

PROFESSIONAL ADVICE POLICY

With my qualifications covering both Electrician and Professional Electrical Engineer in Australia together with postgraduate level adult and Vocational Education and training , I possess the full capacity to develop and deliver the electrical courses for all levels of electrician classifications in NSW .

At the moment , no professional advice to develop and operate the courses is offered by me .

Only RTOs which formally employ and assign the physical teaching classes to me will be given my professional advice according to the following plan .

1/ if less than half of the units in the course were assigned to me for teaching , I will only be responsible for providing the professional advice for the units that I am teaching .

2/If more than half of the units in the course were assigned to me , then I can take the responsibility for providing my professional advice for the whole course

If the RTO does not assign me more than half of the units but it wants me to provide my advice for the whole course., my consultancy fees is set \$10000.

Language and ascent issue

As from NESB background and with over 15 years experience at TAFE NSW in communicating with all nationalities students from diverse backgrounds , criticizing my accent will be regarded as discriminative racist ground that can attract the legal action.

Students' Behavior issue

As an adult educator , I will not be responsible for correcting the behaviors of the learners that the RTO will have the full responsibility in such aspect
