# Roof Anchor Points

Anchor points are a vital part of a fall protection system

---

## Experts in Anchor Point Installation and Recertification

Roof anchor points are a common and cost-effective means of fall protection for roof-top workers in Australia. They provide a secure connection point for workers to attach their safety harnesses and lanyards while working on a roof. Roof anchor points can be permanent or temporary, and can be installed by professional height safety equipment companies. It is important to ensure that roof anchor points are in compliance with Work Health and Safety regulations and guidelines which include regular maintenance and recertification.

## Roof Anchor Point Installation

Our height safety experts can advise and install the appropriate anchors to fit your specific application, ensuring maximum safety for workers at heights and cost-effectiveness for your business. If you're not sure [which anchor system is best for your needs](#), please don't hesitate to contact our friendly team for assistance.

Anchor Safe's team of experienced and accredited installers can handle all of

## The Importance Of Roof Anchor Point Positioning

Proper positioning of roof anchor points is crucial for ensuring the safety of workers at heights. Anchor points must be strategically placed in areas that are easily accessible to workers and provide maximum coverage for fall protection. This can include areas near roof edges, skylights, and other potential fall hazards.

Incorrectly positioned anchor points can lead to a lack of coverage for

every 12 months to meet strict Australian height safety regulations.

However, some manufacturers may recommend more frequent inspections, and if the anchors are in regular use or in a harsh environment, more frequent inspections may be necessary. If you're unsure about inspection schedules for your specific situation, please don't hesitate to contact our friendly staff for guidance.

Height safety compliance is a critical issue and it is essential that all inspections and installations are carried out by licensed professionals using high-quality products and equipment. Anchor Safe's team of qualified and licensed certifiers can arrange scheduled maintenance and recertification to ensure your anchor points are always up to the job.

heights.

Anchor points and the surfaces they are mounted on can be affected by natural elements and changes to the structure they were installed on. It's essential to ensure that this simple yet potentially life-saving equipment is ready to handle the sudden and high-pressure strains of fall arrest.

Protecting your workers and yourself by ensuring your anchor points and other height safety gear is compliant and ready for use is vital. Speak to Anchor Safe's experienced team about our recertification services to ensure your equipment is up to the task.
