 Use communication equipment and systems</p> <p>2.3 Acknowledge and respond to communication</p> <p>2.4 Take, confirm and pass messages on promptly to the others</p> <p>2.5 Pass communications in a clear and concise manner</p> <p>2.6 Follow safety procedures, including the passing of reports and observance of local communications and emergency procedures</p> <p>2.7 Identify and report faults in communication equipment</p>
3 Carry out face-to-face routine communication	<p>3.1 Speak clearly and listen carefully to promote understanding</p> <p>3.2 Ask questions of the audience and confirm meaning of information</p> <p>3.3 Maintain communication processes with others to assist flow of work activities</p> <p>3.4 Use site approved signalling methods to convey information</p> <p>3.5 Participate in discussion to obtain information and clarify meaning</p> <p>3.6 Communicate cooperatively and effectively with others</p>
4 Complete written documentation	<p>4.1 Complete written documentation clearly, concisely and on time</p> <p>4.2 Use approved documents</p> <p>4.3 Pass on written information to others</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

## Assessment Requirements for RIICOM201D Communicate in the workplace

### Modification History

Release	Comment
1	This unit replaces RIICOM201A Communicate in the workplace
2	Editorial corrections.
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

### Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of communicating in the work place that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - identifying communication strategies and systems
  - operating communications systems and equipment to convey meaning to others
  - communicating clearly and promptly to others to convey information and make meaning
  - listening carefully to instructions and information
  - participating in group discussions and engage with group members respectfully
  - asking questions to clarify meaning
  - communicating concisely both written and verbally
  - interpreting other communications such as flags, lights, signs, bells and whistles
  - identifying and reporting communication faults and deficiencies
  - using approved and preparing written documentation that communicates meaning to others

## Knowledge Evidence

The candidate must demonstrate knowledge of communicating in the workplace through:

- relevant standards and site procedures
- worksite communication system components, applications and limitations
- procedures and safety requirements of communication equipment and systems
- common faults in communication equipment/systems
- emergency communication procedures
- record maintenance

## Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment; and,
- simulation may be used for assessment of this Unit of Competency where it does not compromise the quality of assessment outcomes and provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills;
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current\* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years

Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

\*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

\*\*Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

## RIIHAN301D Operate elevating work platform

### Modification History

Release	Comment
1	This unit replaces RIIHAN301B Operate elevating work platform
2	Editorial corrections; Amend reference to Licensing requirements in Unit Application
3	Required frequency and volume of evidence amended in Performance evidence.  Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

### Application

This unit describes a participant's skills and knowledge required to operate an elevating work platform in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories and Industry sectors. Relevant information must be sourced prior to application of the unit.

## Elements and Performance Criteria

1. Plan and prepare for operating an elevating work platform	<p>1.1 Access, interpret and apply elevating work platforms documentation and ensure the work activity is compliant</p> <p>1.2 Obtain, read, interpret, clarify and confirm work requirements</p> <p>1.3 Select and wear personal protective equipment appropriate for work activities</p> <p>1.4 Identify and select any required tools and equipment, check for serviceability and rectify or report, verbally or in writing, any faults prior to commencement</p> <p>1.5 Perform pre-start and post-start inspections/checks</p> <p>1.6 Coordinate activities with others prior to commencement of, and during, the work activity</p> <p>1.7 Identify and address potential risks, hazards and environmental issues, and implement control measures</p> <p>1.8 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency</p>
2. Conduct work activities from elevating work platform	<p>2.1 Stabilise elevating work platform</p> <p>2.2 Place tools and equipment into bucket/platform</p> <p>2.3 Use approved safety devices, ensure safety of personnel and surrounding site</p> <p>2.4 Act on or report, verbally or in writing, monitoring systems and alarms</p> <p>2.5 Recognise and respond to hazardous and emergency situations</p> <p>2.6 Complete work and shut-down in accordance with agreed work plan</p>
3. Carry out operator maintenance	<p>3.1 Carry out work platform inspections and fault finding</p> <p>3.2 Carry out routine operational servicing, lubrication and housekeeping tasks in accordance with manufacturer's instructions and site authorised procedures and practices</p> <p>3.3 Carry out minor operator maintenance to manufacturer's instructions and site requirements</p> <p>3.4 Process written records</p>
4. Clean up	<p>4.1 Clear work area and reuse, recycle or dispose of materials</p> <p>4.2 Check, clean, maintain and store plant, tools and equipment</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

## Assessment Requirements for RIIHAN301D Operate elevating work platform

### Modification History

Release	Comment
1	This unit replaces RIIHAN301B Operate elevating work platform
2	Editorial corrections; Amend reference to Licensing requirements in Unit Application
3	<p>Required frequency and volume of evidence amended in Performance evidence.</p> <p>Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.</p>

## Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of operating elevating work platforms including:
  - selecting and using the required plant, tools and equipment
  - planning and preparing for operating elevating work platforms
  - identifying, addressing and/or reporting, verbally or in writing monitoring systems and alarms
  - identifying and following procedures in emergency or hazardous situations
  - applying hand-eye coordination
- works effectively with others to undertake and complete the operation of elevating work platforms that meet all of the required outcomes including:
  - using a range of communication techniques and equipment to coordinate activities with others
  - maintaining written and verbal reporting requirements and procedures
- demonstrates completion of operating elevating work platforms that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - stabilising elevating work platform
  - selecting safety devices and correctly ensuring safety of personnel and surrounding site
  - completing work platform inspections and fault finding
  - completing operational servicing, lubrication and housekeeping tasks
  - disposing of environmentally sensitive oils, fluids and materials

## Knowledge Evidence

The candidate must demonstrate knowledge of the following when operating an elevating work platform:

- the appropriate National Certification Standards
- site and equipment safety requirements
- equipment characteristics, technical capabilities and limitations
- elevating work platform operational procedures
- basic geological and survey data related to elevating work platforms
- site environmental requirements and constraints related to elevating work platforms

## Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current\* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years

Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

\*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

\*\*Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

## RIIQUA201D Maintain and monitor site quality standards

### Modification History

Release	Comment
1	This unit replaces RIIQUA201A Maintain and monitor site quality standards
2	Editorial corrections
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

## Application

This unit describes a participant's skills and knowledge required to maintain and monitor site quality standards in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

No licensing or certification requirements apply to this unit at the time of publication.

## Elements and Performance Criteria

1 Plan, prepare for quality work outcomes	<p>1.1 Access, interpret and apply quality standards and ensure the work activity is compliant</p> <p>1.2 Identify and agree on performance indicators for own work</p> <p>1.3 Plan and prepare for work to achieve quality standards</p> <p>1.4 Complete work within time, quality, cost and productivity parameters</p>
2 Apply quality systems to own work	<p>2.1 Carry out work to meet quality standards</p> <p>2.2 Adjust performance indicators to meet changing circumstances that affect quality standard requirements</p> <p>2.3 Suggest procedure improvements to others for continuous improvement quality standards</p> <p>2.4 Take corrective actions to improve work outcomes</p> <p>2.5 Complete quality documentation</p>
3 Monitor and report quality standards	<p>3.1 Monitor quality of outputs and identify non-compliance</p> <p>3.2 Prepare written records of quality outputs and report non-compliance</p> <p>3.3 Monitor work processes, report incidents apply local risk control processes to minimise quality non-compliance</p> <p>3.4 Communicate variation to quality outputs and standards to others</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

## Assessment Requirements for RIIQUA201D Maintain and monitor site quality standards

### Modification History

Release	Comment
1	This unit replaces RIIQUA201A Maintain and monitor site quality standards
2	Editorial corrections
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

### Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant legislation, documentation, policies and procedures
- demonstrates completion of the monitoring and maintenance of site quality standards that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - organising work activities to comply with site quality standards
  - identifies and agrees on performance indicators
  - completes work within set parameters
  - recommends and communicates continuous improvements to quality standards
  - processes quality written documentation
  - monitors work processes, reports incidents and applies local risk processes

## Knowledge Evidence

The candidate must demonstrate knowledge of maintaining and monitoring site quality standards through:

- accessing, interpreting and applying the organisation and site requirements and procedures
- work healthy and safety
- maintaining the standards for site/enterprise quality systems and processes
- performing work planning processes
- technical and operational capability and limitations of resources and workplace equipment being used
- applying reporting procedures

## Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current\* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years

Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

\*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

\*\*Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

## RIIRIS201D Conduct local risk control

### Modification History

Release	Comment
1	This unit replaces RIIRIS201B Conduct local risk control
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

### Application

This unit describes a participant's skills and knowledge required to conduct local risk control in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Elements and Performance Criteria

1 Plan and prepare for risk control	<p>1.1 Access, interpret and apply risk management documentation and ensure the work activity is compliant</p> <p>1.2 Inspect work area conditions to identify potential hazards</p> <p>1.3 Apply risk management procedures to deal with recognised hazards</p> <p>1.4 Recognise the type and scope of unresolved hazards and their likely impact</p>
2 Assess and identify unacceptable risk	<p>2.1 Assess and determine consequence of an event</p> <p>2.2 Consider and determine likelihood of the event</p> <p>2.3 Identify criteria for the acceptability/unacceptability of the risk</p> <p>2.4 Assess risk against criteria to identify if it warrants 'unacceptable risk' status and action</p> <p>2.5 Effectively communicate and clarify the decision to others</p>
3 Identify, assess and implement risk treatments	<p>3.1 Identify and consider all possible risk treatment options</p> <p>3.2 Identify options by preliminary analysis and consideration of options</p> <p>3.3 Analyse options, including resource requirements</p> <p>3.4 Select most appropriate and effective course of action</p> <p>3.5 Plan and prepare the course of action in detail and acquire/obtain required resources and approval</p> <p>3.6 Implement the approved risk treatment</p> <p>3.7 Review risk management processes</p>
4 Complete records and reports	<p>4.1 Effectively communicate accurate information to others on the course of action and implementation</p> <p>4.2 Complete written records and reports for hazards and actions from personal risk assessment</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

## Unit Mapping Information

RIIRIS201B Conduct local risk control

SkillsDMC RII Companion Volumes - <http://www.skillsdmc.com.au/>

## Assessment Requirements for RIIRIS201D Conduct local risk control

### Modification History

Release	Comment
1	This unit replaces RIIRIS201B Conduct local risk control
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

### Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locate and apply relevant documentation, policies and procedures
- works effectively with others to undertake and complete conducting of local risk control including:
  - communicating clearly and concisely with others to receive and clarify treatment information
  - communicating clearly and concisely the likelihood and consequence of an identified risk
- demonstrates completion of conducting local risk control that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - identifying 'unacceptable risk' using the acceptability/unacceptability criteria
  - working with others to determine risk controls
  - assessing and determining consequence and likelihood of potential risk
  - controlling risk by selecting and implementing most appropriate treatment
  - reporting written information about risk assessment and treatment implementation

## Knowledge Evidence

The candidate must demonstrate knowledge in conducting local risk control through:

- accessing, interpreting and applying the organisation and site requirements and procedures for:
  - organisation risk management policy, procedure requirements
  - conducting worksite risk management procedures
  - conducting and maintaining worksite communication, reporting and recording procedures
- identifying and assessing hazards, risks, acceptability of risks and controls
- reading, preparing and using worksite safety systems information

## Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current\* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years

Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

\*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

\*\*Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

## RIIWHS201D Work safely and follow WHS policies and procedures

### Modification History

Release	Comment
1	The unit replaces RIIOHS201A Work safely and follow OHS policies and procedures.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

### Application

This unit describes a participant's skills and knowledge required to work safely and follow WHS policies and procedures in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

*Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.*

## Elements and Performance Criteria

1. Access and apply site safety procedures	<p>1.1 Access, interpret and apply work health and safety procedures and ensure the work activity is compliant</p> <p>1.2 Carry out isolation of energy sources and immobilisation of potential energy sources</p> <p>1.3 Locate destinations by interpreting and applying site plans, transport rules and signage</p> <p>1.4 Identify, act on, and report breaches in site safety</p>
2. Apply personal safety measures	<p>2.1 Select and wear personal protective equipment</p> <p>2.2 Establish and maintain a clean and tidy safe working area</p> <p>2.3 Obtain permits and clearances before specialised work is carried out</p> <p>2.4 Apply safe manual handling procedures</p> <p>2.5 Identify and apply site procedures for conducting high-risk activities</p>
3. Apply operational safety measures	<p>3.1 Recognise and respond to alarms</p> <p>3.2 Identify and clarify responsibility in responding to emergency situations</p> <p>3.3 Apply basic fire fighting techniques</p> <p>3.4 Identify emergency escape route(s) and procedures</p>
4. Maintain personal wellbeing	<p>4.1 Identify risks to personal wellbeing and recognise preventative strategies</p> <p>4.2 Identify, act on, and report situations which may endanger others</p> <p>4.3 Access and explain verbally or in writing the requirements for fitness for duty</p> <p>4.4 Comply with all work health and safety policies including smoking, alcohol and drug use</p>
5. Identify and report incidents	<p>5.1 Recognise and communicate incident and injury statistics</p> <p>5.2 Report and prepare written records of incidents and injuries</p> <p>5.3 Contribute to and participate in incident investigations</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

## Assessment Requirements for RIIWHS201D Work safely and follow WHS policies and procedures

### Modification History

Release	Comment
1	The unit replaces RIIOHS201A Work safely and follow OHS policies and procedures.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

### Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of working safely and following WHS policies and procedures that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - sourcing, interpreting, clarifying and applying site safety information
  - listening carefully to health and safety instructions and information
  - responding to and clarifying information and directions
  - carrying out work instructions that complies with WHS policies and procedures
  - selecting, wearing and caring for personal protective equipment for all activities that require personal protective equipment
  - applying safe lifting and manual handling techniques
  - identify and report on WHS issues to appropriate personnel
  - recognising and following procedure to respond to alarms
  - completing workplace reporting procedures

## Knowledge Evidence

The candidate must possess knowledge of work safely and follow WHS policies and procedures through:

- determining equipment safety requirements
- identifying personal protective equipment
- follows hazardous substances procedures and handling techniques
- location of safety data sheets (SDS) information and their application
- adhering to isolation procedures
- identifying lifting techniques, including for both manual and automated lifting
- locating and complying with WHS procedures
- application of site safety requirements and procedures
- participating in procedures for workplace management of others (e.g. consultation, safety representatives, committees, dispute resolution)
- determining potential of biological effects (e.g. circadian rhythms, sleep, alertness, fatigue, stress, effects of heat stress and hypothermia)
- details of site drug and alcohol policy
- locating and using emergency equipment

## Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current\* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years

Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

\*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

\*\*Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

## RIIWHS204D Work safely at heights

### Modification History

Release	Comments
1	This unit replaces RIIOHS204A Work safely at heights.
2	Formatting corrections.
3	Inserted Application information.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

## Application

This unit describes a participant's skills and knowledge required to work safely at heights in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles where they are required to perform work at heights.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

*Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.*

## Elements and Performance Criteria

1. Identify work requirements	<p>1.1 Access, interpret and apply height safety procedures and ensure the work activity is compliant</p> <p>1.2 Inspect site to determine layout and physical condition, condition of structures, prevailing weather conditions, equipment requirements and potential hazards</p> <p>1.3 Adhere to WHS requirements</p> <p>1.4 Identify, select and check safety equipment for serviceability</p> <p>1.5 Identify, manage and report potential risks and hazards</p>
2. Identify work procedures and instructions	<p>2.1 Consult with authorised personnel to select materials, tools and equipment and check for serviceability</p> <p>2.2 Select, wear and care for personal protective equipment</p> <p>2.3 Inspect/install fall protection and perimeter protection equipment</p> <p>2.4 Identify approved methods of moving tools and equipment to work area and minimise potential hazards associated with tools at heights</p> <p>2.5 Ensure safety system has been installed correctly</p> <p>2.6 Select and install appropriate signs and barricades</p>
3. Access and install equipment	<p>3.1 Consult with authorised personnel to ensure anchor fall protection and associated equipment is correctly fitted and adjusted</p> <p>3.2 Ensure all required equipment is installed</p> <p>3.3 Use recommended methods to access work area for people, tools and equipment</p>

	3.4 Locate tools and materials to eliminate or minimise the risk of items being knocked down
4. Perform work at heights	4.1 Check access from ground to work area and ensure it is safe 4.2 Keep fall equipment in place and adjusted appropriately for movement during work 4.3 Undertake manual handling of materials and equipment 4.4 Locate materials and equipment ensuring that they are safely secured and distributed 4.5 Check safety system periodically for compliance 4.6 Monitor risk control measures to ensure that they are effective and appropriate 4.7 Reassess risk control measures, as required, in accordance with changed work practices and/or site conditions and undertake alterations
5. Clean up work area	5.1 Consult with authorised personnel to ensure safety system is dismantled and removed 5.2 Clear work area and dispose of or recycle materials 5.3 Clean, check, maintain and store tools and equipment

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

# Assessment Requirements for RIIWHS204D Work safely at heights

## Modification History

Release	Comments
1	This unit replaces RIIOHS204A Work safely at heights.
2	Formatting corrections.
3	Inserted Application information.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

## Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of working safely at heights that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - accessing, interpreting and applying technical and safety information for working at heights
  - assessing hazards and risk associated with working at heights and implement control methods
  - selecting wearing and caring for personal protective equipment
  - identifying required safety systems including fall protection and associated equipment
  - checking that fitting, adjusting and anchoring of fall protection and associated equipment is correct
  - performing work safely at heights

## Knowledge Evidence

The candidate must demonstrate knowledge of the following when working safely at heights:

- names and functions of equipment, components and materials
- complying with equipment manufacturer's instructions and specifications
- safe shifting and handling of tools and materials
- adhering to statutory and regulatory authority requirements
- the nature of work undertaken at heights
- complying with heights safety systems
- the processes of providing for safe working practices
- using safety equipment/systems and considerations to facilitate working safely at heights
- complying with safe work methods

## Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current\* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years

Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

\*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

\*\*Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

## SIRXCCS201 Apply point-of-sale handling procedures

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release Date	Comments
First Release:	This is a revised unit, based on and equivalent to SIRXCCS001A Apply point-of-sale handling procedures.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to operate point-of-sale equipment, apply store policy and procedures to a range of transactions, interact with customers, and package or wrap an item for transportation.

It covers demonstration of the ability to operate a range of point-of-sale equipment in order to complete sales, returns and exchange transactions, and process a number of methods of payment, according to store policies.

### Application of the Unit

This unit applies to frontline service personnel.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Operate point-of-sale equipment.	<p>1.1.Open and close point-of-sale terminal according to <b><i>store policy and procedures</i></b>.</p> <p>1.2.Clear point-of-sale terminal and transfer tender according to store procedure.</p> <p>1.3.Handle cash according to store security procedures.</p> <p>1.4.Maintain supplies of change in point-of-sale terminal according to store policy.</p> <p>1.5.Attend active point-of-sale terminals according to store policy.</p> <p>1.6.Complete records for transaction errors according to store policy.</p> <p>1.7.Maintain adequate supplies of dockets, vouchers and <b><i>point-of-sale documents</i></b>.</p> <p>1.8.Inform <b><i>customers</i></b> of delays in the point-of-sale operation where required.</p>
2. Ensure accuracy of transactions.	<p>2.1.Identify and perform <b><i>numerical calculations</i></b> to ensure accurate pricing and collection of money.</p> <p>2.2.Collect numerical information from various sources and calculate accurately with or without the use of a calculator.</p>
3. Perform point-of-sale transactions.	<p>3.1.Complete <b><i>point-of-sale transactions</i></b> according to store policy.</p> <p>3.2.Identify and apply store procedures in respect of cash and non cash transactions.</p> <p>3.3.Identify and apply store procedures in regard to exchanges and returns.</p> <p>3.4.Move goods through point-of-sale area efficiently and with attention to fragility and packaging.</p> <p>3.5.Enter information into <b><i>point-of-sale equipment</i></b>.</p> <p>3.6.State price or total and amount of cash received verbally to customer.</p> <p>3.7.Tender correct change.</p>

4. Complete sales.
  - 4.1. Complete customer order forms, invoices and receipts and process any loyalty card transactions.
  - 4.2. Identify and process customer delivery requirements according to set timeframes.
  - 4.3. Process sales transactions or direct customers to point-of-sale terminals according to store policy without undue delay.
  - 4.4. Acknowledge and thank customer in line with store policy and procedures.
5. Wrap and pack goods.
  - 5.1. Maintain and request adequate supplies of ***wrapping and packaging materials***.
  - 5.2. Select appropriate wrapping or packaging material.
  - 5.3. Wrap merchandise neatly and effectively where required.
  - 5.4. Pack items safely to avoid damage in transit, and attach labels where required.
  - 5.5. Arrange transfer of merchandise for parcel pick up or other ***delivery methods*** if required.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - inform customers of delays
  - listen actively
  - request adequate supplies of wrapping material or bags through clear and direct communication
  - share information
  - state price or total and amount of cash received
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- self-management skills to:
  - deal with different types of transactions
  - follow set routines and procedures
- literacy and numeracy skills to:
  - document sales and delivery information
  - render change
  - undertake work functions, including addition, division, multiplication, percentages and subtraction

### Required knowledge

- cash and non-cash handling procedures, including:
  - balancing point-of-sale equipment
  - calculating non-cash documents
  - change required, denominations of change and tendering change
  - clearance of terminal and transference of tender
  - counting cash
  - maintenance of cash float
  - opening and closing point-of-sale terminal
  - recording takings
  - security of cash and non-cash transactions
- functions and procedures for operating point-of-sale equipment, including:
  - calculators
  - electronic scales
  - numerical display board
  - registers
- merchandise handling techniques, including wrapping and packaging techniques

- range of services provided by the store
- relevant legislation and statutory requirements, including:
  - industry codes of practice
  - work health and safety (WHS)
  - Australian consumer law
  - scanners
- store policy and procedures in relation to:
  - allocated duties and responsibilities
  - bag checking
  - customer service
  - exchanges and returns
  - handling, packing and wrapping goods or merchandise
  - point-of-sale transactions
- stock availability
- key features of a calculator

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- operates point-of-sale equipment according to manufacturer instructions and store policy and procedures
- applies store policy and procedures in regard to cash handling and point-of-sale transactions
- interprets, calculates and records numerical information accurately
- processes sales transaction information responsibly and accurately according to store policy and procedures
- applies store policy and procedures in regard to the handling, packing, wrapping and delivery of goods or merchandise.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as:
  - stock, inventory and price lists
  - financial transaction dockets and slips
  - lay-by, credit and product return slips
  - store policy and procedures manuals
- a range of point-of-sale equipment.

### **Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the work
- role play
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

### **Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, work and job role is recommended, for example:

- SIRXCCS202 Interact with customers
- SIRXFIN201 Balance and secure point-of-sale terminal
- SIRXINV001A Perform stock control procedures
- SIRXRSK201 Minimise loss.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

***Store policy and***

***procedures*** in regard to:

- cash handling
- financial transactions
- handling techniques of stock
- operation of point-of-sale equipment
- sales transactions
- security.

***Point-of-sale documents***

may include:

- credit slips
- lay-by slips
- message pads
- order forms
- product return slips
- promotional materials.

***Customers*** may include:

- customers with routine or special requests
- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

***Numerical calculations***

may include:

- addition and subtraction
- calculations of cash amounts and change
- calculations of discount amounts
- estimation of quantities
- measurement
- multiplication and division
- percentages.

***Point-of-sale***

***transactions*** may include:

- cheques
- credit cards and store cards
- EFTPOS
- exchanges
- gift vouchers
- lay-by
- returns
- smart cards
- travellers cheques.

***Point-of-sale equipment***

- cash drawer
- cash register

may include:

- EFTPOS terminal
- electronic scales
- numerical display board
- scanner
- security tagging.

***Wrapping and  
packaging materials***  
may include:

- adhesive tape
- bags
- boxes
- bubble wrap
- gift wrapping
- paper
- ribbon
- string.

***Delivery methods*** may  
include:

- courier
- domestic or international delivery
- freight
- parcel pick-up
- post or express post.

## **Unit Sector(s)**

## **Competency Field**

Client and Customer Service

## SIRXCCS202 Interact with customers

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release Date	Comments
First Release:	This is a revised unit, based on and equivalent to SIRXCCS002A Interact with customers.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to deliver service to customers. It involves being able to communicate effectively with customers, respond to their complaints, receive and process sales orders, and identify special customer requirements.

The unit covers the consistent application of store policies and industry codes of practice to provide a quality service environment by treating customers and team members in a courteous and professional manner through all stages of the service and sales procedure, and to identify and resolve customer complaints.

### Application of the Unit

This unit applies to frontline service personnel.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Deliver service to customers.	<p>1.1. <b><i>Communicate</i></b> with <b><i>customers</i></b> in a professional, courteous manner according to store policy.</p> <p>1.2. Meet <b><i>customer needs</i></b> and reasonable requests or refer to supervisor, according to store policy and <b><i>legislative requirements</i></b>.</p> <p>1.3. Record customer details and information where necessary.</p> <p>1.4. Identify and anticipate possible problems and take action to minimise the effect on customer satisfaction.</p> <p>1.5. Recognise and act upon opportunities to deliver additional levels of <b><i>service</i></b> beyond the customer's immediate request.</p> <p>1.6. Maintain contact with customer until sale is completed according to store policy.</p> <p>1.7. Use verbal and non-verbal communication to develop rapport with customers during service delivery.</p> <p>1.8. Encourage repeat customers by promotion of appropriate services or products according to store policy.</p> <p>1.9. Farewell customer appropriately and courteously according to store policy.</p>
2. Respond to customer complaints.	<p>2.1. Convey a positive, helpful attitude to customers when handling <b><i>complaints</i></b>, according to store policy.</p> <p>2.2. Handle complaints sensitively, courteously and with discretion.</p> <p>2.3. Establish and confirm with customer nature of complaint by active listening and questioning.</p> <p>2.4. Take action to resolve complaint to customer's satisfaction wherever possible.</p> <p>2.5. Promptly refer unresolved customer dissatisfaction or complaints to supervisor.</p> <p>2.6. Take the opportunity to turn incidents of customer dissatisfaction into a demonstration of high-quality service to customer according to store policy.</p> <p>2.7. Complete documentation regarding customer dissatisfaction</p>

- or complaints accurately and legibly.
- 2.8. Take ***follow-up action*** as necessary to ensure customer satisfaction.
3. Receive and process sales orders.
- 3.1. Record customer details and information accurately.
- 3.2. Promptly refer customers to appropriate area as required.
- 3.3. Provide customers with information in clear, concise manner.
- 3.4. Process, record and act upon sales orders according to store policy.
- 3.5. Process customer returns or refunds according to store policy and procedures.
4. Identify special customer requirements.
- 4.1. Promptly identify customers with special needs or requirements by observation and questioning.
- 4.2. Verbally and non-verbally convey a willingness to assist.
- 4.3. Promptly service, refer or redirect customers' needs as required.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication and interpersonal skills to:
  - build rapport and understanding
  - clarify and feed back information
  - deal with difficult customers
  - listen to customers' needs
  - negotiate with and persuade customers to buy
  - promote products and services
  - respond to complaints effectively and politely
- literacy and numeracy skills to:
  - calculate costs and discounts
  - document sales, stock and delivery information
  - follow procedures for recording customer orders that are placed in person, by telephone or by electronic means
  - handle legal tender
  - take messages in person or by telephone
  - write records of complaints
  - weigh and measure goods
- observation and analysis skills to anticipate customer behaviour
- self-management skills to follow set routines and procedures

### Required knowledge

- add-on selling concepts
- conflict-resolution strategies
- functions and procedures for operating the store telephone system and other communication equipment, and the relevant numbers
- greeting and farewelling techniques
- location of store departments
- merchandise and service range of store departments
- non-verbal cues indicating customer behaviour
- questioning and active listening techniques
- relevant legislation and statutory requirements, including work health and safety (WHS)
- store policy and procedures in regard to:
  - customer service
  - dealing with customer complaints
  - allocated duties and responsibilities
  - customer returns and refunds

- lay-by, gift voucher and rain-check procedures
- strategies for handling difficult or abusive customers

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- accesses, records and processes sales orders accurately and responsibly, according to store policy and procedures
- identifies the nature of customer complaints, resolves complaints and provides service to customers according to store policies
- collaboratively works within a team to meet customers' needs
- applies store policy and procedures and industry codes of practice in regard to customer service
- provides a quality service environment by treating customers and team members in a courteous and professional manner through all stages of the service and sales procedure
- uses effective questioning, active listening and observation skills to identify special customer requirements.

### Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as:
  - sales order forms
  - complaint and return forms
  - stock, inventory and price lists
  - store policy and procedures manuals
- a range of customers with different requirements
- point-of-sale equipment and materials
- a communication system or a range of communication equipment.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

### Guidance information

Holistic assessment with other units relevant to the industry

**for assessment**

sector, workplace and job role is recommended, for example:

- SIRXCCS201 Apply point-of-sale handling procedures
- SIRXFIN201 Balance and secure point-of-sale terminal
- SIRXINV001A Perform stock control procedures
- SIRXRSK201 Minimise loss.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

***Communication***

techniques may include:

- face-to-face or telephone contact with customers
- non-verbal communication
- speaking clearly and concisely
- using appropriate language
- using open and inclusive language.

***Customers*** may include:

- customers with routine or special requests
- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

***Store policy*** may relate to:

- cash handling
- customer service
- dealing with customer complaints
- processing sales orders.

***Customer needs*** may include:

- information regarding store facilities and services
- location of specific items within the store
- product information
- returns or refunds.

***Legislative requirements*** may include:

- liquor licensing regulations
- lottery legislation
- sale of second-hand goods
- sale of X and R-rated products
- tobacco laws
- Trade Practices Act
- trading hours
- transport, storage and handling of goods.

***Service*** may include:

- all store activities
- internal and external customers
- follow-up in event of delays in service provision.

***Complaints*** may relate to:

- prices
- products
- service.

***Follow-up action*** may require:

- communication with:
  - customers

- staff
- supervisors and management
- suppliers
- recommendations to supervisor regarding policy and procedure development or alteration.

## **Competency Field**

Client and Customer Service

## SIRXFIN201 Balance and secure point-of-sale terminal

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXFIN001A Balance point-of-sale terminal.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to balance and reconcile a register or terminal in a retail environment. It involves clearing the register, counting money, calculating non-cash transactions, and reconciling and recording takings. The unit requires the application of store policy and procedures in undertaking those tasks.

### Application of the Unit

This unit applies to frontline retail staff working under some supervision.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Balance and secure takings from register or terminal.	<ul style="list-style-type: none"><li>1.1.Perform <b><i>register or terminal</i></b> balance at designated times according to <b><i>store policy and procedures</i></b>.</li><li>1.2.Separate cash float from takings prior to balancing procedure and secure according to store policy.</li><li>1.3.Supply change to register or terminal according to store policy.</li><li>1.4.Obtain and interpret register or terminal reading or print-out.</li><li>1.5.Secure cash and <b><i>non cash documents</i></b> according to store security policy and procedures.</li></ul>
2. Reconcile takings.	<ul style="list-style-type: none"><li>2.1.Count cash accurately.</li><li>2.2.Calculate non cash documents accurately.</li><li>2.3.Determine balance between register or terminal reading and sum of cash and non cash transactions.</li><li>2.4.Report discrepancies between register or terminal reading and sum of cash and non cash transactions to <b><i>relevant personnel</i></b> according to store policy.</li><li>2.5.Record store and individual department takings and file <b><i>records</i></b> according to store policy.</li></ul>

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- literacy and numeracy skills to:
  - balance the register or terminal
  - count cash
  - calculate non-cash transactions
  - calculate discrepancies between reported and actual takings
  - complete documentation
  - interpret documentation
  - report on takings
- planning and organising skills to complete tasks in a set timeframe
- technology skills to operate register or terminal

### Required knowledge

- cash and non-cash handling procedures, including:
  - balancing point-of-sale terminal
  - calculating non-cash documents
  - change required and denominations of change
  - clearance of terminal and transference of tender
  - counting cash
  - credit and returns
  - credit cards
  - EFTPOS
  - gift vouchers
  - lay-by
  - maintenance of cash float
  - opening and closing point-of-sale terminal
  - recording takings
  - security of cash and non-cash transactions
- store policy and procedures in regard to:
  - cash float
  - operation of equipment used at register or terminal
  - register or terminal balance
  - security of cash and non-cash transactions

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- operates register or terminal equipment according to manufacturer instructions and store policy
- applies store policy and procedures in regard to handling cash and removing takings from register or terminal
- applies store policy and procedures in regard to cash float
- applies store policy and procedures in regard to reading registers and recording information
- processes documentation and records responsibly and according to store policy and procedures
- reconciles takings according to store policy and procedures.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as:
  - financial transaction dockets, slips and invoices
  - sample debit card and credit card vouchers
  - recording and tally sheets
  - store policy and procedure manuals in regard to register or terminal balance
- register or terminal and related equipment.

### **Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

### **Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS201 Apply point-of-sale handling procedures
- SIRXRSK201 Minimise loss.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

- |   |   |
|---|---|
| <b><i>Register or terminal</i></b> may be:              | <ul style="list-style-type: none"> <li>• cleared at intervals during or at close of trading</li> <li>• cleared by operator or specialist staff</li> <li>• electronic</li> <li>• manual.</li> </ul>  |
| <b><i>Store policy and procedures</i></b> in regard to: | <ul style="list-style-type: none"> <li>• cash handling</li> <li>• register or terminal balance</li> <li>• security.</li> </ul>  |
| <b><i>Non-cash documents</i></b> may relate to:         | <ul style="list-style-type: none"> <li>• cash on delivery (COD)</li> <li>• cheques</li> <li>• credit cards</li> <li>• customer credit ratings</li> <li>• customer refunds</li> <li>• gift vouchers</li> <li>• hire-purchase</li> <li>• lay-by.</li> </ul> |
| <b><i>Relevant personnel</i></b> may include:           | <ul style="list-style-type: none"> <li>• manager</li> <li>• supervisor</li> <li>• team leader.</li> </ul>   |
| <b><i>Records</i></b> may be:                           | <ul style="list-style-type: none"> <li>• electronic</li> <li>• manual.</li> </ul>   |

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
Second Release	Editorial updates

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to operate a variety of retail equipment. It involves identifying the correct equipment required for a given task, maintaining retail equipment, applying keyboard skills and operating data entry equipment.

### Application of the Unit

This unit applies to frontline service personnel who operate and maintain a range of retail equipment, including point-of-sale systems, keyboards and data entry equipment, according to manufacturer instructions, design specifications, store policy and designated timeframes. This work is undertaken with some supervision and guidance.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Maintain retail equipment.	1.1. Identify purpose of <b><i>equipment</i></b> used in store or department. 1.2. Operate equipment, according to design specifications and <b><i>safety requirements</i></b> . 1.3. Identify equipment faults and report to <b><i>relevant personnel</i></b> . 1.4. Identify and apply maintenance program for retail equipment according to <b><i>store policy and procedures</i></b> .
2. Apply keyboard skills.	2.1. Operate keyboard using typing techniques within designated speed and accuracy requirements. 2.2. Enter and edit information accurately.
3. Operate data entry equipment.	3.1. Enter data using relevant equipment, according to store policy and procedures. 3.2. Operate price marking equipment, according to manufacturer instructions and store policy. 3.3. Enter data accurately and within designated time limits.

## **Required Skills and Knowledge**

This section describes the essential skills and knowledge and their level, required for this unit.

### **Required skills**

- planning and organising skills to complete tasks in set timeframe
- problem solving skills to deal with different types of transactions
- literacy and numeracy skills to:
  - read store procedures for operating equipment
  - enter data
  - perform point-of-sale transactions
  - follow common fault-finding procedures

### **Required knowledge**

- store policy and procedures in regard to:
  - the operation and maintenance of store retail equipment
  - reporting problems and faults
- relevant legislation and statutory requirements in regard to operating retail technology, including Work Health and Safety (WHS) requirements
- relevant industry codes of practice
- purpose and impact of using electronic technology
- licensing requirements for carrying and moving merchandise (if applicable)

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- operates a range of store retail equipment according to store policy and procedures and industry codes of practice
- operates and maintains a range of store retail equipment according to manufacturer instructions and design specifications
- applies store maintenance program and reports faults and problems
- consistently applies safe working practices in the operation and maintenance of store retail equipment according to OHS legislation and codes of practice
- reads and interprets operation manuals to solve routine faults and errors and maintains and uses equipment effectively
- uses keyboard skills to enter and edit data accurately
- completes tasks in set timeframe.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
  - store policy and procedure manuals
  - manufacturer instructions and operation manuals
- a range of store retail equipment.

### **Methods of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

### **Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

***Equipment*** may include:

- point-of-sale terminals
- electronic bar coding equipment for price labelling and stocktaking
- portable data entry
- printers
- EFTPOS terminals
- electronic ordering equipment
- wrapping and packing equipment
- equipment for carrying or moving merchandise
- equipment for storage of merchandise, including refrigerators
- weighing machines
- thermometers
- security tag systems
- trolley return equipment
- computers
- scanners
- numerical keyboard equipment, including calculators.

***Safety requirements*** may include:

- hazard identification (e.g. workplace inspections)
- emergency, fire and accident procedures
- personal safety procedures
- stress management
- procedures for the use of personal protective clothing and equipment
- reporting incidents and accidents in the workplace.

***Relevant personnel*** may include:

- supervisor
- team leader
- manager.

***Store policy and procedures*** in regard to:

- store administration
- clerical systems
- operating and maintaining retail equipment
- Work Health and Safety (WHS).

### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Receive and process incoming goods.	<p>1.1.Maintain cleanliness and orderliness in receiving bay according to <b><i>store policy and procedures</i></b>.</p> <p>1.2.Unpack goods using correct <b><i>handling techniques</i></b> and <b><i>equipment</i></b>, according to store policy.</p> <p>1.3.Remove and promptly dispose of packing materials, according to store policy and relevant <b><i>legislative requirements</i></b>.</p> <p>1.4.Check incoming stock and validate against purchase orders and delivery documentation, according to store policy and relevant legislative requirements.</p> <p>1.5.Inspect items received for damage, quality, use by dates, breakage or discrepancies and record, according to store policy.</p> <p>1.6.Record stock levels on store <b><i>stock systems</i></b>, according to store policy.</p> <p>1.7.Rotate and store stock, according to the first in first out (FIFO) principle.</p> <p>1.8.Dispatch stock to appropriate area or department.</p> <p>1.9.Apply stock price and code labels when required according to store policy.</p>
2. Rotate stock.	<p>2.1.Carry out stock rotation procedures, according to store routine and policy.</p> <p>2.2.Perform store code checking and reporting procedures, including recording of waste and markdowns.</p> <p>2.3.Place merchandise to achieve a balanced, fully stocked display appearance and promote sales.</p> <p>2.4.Place excess stock in storage or dispose of, according to store policy and legislative requirements.</p> <p>2.5.Maintain safe lifting, shifting and carrying techniques according to store Work Health and Safety (WHS) policy and legislative requirements.</p>

## **Required Skills and Knowledge**

This section describes the essential skills and knowledge and their level, required for this unit.

### **Required skills**

- literacy and numeracy skills to:
  - follow set routines and procedures
  - use electronic labelling and ticketing equipment
  - stock records and delivery documentation
  - report problems

### **Required knowledge**

- store policy and procedures in regard to:
  - stock control
  - store labelling policy
  - product quality standards
  - correct unpacking of goods
  - out-of-date, missing or damaged stock
  - equipment used
  - stock location
  - waste disposal
  - methods of storage
  - delivery documentation
  - stock record documentation
  - dispatch documentation
  - reporting faults and problems
- relevant legislation and statutory requirements in regard to stock control, including WHS
- relevant industry codes of practice

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- consistently applies store policy and procedures, industry codes of practice, relevant legislation and statutory requirements in regard to stock control
- consistently applies safe working practices in the manual handling and moving of stock according to WHS legislation and store policy
- interprets and applies manufacturer instructions with regard to handling stock and using relevant equipment
- receives and processes incoming goods and dispatches outgoing goods according to store policy and procedures
- rotates stock and performs out-of-code checking and reporting according to store policy and procedures
- interprets and processes information accurately and responsibly.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a retail work environment
- relevant equipment, including:
  - stock moving equipment
  - manual and electronic labelling and ticketing equipment
- computers and stock recording equipment
- relevant documentation, such as:
  - invoices, packing slips, dispatch documents and order forms
  - recording and tally sheets
  - store policy and procedures manuals
  - WHS regulations
  - relevant legislation and statutory requirements
  - industry codes of practice.

## SIRXINV002A Maintain and order stock

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
Second Release	Editorial updates

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to maintain and order stock in a retail environment. It involves monitoring receipt and dispatch of goods, maintaining stock records, coordinating stocktake, identifying stock losses, processing orders and following up on orders.

### Application of the Unit

This unit applies to retail staff who are responsible for monitoring and coordinating stock levels, storage, distribution and reorder cycles. It includes rostering staff, organising and coordinating stocktakes, maintaining accurate records and routinely reporting on inventory status to relevant personnel according to store policy and procedures.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Monitor receipt and dispatch of goods.	<p>1.1. Delegate responsibility for receipt and dispatch of goods to <b><i>appropriate staff</i></b>.</p> <p>1.2. Implement store procedures in regard to receipt, dispatch and secure storage of goods.</p> <p>1.3. Observe <b><i>staff</i></b> functions to ensure store procedures are followed and documentation is completed correctly.</p> <p>1.4. Implement store procedures to ensure goods inspected for quantity and quality on receipt.</p> <p>1.5. Act upon variations to quantity and quality of delivered goods, according to <b><i>store policy and procedures</i></b>.</p> <p>1.6. Supervise safe <b><i>handling and storage of goods</i></b>, according to store policy.</p>
2. Maintain stock records.	<p>2.1. Monitor and maintain stock levels at required levels.</p> <p>2.2. Maintain, monitor and adjust stock reorder cycles as required.</p> <p>2.3. Inform team members of their individual responsibilities in regard to recording of stock.</p> <p>2.4. Maintain stock storage and movement <b><i>records</i></b>, according to store policy.</p> <p>2.5. Record stock discrepancies and follow procedures according to store policy.</p> <p>2.6. Monitor stock performance and identify and <b><i>report</i></b> fast and slow selling items according to store policy.</p>
3. Coordinate stocktake or cyclical count.	<p>3.1. Interpret policy and procedures in regard to <b><i>stocktaking</i></b> and cyclical counts and explain to team members.</p> <p>3.2. <b><i>Roster</i></b> staff, according to allocated budget and time constraints.</p> <p>3.3. Allocate stocktaking tasks to individual team members.</p> <p>3.4. Provide team members with clear directions for the performance of each task.</p> <p>3.5. Allocate team members to ensure effective use of staff resources to complete task.</p> <p>3.6. Produce accurate reports on stocktake data, including discrepancies, for management.</p>

- 4. Identify stock losses.
  - 4.1. Identify, record and assess losses against potential loss forecast on a regular basis.
  - 4.2. Identify avoidable losses and establish reasons.
  - 4.3. Recommend and implement possible solutions.
- 5. Process orders.
  - 5.1. Process and raise orders for stock as requested, according to store policy and procedures.
  - 5.2. Maintain *ordering and recording system*.
  - 5.3. Ensure availability of sample range, according to buying plan.
  - 5.4. Order pricing materials as required.
  - 5.5. Record negotiated purchase and supply agreements and file for retrieval.
- 6. Follow up orders.
  - 6.1. Monitor delivery process to meet agreed deadlines.
  - 6.2. Handle routine supply problems or refer to management as required by store policy.
  - 6.3. Maintain ongoing liaison with buyers, store or departments, warehouse and *suppliers* to ensure continuity of supply.
  - 6.4. Distribute stock, according to store or department allocation.

## Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

### Required skills

- technical skills to:
  - use store stocktaking systems
  - use electronic recording equipment
- interpersonal skills to:
  - inform team members of their responsibilities and give instructions
  - explain policies and procedures to staff
  - allocate tasks and provide directions for performance of tasks
  - liaise with buyers, store and departments, warehouse and suppliers through clear and direct communication
  - ask questions to identify and confirm requirements
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- management skills to coordinate stock takes
- negotiation skills to handle supply problems
- literacy and numeracy skills to:
  - prepare and present stock control reports and documentation
  - process orders
  - maintain delivery and supply records
  - maintain stock distribution records
  - maintain stock ordering and recording systems

### Required knowledge

- store policy and procedures in regard to:
  - stock control
  - store merchandising system
  - current and future stock levels
  - bar codes, labels and price tags
  - store stock recording system
  - stock replenishment and reorder procedures
  - inter- and intra-store and department transfers
  - reporting of stock discrepancies and damage
  - identifying and recording stock losses
  - identifying and recording discrepancies
  - existing suppliers
  - quality control procedures and requirements
  - receipt and dispatch of goods, including inspection for quality and quantity

- relevant licensing requirements for moving stock mechanically
- relevant legislation and statutory requirements
- relevant industry codes of practice
- relevant Work Health and Safety (WHS) legislation and codes of practice

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- consistently implements and monitors store policy and procedures regarding receipt, dispatch and secure storage of goods
- regularly monitors staff implementation of store procedures and documentation in regard to receipt, dispatch and secure storage of goods
- monitors stock levels, storage, movement and reorder cycles on a regular basis.
- organises and coordinates stocktake according to store policy and procedures
- consistently raises and processes stock orders and maintains record system according to store policy and procedures
- monitors delivery processes and distributes stock to ensure continuity of supply.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - store policy and procedures for receipt and dispatch of goods
  - store procedures for stocktake
  - WHS legislation and codes of practice
  - industry codes of practice
  - legislation and statutory requirements
  - store merchandising and marketing policy and procedures
  - inter- and intra-store and department transfer procedures
  - store quality control procedures and requirements.

### **Methods of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding

- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

**Guidance information for  
assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

- Appropriate staff*** may include:
- frontline staff
  - relevant managers
  - supervisor
  - team leader
  - specialist staff.
- Staff*** may include:
- full-time, part-time, casual or contract staff
  - people from a range of social, cultural and ethnic backgrounds
  - people with varying degrees of language and literacy levels.
- Store policy and procedures*** in regard to:
- stock control
  - stock control system
  - recording procedures
  - procedures for investigating discrepancies
  - store merchandise and marketing
  - pricing, labelling and packaging requirements
  - quality control policy and procedures.
- Handling and storage of goods*** may vary according to:
- stock characteristics
  - industry codes of practice.
- Records*** may be:
- manual
  - digital.
- Reports*** for management may include:
- financial reports
  - business documents
  - informal reports
  - stocktake reports.
- Stocktaking*** may be:
- cyclical
  - compliance driven.
- Roster*** may include:
- varying levels of staff training
  - staffing levels
  - routine or busy trading conditions
  - full-time, part-time or casual staff
  - range of staff responsibilities.
- Ordering and recording system*** may be:
- manual
  - digital.
- Suppliers*** may include:
- existing contacts
  - new contacts

- local suppliers
- overseas supplies.

## SIRXMER201 Merchandise products

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXMER001A Merchandise products.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to merchandise products within a retail store. It involves the consistent application of store policies and procedures in regard to displaying, merchandising, ticketing, labelling, pricing and storing stock. It also includes the application of correct manual handling, storage and display techniques according to stock characteristics, industry codes of practice, and relevant legislation.

### Application of the Unit

This unit applies to frontline retail personnel.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Place and arrange merchandise.	<p>1.1.Unpack <b><i>merchandise</i></b> according to <b><i>store policy and procedures</i></b> and <b><i>legislative requirements</i></b>.</p> <p>1.2.Place merchandise on floor, fixtures and shelves in determined locations according to work health and safety (WHS) legislative requirements.</p> <p>1.3.<b><i>Display</i></b> merchandise to achieve a balanced, fully-stocked appearance and promote sales.</p> <p>1.4.Identify damaged, soiled or out-of-date stock and take corrective action as required according to store procedures.</p> <p>1.5.Place stock range in line with fixtures, ticketing, prices and bar codes.</p> <p>1.6.Rotate stock according to stock requirements and store procedure.</p> <p>1.7.Ensure stock presentation conforms to special <b><i>handling techniques</i></b> and other <b><i>safety requirements</i></b>.</p>
2. Prepare and apply labels and tickets.	<p>2.1.Prepare <b><i>labels and tickets</i></b> for window, wall or floor displays according to store policy.</p> <p>2.2.Prepare tickets using electronic equipment or neatly by hand according to design specifications and store procedures.</p> <p>2.3.Identify soiled, damaged, illegible or incorrect labels and tickets and take corrective action according to store procedures.</p> <p>2.4.Use, maintain and store electronic ticketing and labelling equipment according to manufacturer's instructions and store procedures.</p> <p>2.5.Place labels and tickets visibly and correctly on merchandise.</p> <p>2.6.Replace labels and tickets according to store policy.</p>
3. Maintain displays.	<p>3.1.Reset or dismantle unsuitable or out-of-date displays and <b><i>special promotion areas</i></b> as directed.</p> <p>3.2.Assist supervisor in selection of merchandise for display.</p> <p>3.3.Arrange and face up merchandise as directed and according to layout specifications and load-bearing capacity of fixtures.</p> <p>3.4.Maintain correct pricing and information on merchandise according to store procedures, industry codes of practice and</p>

- legislative requirements.
- 3.5. Identify optimum stock levels and replenish stock according to store policy.
- 3.6. Remove excess packaging and maintain display areas in a clean and tidy condition.
- 4. Protect merchandise.
  - 4.1. Identify and apply correct handling, storage and display techniques according to stock characteristics and legislative requirements.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- literacy and numeracy skills to:
  - prepare machine or manual labels and tickets
  - read and interpret store procedures and guidelines
  - read and interpret manufacturer instructions
- self-management skills to complete tasks in a set timeframe
- technology skills to operate and maintain manual and electronic labelling and ticketing equipment

### Required knowledge

- store policies and procedures in regard to:
  - availability and use of display materials
  - correct storage of stock
  - correct storage procedures for labelling and ticketing equipment and materials
  - location of display areas
  - merchandise range
  - merchandising, ticketing and pricing of stock
  - scheduling for building or rotating displays
  - stock replenishment
  - stock rotation
  - store promotional themes, including advertising, catalogues and special offers
- correct manual handling techniques for protection of self and merchandise
- principles of display
- elements and principles of design and trends in retail design
- relevant WHS regulations, including:
  - manual handling
  - hygiene and sanitation
  - hazardous substances
  - labelling of workplace substances
- relevant legislation and statutory requirements relating to merchandising product
- pricing procedures, including inclusion and exclusion of GST
- relevant industry codes of practice relating to merchandising product

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- applies store policies and procedures and legislative requirements in regard to displaying, merchandising, ticketing, pricing and storing stock
- displays merchandise on floor, fixtures, shelves and display areas, in determined locations, according to special manual handling techniques and other safety requirements
- prepares display labels and price tickets for merchandise with regard to store policies and procedures
- operates, maintains and stores a range of ticketing equipment according to:
  - store policy and procedures
  - industry codes of practice
  - manufacturer instructions and design specifications
- identifies damaged, soiled or out-of-date stock and takes corrective action as required by store procedures and legislative requirements
- maintains display areas and replenishes stock as required according to store procedures and legislative requirements
- performs correct manual handling, storage and display techniques.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a real or simulated retail work environment
- a range of ticketing and pricing equipment
- merchandise for display
- display materials and props
- cleaning materials
- relevant documentation, such as:
  - store policy and procedure manuals on housekeeping, merchandising and WHS
  - manufacturer instructions and operation manuals for electronic ticketing equipment
  - relevant legislation and industry codes of practice.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXSLS201 Sell products and services
- SIRXSLS002A Advise on products and services.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

- Merchandise*** may be characterised by:
- type
  - brand
  - size
  - customer needs
  - colour
  - price.
- Store policy and procedures*** in regard to:
- merchandising of stock
  - preparing and displaying labels and tickets
  - maintaining displays.
- Legislative requirements*** may include:
- pricing requirements, including GST requirements
  - industry codes of practice
  - discounted items
  - Australian Consumer law.
- Display*** may include:
- setting new displays
  - maintaining existing displays.
- Handling techniques*** may vary according to:
- stock characteristics
  - store policy
  - legislative requirements
  - industry codes of practice.
- Safety requirements*** may relate to:
- transport, storage and handling of goods
  - hazardous substances
  - labelling of workplace substances.
- Preparation of ***labels and tickets*** may involve:
- pricing gun
  - shelf tickets
  - shelf talkers
  - written labels
  - swing ticketing
  - bar coding
  - price boards
  - header boards.
- Special promotion areas*** may be:
- permanent or temporary
  - interior or exterior
  - publicly accessible
  - windows

- shelves
- wall fixtures
- on floor.

## SIRXMER303 Coordinate merchandise presentation

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXMER002A Coordinate merchandise presentation.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to apply knowledge of store merchandising and pricing policy and standards to support and coordinate relevant frontline staff members and ensure that they arrange, present and label or price merchandise according to store requirements.

It also involves informing staff of store merchandise presentation requirements for sales, promotions and special events, and providing feedback to management in regard to improvement of store marketing and promotional activities.

### Application of the Unit

This unit applies to frontline visual merchandisers who supervise sales and other staff implementing and maintaining displays according to store merchandising standards.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Instruct and coordinate staff.	1.1.Communicate and demonstrate store <b><i>display standards and requirements</i></b> to staff. 1.2.Identify occurrence and timing of promotions and special events and inform staff. 1.3.Identify items to be advertised or promoted, according to store merchandising policy and inform staff. 1.4.Identify appropriate timing for dismantling and disposing of displays and inform staff.
2. Supervise construction and maintenance of presentations.	2.1.Plan and coordinate promotions and special events as directed by management. 2.2.Plan and supervise construction and maintenance of <b><i>displays</i></b> in order to achieve balance and visual impact. 2.3.Ensure product or service <b><i>display information</i></b> accurately depicts product or service being promoted. 2.4.Ensure displays are completed according to required time schedule, with minimum disruption to <b><i>customer</i></b> service and traffic flow. 2.5.Ensure displays are constructed and maintained in a safe and secure manner. 2.6.Regularly monitor replenishment of merchandise and rotation of stock on store displays and take action as required.
3. Implement merchandise pricing.	3.1.Implement store policy and procedures in regard to pricing and ticketing. 3.2.Identify current prices for products and services and amend according to store policy. 3.3.Inform team members of price changes and current pricing policies.
4. Review merchandise presentations.	4.1.Evaluate promotions or special events against sales turnover and store presentation standards. 4.2.Evaluate merchandise presentation against sales turnover and store presentation standards. 4.3.Provide management with feedback in regard to improvement of

store marketing and promotional activities.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication and interpersonal skills to:
  - give instructions
  - provide feedback to management through clear and direct communication
  - provide information to staff
  - share information
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- literacy and numeracy skills to:
  - prepare machine or manual labels and tickets
  - present and price merchandise
  - read and interpret store policies and procedures
- observation skills to assess display and presentation compliance with visual merchandising standards
- technology skills to operate and maintain electronic labelling and ticketing equipment
- team leadership skills to:
  - instruct and support staff
  - supervise staff activities

### Required knowledge

- availability and use of materials
- correct storage procedures for labelling and ticketing equipment and materials
- load-bearing capacity of fixtures and display areas
- location of display areas
- manufacturer specifications for the use of electronic labelling and ticketing equipment
- occurrence and timing of store promotions, including advertising, catalogues and special offers
- pricing procedures, including GST requirements
- principles and techniques of interpersonal communication skills
- principles of display and design
- procedure for accessing information and implementing price changes
- relevant industry codes of practice relating to coordinating merchandise presentation
- relevant legislation and statutory requirements relating to coordinating merchandise presentation, including Australian Consumer Law
- relevant work health and safety (WHS) legislation and codes of practice
- store policies and procedures in regard to:
  - efficient use of resources
  - merchandise range

- merchandising, pricing and ticketing
- minimum stock levels required
- stock rotation and replenishment
- storage of stock
- store promotional themes

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- implements and instructs staff regarding store display, merchandising, ticketing and pricing policies and procedures
- coordinates and monitors display, promotion and presentation of merchandise according to store policies and procedures and legislative requirements
- identifies products to be advertised or promoted according to store merchandising policies
- coordinates construction and maintenance of displays within time schedule set in regard to advertising, catalogues, special offers and in-store promotions in a safe and secure manner
- informs staff of pricing policies, promotions, special events, display standards and requirements, and timing for dismantling and disposing of displays
- evaluates and reports effectiveness of store merchandising and promotional activities to management and staff as required by store policies and procedures.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a real or simulated retail work environment
- pricing and ticketing equipment
- merchandise for display
- display materials and props
- relevant documentation, such as:
  - store policy and procedures manuals on merchandising
  - WHS requirements
  - manufacturer instructions and operation manuals on electronic ticketing equipment
  - legislation and statutory requirements
  - industry codes of practice
  - a work team.

### **Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge.

**Guidance information for assessment** Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

- Display standards and requirements*** may include:
- maintaining existing displays
  - safety
  - setting up new displays
  - ticketing and display signage.
- Staff*** may be:
- from a range of social, cultural and ethnic backgrounds
  - from within or outside own work team
  - full-time, part-time, casual or contract.
- Displays*** may be located in a variety of areas, including:
- fixtures on floor
  - interior or exterior
  - permanent or temporary
  - publicly accessible areas
  - shelves
  - walls
  - windows.
- Display information*** may include:
- discount information
  - price
  - product brand
  - special guarantees
  - product characteristics, such as:
    - size
    - weight capacity
    - materials.
- Customers*** may include:
- internal and external contacts
  - new or repeat contacts
  - people from a range of social, cultural and ethnic backgrounds
  - people with varying physical and mental abilities.

## **SIRXRSK001A Minimise theft**

### **Modification History**

Not applicable.

### **Unit Descriptor**

**Unit descriptor**

This unit describes the performance outcomes, skills and knowledge required to minimise theft in a retail environment. It involves applying routine store security, taking appropriate action to minimise theft and maintaining security of cash, registers or terminals and keys.

### **Application of the Unit**

**Application of the unit**

This unit applies to frontline service personnel. It requires the team member to apply store policy and procedures and industry codes of practice in regard to store security and theft prevention, reporting theft or suspicious behaviour to relevant personnel and monitoring stock, work areas, customers and staff to minimise opportunities for theft.

### **Licensing/Regulatory Information**

Not applicable.

### **Pre-Requisites**

**Prerequisite units**

Nil

## Employability Skills Information

**Employability skills** The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Apply routine store security.	<p>1.1 Apply store <b><i>security systems and procedures</i></b> according to store policy.</p> <p>1.2 Handle and secure cash according to <b><i>store policy and procedures</i></b>.</p> <p>1.3 Observe and deal with suspect behaviour by <b><i>customers</i></b> according to store policy and <b><i>legislative requirements</i></b>.</p> <p>1.4 Deal with internal and external theft according to store policy and legislative requirements.</p> <p>1.5 Store products and equipment in a secure manner.</p>
2 Minimise theft.	<p>2.1 Take appropriate action to minimise theft by applying store procedures and legislative requirements.</p> <p>2.2 Match merchandise to correct price tags.</p> <p>2.3 Maintain surveillance of merchandise according to store policy and <b><i>legislative requirements</i></b>.</p>

**ELEMENT**

**PERFORMANCE CRITERIA**

- 2.4 Check customers' bags as required at point of sale according to store policy and legislative requirements.
- 2.5 Maintain security of cash, cash register and keys according to store policy.
- 2.6 Maintain security of stock, cash and equipment in regard to customers, *staff* and outside contractors according to store policy and legislative requirements.
- 2.7 Deal with suspected or potential thieves according to store policy and procedures.

## **Required Skills and Knowledge**

### **REQUIRED SKILLS AND KNOWLEDGE**

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- literacy and numeracy skills in:
  - recording of stolen items
  - reporting of theft.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
  - security
  - checking customers' bags and purchases
  - reporting problems and faults
- relevant legislation and statutory requirements, particularly in regard to checking customers' bags and purchases
- Trade Practices and Fair Trading Acts
- store merchandising system
- security procedures relating to cash and non-cash transactions
- location and operation of store security equipment
- reporting procedures for internal and external theft or suspicious circumstances.

## **Evidence Guide**

### **EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

## EVIDENCE GUIDE

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- consistently applies store policy and procedures and legislative requirements, including industry codes of practice in regard to store security and theft prevention in a range of contexts and situations
- consistently applies store policy and procedures in regard to following security procedures and for reporting theft or suspicious behaviour to relevant personnel
- monitors stock, work area, customers and staff to minimise opportunities for theft.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
  - store policy and procedures manuals
  - legislation and statutory regulations
  - industry codes of practice
  - Trade Practices and Fair Trading Acts
- relevant security equipment
- point-of-sale equipment.

## EVIDENCE GUIDE

### Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a simulated work environment
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS001A Apply point-of-sale handling procedures
- SIRXCCS002A Interact with customers
- SIRXINV001A Perform stock control procedures
- SIRXFIN001A Balance point-of-sale terminal.

### Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

## RANGE STATEMENT

*Security systems and procedures*  
may deal with:

- customers
- staff
- keys
- visitors, sales representatives, contractors and vendors
- stock
- records
- cash, credit cards
- equipment, including:
  - alarm systems
  - video surveillance
  - mirrors
  - security tags
- locked and secure areas
- premises
- armed hold-up.

*Store policy and procedures*  
may relate to:

- security
- surveillance of merchandise
- reporting problems and faults.

*Customers* may include:

- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

*Legislative requirements* may  
include:

- privacy and confidentiality laws
- Trade Practices and Fair Trading Acts
- consumer law
- awards and agreements
- property offences
- credit laws
- reporting procedures
- criminal law.

## **RANGE STATEMENT**

*Staff* may include:

- management
- other staff members
- full-time, part-time and casual staff
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

## SIRXWHS302 Maintain store safety

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXOHS002A Maintain store safety.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to maintain store safety in a retail environment.

It involves informing and involving team members with regard to work health and safety (WHS), monitoring and maintaining a safe work environment, implementing emergency procedures, identifying the need for WHS training, and maintaining WHS records. It is based on the National Occupational Health and Safety Commission (NOHSC) guidelines.

### Application of the Unit

This unit applies to store managers and team leaders.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Inform team members about WHS matters.	<p>1.1. Clearly and accurately explain store policy and procedures in regard to WHS and <b><i>emergency procedures to team members</i></b>.</p> <p>1.2. Ensure access for team members to store <b><i>WHS policy and procedures</i></b>.</p> <p>1.3. Clearly and accurately explain relevant provisions of WHS legislation and codes of practice to team members.</p> <p>1.4. Regularly provide clear and accurate information on identified <b><i>hazards</i></b> and risk control procedures to team members.</p> <p>1.5. Model the implementation of WHS and emergency procedures to reinforce information.</p>
2. Involve team members in WHS matters.	<p>2.1. Provide <b><i>opportunities and processes for team members to consult and contribute</i></b> on WHS issues according to store policy.</p> <p>2.2. Promptly resolve issues raised or refer to relevant personnel according to store policy.</p> <p>2.3. Promptly convey outcomes of issues raised on WHS matters to team members.</p>
3. Monitor and maintain a safe work environment.	<p>3.1. Implement store policy and procedures with regard to identifying, preventing and reporting potential hazards.</p> <p>3.2. Take prompt action to deal with hazardous events according to store policy.</p> <p>3.3. Investigate unsafe or hazardous events, identify cause, and report inadequacies in risk control measures or <b><i>resource allocation</i></b> for risk control to <b><i>relevant personnel</i></b>.</p> <p>3.4. Implement and monitor control measures to prevent recurrence and minimise risks of unsafe and hazardous events according to store policy and <b><i>hierarchy of control</i></b>.</p> <p>3.5. Handle and store <b><i>hazardous goods</i></b> according to store policy and WHS regulations.</p> <p>3.6. Maintain <b><i>equipment</i></b> according to store policy and WHS regulations.</p> <p>3.7. Monitor team performance to ensure use of <b><i>safe manual handling techniques</i></b>.</p>

- 3.8. Implement *store emergency policy and procedures* promptly in the event of an emergency.
- 4. Identify need for WHS training.
  - 4.1. Identify WHS training needs, specifying gaps between WHS competencies required and those held by team members.
  - 4.2. Organise and arrange *training* according to store policy.
- 5. Maintain WHS records.
  - 5.1. Complete and maintain WHS *records* regarding occupational injury and disease according to store policy and *legislative requirements*.
  - 5.2. Use information from records to identify hazards and monitor risk control procedures according to store policy.

## Required Skills and Knowledge

this section describes the skills and knowledge required for this unit.

### Required skills

- communication and interpersonal skills to:
  - provide information, coaching and feedback to team members
  - involve team members
  - refer issues to appropriate personnel through clear and direct communication
  - motivate and lead a team
  - use and interpret non-verbal communication
- literacy and numeracy skills to:
  - generate reports
  - interpret and apply WHS regulations
  - interpret symbols used for WHS signage
  - read store policy and procedures
- technical skills to:
  - identify broken or damaged equipment
  - identify hazardous goods and substances
  - locate and use safety alarms, fire extinguishers and emergency exits

### Required knowledge

- hierarchy of risk control:
  - elimination of hazards
  - engineering controls to reduce risk
  - administrative controls
  - use of personal protective equipment
- job role and responsibilities
- location of nearest first aid assistant or facility
- manual handling and safe lifting techniques
- possible fire and safety hazards
- principles and techniques in interpersonal communication
- relevant WHS legislation and codes of practice
- sickness and accident procedures
- store policies and procedures in regard to:
  - manual handling
  - WHS emergency procedures
  - unsafe or hazardous goods
  - handling and storage
  - disposal
  - bomb threat procedures

- store evacuation

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- applies and monitors store policy, industry codes of practice, relevant legislation and statutory requirements in regard to WHS and emergency procedures
- applies and monitors safe work practices in the handling and moving of stock, according to WHS legislation and codes of practice
- interprets and monitors the implementation of manufacturer instructions with regard to handling stock and using relevant equipment
- applies and monitors safe work practices in the handling, storage and disposal of unsafe or hazardous materials
- identifies WHS training needs and maintains WHS records.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a retail work environment
- relevant equipment, such as:
  - stock moving equipment
  - alarm systems
  - first aid equipment
  - firefighting equipment
  - communication equipment
- relevant documentation, such as:
  - WHS legislation
  - store evacuation procedures
  - store policy and procedures manuals
  - incident reporting forms.

### **Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- third-party reports from a supervisor
- customer feedback
- written or verbal questioning to assess knowledge and understanding.

### **Guidance information**

Holistic assessment with other units relevant to the industry

**for assessment**

sector, workplace and job role is recommended, for example:

- SIRXRSK002A Maintain store security.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

***Emergency procedures***  
may relate to:

- accidents
- bomb threats
- cyclones
- dealing with dangerous customers
- fire
- flooding
- product recall and contamination
- sickness
- store evacuation involving staff or customers.

***Team members*** may  
include:

- full-time, part-time, casual or contract
- new or existing staff
- people from a range of cultural, social and ethnic backgrounds
- people with varying levels of language and literacy.

***WHS policy and procedures*** may relate  
to:

- basic safety procedures
- customers
- dangerous goods
- emergency procedures
- equipment and tools
- issue-resolution procedures
- premises
- reporting procedures
- safe manual handling and lifting
- staff
- stock.

***Hazards*** may include:

- broken or damaged equipment
- chemical spills
- damaged packing material or containers
- electricity and water
- fires
- manual handling
- sharp cutting tools and instruments
- stress
- unguarded equipment.

***Opportunities and processes for team***

- identification of health and safety representatives
- WHS meetings

- members to consult and contribute*** may include:
- staff meetings
  - suggestions from staff for improving existing tasks and procedures.
- Resource allocation*** may include:
- equipment and technology
  - finances
  - materials
  - people
  - time.
- Relevant personnel*** may include:
- manager
  - safety representative
  - supervisor
  - team leader.
- Hierarchy of control*** may include:
- appropriate use of personal protective clothing and equipment
  - eliminating hazards
  - isolating hazards
  - substitution
  - using administrative controls
  - using engineering controls.
- Hazardous goods*** may include:
- chemicals
  - electrical equipment
  - flammable goods
  - waste.
- Equipment*** may include:
- computers
  - EFTPOS terminals
  - equipment for carrying or moving merchandise
  - equipment for storage of merchandise, including refrigerators
  - point of sale terminals
  - printers
  - security tag systems
  - thermometers
  - trolley return equipment
  - weighing machines
  - wrapping and packing equipment, such as shrink wrapping.
- Safe manual handling techniques*** may include:
- job procedures
  - lifting or shifting practices
  - using equipment, such as ladders and trolleys.
- Store emergency policy and procedures*** may relate to:
- alarm systems and procedures
  - events likely to endanger staff, contractors, customers or visitors
  - firefighting procedures
  - medical attention procedures
  - product recall and contamination
  - store evacuation procedures for staff and customers

- Training*** may include:
- transport arrangements for sick or injured persons.
  - emergency procedures
  - evacuation procedures
  - first aid
  - manual handling techniques
  - reporting procedures
  - stress management.
- Records*** may include:
- centralised
  - departmental
  - electronic
  - manual.
- Legislative requirements*** may include:
- federal, state or territory and local legislation
  - WHS regulations
  - privacy legislation
  - workers' compensation regulations.

## SITXADM004A Plan and manage meetings

### Modification History

Not applicable.

### Unit Descriptor

#### Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and conduct structured meetings involving multiple participants. It requires the ability to write and distribute agendas, chair meetings and write minutes.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Application of the Unit

#### Application of the unit

This unit describes a complex administrative function for the tourism and hospitality industries and applies to the full range of industry sectors and environments.

The meetings described by this unit are formal in nature and would follow general meeting protocols. Meetings may be convened for a number of reasons in the tourism and hospitality industries. They may be formal board, committee or annual general meetings or meetings requiring a lesser degree of formality, such as project meetings or event management meetings.

Senior tourism and hospitality supervisors and managers who operate autonomously and have responsibility for others are involved in the planning and management of meetings.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Prerequisite units Nil

## Employability Skills Information

**Employability skills** The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Plan and prepare for meetings.	<p>1.1 Identify the need for <b><i>meetings</i></b> and who should attend.</p> <p>1.2 Decide on style of meeting and required level of formality according to meeting purpose, occasion, nature of participants and organisation procedures.</p> <p>1.3 Make arrangements for meeting according to</p>

ELEMENT	PERFORMANCE CRITERIA
	organisational requirements and within designated timelines, including provision for people with special needs.
	1.4 Develop an agenda that reflects meeting purpose.
	1.5 Research or obtain information on agenda items to enable informed discussion at the meeting.
	1.6 Prepare meeting papers and dispatch to participants before the meeting, where appropriate, and within appropriate timeframes.
2 Conduct meetings.	2.1 Chair meetings according to organisation procedures and meeting protocols.
	2.2 Encourage open and constructive communication by using appropriate interpersonal and communication styles.
	2.3 Reach agreement with meeting participants on meeting goals and conduct.
	2.4 Present information and ideas clearly and concisely.
	2.5 Give all participants the opportunity to contribute.
	2.6 Manage meetings to maintain focus on agreed goals.
	2.7 Conduct meetings within agreed times, or adjust times with the agreement of participants.
	2.8 Record minutes of meetings where appropriate.
3 Debrief and follow up meetings.	3.1 Process and distribute <i>documentation from meetings</i> .
	3.2 Inform colleagues regarding the outcomes of meetings.
	3.3 Incorporate work resulting from meetings into the current work schedule, with tasks prioritised and actioned as appropriate.

## **Required Skills and Knowledge**

### **REQUIRED SKILLS AND KNOWLEDGE**

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- meeting management and chairing skills, including:
  - active listening
  - questioning
  - conflict management
  - time keeping
- oral communication skills specific to the conduct of meetings, including presentation skills
- written communication skills specific to writing agendas, supporting notes and minutes
- summarising and minute taking.

The following knowledge must be assessed as part of this unit:

- different types and formats of meetings, including general awareness of procedures for formal meetings
- standard procedures for formal meetings, including:
  - agenda format and order
  - types of seating arrangements
  - meeting terminology
  - minutes
  - role of chairperson and other office bearers
- group dynamics.

## **Evidence Guide**

### **EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

## EVIDENCE GUIDE

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- project or work activities that show the candidate's ability to plan for and conduct effective and structured meetings using appropriate procedures, protocols and documentation
- ability to use effective communication skills in the conduct of meetings.

### **Context of and specific resources for assessment**

Assessment must ensure:

- management of a meeting in a meeting facility appropriate to size and style of meeting
- involvement of multiple meeting participants
- use of agendas, minutes and other supporting documentation relevant to subject matter of the meeting.

### **Methods of assessment**

A range of assessment methods should be used to assess the practical skills and knowledge required to plan and manage meetings. The following examples are appropriate for this unit:

- direct observation of a meeting chaired by the candidate
- review of agendas, minutes and supporting documentation prepared by the candidate
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITXCOM003A Deal with conflict situations
- SITXHRM005A Lead and manage people
- SITXMGT002A Develop and implement operational plans
- SITXMGT003A Manage projects.

## EVIDENCE GUIDE

### Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

***Meetings*** may include:

- one-off
- regular
- teleconferences
- videoconferences
- committee meetings
- board meetings
- annual general meetings
- project management meetings
- formal staff meetings.

***Documentation from meetings*** must include:

- agendas
- minutes.

## TAEDEL301A Provide work skill instruction

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit describes the performance outcomes, skills and knowledge required to conduct individual and group instruction and demonstrate work skills, using existing learning resources in a safe and comfortable learning environment. The unit covers the skills and knowledge required to determine the success of both the training provided and one's own personal training performance. It emphasises the training as being driven by the work process and context.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit supports a wide range of applications across any workplace setting and so can be used by any organisation. Its use is not restricted to training organisations.
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise instruction and demonstration	1.1. Gather information about <i>learner characteristics</i> and learning needs 1.2. Confirm a <i>safe learning environment</i> 1.3. Gather and check <i>instruction and demonstration objectives</i> and seek assistance if required 1.4. Access and review relevant <i>learning resources</i> and <i>learning materials</i> for suitability and relevance, and seek assistance to interpret the contextual application 1.5. Organise access to necessary equipment or physical resources required for instruction and demonstration 1.6. Notify learners of <i>details</i> regarding the implementation of the learning program and/or delivery plan
2. Conduct instruction and demonstration	2.1. Use interpersonal skills with learners to establish a safe and comfortable learning environment 2.2. Follow the learning program and/or delivery plan to cover all learning objectives 2.3. Brief learners on any <i>OHS procedures</i> and requirements prior to and during training 2.4. Use <i>delivery techniques</i> to structure, pace and enhance learning 2.5. Apply <i>coaching</i> techniques to assist learning 2.6. Use communication skills to provide information, instruct learners and demonstrate relevant work skills 2.7. Provide opportunities for practice during instruction and through work activities 2.8. Provide and discuss feedback on learner performance to support learning
3. Check training performance	3.1. Use <i>measures</i> to ensure learners are acquiring and can use new technical and generic skills and knowledge 3.2. Monitor learner progress and outcomes in consultation with learner 3.3. Review relationship between the trainer/coach and the learner and adjust to suit learner needs
4. Review personal training performance and finalise documentation	4.1. Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement 4.2. Maintain, store and secure learner records according

ELEMENT	PERFORMANCE CRITERIA
	to organisational and legal requirements

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- verbal and non-verbal communication techniques, such as:
  - asking relevant and appropriate questions
  - providing explanations
  - demonstrating
  - using listening skills
  - providing information clearly
- safety skills to implement OHS requirements, by acting and responding safely in order to:
  - identify hazards
  - conduct prestart-up checks if required
  - observe and interpret learner behaviour that may put people at risk
- time-management, skills to:
  - ensure all learning objectives are covered
  - pace learning
- reflection skills in order to:
  - identify areas for improvement
  - maintain personal skill development
- literacy skills to:
  - complete and maintain documentation
  - read and follow learning programs and plans
  - read and analyse learner information
- technology skills to operate audio-visual and technical equipment
- interpersonal skills to:
  - engage, motivate and connect with learners
  - provide constructive feedback
  - maintain appropriate relationships
  - establish trust
  - use appropriate body language
  - maintain humour
  - demonstrate tolerance
  - manage a group
  - recognise and be sensitive to individual difference and diversity
- observation skills to:
  - monitor learner acquisition of new skills, knowledge and competency

**REQUIRED SKILLS AND KNOWLEDGE**

requirements

- assess learner communication and skills in interacting with others
- identify learner concerns
- recognise learner readiness to take on new skills and tasks

**Required knowledge**

- learner characteristics and needs
- content and requirements of the relevant learning program and/or delivery plan
- sources and availability of relevant learning resources and learning materials
- content of learning resources and learning materials
- training techniques that enhance learning and when to use them
- introductory knowledge of learning principles and learning styles
- key OHS issues in the learning environment, including:
  - roles and responsibilities of key personnel
  - responsibilities of learners
  - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
  - risk controls for the specific learning environment

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- carry out a minimum of three training sessions, involving demonstrating and instructing particular work skills for different groups; with each session addressing:
  - different learning objectives
  - a range of techniques and effective communication skills appropriate to the audience.

#### Context of and specific resources for assessment

Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.

#### Method of assessment

#### Guidance information for assessment

For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website ([www.ibsa.org.au](http://www.ibsa.org.au)).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Learner characteristics</i></b> may include:	<ul style="list-style-type: none"> <li>• language, literacy and numeracy levels</li> <li>• learning styles</li> <li>• past learning and work experiences</li> <li>• specific needs</li> <li>• workplace culture.</li> </ul>
<b><i>Safe learning environment</i></b> may include:	<ul style="list-style-type: none"> <li>• exit requirements</li> <li>• personal protective equipment</li> <li>• safe access</li> <li>• safe use of equipment.</li> </ul>
<b><i>Instruction and demonstration objectives</i></b> may include:	<ul style="list-style-type: none"> <li>• competencies to be achieved</li> <li>• generic and technical skills, which may be:               <ul style="list-style-type: none"> <li>• provided by the organisation</li> <li>• developed by a colleague</li> <li>• individual or group objectives</li> <li>• learning outcomes.</li> </ul> </li> </ul>
<b><i>Learning resources</i></b> may include:	<ul style="list-style-type: none"> <li>• any material used to support learning, such as:               <ul style="list-style-type: none"> <li>• learner and user guides</li> <li>• trainer and facilitator guides</li> <li>• example training programs</li> <li>• specific case studies</li> <li>• professional development materials</li> <li>• assessment materials</li> </ul> </li> <li>• a variety of formats</li> <li>• those produced locally</li> <li>• those acquired from other sources.</li> </ul>
<b><i>Learning materials</i></b> may include:	<ul style="list-style-type: none"> <li>• handouts for learners</li> <li>• materials sourced from the workplace, e.g. workplace documentation, operating procedures, and specifications.</li> </ul>
<b><i>Details</i></b> may include:	<ul style="list-style-type: none"> <li>• location and time</li> <li>• outcomes of instruction or demonstration</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• reason for instruction or demonstration</li> <li>• who will be attending instruction session.</li> </ul>
<i>OHS procedures</i> may include:	<ul style="list-style-type: none"> <li>• emergency procedures</li> <li>• hazards and their means of control</li> <li>• incident reporting</li> <li>• use of personal protective equipment</li> <li>• safe work practices</li> <li>• safety briefings</li> <li>• site-specific safety rules.</li> </ul>
<i>Delivery techniques</i> may include:	<ul style="list-style-type: none"> <li>• coaching</li> <li>• demonstration</li> <li>• explanation</li> <li>• group or pair work</li> <li>• providing opportunities to practise skills and solve problems</li> <li>• questions and answers.</li> </ul>
<i>Coaching</i> may include:	<ul style="list-style-type: none"> <li>• learning arrangements requiring immediate interaction and feedback</li> <li>• on-the-job instruction and 'buddy' systems</li> <li>• relationships targeting enhanced performance</li> <li>• short-term learning arrangements</li> <li>• working on a one-to-one basis.</li> </ul>
<i>Measures</i> may include:	<ul style="list-style-type: none"> <li>• informal review or discussion</li> <li>• learner survey</li> <li>• on-the-job observation</li> <li>• review of peer coaching arrangements.</li> </ul>

## TAEDEL404A Mentor in the workplace

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit describes the performance outcomes, skills and knowledge required to establish and develop a professional mentoring relationship with a learner, in particular an apprentice or trainee employed by, or undertaking work placement in, a workplace. It includes establishing the need for mentoring, developing a mentoring plan/framework, facilitating and monitoring the mentoring relationship, and evaluating the effectiveness of mentoring.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit typically applies to workplace supervisors or other work colleague with responsibility for mentoring in the workplace.
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop a mentoring plan	1.1. Identify scope and boundaries of the <b>mentoring</b> relationship according to organisational procedures 1.2. Establish <b>ground rules</b> and negotiate realistic expectations 1.3. Establish and maintain confidentiality of the relationship in accordance with <b>legislation, policy and procedures</b>
2. Facilitate mentoring relationship	2.1. Develop learner's confidence, self-esteem, respect and trust in the mentoring relationship 2.2. Share personal experiences and knowledge with the person being mentored according to agreed objectives 2.3. Support the person being mentored to develop and use skills in problem solving and decision making 2.4. Use personal and professional networks to assist the person being mentored 2.5. Provide information, guidance and constructive guidance to enhance engagement in the workplace 2.6. Use <b>techniques for resolving differences</b> without damaging the relationship, and obtain assistance according to organisational policy and procedures
3. Monitor mentoring relationship	3.1. Provide planning assistance and guidance as requested by the person being mentored in a form and style to suit their requirements 3.2. Provide feedback to the person being mentored on progress towards achieving the expectations and goals of the mentoring process 3.3. Recognise and discuss changes in the <b>mentoring relationship</b> with appropriate <b>stakeholders</b> 3.4. Negotiate and manage closure of the mentoring arrangement once objectives have been met
4. Evaluate effectiveness of mentoring	4.1. Establish and discuss <b>benefits</b> gained from the mentoring process 4.2. Reflect on and articulate the personal benefits gained from providing mentoring 4.3. Identify and report the outcomes of the mentoring arrangement and the <b>benefits to the organisation</b> according to organisational policy and procedures to improve the mentoring system or program

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- planning and time-management skills to mentor in a workplace
- oral communication and language skills to motivate learners
- organisational skills to provide guidance and feedback to individuals
- interpersonal skills to:
  - engage in relationship building, including building trust and maintaining confidentiality
  - respond to diversity, including gender and disability
- communication skills to use a range of communication strategies, including listening, questioning, and giving and receiving feedback
- initiative and enterprise skills to apply procedures relating to OHS and environmental legislation in the context of workplace mentoring

#### Required knowledge

- relevant policy, legislation, codes of practice and national standards likely to impact on the provision of workplace mentoring
- training contracts and responsibilities of employer, registered training organisation (RTO) and funding body
- training plans and responsibilities
- training products and strategies for learning
- mentoring methodologies and strategies
- acceptable behaviour in the mentoring relationship
- equal employment opportunity, equity and diversity principles
- OHS relating to the work role, including:
  - hazards relating to the industry and specific workplace
  - reporting requirements for hazards and incidents
  - specific procedures for work tasks
  - safe use and maintenance of relevant equipment
  - emergency procedures
  - sources of OHS information

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• prepare a mentoring plan between the mentor and learner that reflects the scope and substance expected within a plan prepared for a learner undertaking a contracted apprenticeship or traineeship</li> <li>• facilitate at least three mentoring sessions</li> <li>• provide information on sessions, including comments and notes from both mentor and learner.</li> </ul>
<b>Context of and specific resources for assessment</b>	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.
<b>Method of assessment</b>	
<b>Guidance information for assessment</b>	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website ( <a href="http://www.ibsa.org.au">www.ibsa.org.au</a> ).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Mentoring</i></b> may include:	<ul style="list-style-type: none"> <li>• long-term focus on personal growth and learning</li> <li>• wide range of learning oriented to:               <ul style="list-style-type: none"> <li>• support</li> <li>• guidance in personal or career growth</li> </ul> </li> <li>• relationship, not just a procedure or activity</li> <li>• one person professionally assisting the career development of another.</li> </ul>
<b><i>Ground rules</i></b> may include:	<ul style="list-style-type: none"> <li>• training for mentoring partners</li> <li>• mentoring agreement</li> <li>• active involvement of both partners in the mentoring process.</li> </ul>
<b><i>Legislation, policy and procedures</i></b> may include:	<ul style="list-style-type: none"> <li>• commonwealth and state or territory legislation and regulations, such as:               <ul style="list-style-type: none"> <li>• privacy legislation</li> <li>• equal employment opportunity, anti-discrimination and harassment legislation</li> <li>• OHS legislation</li> <li>• user choice</li> </ul> </li> <li>• organisational policy, procedures and protocols.</li> </ul>
<b><i>Techniques for resolving differences</i></b> may include:	<ul style="list-style-type: none"> <li>• finding a mutually beneficial solution</li> <li>• self-disclosure</li> <li>• inviting discussion</li> <li>• providing explanations</li> <li>• accessing assistance.</li> </ul>
<b><i>Mentoring relationship</i></b> may include:	<ul style="list-style-type: none"> <li>• informal workplace development program</li> <li>• formal mentoring process associated with a contracted apprenticeship or traineeship, involving a formal training plan.</li> </ul>
<b><i>Stakeholders</i></b> may include:	<ul style="list-style-type: none"> <li>• trainee or apprentice</li> <li>• manager or supervisor</li> <li>• RTO</li> <li>• learning support services, including assistive technology</li> </ul>

<b>RANGE STATEMENT</b>	
	and diagnostic testing <ul style="list-style-type: none"> <li>• funding organisation</li> <li>• supplier of learning resources.</li> </ul>
<b>Benefits</b> may include:	<ul style="list-style-type: none"> <li>• insights into organisational culture, attitudes and expected behaviours</li> <li>• supportive environment in which successes and failures can be evaluated</li> <li>• networking opportunities</li> <li>• development of workplace competence and self-confidence</li> <li>• recognition and job satisfaction</li> <li>• mutual respect.</li> </ul>
<b>Benefits to the organisation</b> may include:	<ul style="list-style-type: none"> <li>• increased productivity</li> <li>• new competencies in the person being mentored</li> <li>• staff motivation</li> <li>• more committed, involved and responsible learners.</li> </ul>

## Co-requisite units

<b>Co-requisite units</b>		

## **TLIA2012A Pick and process orders**

### **Modification History**

Not Applicable

### **Unit Descriptor**

#### **Unit Descriptor**

This unit involves the skills and knowledge required to pick and process orders in accordance with workplace requirements including identifying workplace order picking processes, policies and procedures; picking and despatching orders, and recording stock levels. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

### **Application of the Unit**

#### **Application of the Unit**

Work must be carried out in accordance with relevant codes/regulations and workplace requirements for the picking and processing of orders.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures to the picking and processing of orders in the warehousing, distribution and/or storage industries.

### **Licensing/Regulatory Information**

Refer to Unit Descriptor

### **Pre-Requisites**

Not Applicable

## **Employability Skills Information**

**Employability Skills**                      This unit contains employability skills.

## **Elements and Performance Criteria Pre-Content**

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Identify workplace order picking processes, policies and procedures</b>	1.1 Workplace procedures for order picking and related workplace documentation are interpreted 1.2 Stock allocation and location systems are identified and located 1.3 Appropriate manual handling equipment is selected in accordance with OH&S regulations and workplace procedures
<b>2 Pick and despatch an order</b>	2.1 Work requirements are planned with appropriate equipment and documentation assembled 2.2 Zones of the warehouse which store required products are identified and located 2.3 Pick path is established 2.4 Where required, appropriate pallet(s) for orders are selected and stacked to minimise stock damage and maximise stability 2.5 Products are selected and consolidated 2.6 Products/pallets are located in despatch areas 2.7 Products are assembled to meet workplace schedules 2.8 Orders are consolidated, secured, arranged and placed in storage zones in accordance with the schedule
<b>3 Record stock levels</b>	3.1 Storage areas are checked and stocks are noted for replenishment in accordance with workplace procedures 3.2 Workplace records are completed in accordance with workplace requirements

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

#### Required knowledge:

- Regulations relevant to the picking and processing of orders, including relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the picking and processing of orders
- Focus of operation of work systems, equipment, management and site operating systems for the picking and processing of orders
- Problems that may occur when picking and processing an order and appropriate action that can be taken to resolve the problems

## REQUIRED KNOWLEDGE AND SKILLS

- Documentation and record requirements when picking and processing an order
- Equipment used during picking and processing operations and the precautions and procedures that should be followed in its use
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

### Required skills:

- Communicate effectively with others when picking and processing orders
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures, signs and labels relevant to the picking and processing of orders
- Complete documentation related to picking and processing orders
- Identify relevant stock and goods coding and labelling, including ADG and IMDG markings
- Work collaboratively with others when picking and processing orders
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions when picking and processing orders in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when picking and processing orders
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when picking and processing orders
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use relevant equipment and communications technology when picking and processing orders
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Estimate the size, shape and special requirements of goods/loads

## Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

- |   |   |

## RANGE STATEMENT

- email
  - internet
  - RF communications
  - barcode readers
  - oral, aural or signed communications
  - company procedures
  - enterprise procedures
  - organisational procedures
  - established procedures
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- Personal protective equipment may include:
- gloves
  - safety headwear and footwear
  - safety glasses
  - two-way radios
  - high visibility clothing
- Information/documents may include:
- goods identification numbers and codes
  - manifests, picking slips, merchandise transfers, stock requisitions and bar codes
  - manufacturers specifications for equipment/tools
  - workplace procedures and policies
  - supplier and/or client instructions
  - material safety data sheets
  - codes of practice including the National Standards for Manual Handling and the Industry Safety Code
  - relevant legislation, regulations and related documentation
  - award, enterprise bargaining agreement, other industrial arrangements
  - standards and certification requirements
  - quality assurance procedures
  - emergency procedures
- Applicable regulations and legislation may include:
- relevant codes and regulations pertaining to the picking and processing of orders
  - Australian Dangerous Goods Code
  - relevant state/territory OH&S legislation
  - relevant state/territory environmental protection legislation
  - licence, patent or copyright arrangements
  - water and road use and licence arrangements
  - export/import/quarantine/bond requirements
  - workplace relations regulations
  - workers compensation regulations

### **Unit Descriptor**

#### **Unit Descriptor**

This unit involves the skills and knowledge required to receive goods in accordance with regulatory and workplace requirements, including identifying workplace procedures and documentation requirements for the receipt of goods; checking and inspecting goods on arrival and completing workplace documentation; and unloading, packing and storing stock. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

### **Application of the Unit**

#### **Application of the Unit**

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the receiving of goods.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the receiving of goods as part of work activities in the warehousing, distribution and/or storage industries.

### **Licensing/Regulatory Information**

Refer to Unit Descriptor

### **Pre-Requisites**

Not Applicable

## **Employability Skills Information**

**Employability Skills**                      This unit contains employability skills.

## **Elements and Performance Criteria Pre-Content**

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Identify workplace procedures and documentation requirements for the receipt of goods</b>	<p>1.1 Workplace procedures for receipt of goods are identified</p> <p>1.2 Purpose of documents associated with the receipt of goods is interpreted</p> <p>1.3 Workplace documentation requirements for the receipt of goods and reporting of damage are identified</p>
<b>2 Check and inspect goods on arrival and complete workplace documentation</b>	<p>2.1 Procedures for checking of goods in comparison with orders or manifests are identified and followed</p> <p>2.2 Discrepancies and/or damaged goods are reported</p> <p>2.3 Non-conforming goods are appropriately documented and despatched or stored in accordance with company procedures</p>
<b>3 Unload, unpack and store stock</b>	<p>3.1 Appropriate manual handling techniques and equipment are identified</p> <p>3.2 Safe work procedures are used when unloading, unpacking and storing stock</p> <p>3.3 Advice on appropriate storage locations and requirements for particular products is sought</p> <p>3.4 Goods are unloaded and unpacked in accordance with workplace procedures</p> <p>3.5 Assistance from others is sought when required to maintain safe and effective work</p> <p>3.6 Directions are followed to store stock in appropriate areas</p>

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

#### Required knowledge:

- Australian and international codes and regulations relevant to the receiving of goods including the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the receiving of goods
- Focus of operation of work systems, equipment, management and site operating systems for the receiving of goods
- Problems that may occur when receiving goods and appropriate action that can be taken to resolve the problems

## REQUIRED KNOWLEDGE AND SKILLS

- Specifications and standards for the checking and inspection of received goods
- Documentation requirements for the receiving of goods
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

### Required skills:

- Communicate effectively with others when receiving goods
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures, information, labels and signs relevant to receiving goods
- Complete documentation related to the receipt of goods
- Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels
- Work collaboratively with others when receiving goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems when receiving goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when receiving goods
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when receiving goods
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use relevant load handling equipment when receiving goods
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Estimate the size, shape and special requirements of goods and loads

## Evidence Guide

### **Unit Descriptor**

#### **Unit Descriptor**

This unit involves the skills and knowledge required to replenish stock in accordance with workplace requirements including participating in stock rotation activities, interpreting and filling replenishment requests, and completing all required stock replenishment tasks. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

### **Application of the Unit**

#### **Application of the Unit**

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the replenishment of stock.

Work is performed under some supervision generally within a team environment. It involves the application of product knowledge and an understanding of relevant workplace procedures and regulatory requirements to replenish stock as part of work activities in the warehousing, distribution and/or storage industries.

### **Licensing/Regulatory Information**

Refer to Unit Descriptor

### **Pre-Requisites**

Not Applicable

## **Employability Skills Information**

**Employability Skills**                      This unit contains employability skills.

## **Elements and Performance Criteria Pre-Content**

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Participate in stock rotation activities</b>	<p>1.1 Stock levels are counted against appropriate documentation</p> <p>1.2 Stock levels are recorded and reported</p> <p>1.3 Stocks are replenished, adjusted or rotated following workplace procedures</p> <p>1.4 Stock re-ordering processes are activated when appropriate</p> <p>1.5 Routine and non-routine problems with products or storage systems are reported following workplace procedures</p>
<b>2 Interpret and fill replenishment request</b>	<p>2.1 Order request documentation is interpreted</p> <p>2.2 Product(s) in order noted and workplace location(s) are identified</p> <p>2.3 Workplace and product knowledge is used to plan sequence of work</p> <p>2.4 Appropriate materials handling equipment is selected in accordance with workplace procedures and timeframes and OH&amp;S regulations</p> <p>2.5 Required schedules for order movement and despatch or storage are identified</p>
<b>3 Complete stock replenishment</b>	<p>3.1 Products are sorted, assembled and consolidated in the appropriate storage areas</p> <p>3.2 Work is checked in accordance with company procedures</p> <p>3.3 Documentation and records are completed in accordance with workplace procedures</p>

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

#### Required knowledge:

- Australian codes and regulations relevant to the replenishment of stock
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the replenishment of stock
- Focus of operation of work systems, equipment, management and site operating systems for the replenishment of stock
- Principles of operation and functions of stock control systems
- Computer records and documentation requirements for the replenishment of stock

## REQUIRED KNOWLEDGE AND SKILLS

- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

### Required skills:

- Communicate effectively with others when replenishing stock
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the replenishment of stock
- Complete documentation related to the replenishment of stock
- Work collaboratively with others when replenishing stock
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when replenishing stock in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in stock and equipment in accordance with standard operating procedures
- Select and use relevant communications, computing and office equipment when replenishing stock
- Select and use required personal protective equipment conforming to industry and OH&S standards

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills

## EVIDENCE GUIDE

### Context of and specific resources for assessment

- relevant legislation and workplace procedures
- other relevant aspects of the range statement
- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

### Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:

- a range of work environments
- by day or night

Customers may be:

- internal or external

Workplaces may comprise:

- large, medium or small worksites

## RANGE STATEMENT

- Work may be conducted in:
- limited or restricted spaces
  - exposed conditions
  - controlled or open environments
- Goods may involve:
- special handling, location, storage and/or packaging requirements, including temperature controlled goods and dangerous goods
- Inventory systems may be:
- automated
  - manual
  - paper-based
  - computerised
  - microfiche
- Categories or groups of products/stock may include:
- small parts
  - perishable goods
  - overseas export
  - dangerous goods
  - refrigerated products
  - temperature controlled stock
  - fragile goods
- The characteristics of products/stock may include:
- small parts
  - toxicity
  - flammability
  - form
  - weight
  - size
  - state
  - perishability
  - fragility
  - security risk
- Labelling systems may include:
- batch code
  - bar code
  - identification numbering systems
  - serial numbers
  - symbols for safe handling
  - ADG and HAZCHEM Codes
- Hazards in the work area may include:
- chemicals
  - dangerous or hazardous substances
  - movements of equipment, goods and materials
  - oil or water on floor
  - a fire or explosion
  - damaged packaging or pallets

## RANGE STATEMENT

	<ul style="list-style-type: none"><li>• debris on floor</li><li>• faulty racking</li><li>• poorly stacked pallets</li><li>• faulty equipment</li></ul>
Communication in the work area may include:	<ul style="list-style-type: none"><li>• phone</li><li>• electronic data interchange (EDI)</li><li>• fax</li><li>• email</li><li>• internet</li><li>• RF systems</li><li>• oral, aural or signed communications</li></ul>

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

#### Required knowledge:

- Relevant codes of practice and legislative requirements (for example dangerous goods)

## REQUIRED KNOWLEDGE AND SKILLS

regulations, health and hygiene regulations, etc.)

- Relevant OH&S and environmental procedures and regulations
- Principles of stock control
- Stock control documentation and systems used in workplace stores
- Interpretation of workplace specifications and orders for supplies
- Stock security systems
- Safe lifting and handling procedures
- Protocols and procedures for liaising with supplier representatives, drivers and colleagues using appropriate technology
- Code of practice for working collaboratively with others
- Systems for the completion of relevant records and documentation
- Problems that may occur when receiving and storing stock and appropriate action that can be taken to resolve the problems
- Contacts and sources of information and documentation needed when receiving and storing stock
- Site layout
- The purpose and procedures for the use of relevant personal protective equipment
- Customer service policies and procedures
- Procedures for operating electronic communications equipment

### Required skills:

- Communicate effectively with others when receiving and storing stock
- Read and interpret instructions, procedures and labels relevant to receiving and storing stock
- Complete documentation related to receiving and storing stock
- Work collaboratively with others when receiving and storing stock
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when receiving and storing stock in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures

**Required skills:**

- Select and use required personal protective equipment conforming to industry and OH&S standards
- Select and use relevant communication and computing equipment when receiving and storing stock

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

**Context of and specific resources for assessment**

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

**Method of assessment**

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:

## EVIDENCE GUIDE

- through activities in an appropriately simulated environment at the registered training organisation, and/or
- in an appropriate range of situations in the workplace

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

This unit may apply to:

- any workplace store in an enterprise/organisation in a transport, distribution, production, hospitality, retail or other relevant industry sector (excluding work areas and organisations involving major and/or dedicated warehousing)

Suppliers may be:

- internal or external

Requirements for work may include:

- workplace protocols and procedures
- communications equipment
- workplace operations manuals
- relevant regulations, authorities and permits
- hours of operation
- relevant record keeping requirements
- workplace quality and customer service standards

Stock control and record systems may be:

- manual
- computerised

Stock may include but is not limited to:

- production materials
- packaging materials
- equipment and tools
- office and stationery supplies
- forms, brochures and documents
- vouchers and tickets
- merchandise for sale
- linen
- food and beverage supplies

Consultative processes may involve:

- suppliers, representatives and drivers
- relevant authorities
- other employees and supervisors

## RANGE STATEMENT

- Communications systems may involve:
- management
  - other professional or technical staff
  - telephone
  - fax
  - email
  - electronic data transfer of information
  - mail
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
  - enterprise procedures
  - organisational procedures
  - established procedures
- Personal protective equipment may include but is not limited to:
- gloves
  - safety headwear and footwear
  - safety glasses
  - two-way radios
  - high visibility clothing
- Documentation/records may include:
- workplace protocols and procedures
  - workplace specifications for the stock concerned
  - relevant regulations
  - supplier instructions
  - operations manuals
  - documentation including order forms, standard letters, etc.
  - induction documentation
  - delivery options
  - relevant Australian and international standards, criteria and certification requirements
  - communications technology equipment, oral, aural or signed communications
  - quality assurance procedures
  - emergency procedures
  - relevant competency standards and training materials
- Applicable procedures and codes may include:
- relevant regulations and codes of practice for receipt and storage of stock concerned
  - Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
    - Australian and International Dangerous Goods Codes
    - Australian and International Explosives Codes
  - Australian and international standards and certification requirements

**RANGE STATEMENT**

- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Check documentation</b>	<p>1.1 Documentation is checked to ensure its compliance with regulatory and workplace requirements</p> <p>1.2 Documentation is checked on a regular basis, and the personnel responsible for documentation are advised of deadlines</p> <p>1.3 Use of systems for the maintenance of records complies with regulatory and workplace requirements</p>
<b>2 Analyse and evaluate records</b>	<p>2.1 Records are analysed to identify unexpected deviations from plans or possible future problems with plant and equipment</p> <p>2.2 Advice is provided to appropriate personnel when problems are identified</p> <p>2.3 Security of records and documentation is maintained at all times with access being granted to authorised personnel in accordance with workplace procedures</p>

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

#### Required knowledge:

- Australian and international standards, codes and regulations relevant to the documentation requirements for the local and international transport of cargo and containers including the Australian and International Dangerous Goods Codes
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for checking and evaluating documentation for the local and/or international transport of cargo and containers
- Focus of operation of work systems, equipment, management and site operating systems for checking and evaluating cargo/container transport documentation
- Problems that may occur when checking and evaluating documentation and appropriate action that can be taken to resolve the problems
- Types of cargo, containers and transport modes and the documentation requirements for each
- Site layout, loading/unloading plans and sequence sheets
- The marking and numbering systems for cargo
- Relevant bond, quarantine or other legislative requirements

#### Required skills:

**Required skills:**

- Communicate effectively with others when checking and evaluating transport documentation
- Read and interpret instructions, procedures and labels relevant to checking and evaluating transport documentation
- Receive, acknowledge and send messages with available communications equipment
- Identify cargo, container and goods, coding, ADG and IMDG markings and where applicable emergency information panels
- Work collaboratively with others when checking and evaluating transport documentation
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions when checking and evaluating transport documentation in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Identify, select and use relevant equipment, processes and procedures when checking and evaluating documentation for the local and/or international transport of cargo and containers

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

**Context of and specific resources for assessment**

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational

## EVIDENCE GUIDE

	<p>situations in the workplace</p> <ul style="list-style-type: none"> <li>• In both real and simulated environments, access is required to:             <ul style="list-style-type: none"> <li>• relevant and appropriate materials and equipment, and</li> <li>• applicable documentation including workplace procedures, regulations, codes of practice and operation manuals</li> </ul> </li> </ul>
<b>Method of assessment</b>	<ul style="list-style-type: none"> <li>• Assessment of this unit must be undertaken by a registered training organisation</li> <li>• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests</li> <li>• Practical assessment must occur:             <ul style="list-style-type: none"> <li>• through activities in an appropriately simulated environment at the registered training organisation, and/or</li> <li>• in an appropriate range of situations in the workplace</li> </ul> </li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted in:	<ul style="list-style-type: none"> <li>• a range of work environments</li> <li>• by day or night</li> </ul>
Customers may be:	<ul style="list-style-type: none"> <li>• internal or external</li> </ul>
Workplaces may comprise:	<ul style="list-style-type: none"> <li>• large, medium or small worksites</li> </ul>
Work may be conducted in:	<ul style="list-style-type: none"> <li>• limited or restricted spaces</li> <li>• exposed conditions</li> <li>• controlled or open environments</li> <li>• office environments</li> </ul>
Cargo/freight may include:	<ul style="list-style-type: none"> <li>• goods with specialist requirements, including temperature controlled goods and dangerous goods</li> </ul>
Hazards in the work area may include exposure to:	<ul style="list-style-type: none"> <li>• chemicals</li> <li>• dangerous or hazardous substances</li> <li>• movements of equipment, goods, materials and vehicular traffic</li> </ul>

## RANGE STATEMENT

Personnel in work area may include:

- workplace personnel
- site visitors
- contractors
- official representatives

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- protective clothing
- high visibility clothing

Communication in the work area may include:

- phone
- fax
- email
- electronic data transfer (EDI)
- RF systems
- radio
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:

- goods identification numbers and codes
- manifests, bar codes, and container identification/serial number
- Australian and international codes of practice and regulations relevant to the documentation requirements for the local and/or international transport of cargo and containers
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions
- dangerous goods declarations and material safety data sheets (where applicable)
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification

## RANGE STATEMENT

Applicable regulations and legislation may include:

- requirements
- quality assurance procedures
- emergency procedures
- relevant standards, codes and regulations relevant to the documentation requirements for the local and international transport of cargo and containers
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
  - Australian and International Dangerous Goods Codes
  - Australian Marine Orders and the International Maritime Dangerous Goods Code
  - IATA Dangerous Goods by Air regulations
  - Australian and International Explosives Codes
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- marine orders
- relevant Australian standards and certification requirements
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations

## Unit Sector(s)

Not Applicable

## Competency Field

Competency Field                      A - Handling Cargo/Stock

## **TLIA5058A Manage facility and inventory requirements**

### **Modification History**

Not Applicable

### **Unit Descriptor**

#### **Unit Descriptor**

This unit involves the skills and knowledge required to manage a facility and its inventory requirements. It includes identifying space, safety and security requirements; developing a documentation system; designing storage zones; and evaluating facility utilisation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

### **Application of the Unit**

#### **Application of the Unit**

Work may be undertaken in various contexts within the transport and logistics industry.

This unit generally applies to those who provide leadership of others individually or in teams.

This unit is normally packaged at AQF V or above.

### **Licensing/Regulatory Information**

Refer to Unit Descriptor

### **Pre-Requisites**

Not Applicable

## **Employability Skills Information**

**Employability Skills**                      This unit contains employability skills.

## **Elements and Performance Criteria Pre-Content**

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

#### 1 Identify space requirements

- 1.1 The medium-term and long-term storage needs of the organisation are assessed to facilitate planning in accordance with the business plan of the enterprise and legislative requirements
- 1.2 Product type, picking frequencies, value, fragility, weight, handling characteristics, quantity and holding periods are assessed to consider type and amount of storage
- 1.3 Facility is assessed to determine the stock holding and handling requirements for each inventory item
- 1.4 Volume requirements are calculated to ensure that ongoing stock holding needs are met
- 1.5 The total space requirement is calculated and used to formulate plan for space utilisation

#### 2 Identify safety and security requirements

- 2.1 An assessment is made of risks to ensure maximum safety and security for personnel, stock and facilities
- 2.2 Storage handling security and incident/emergency procedures for each class or type of product are identified and documented
- 2.3 Fire prevention and firefighting systems are identified in accordance with building code regulations and storage material requirements
- 2.4 An evacuation plan is developed in accordance with the safety program of the enterprise

#### 3 Develop documentation system

- 3.1 A system for recording and tracing stock location, receipt, throughput and despatch is developed and implemented to enable reporting, quality assurance and financial requirements to be met
- 3.2 A system for recording communication with carriers, customers and employees is developed and implemented to assess operational effectiveness and to provide data for system improvement

#### 4 Design storage zones

- 4.1 Space requirements and equipment operation are accurately assessed to facilitate the planning of warehouse zones
- 4.2 An assessment is made of the facility to enable the most effective use of available space
- 4.3 Positioning of storage areas, bays, work stations and the like is undertaken in accordance with data obtained from the planning process
- 4.4 Provision for maintenance and cleaning is catered for

#### 5 Evaluate facility utilisation

- 5.1 A continual system of review is used involving regular checks to ensure storage areas and systems are functioning at optimum levels

**ELEMENT****PERFORMANCE CRITERIA**

- 5.2 Receiving and despatch systems provide efficient operations
- 5.3 Storage and handling systems provide ease of access and comply with ergonomic principles
- 5.4 Product handling and storage minimises product damage, contamination and stock losses
- 5.5 Facility layout remains sufficiently flexible to meet changing storage and handling requirements
- 5.6 Appropriate reporting systems are established and used to maintain data for the design of improved facilities and systems

**Required Skills and Knowledge****REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**

- Relevant sections of national and state or territory regulatory requirements and codes of practice, including knowledge of fire safety and building regulations applicable to the facility
- Relevant OH&S and environmental procedures and regulations
- Focus of operation of warehouse systems, resources, management and workplace operating systems
- Enterprise business policies and plans including procedures for operations of the facility
- Throughput and storage requirements for specific types of inventory
- Principles, purpose and location of controls, monitoring devices, and systems
- Selection and appropriate application of technology, information systems and procedures
- Procedures for operating electronic communications equipment
- Requirements for completing relevant documentation
- Procedures for managing and controlling hazardous situations when carrying out work activities, particularly those that relate to the storage of materials
- Procedures to be followed in the event of an emergency

**Required skills:**

- Communicate effectively with others when managing facility and inventory requirements
- Read and interpret plans, diagrams, regulations, codes of practice and other documentation relevant to the management of facilities and inventory requirements
- Provide leadership to others when managing facilities and inventory requirements

**Required skills:**

- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and or rectify any identified problems that may arise during the planning and management of facilities and inventory requirements
- Develop and implement contingency plans for unplanned events which may arise during the management of facilities and inventory requirements
- Prioritise work and coordinate the work of others
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Select and apply appropriate technology, information systems and procedures when managing facility and inventory requirements

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

**Context of and specific resources for assessment**

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace

## EVIDENCE GUIDE

	procedures, regulations, codes of practice and operation manuals
<b>Method of assessment</b>	<ul style="list-style-type: none"> <li>• Assessment of this unit must be undertaken by a registered training organisation</li> <li>• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests</li> <li>• Practical assessment must occur:               <ul style="list-style-type: none"> <li>• through activities in an appropriately simulated environment at the registered training organisation, and/or</li> <li>• in an appropriate range of situations in the workplace</li> </ul> </li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The workplace environment may involve:	<ul style="list-style-type: none"> <li>• twenty four hour operation</li> <li>• single and multi site location</li> <li>• large, medium and small companies</li> </ul>
Depending on the organisation concerned, workplace procedures may be called:	<ul style="list-style-type: none"> <li>• standard operating procedures (SOPs)</li> <li>• company procedures</li> <li>• enterprise procedures</li> <li>• organisational procedures</li> <li>• established procedures</li> </ul>
Communication in the work area may include:	<ul style="list-style-type: none"> <li>• phone</li> <li>• electronic data interchange (EDI)</li> <li>• fax</li> <li>• email</li> <li>• internet</li> <li>• RF systems</li> <li>• oral, aural or signed communications</li> </ul>
Consultative processes may involve:	<ul style="list-style-type: none"> <li>• other employees and supervisors</li> <li>• relevant authorities and institutions</li> <li>• management and union representatives</li> <li>• industrial relations and OH&amp;S specialists</li> <li>• customers and suppliers</li> </ul>

## RANGE STATEMENT

Documentation and records may include:

- other professional or technical staff, contractors and maintenance personnel
- regulations and codes of practice relevant to the functions of a storage facility, including the ADG code, fire safety and firefighting regulations, building code regulations, storage and handling procedures, and security procedures relevant to the specific facility
- relevant OH&S and environmental protection regulations
- quality assurance procedures
- emergency procedures, particularly in relation to fire and evacuation
- operations manuals, job specifications and induction documentation
- relevant Australian Standards and certification requirements

Applicable legislation and regulations may include:

- Australian and international regulations and codes of practice for the transport of dangerous goods and hazardous substances
- relevant state/territory OH&S and environmental protection legislation
- building codes, fire safety and firefighting codes and regulations

## Unit Sector(s)

Not Applicable

## Competency Field

**Competency Field**                      A - Handling Cargo/Stock

## **TLID1001A Shift materials safely using manual handling methods**

### **Modification History**

Not Applicable

### **Unit Descriptor**

#### **Unit Descriptor**

This unit involves the skills and knowledge required to shift loads using manual handling methods, including assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

### **Application of the Unit**

#### **Application of the Unit**

Work must be carried out in compliance with the relevant OH&S regulations concerning the manual handling and movement of loads.

Work is performed under some supervision generally within a team environment.

Work involves the application of the basic principles for the safe manual handling techniques and movement of loads when shifting materials using manual handling methods as part of day-to-day work.

### **Licensing/Regulatory Information**

Refer to Unit Descriptor

### **Pre-Requisites**

Not Applicable

## **Employability Skills Information**

**Employability Skills**                      This unit contains employability skills.

## **Elements and Performance Criteria Pre-Content**

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Assess risks associated with the relocation of the load</b>	<ul style="list-style-type: none"><li>1.1 Products, goods or materials to be relocated are identified and assessed for the appropriate method of relocation</li><li>1.2 Locations for storage are determined and potential routes to be followed are identified</li><li>1.3 Effect of load relocation on original load base is predicted</li><li>1.4 Points of balance are estimated</li><li>1.5 Required clearances are compared to available space and adjustments are made</li><li>1.6 Effects of moving contents which may be loose, liquid, dangerous or hazardous are considered</li><li>1.7 Potential risks in route(s) which may be followed are considered</li><li>1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods</li><li>1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified</li><li>1.10 Team lifting processes are considered for application</li><li>1.11 Appropriate personal protective equipment is worn</li><li>1.12 Size to weight ratio of items to be manually handled are identified</li></ul>
<b>2 Plan load relocation</b>	<ul style="list-style-type: none"><li>2.1 Relocation of the load is planned consistent with the code of practice for manual handling</li><li>2.2 Process for relocating load is proposed including predicting and planning for potential difficulties</li><li>2.3 Proposed process is checked against code of practice and workplace procedures for compliance</li></ul>
<b>3 Relocate load</b>	<ul style="list-style-type: none"><li>3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and OH&amp;S requirements</li><li>3.2 Applications appropriate for team relocation of load are identified</li><li>3.3 Team lifting tasks are coordinated</li><li>3.4 Planned process and route are followed</li><li>3.5 Relocated materials are set down without damage to goods, personnel or equipment and checked for stability</li><li>3.6 Relocation is checked to see that it meets work requirements, with any variance(s) reported</li></ul>

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

#### Required knowledge:

- Relevant OH&S procedures and guidelines concerning the manual lifting and movement of loads
- Risks when manually lifting and handling materials and goods and related precautions to control the risk, including: the load on the spine during lifting; controlled actions on a movement during lifting; rotation and side movement of the spine during lifting; postures and positions during lifting; work layout; the type, weight and position of the load; frequency of shifting operations; distance over which load is to be shifted; and time allowed for the shifting of the load
- Workplace procedures and policies for manual handling
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

#### Required skills:

- Communicate effectively with others when manually lifting and handling materials and goods
- Read and interpret instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- Interpret and follow operational instructions and prioritise work
- Work collaboratively with others when manually lifting and handling materials and goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when manually lifting and handling materials and goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected situations that may occur when manually lifting and handling materials and goods
- Apply precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in loads and materials in accordance with standard operating

**Required skills:**

procedures

- Select and use required personal protective equipment conforming to industry and OH&S standards

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
  - applying the underpinning knowledge and skills
  - interpreting manual handling risks
  - using correct manual handling practices
  - applying relevant legislation and workplace procedures

**Context of and specific resources for assessment**

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

**Method of assessment**

- As a minimum, assessment of knowledge must be conducted through appropriate assessments using written/practical/oral assessments
- Practical assessment must occur:
  - through activities in an appropriately simulated

## EVIDENCE GUIDE

- environment, and/or
- in an appropriate range of situations in the workplace

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- |   |   |
|---|---|
| The shifting operations may be conducted:         | <ul style="list-style-type: none"><li>• in a range of work environments</li><li>• by day or night</li></ul>   |

## RANGE STATEMENT

Communication in the work area may include:

- phone
- electronic data interchange
- fax
- email
- internet
- radio
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Information/documents may include:

- goods identification numbers and codes
- manifests, bar codes, goods and container identification
- manufacturers specifications for equipment/tools
- workplace procedures and policies
- supplier and/or client instructions
- material safety data sheets
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- relevant legislation, regulations and related documentation
- award, enterprise bargaining agreement, other industrial arrangements
- standards and certification requirements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- workplace relations regulations
- workers compensation regulations
- licence, patent or copyright arrangements
- dangerous goods and air freight regulations
- export/import/quarantine/bond requirements
- marine orders

## Unit Sector(s)

Not Applicable

## Competency Field

Competency Field                      D - Load Handling

## **TLID2004A Load and unload goods/cargo**

### **Modification History**

Not Applicable

### **Unit Descriptor**

#### **Unit Descriptor**

This unit involves the skills and knowledge required to load and unload goods and cargo, including loading and unloading goods, securing and protecting the load and completing all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

### **Application of the Unit**

#### **Application of the Unit**

Work must be carried out in compliance with the relevant regulations/permit requirements including those of the relevant state/territory roads and traffic authority concerning the loading of goods/cargo.

Work is performed under some supervision generally within a team environment. It involves the application of the basic principles, routine procedures and regulatory/permit requirements to the loading and unloading of goods/cargo.

### **Licensing/Regulatory Information**

Refer to Unit Descriptor

### **Pre-Requisites**

Not Applicable

## **Employability Skills Information**

**Employability Skills**                      This unit contains employability skills.

## **Elements and Performance Criteria Pre-Content**

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

#### 1 Load and unload goods/cargo

- 1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading procedures
- 1.2 Dangerous or hazardous goods are identified and handled in accordance with the Australian Dangerous Goods (ADG) Code and other relevant regulations/permit requirements
- 1.3 Load is packed/unpacked to make safe and effective use of available spaces
- 1.4 Goods/cargo are loaded in accordance with relevant mass and loading regulations and workplace procedures
- 1.5 Lifting aids and appliances are selected and used to aid loading procedures in compliance with workplace procedures and safety legislation
- 1.6 Unloading activities are conducted in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and the balance of the remaining load
- 1.7 Goods requiring special handling and/or documentation are identified and appropriate procedures followed
- 1.8 Relocated material is restacked appropriate for the transport method, safe height, weight loading, size and crushability of the goods

#### 2 Secure and protect load

- 2.1 The distribution of the load is checked to ensure that it is even, legal and within safe working capacity
- 2.2 Load is checked to ensure that dangerous goods and hazardous substances are appropriately segregated in accordance with the ADG Code
- 2.3 Load is secured using the correct load restraint and protection equipment for different loads, carrying and storage conditions
- 2.4 The load is protected in accordance with legal and workplace safety requirements

#### 3 Complete documentation

- 3.1 The load is inspected and checked for security to travel in accordance with relevant regulations/permit requirements and the ADG Code where applicable
- 3.2 All required documentation for the goods is completed in accordance with workplace requirements including the ADG Code where applicable

## Required Skills and Knowledge

## REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

### Required knowledge:

- Relevant Australian standards and regulations including state/territory mass and loading regulations
- National Load Restraint Guide
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- OH&S procedures and guidelines concerning the lifting and movement of loads
- Risks when loading and unloading goods/cargo and related precautions to control the risk
- Security awareness requirements when loading and unloading vehicles and in particular the recognition, isolation and reporting of suspicious cargo and goods
- Workplace procedures and policies for the loading and unloading of goods/cargo
- Housekeeping standards procedures required in the workplace
- Methods of securing a load
- Site layout and obstacles
- Problems that may arise when loading and unloading goods and cargo and actions that should be taken to prevent or solve them

### Required skills:

- Communicate effectively with others when loading and unloading goods and cargo
- Read and interpret instructions, procedures, information, signs and labels relevant to the loading and unloading of goods and cargo
- Identify containers and goods coding, ADG and IMDG markings and, where applicable, emergency information panels and take appropriate action
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the loading and unloading of goods and cargo
- Operate electronic communication equipment to required protocol
- Estimate the size, shape and special requirements of loads and take appropriate action
- Work collaboratively with others when loading and unloading goods and cargo
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when loading and unloading goods and cargo in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected situations that may occur when loading and unloading goods and cargo
- Apply precautions and required action to minimise, control or eliminate hazards that may exist

**Required skills:**

- during the loading and unloading of goods and cargo
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in cargo and equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

**Context of and specific resources for assessment**

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted:	<ul style="list-style-type: none"> <li>in a range of work environments</li> <li>by day or night</li> </ul>
Customers may be:	<ul style="list-style-type: none"> <li>internal or external</li> </ul>
Workplaces may comprise:	<ul style="list-style-type: none"> <li>large, medium or small worksites</li> </ul>
Work may be conducted in:	<ul style="list-style-type: none"> <li>restricted spaces</li> <li>exposed conditions</li> <li>controlled or open environments</li> </ul>
Goods/cargo to be loaded or unloaded may:	<ul style="list-style-type: none"> <li>require special precautions</li> </ul>
Loads to be shifted may be:	<ul style="list-style-type: none"> <li>irregularly shaped</li> <li>packaged or unpackaged</li> <li>labelled or unlabelled</li> <li>palletted or unpalletted</li> </ul>
Hazards in the work area may include exposure to:	<ul style="list-style-type: none"> <li>chemicals</li> <li>dangerous or hazardous substances</li> <li>movements of equipment, goods and materials</li> </ul>
Personnel in the work area may include:	<ul style="list-style-type: none"> <li>workplace personnel</li> <li>site visitors</li> <li>contractors</li> </ul>

## RANGE STATEMENT

Communication in the work area may include:	<ul style="list-style-type: none"><li>• official representatives</li><li>• phone</li><li>• electronic data interchange</li><li>• fax</li><li>• email</li><li>• internet</li><li>• radio</li><li>• oral, aural or signed communications</li></ul>
Loading operations may be carried out:	<ul style="list-style-type: none"><li>• manually</li><li>• with the aid of lifting equipment and/or appliances</li></ul>
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	<ul style="list-style-type: none"><li>• company procedures</li><li>• enterprise procedures</li><li>• organisational procedures</li><li>• established procedures</li></ul>
Personal protective equipment may include:	<ul style="list-style-type: none"><li>• gloves</li><li>• safety headwear and footwear</li><li>• safety glasses</li><li>• two-way radios</li><li>• high visibility clothing</li></ul>
Information/documents may include:	<ul style="list-style-type: none"><li>• goods identification numbers and codes, including ADG and IMDG markings and HAZCHEM signs</li><li>• manifests, bar codes, goods and container identification</li><li>• manufacturers specifications for equipment/tools</li><li>• workplace procedures and policies for the loading and unloading of goods/cargo</li><li>• ADG Code and associated regulations</li><li>• supplier and/or client instructions</li><li>• material safety data sheets</li><li>• EPGs and Initial Response Guide (HB76:1998 or equivalent)</li><li>• codes of practice including the National Standards for Manual Handling and the Industry Safety Code</li><li>• award, enterprise bargaining agreement, other industrial arrangements</li><li>• relevant Australian standards and certification requirements</li><li>• quality assurance procedures</li><li>• emergency procedures</li><li>• Load Restraint Guide</li></ul>
Applicable regulations and	<ul style="list-style-type: none"><li>• relevant Australian standards and regulations including</li></ul>

**RANGE STATEMENT**

legislation may include

- state/territory mass and loading regulations
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
  - Australian and International Dangerous Goods Codes
  - Australian Marine Orders and the International Maritime Dangerous Goods Code
  - IATA Dangerous Goods by Air regulations
  - Australian and International Explosives Codes
- relevant state/territory environmental protection legislation
- relevant state/territory OH&S legislation

# **TLID2013A Move materials mechanically using automated equipment**

## **Modification History**

Not Applicable

## **Unit Descriptor**

### **Unit Descriptor**

This unit involves the skills and knowledge required to move materials mechanically using automated equipment such as automatic guided vehicles, tow motors, high level order pickers, conveyor systems, and mechanised pallet movers. This includes selecting appropriate mechanical moving equipment (where relevant), moving materials/goods in accordance with operational requirements, checking condition of materials/goods and completing all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

## **Application of the Unit**

### **Application of the Unit**

Work must be carried out in compliance with the relevant OH&S regulations concerning the movement of materials mechanically using automated equipment.

Work is performed under limited or minimum supervision. It involves the application of the basic principles and routine procedures for the safe movement of materials mechanically using automated equipment.

## **Licensing/Regulatory Information**

Refer to Unit Descriptor

## **Pre-Requisites**

Not Applicable

## **Employability Skills Information**

**Employability Skills**                      This unit contains employability skills.

## **Elements and Performance Criteria Pre-Content**

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Select load moving equipment</b>	<p>1.1 The mechanised handling equipment, the route to be taken and procedures to be used are selected appropriate to the characteristics of the goods</p> <p>1.2 Dangerous goods and hazardous materials are identified and handled in accordance with codes of practice, OH&amp;S requirements and workplace procedures</p>
<b>2 Move goods</b>	<p>2.1 Goods are moved using the selected materials handling equipment in accordance with occupational health and safety regulations, manufacturers instructions and company procedures</p> <p>2.2 Problems in the movement of goods and materials using the automated equipment are identified and are reported in accordance with workplace procedures</p>
<b>3 Check goods and complete documentation</b>	<p>3.1 Moved goods are inspected for possible damage during transit/movement and appropriate action is taken</p> <p>3.2 All required documentation is completed for the tracking of the moved goods in accordance with company requirements</p>

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

#### Required knowledge:

- Regulations relevant to the use of automated equipment to move materials mechanically
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the use of automated equipment to move materials mechanically
- Focus of operation of work systems, equipment, management and site operating systems for the use of automated equipment to move materials mechanically
- The purpose, characteristics, capabilities, requirements and limitations of the automated materials moving equipment
- Problems that may occur during the use of automated equipment to move materials mechanically and appropriate action that can be taken to resolve the problems
- Risks when using automated equipment to move materials and related precautions to control the risks
- Documentation and record requirements

## REQUIRED KNOWLEDGE AND SKILLS

- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

### Required skills:

- Communicate effectively with others when using automated equipment to move materials mechanically
- Read and interpret instructions, procedures, information and signs relevant to the use of automated equipment to move materials mechanically
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the use of automated equipment to move materials mechanically
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when using automated equipment to move materials mechanically
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when using automated equipment to move materials mechanically in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of automated equipment and take appropriate action where required
- Ensure servicing of automated equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids (where applicable) and carry out lubrication processes in the course of work activities

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

#### **Context of and specific resources for assessment**

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

#### **Method of assessment**

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

## Range Statement

## RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- The operations may be conducted:
- in a range of work environments
  - by day or night
  - in a range of typical weather conditions
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- restricted spaces
  - exposed conditions
  - controlled or open environments
- Mechanised equipment may include a range of goods and materials handling equipment such as:
- automatic guided vehicle
  - tow motors
  - high level order picker
  - conveyor system
  - mechanised pallet mover
- Personal protective equipment may include:
- gloves
  - safety headwear and footwear
  - safety glasses
  - two-way radios
  - high visibility clothing
- Hazards in the work area may include exposure to:
- chemicals
  - dangerous or hazardous substances
  - movements of equipment, goods and materials
  - moving and rotating equipment and vehicles
- Personnel in the work area may include:
- workplace personnel
  - site visitors
  - contractors
  - official representatives
- Communication in the work area may include:
- phone
  - electronic data interchange
  - fax
  - email
  - internet
  - radio
  - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace
- company procedures
  - enterprise procedures
  - organisational procedures

## RANGE STATEMENT

procedures may include:

- established procedures

Information/documents may include:

- goods identification numbers and codes
- manifests, bar codes, goods and container identification
- manufacturers instructions concerning the use and servicing of automated mechanical equipment
- workplace procedures and policies
- supplier and/or client instructions
- material safety data sheets
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- relevant legislation, regulations and related documentation
- award, enterprise bargaining agreement, other industrial arrangements
- standards and certification requirements
- quality assurance procedures
- emergency procedures
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- workplace relations regulations
- workers compensation regulations
- ADG Code and regulations

Applicable regulations and legislation may include:

D - Load Handling

## **TLID3011A Conduct specialised forklift operations**

### **Modification History**

Not Applicable

### **Unit Descriptor**

#### **Unit Descriptor**

This unit involves the skills and knowledge required to operate a forklift with specialised attachments or all-terrain equipment, including checking attachments and worksite for suitability, selecting the type of forklift and accessories for required load shifting tasks, and shifting load and completing work in accordance with operational requirements. Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory OH&S authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

### **Application of the Unit**

#### **Application of the Unit**

Specialised operation of a forklift must be carried out in compliance with the licence requirements and regulations of the relevant state/territory authority.

Specialised operation of a forklift is performed under some supervision, generally within a team environment. It involves the application of equipment operation principles and procedures to maintain the safety and specialised operation of a forklift in a wide variety of operational contexts.

### **Licensing/Regulatory Information**

Refer to Unit Descriptor

### **Pre-Requisites**

Not Applicable

## Employability Skills Information

**Employability Skills**                      This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Check attachments and worksite for suitability</b>	<ul style="list-style-type: none"><li>1.1 Suitable work site is selected for operations</li><li>1.2 Work area is checked for overhead obstructions and proximity to service delivery lines</li><li>1.3 Barriers or warning signs are erected in areas subject to passing traffic</li><li>1.4 Attachments and platforms are securely fixed to carriage or tines</li><li>1.5 Personnel support platforms are inspected to ensure compliance with the relevant Australian Standard</li></ul>
<b>2 Select type of forklift and accessories for the required workplace task</b>	<ul style="list-style-type: none"><li>2.1 Special equipment, accessories or attachments are identified to match load characteristics and work requirements</li><li>2.2 Appropriate specialised equipment is selected</li><li>2.3 Existing attachments are removed and stored according to workplace procedures</li><li>2.4 Specialised equipment is fitted according to manufacturers instructions and workplace procedures</li><li>2.5 Designated staff are notified regarding specialist operations</li></ul>
<b>3 Shift load and complete work</b>	<ul style="list-style-type: none"><li>3.1 Equipment is operated within safe working limits and to maximise efficiency of operations</li><li>3.2 Load is lifted, carried and set down in accordance with workplace and manufacturers procedures and regulatory requirements</li><li>3.3 Documentation is completed reporting any damage or faults to goods or equipment</li><li>3.4 Specialist equipment and forklift are returned to appropriate storage/parking area</li></ul>

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

#### Required knowledge:

- Relevant duty of care requirements pertaining to the specialised operation of a forklift
- Relevant OH&S and environmental procedures and regulations
- Workplace operating procedures

## REQUIRED KNOWLEDGE AND SKILLS

- Forklift controls, instruments and indicators and their use
- Types of forklift accessories and ancillary equipment, their purposes and procedures for their use
- Handling procedures for forklifts involved in specialised operations
- Procedures to be followed in the event of an operational emergency
- Operating hazards and related defensive driving and hazard control techniques
- Engine power management and safe operating strategies
- Efficient driving techniques
- Pre-operational checks carried out on forklift and accessories and related action
- Site layout and obstacles
- Principles of stress management when driving a forklift

### Required skills:

- Communicate effectively with others when conducting specialised forklift operations
- Read and interpret instructions, procedures, information and signs relevant to specialised forklift operations
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to specialised forklift operations
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when conducting specialised forklift operations
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when conducting specialised forklift operations in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may occur when conducting specialised forklift operations
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during specialised forklift operations
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S

**Required skills:**

standards

- Identify points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- Monitor performance of equipment
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

**Context of and specific resources for assessment**

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

**Method of assessment**

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be

## EVIDENCE GUIDE

conducted through appropriate written/oral tests

- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Types of forklift may include:

- counterbalance trucks
- reach trucks
- pallet trucks
- container-handling heavy forklifts
- vacuum
- top frame

Specialised forklift operations may be carried out in typical forklift operational situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road or worksite
- while at a workplace
- internal or external

Customers may be:

Workplaces may comprise:

- large, medium or small worksites

Specialised forklift may be used to assist in a range of workplace tasks, including:

- stock/goods/container handling
- loading and unloading vehicles
- stacking stock and goods
- lifting and moving equipment
- transporting materials and goods in a workplace

Work may be conducted in:

- restricted spaces
- exposed conditions
- controlled or open environments

Loads to be shifted may require:

- special precautions

Specialised forklift operations

- spikes

## RANGE STATEMENT

may involve the use of a range of attachments and accessories, including:

- drum carriers
- bale carriers
- tines
- personnel carriers
- high reaching
- pantograph
- jibs
- paper clamps
- hooks
- side lifters

Loads to be shifted may be:

- irregularly shaped
- packaged or unpackaged
- labelled or unlabelled
- palletted or unpalletted
- containerised

Personnel in the work area may include:

- workplace personnel
- site visitors
- contractors
- official representatives

Forklift operational procedures may include:

- starting a forklift (including pre-start checks)
- steering and manoeuvring a forklift
- accelerating and braking
- positioning and stopping a forklift
- reversing a forklift
- operating forklift controls, instruments and indicators
- using defensive driving techniques
- managing engine performance

Pre-operational checks may include but are not limited to:

- visual checking of forklift and its associated accessories and equipment
- checking and topping up of fluid levels
- checks of tyres
- checks of operation of forklift lights and indicators
- checks of brakes

Post-operational checks may include but are not limited to:

- parking in a safe place
- shutting down forklift
- lowering all equipment
- visually checking for faults or damage

Hazards may include (examples only):

- wet and iced operating surfaces
- oil on operating surface
- faulty brakes

## RANGE STATEMENT

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	<ul style="list-style-type: none"><li>• workplace obstacles and other operational equipment and vehicles</li><li>• damaged loads and pallets</li><li>• other personnel in work area</li><li>• company procedures</li><li>• enterprise procedures</li><li>• organisational procedures</li><li>• established procedures</li></ul>
Personal protective equipment may include:	<ul style="list-style-type: none"><li>• gloves</li><li>• safety headwear and footwear</li><li>• safety glasses</li><li>• two-way radios</li><li>• high visibility clothing</li></ul>
Information/documents may include:	<ul style="list-style-type: none"><li>• goods identification numbers and codes, including IMDG markings and HAZCHEM signs</li><li>• manifests, bar codes, picking slips, merchandise transfers, stock requisitions, goods and container identification</li><li>• Australian Standard 2359 - Industrial Truck Code</li><li>• manufacturers specifications for forklift and associated accessories and equipment</li><li>• operations and service record book or log</li><li>• workplace procedures and policies for the operation of forklifts</li><li>• supplier and/or client instructions</li><li>• material safety data sheets</li><li>• regulatory requirements concerning the use of forklifts</li><li>• award, enterprise bargaining agreement, other industrial arrangements</li><li>• standards and certification requirements</li><li>• quality assurance procedures</li><li>• emergency procedures</li></ul>
Applicable procedures and codes may include:	<ul style="list-style-type: none"><li>• relevant state/territory regulations pertaining to the operation of forklifts</li><li>• relevant codes and standards, including Australian Standard 2359 - Industrial Truck Code</li><li>• relevant state/territory OH&amp;S legislation</li><li>• relevant state/territory fatigue management regulations</li><li>• relevant state/territory environmental protection legislation</li></ul>

Not Applicable

## Competency Field

Competency Field                      D - Load Handling

## **TLIL4005A Apply conflict/grievance resolution strategies**

### **Modification History**

Not Applicable

### **Unit Descriptor**

#### **Unit Descriptor**

This unit involves the skills and knowledge required to apply conflict resolution strategies to resolve grievances that may occur in the course of work, including identifying potential conflict situations, implementing appropriate conflict resolution strategies, and using effective interpersonal skills. Grievances and conflict situations may include those between employees in the workplace, between employees and managers, as well as grievances that might be raised by customers. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

### **Application of the Unit**

#### **Application of the Unit**

Work involves discretion and judgement for self and others in management and resolution of conflicts and grievances both internal and external to the workplace.

Work is performed under minimum supervision with general guidance on progress and outcomes of work. It involves application of conflict/grievance resolution strategies in conflict situations that may arise amongst personnel both internal to and external to the workplace.

### **Licensing/Regulatory Information**

Refer to Unit Descriptor

### **Pre-Requisites**

Not Applicable

## **Employability Skills Information**

**Employability Skills**                      This unit contains employability skills.

## **Elements and Performance Criteria Pre-Content**

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Identify potential conflict situations</b>	1.1 Signs, stages and possible causes of conflict/grievance are identified
<b>2 Implement conflict resolution strategies</b>	2.1 Factors and issues relevant to conflict/grievance are clarified 2.2 Strategies for dealing with conflict/grievance situations are developed 2.3 Options for resolution of the conflict/grievance are identified which allow for constructive responses to be negotiated and enable established relationships to continue 2.4 Strategies are implemented for the resolution of the source of conflict 2.5 Outcomes of the process are monitored to ensure objectives continue to be met
<b>3 Use effective interpersonal skills</b>	3.1 Effective verbal and non-verbal communication is used during negotiations, including body language, questioning, language style, active listening and reflection 3.2 Feedback is given assertively and received non-defensively during negotiations

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

#### Required knowledge:

- Relevant and regulatory and code requirements
- Relevant OH&S and environmental protection policies and procedures
- Workplace protocols and procedures for the identification and resolution of conflicts/grievances
- Relevant workplace business marketing policies and practices, including requirements for the maintenance of security and confidentiality
- Signs, stages and possible causes of conflict in the workplace
- Options for constructive responses to typical conflict/grievance situations
- Typical problems that can occur when applying conflict/grievance resolution strategies and related appropriate action that can be taken

#### Required skills:

**Required skills:**

- Communicate effectively with others when applying conflict and grievance resolution strategies
- Negotiate effectively with others when applying conflict and grievance resolution strategies
- Read and interpret instructions, procedures, information and signs relevant to the application of conflict and grievance resolution strategies
- Interpret and follow operational instructions and prioritise work
- Gather, record and convey simple and routine work-related information
- Complete documentation related to the application of conflict and grievance resolution strategies
- Operate electronic communication equipment to required protocol
- Identify existing and potential conflicts/grievances
- Participate in small informal work groups
- Apply interpersonal skills
- Work collaboratively with others when applying conflict and grievance resolution strategies
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when applying conflict and grievance resolution strategies in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Select and appropriately apply technology, information systems and procedures to complete workplace tasks
- Work systematically with required attention to detail

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills

## EVIDENCE GUIDE

<b>Context of and specific resources for assessment</b>	<ul style="list-style-type: none"> <li>• relevant legislation and workplace procedures</li> <li>• other relevant aspects of the range statement</li> <li>• Performance is demonstrated consistently over a period of time and in a suitable range of contexts</li> <li>• Resources for assessment include:               <ul style="list-style-type: none"> <li>• a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or</li> <li>• access to an appropriate range of relevant operational situations in the workplace</li> </ul> </li> <li>• In both real and simulated environments, access is required to:               <ul style="list-style-type: none"> <li>• relevant and appropriate materials and equipment, and</li> <li>• applicable documentation including workplace procedures, regulations, codes of practice and operation manuals</li> </ul> </li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The workplace environment may involve twenty-four hour operation and may include:	<ul style="list-style-type: none"> <li>• single and multi-site locations</li> <li>• large, medium and small companies</li> </ul>
Services, products, risks, work systems and requirements may:	<ul style="list-style-type: none"> <li>• potentially vary across different sections of the workplace</li> </ul>

## RANGE STATEMENT

Operations involve:

- internal and external customer contact and coordination

Conflicts/grievances may arise at all levels of the organisation in a range of possible situations including:

- amongst internal personnel
- between internal personnel and external personnel such as customers, suppliers, contractors, equipment manufacturers, etc.
- between external personnel and the organisation
- between internal personnel and management

Consultative processes may involve:

- other employees and supervisors
- management
- customers/clients
- suppliers of goods/materials
- manufacturers of equipment
- contractors
- relevant authorities
- union representatives
- OH&S specialists
- other maintenance, professional or technical staff

Communications systems may involve:

- face-to-face conversations and meetings
- telephone
- fax
- email
- mail

Depending on the type of organisation concerned and the local terminology used, workplace plans/procedures may include:

- company plans/procedures
- enterprise plans/procedures
- organisational plans/procedures
- established plans/procedures

Information/documentation may include:

- workplace procedures for the resolution of conflicts/grievances
- records of action to resolve conflicts/grievances and documentation of agreements reached
- job specifications
- conditions of service, relevant legislation, regulations and related documentation
- award, enterprise bargaining agreement, workers compensation, and other industrial arrangements
- relevant codes of practice including the national standards for manual handling and the industry safety code
- supplier and/or client instructions
- manifests, bar codes, goods and container identification
- goods identification numbers and codes

**RANGE STATEMENT**

Applicable regulations and legislation may include:

- manufacturers specifications
- material safety data sheets
- relevant Australian standards and certification requirements
- quality assurance procedures
- emergency procedures
- relevant regulations, standards and codes of practice
- trading regulations relevant to business operations
- relevant Australian and state/territory OH&S legislation
- environmental protection regulations
- hazardous substances and dangerous goods codes

## TLILIC2001A Licence to operate a forklift truck

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit Descriptor</b>	This unit specifies the outcomes required for the operation of a powered industrial truck equipped with a mast and an elevating load carriage to which is attached a pair of fork arms or other attachment, for licensing purposes. This definition also includes a truck on which the operator is raised with the attachment for order-picking.
------------------------	--

### Application of the Unit

<b>Application of the Unit</b>	<p>THIS UNIT REQUIRES THE OPERATOR TO BE ABLE PLAN THE WORK, CONDUCT ROUTINE CHECKS ON THE FORKLIFT, SHIFT LOADS IN A SAFE MANNER, AND SHUT DOWN AND SECURE THE EQUIPMENT AFTER THE COMPLETION OF OPERATIONS.</p> <p>This unit is based on the National Standard for Licensing Persons Performing High Risk Work.</p> <p>This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.</p>
--------------------------------	---

### Licensing/Regulatory Information

Refer to Unit Descriptor

### Pre-Requisites

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b> <i>Elements describe the essential outcomes of a unit of competency.</i>	<b>PERFORMANCE CRITERIA</b> <i>Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.</i>
1. Plan work	1.1 Potential workplace <b><i>hazards</i></b> are identified 1.2 <b><i>Hazard control measures</i></b> are identified consistent with <b><i>appropriate standards</i></b> to ensure the safety of personnel and equipment 1.3 Appropriate <b><i>forklift</i></b> truck is selected according to the load and workplace conditions 1.4 Working area is inspected to determine appropriate path of movement for loads and forklift truck 1.5 <b><i>Communication methods</i></b> are identified according to <b><i>procedures</i></b>
2. Conduct routine checks	2.1 Forklift is visually checked for any damage or defects 2.2 All <b><i>signage and labels</i></b> are visible and legible according to the <b><i>appropriate standard</i></b> 2.3 All controls are located and identified 2.4 <b><i>Pre-start operational checks</i></b> are carried out according to <b><i>procedures</i></b> 2.5 <b><i>Forklift</i></b> is started according to <b><i>procedures</i></b> and checked for any abnormal noise  2.6 <b><i>Post-start operational checks</i></b> are carried out according to <b><i>procedures</i></b> 2.7 All forklift functions and safety devices are tested to their maximum according to <b><i>procedures</i></b> 2.8 Defects and damage are reported and recorded according to <b><i>procedures</i></b> , and appropriate action is taken
3. Shift load	3.1 The weight of load is assessed to ensure compliance with <b><i>forklift</i></b> truck data plate specifications 3.2 Appropriate <b><i>hazard prevention/control measures</i></b> are implemented and communicated with personnel in the work area 3.3 <b><i>Forklift</i></b> is operated at a safe speed and according to <b><i>procedures</i></b> 3.4 Loads are moved and placed to ensure stability of material and avoidance of hazards

	<p>3.5 Load movement is monitored constantly ensuring safety to personnel and load, and structural stability</p> <p>3.6 <i>Unplanned and/or unsafe situations</i> are responded to in line with <i>procedures</i></p>
4. Shut down and secure forklift truck	<p>4.1 <i>Forklift</i> truck is parked to avoid hazards</p> <p>4.2 Forklift is <i>shut down</i> according to <i>procedures</i></p> <p>4.3 Routine post-operational forklift checks are carried out according to <i>procedures</i></p> <p>4.4 Forklift is secured to prevent unauthorised access/use</p> <p>4.5 All defects and damage are reported and recorded according to <i>procedures</i>, and appropriate action is taken</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

*This describes the essential skills and knowledge and their level required for this unit.*

#### Required skills:

- Accurately interpret information relating to conducting forklift truck operations (e.g. procedures)
- Safely conduct forklift truck operations including all functions to the maximum height and load capacity
- Identify hazards associated with the operation of the forklift truck, assess risks and put into place effective hazard prevention/control measures for those hazards identified
- Use communication skills at a level sufficient to communicate with other site personnel (e.g. receive and interpret work instructions, safety information, emergency procedures)
- Drive forklift with load in forward and reverse, maintaining visibility
- Verify problems and equipment faults and demonstrate appropriate response procedures

#### Required knowledge:

- Methodology of determining the weight of a load
- Commonwealth, state or territory OH&S legislation, standards relevant to the safe operation for the forklift trucks
- Understanding of forklift characteristics and capabilities (including use of load data plates)
- Understanding of the hierarchy of hazard identification and control
- Organisational and workplace standards, requirements, policies and procedures for

**REQUIRED SKILLS AND KNOWLEDGE**

- conducting operations for the crane class
- Procedures for the recording, reporting and maintenance of workplace records and information
- Forklift truck operations and safe operating techniques
- Typical routine problems encountered in the operation of the crane and equipment and adjustments required for correction

**Evidence Guide****EVIDENCE GUIDE**

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for the Training Package.*

**Overview of assessment**

- Successful assessment of this unit meets the competency requirement of the National Standard for Licensing Persons Performing High Risk Work.
- State/territory OH&S regulators have mandated the use of Assessment Instruments and Instructions for Assessment for this unit which have been endorsed by the national body responsible for OH&S matters.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- Compliance with OH&S licensing legislation.
- Communicate and work safely with others in the work area.
- Identify hazards associated with the operation of the forklift truck and put in place effective hazard controls for those hazards identified.
- Conduct pre-start-up, operational, moving loads and shut down and secure checks of the forklift truck according to procedures.
- Operate the forklift truck and move loads safely, including driving and manoeuvring, picking up and placing of loads at various stack heights.
- Drive forklift truck with load in forward and reverse, maintaining visibility.

**Context of and specific resources for assessment**

- Assessment of the safe application of knowledge and skills to workplace tasks (performance) must be undertaken using the endorsed Assessment Instrument.

**EVIDENCE GUIDE**

	<ul style="list-style-type: none"> <li>Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace setting.</li> <li>Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints.</li> <li>Applicants must have access to: <ul style="list-style-type: none"> <li>Personal Protective Equipment (PPE) for the purpose of the Performance Assessment</li> <li>associated equipment appropriate to forklift truck operations</li> <li>suitable loads as described by the endorsed Assessment Instrument</li> <li>manufacturers specifications</li> <li>appropriate forklift truck in a safe condition.</li> </ul> </li> </ul>
<b>Method of assessment</b>	<ul style="list-style-type: none"> <li>Assessment must be conducted using the endorsed Assessment Instrument. These Instruments provide instruction on their application.</li> <li>The use of '<b>simulators</b>' in the assessment of this unit of competency is <b>not acceptable</b>.</li> <li>Assessment may be in conjunction with the assessment of other units of competency.</li> <li>Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li> <li>Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> </ul>
<b>Guidance information for assessment</b>	<ul style="list-style-type: none"> <li>Further information about endorsed Assessment Instruments may be obtained from state/territory OH&amp;S regulators.</li> </ul>

**Range Statement****RANGE STATEMENT**

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below.*

<b>RANGE STATEMENT</b>	
<b>Hazards</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• ground conditions (e.g. condition of pavement, slopes)</li> <li>• overhead hazards (e.g. powerlines, service pipes)</li> <li>• insufficient lighting</li> <li>• traffic (e.g. pedestrians, vehicles, other plant)</li> <li>• weather (e.g. wind, lightning, rain)</li> <li>• forklift instability (e.g. overloading, poor load placement, irregular loads)</li> <li>• other hazards (e.g. dangerous materials)</li> </ul>
<b>Hazard control measures</b>	<p>Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls</p> <p>It includes the application of the hierarchy of control, the six-step preference of control measures to manage and control risk:</p> <ol style="list-style-type: none"> <li>1 elimination</li> <li>2 substitution</li> <li>3 isolation</li> <li>4 engineering control measures</li> <li>5 using safe work practices</li> <li>6 personal protective equipment</li> </ol>
<b>Appropriate standards</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• legislation</li> <li>• Australian standards</li> <li>• manufacturer's specifications</li> <li>• industry standards (where applicable)</li> </ul>
<b>Forklift truck</b>	<p>May include but not be limited to:</p> <ul style="list-style-type: none"> <li>• counterbalanced</li> <li>• reach trucks</li> <li>• rough terrain</li> <li>• internal combustion petrol, diesel, gas</li> <li>• electric</li> </ul>
<b>Communications methods</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• verbal and non-verbal language</li> <li>• written instructions</li> <li>• signage</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• hand signals</li> <li>• listening</li> <li>• questioning to confirm understanding</li> <li>• appropriate worksite protocol</li> </ul>
<b>Procedures</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• manufacturer's guidelines (instructions, specifications or checklists)</li> <li>• industry operating procedures</li> <li>• workplace procedures (work instructions, operating procedures, checklists)</li> </ul>
<b>Pre-start operational checks</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• safety devices fitted where appropriate</li> <li>• forklift data plate fitted and interpreted</li> <li>• logbook, handbook or operating manuals available</li> <li>• external visual check including, evidence of damage, leaks, visual evidence of structural weaknesses (including paint separation or stressed welds) is carried out</li> <li>• forklift attachment is checked for security</li> <li>• approved modifications and/or attachments fitted to manufacturer's specifications (e.g. as per forklift or attachment data plate) are identified</li> <li>• checks for adaptations or modifications outside manufacturer's specifications (e.g. not listed on the forklift or attachment data plate) are carried out</li> <li>• maintenance logbook/records checked</li> </ul>
<b>Post-start operational checks</b>	<p>May include checks of the forklift truck and equipment after start-up to ensure:</p> <ul style="list-style-type: none"> <li>• hazard warning systems (for example lights and horns), are functional</li> <li>• attachment movements and control functions are smooth and comply with operating requirements</li> <li>• steering, transmission and brake functions comply with operating requirements</li> </ul>
<b>Hazard prevention/control measures</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• barricades and traffic control</li> <li>• safety tags on electrical switches/isolators</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>insulated powerlines</li> <li>safety observer used inside exclusion zone</li> <li>disconnected power</li> <li>pedestrian control (barricades, signs, etc.)</li> <li>excavation safeguards</li> <li>movement of obstructions</li> <li>personal protective equipment</li> <li>adequate illumination</li> </ul>
<b>Unplanned and/or unsafe situations</b>	<p>May include but not limited:</p> <ul style="list-style-type: none"> <li>failure/loss of control (e.g. brakes and steering)</li> <li>failure of equipment (e.g. hydraulic system)</li> <li>environmental condition</li> </ul>
<b>Shut down</b>	<p>May include, but is not limited to:</p> <ul style="list-style-type: none"> <li>parking in a suitable location away from dangerous areas</li> <li>fork arms are correctly positioned (tips down, tilted forward, lowered to ground)</li> <li>appropriate transmission/gear is selected for parking (relevant to transmission type)</li> <li>hand/parking brake is applied</li> <li>engine power is turned off</li> <li>ignition key is removed (if applicable)</li> <li>LPG gas cylinder valve is shut off (where fitted)</li> <li>securing equipment against unauthorised operation</li> <li>securing the site</li> <li>ensuring access ways are clear</li> <li>identifying and segregating defective equipment and reporting to authorised personnel</li> <li>batteries are connected to the charger (if applicable)</li> </ul>
