The Moog DRL is a modern take on a proven performer, supporting the entire family of HELLFIRE Missiles (all AGM-114 variants).

[Contact Us](#)

Overview

- Modern launcher design with lightweight electronics and hard-back provides the carrier platform with longer flight time
- Incredibly lightweight, only 46 lbs including launcher electronics (Moog HIU)
- MIL-STD-1760 Weapon Systems Interface with custom connector location on the DRL for different pylon requirements
- Wheel Lock Trigger (WLT) rails provide easier loading and lower release force than M299 rails
- Optimized for light attack, UAS, and ISR platforms
- Expandable capabilities to support JAGM and UAI weapons
