- a) Document
- b) Form
- c) Window
- d) Link

Answer: Window

Question: The window object is the____object in the browser.

- a) Main
- b) Global
- c) Changer
- d) Normal

Answer: Global

Question: Why the window object is known as the global! object?

- a) Because it is common in all the browsers.
- b) Because all other browser objects arl contained within it.
- c) Because it is the top object of BOM.
- d) All of these

Answer: Because all other browser objects arl contained within it.

Question: By	web bro	owser windo	ow is cor	itrolled	in wind	ow
object.						

- a) Methods
- b) Properties
- c) (A) and (B) Both
- d) Document

Answer: (A) and (B) Both

Question: What is included in object?

- a) Document object
- b) Form object
- c) Radio object
- d) All of these

Answer: Document object

Question: _____is the most important object in the browser object model.

- a) Form object
- b) Document object
- c) Radio object
- d) Checkbox object

Answer: Document object

Question: ____object is used to display web page in a browser.

- a) Location object
- b) Form object
- c) Document object
- d) Text area object

Answer: Document object

Question: _____is included in the document object of BOM.

- a) Form
- b) Images
- c) Links and other elements
- d) All of these

Answer: All of these

Question: _____object is used to give reference to other objects.

- a) Element
- b) Document
- c) Link
- d) All of these

Answer: Element

Question: ____can be the object as the element object of browser object mode.

- a) Radio button
- b) Text box
- c) Check box
- d) All of these

Answer: All of these

Question: _____method is used to take the control to the specific element of the form.

- a) Focus
- b) Alert
- c) Document
- d) Confirm

Answer: Focus

Question: When focus () method is used?

- a) Any time in JavaScript
- b) After getting alert O message
- c) After getting confirm message
- d) When the for is created

Answer: After getting alert O message

Question: In internet some fields in the form are displayed with red asterisk (*) is known as____

- a) This field is optional.
- b) This field is mandatory, can't leave it blank.
- c) This field is out of the reach.
- d) Only correct information is to be filled up.

Answer: This field is mandatory, can't leave it blank.

Question: _____is used to clear the validation of the entered data.

- a) HTML
- b) DHTML
- c) Java
- d) JavaScript

Answer: JavaScript

Question: _____is not the inbuilt function.

- a) isNaN ()
- b) Alert ()
- c) if ()
- d) Confirm ()

Answer: if ()

Question: _____built in function is there to work with number in Javascript.

- a) Digits ()
- b) isNaN ()

- c) isnan ()
- d) Alert ()

Answer: isNaN ()

Question: _____is the most used numerical function in Javascript.

- a) isNaN ()
- b) Number ()
- c) Digits ()
- d) None of these

Answer: isNaN ()

Question: NaN stands for_____.

- a) Number and Number
- b) Not a Number
- c) Not a numeric
- d) Numeric and Number

Answer: Not a Number

Question: isNaN(123) will give____output.

- a) True
- b) False
- c) erroe
- d) 123

Answer: False

Question: isNaN("Sujal")will give____output.

- a) True
- b) False
- c) erroe
- d) Hello

Answer: True

Question: _____element is used to write script in HTML.

- a) <head>...</head>
- b) <script>...</script>
- c) <scr>...</scr>
- d) <body>...</body>

Answer:

<script>...</script>

Question: ____browser supports JavaScript.

- a) Mozilla Firefox
- b) Chrome
- c) Safari and Internet Explorer
- d) All of these

Answer: All of these

Question: JavaScript can be used for a ____ in a web page.

- a) Interactivity with the user
- b) Control the browser
- c) Dynamically create HTML content

CBSE Class 12 Computer Science Classes and Objects In Java MCQs Set A

Download PDF

• Computer Science

CBSE Class 12 Computer Science Classes and Objects In Java MCQs Set A with answers available in Pdf for free download. The MCQ Questions for Class 12 Computer Science with answers have been prepared as per the latest syllabus, NCERT books and examination pattern suggested in Standard 12 by CBSE, NCERT and KVS. Multiple Choice Questions are an important part of Term 1 and Term 2 exams for Grade 12 Computer Science and if practiced properly can help you to get higher marks. Refer to more Chapter-wise MCQs for NCERT Class 12 Computer Science and also download more latest study material for all subjects

Classes and Objects In Java Class 12 Computer Science MCQ

Class 12 Computer Science students should refer to the following multiple-choice questions with answers for Classes and Objects In Java in standard 12. These MCQ questions with answers for Grade 12 Computer Science will come in exams and help you to score good marks

Classes and Objects In Java MCQ Questions Class 12 Computer Science with Answers

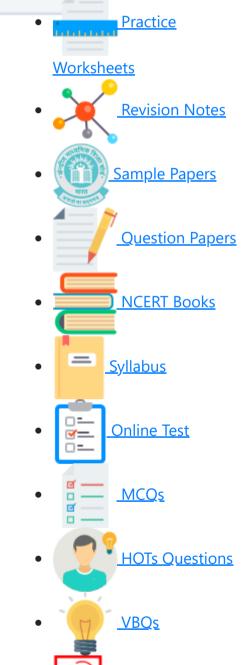

Question: An_____is a variable representing a collection of homogeneous type of elements.

- a) Arrangement
- b) Array
- c) Assortment
- d) Group

Answer: Array

Question: _____are useful to represent vector, matrix and other multi-dimensional data.

• a) Arrangements

Subjects

Accountancy

<u>Unseen Passage</u>

- Biology
- Bio Technology
- Business Studies
- <u>Chemistry</u>
- Computer Science
- Economics
- Engineering Drawing

- b) Arrays
- c) Assortments
- d) Groups

Answer: Arrays

Question: ______is one dimensional (1-D) data structure that can be used to store list of items like characters, numbers.

- a) Vector
- b) Path
- c) Matrix
- d) Route

Answer: Vector

Question: ______is used to represent two dimensional (2-D) data structures like table or rows and columns.

- a) Vector
- b) Path
- c) Matrix
- d) Route

Answer: Matrix

Question: _____are useful when same operations are to be performed on various elements of the similar type.

- a) Matrix's
- b) Arrays
- c) Dimensions
- d) Groups

Answer: Arrays

Question: All the _____of an array are stored in memory using contiguous storage space.

- a) Index's
- b) Values
- c) Features
- d) Elements

Answer: Elements

Question: Each element is identified by an_____position associated with array variable.

- a) Index
- b) Value
- c) Tabular
- d) Element

Answer: Index

Question: In Java_____is an object used to manage list of items.

- Entrepreneurship
- Marketing
- Painting and Sculpture
- Physical Education
- English
- Graphics Design
- Geography
- Hindi
- Home Science
- History
- Informatics Practices
- Languages
- Mathematics
- Other Subjects
- Physics
- Political Science
- Psychology
- Sanskrit
- Sociology
- <u>Urdu</u>

Search

keywords

- a) Array
- b) Variable
- c) Matrix
- d) Element

Answer: Array

Question: Creating an array is a____step process.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Two

Question: An array object can be created in____ways.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Two

Question: Which is the way an array object can be created?

- a) Using new operator and specifying the size.
- b) Directly initializing the content of array
- c) Both (A) and (B)
- d) None of these

Answer: Both (A) and (B)

Question: Array with_____dimension is known as 1-D array.

- a) Double
- b) Triple
- c) Both (A) and (B)
- d) Single

Answer: Single

Question: For example_____can be seen as a collection of one or more scalar variables.

- a) Vector
- b) Path
- c) Matrix
- d) Variable

Answer: Vector

Question: Instead of declaring individual variables like marks 1, marks 2, marks 3, marks 4, marks 5; one can declare array_____

- a) Marks [5]
- b) Mark[5]
- c) Marks[l-5]

• d) All of these

Answer: Marks [5]

Question: Individual variable elements of an array marks [5] can be accessed as:

- a) Marks[1], marks[2], marks[3], marks[4], marks [5].
- b) Marks[-1], marks[1], marks[2], marks[3], marks [4].
- c) Marks[0], marks[1], marks[2], marks[3], marks [4].
- d) Marks[-1], marks[0], marks[1], marks[2], marks [3].

Answer: Marks[0], marks[1], marks[2], marks[3], marks [4].

Question: To declare a____array a pair of square brackets [] is used after array name or after data type.

- a) 2-D
- b) 1-D
- c) 3-D
- d) 4-D

Answer: 1-D

Question: The syntax to declare array is as follows_____

- a)[];
- b);
- c) Both (A) and (B)
- d) None of these

Answer: Both (A) and (B)

Question: For example, to store the marks obtained by a student in five tests in Mathematics subject, an array of_____integer elements can be used.

- a) Five
- b) Six
- c) Four
- d) Seven

Answer: Five

Question: The array marks refers to____location where five integer values are stored.

- a) Chip
- b) Memory
- c) Variable
- d) Address

Answer: Memory

Question: Array object named 'marks' with size for 5 elements can be created as follows:

• a) Int marks [] = new int [5];

- b) Int[] marks = new int [5];
- c) Both (A) and (B)
- d) None of these

Answer: Both (A) and (B)

Question: Integer of int data type uses_____bytes storage space.

- a) 2
- b) 3
- c) 4
- d) 5

Answer: 4

Question: Thus array marks requires_____bytes in contiguous locations in memory.

- a) 5 x 4 = 20
- b) $5 \times 5 = 25$
- c) $5 \times 3 = 15$
- d) $5 \times 2 = 10$

Answer: $5 \times 4 = 20$

Question: To refer an element of an array, an index or subscript is used in____after array variable name.

- a) Curly bracket { }
- b) Square bracket []
- c) Round bracket ()
- d) None of these

Answer: Square bracket []

Question: ____specifies the position of an element in an array.

- a) Number
- b) Index
- c) Variable name
- d) Element

Answer: Index

Question: Index value starts from_____

- a) 5
- b) 4
- c) 1
- d) 0

Answer: 0

Question: The array variable marks[5] has an index value from_____

- a) 1 to 5
- b) 0 to 4
- c) 0 to 5
- d) 1 to 4

Answer: 0 to 4

Question: In array variable marks [5], marks [0] refers to the____element.

- a) Last
- b) Second
- c) First
- d) None of these

Answer: First

Question: In array variable marks [5], marks [4] refers to the_____element.

- a) Last
- b) Second
- c) First
- d) Fourth

Answer: Last

Question: An object is a_____to variable.

- a) Position
- b) Location
- c) Address
- d) Reference

Answer: Reference

Question: Array being an object in Java, array name is also a____variable.

- a) Position
- b) Location
- c) Address
- d) Reference

Answer: Reference

Question: Array name contains_____to memory location where the array elements are stored.

- a) Position
- b) Location
- c) Address
- d) Reference

Answer: Reference

Question: As array is an object, so its elements are initialized with _____ values.

- a) Default
- b) Initial
- c) Declared
- d) Index

Answer: Default

Question: 1-D array is initialized using _____separated values of data elements in braces { }.

- a) Semi colon
- b) Comma
- c) Colon
- d) Full stop

Answer: Comma

Question: Which of the following is correct initialization of 1-D array?

- a) Int marks[] = {90, 70, 77};
- b) Int [] marks = {90, 70, 77};
- c) Int marks}] = {90; 70; 77}
- d) Both (A) and (B)

Answer: Both (A) and (B)

Question: When an array is initialized while creating, it does not need the use of____operator.

- a) New
- b) New
- c) Int
- d) Float

Answer: New

Question: The array size is same as the number of values specified in

- a) Braces
- b) Index
- c) Default value
- d) Initialization

Answer: Braces

Question: Class methods are declared as _____ and can be referred without any object in the class.

- a) Private
- b) Void
- c) Package
- d) Static

Answer: Static

Question: Every element of an array is an individual variable that can be referred by using_____

- a) Index
- b) Value
- c) Tabular

• d) Element

Answer: Index

Question: Like variables, to change the value of an element, an assignment statement can be used which refers a variable element on____side.

- a) Right
- b) Left
- c) Middle
- d) None of these

Answer: Left

Question: Instead of writing the code, various static methods provided by Java using____class can be used.

- a) Java.Arrays
- b) Java.utility
- c) Java.util.Arrays
- d) All of these

Answer: Java.util.Arrays

Question: Methods sort() and fill() are part of____class.

- a) JavaArrays
- b) Java.util
- c) Java.util.Arrays
- d) All of these

Answer: Java.util.Arrays

Question: To sort an entire or part of array____method can be used.

- a) Sort()
- b) Fill()
- c) Display()
- d) Order()

Answer: Sort()

Question: Method_____is used to fill or partial array with specified value.

- a) Sort()
- b) Fill()
- c) Display()
- d) Order()

Answer: Fill()

Question: To search an element in an array, arrays class provides____method.

• a) Search0

- b) Find()
- c) Binary search()
- d) Bin search ()

Answer: Binary search()

Question: search method does element by element comparison in a serial manner.

- a) Linear
- b) Vertical
- c) Horizontal
- d) Vector

Answer: Linear

Question: _____arrays are used to store tabular data in the form of rows and columns.

- a) 2-D
- b) 1-D
- c) 3-D
- d) 4-D

Answer: 2-D

Question: In Java, 2-D array can be declared using array name and 2 pairs of_____to specify the size of two dimensions row and column respectively.

- a) Curly bracket { } { }
- b) Square bracket [][]
- c) Round bracket () ()
- d) None of these

Answer: Square bracket [] []

Question: int marks [] f] = new int [5] [3], the logical view of array elements is a table of_____

- a) 3 rows and 5 columns
- b) 15 columns
- c) 5 rows and 3 columns
- d) 15 rows

Answer: 5 rows and 3 columns

Question: Int marks [] [] = new int [5] [3], will physically use contiguous memory locations that is_____bytes.

- a) 15
- b) 45
- c) 60
- d) 8

Answer: 60

Question: To create_____array, an array of an array has to be created.

- a) 2-D
- b) 1-D
- c) 3-D
- d) 4-D

Answer: 2-D

Question: Declaration and initialization of 2-D array is very similar to 1-D array except the number of

- a) Sizes
- b) Length
- c) Index values
- d) Dimensions

Answer: Dimensions

Question: In 2-D array, each row is considered as_____array element.

- a) 2-D
- b) 1-D
- c) 3-D
- d) 4-D

Answer: 1-D

Question: To initialize 2-D array, all these initialized rows are to be enclosed in curly braces {} separating them by_____

- a) Colon (:)
- b) Comma (,)
- c) Semi Colon (;)
- d) Full stop (.)

Answer: Comma (,)

Question: In Java, 2-D array is considered as an_____of 1-D array.

- a) Matrix
- b) Array
- c) Dimension
- d) Group

Answer: Array

Question: In 2-D array, each name is stored in different row and all names have different number of____

- a) Spaces
- b) Groups
- c) Characters
- d) Columns

Answer: Characters

Question:	Size of each	n row of an	array	can b	e known
using	property	of 1-D array	/ .		

- a) Length
- b) Height
- c) len
- d) Size

Answer: Length

Question: For 2-D array_____property returns number of rows.

- a) Length
- b) Height
- c) len
- d) Size

Answer: Length

Question: For 1-D array_____property returns number of columns in specified row element.

- a) Length
- b) Height
- c) Len
- d) Size

Answer: Length

Question: _____is a collection of homogeneous type of data.

- a) Matrix
- b) Array
- c) Dimension
- d) Group

Answer: Array

Question: _____elements can be accessed using index for each dimension in [].

- a) Matrix
- b) Array
- c) Dimension
- d) Group

Answer: Array

Question: Index value starts with_____

- a) One
- b) Two
- c) Zero
- d) Three

Answer: Zero

Question: Declaring an_____without initialization does not create an array object.

- a) Matrix
- b) Array
- c) Dimension
- d) Group

Answer: Array

Question: String is nothing but a sequence of_____

- a) Spaces
- b) Groups
- c) Characters
- d) Columns

Answer: Characters

Question: 1-D array of _____can be considered as a string.

- a) Spaces
- b) Groups
- c) Characters
- d) Columns

Answer: Characters

Question: _____literals are where a sequence of characters is enclosed between double quotes.

- a) String
- b) Character
- c) Numerical
- d) None of these

Answer: String

Question: To use variables that can store strings, Java supports____types of strings.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Two

Question: Strings in Java are handled by two classes namely 'String' and

- a) Strings
- b) Characters
- c) Buffer
- d) StringBuffer

Answer: StringBuffer

Question: String () without arguments create a_____object with no character.

- a) String
- b) Character
- c) Buffer
- d) Code

Answer: String

Question: String (char ary[]) creates a String object with its initial value using ary_____

- a) Value
- b) Argument
- c) Index
- d) []

Answer: Argument

Question: String (char ary[], int start, intlen) creates a String object using 1-D ary argument starting at ary[start] with____number of characters.

- a) Length
- b) Leng
- c) Len
- d) Limited

Answer: Len

Question: String (String strObj) creates a String object which is same as object specified in_____

- a) Value
- b) Argument
- c) Index
- d) Square brackets []

Answer: Argument

Question: String (string literal) creates a String____which is same as object specified in argument.

- a) Literal
- b) obj
- c) Object
- d) Variable

Answer: Object

Question: String (string literal) creates a String object that refers to the _____specified in argument.

- a) Literal
- b) Obj
- c) Object
- d) Variable

Answer: Literal

Question: I	n Java,	characters	are stored	using	_bytes.
-------------	---------	------------	------------	-------	---------

- a) Four
- b) Three
- c) Two
- d) Five

Answer: Two

Question: To save space, if the characters are _____ an array of bytes should be used instead of array of characters.

- a) ASCII
- b) Coded
- c) ACSII
- d) ACIIS

Answer: ASCII

Question: A____can be used with array of bytes as an argument.

- a) Method
- b) Destructor
- c) Variable
- d) Constructor

Answer: Constructor

Question: When two String objects are created using same string literals, memory space is not allocated for____object.

- a) First
- b) Second
- c) Both (A) and (B)
- d) None of these

Answer: Second

Question: Separate memory is allocated when string objects are created using _____operator even if strings are identical.

- a) New
- b) new
- c) int
- d) Float

Answer: new

Question: "strl = - str2"_____the contents of strl and str2 and not the objects at strl and str2.

- a) Equals
- b) Matches
- c) Compares
- d) Relates

Answer: Compares

Question: The String class provides_____to compare strings, find length of string, combining strings, obtaining substrings, converting strings, splitting strings, searching for character or patterns in string etc.

- a) Constructors
- b) Methods
- c) Strings
- d) Classes

Answer: Methods

Question: Method Boolean equals(String str) returns_____if invoking string is same as str.

- a) True
- b) False
- c) Can't say
- d) None of these

Answer: True

Question: Method booleanequalsIgnore Case (String str) returns_____if invoking string is same as str after ignoring case (case insensitive).

- a) True
- b) False
- c) Can't say
- d) None of these

Answer: True

Question: Method int compare To (String str) returns 0, > 0, < 0_____if invoking string is equal to, greater than or less than str respectively.

- a) String
- b) Negative value
- c) Integer
- d) Float

Answer: Integer

Question: Method int compare To ignore Case (String str) is same as_____but Case Sensitive.

- a) Equals
- b) Ignore Case
- c) Equals Ignore Case
- d) Compare To

Answer: Compare To

Question: A String class provides methods for____task.

- a) Extracting part of string.
- b) Replacing characters or substrings.
- c) Splitting string into substrings
- d) All of these

Answer: All of these

Question: A String class provides methods for____task.

- a) Getting number of characters.
- b) Getting character at specified index position.
- c) Converting string into an array of bytes.
- d) All of these

Answer: All of these

Question: A String class provides methods for____task.

- a) Converting string into lowercase or uppercase
- b) Appending string
- c) Copy string or part of string
- d) All of these

Answer: All of these

Question: Method int____returns number of characters in invoking string.

- a) IndexAt(int index)
- b) Length()
- c) GetBytes()
- d) To Upper Case()

Answer: Length()

Question: Method char_____returns character at index position from the invoking string, index considered from 0.

- a) Index At(int index)
- b) Length()
- c) Get Bytes()
- d) To Upper Case()

Answer: Index At(int index)

Question: Method byte[]_____returns an array of characters as bytes from invoking string.

- a) IndexAt(int index)
- b) Length()
- c) Get Bytes()
- d) To Upper Case()

Answer: Get Bytes()

Question: Method void_____copies characters of invoking string fromIndx to toIndx-1 to target array from targetIndx onwards.

- a) To Upper Case()
- b) To Lower Case
- c) Concat(String str)
- d) Get Chars(intfromIndx, inttoIndx, char target [], inttargetIndx)

Answer: Get Chars(intfromIndx, inttoIndx, char target [], inttargetIndx)

Question: Method String____returns a string after appending str with the invoking string.

- a) To Uppercase0
- b) To LowerCase
- c) Concat (String str)
- d) Get Chars (intfromlndx, inttolndx, chad target[], inttargetlndx)

Answer: Concat (String str)

Question: String _____returns a string with all characters of invoking string converted to lowercase.

- a) To UpperCase()
- b) To LowerCase
- c) Concat (String str)
- d) Get Chars (intfromlndx, inttolndx, chail target!], inttarget lndx)

Answer: To LowerCase

Question: String _____returns a string with all characters of invoking string converted to uppercase.

- a) To UpperCase()
- b) To LowerCase
- c) Concat (String str)
- d) GetChars (intfromIndx, inttoIndx, chJ target!], inttargetIndx)

Answer: To UpperCase()

Question: With array variable, length is an____or property of array;

- a) Attribute
- b) Method
- c) String
- d) None of these

Answer: Attribute

Question: With String object length is a_____

- a) Attribute
- b) Method
- c) String
- d) None of these

Answer: Method

Question: ____class of Java does not provide any method to reverse a string.

- a) Attribute
- b) Method
- c) String
- d) None of these

Answer: String

Question: Java library also provides class in java.util package.

- a) Data
- b) String
- c) Time
- d) Date

Answer: Date

Question: _____class encapsulates both date and time and represents the value using milliseconds precision.

- a) Data
- b) String
- c) Time
- d) Date

Answer: Date

Question: Method_____constructs Date object using current system time.

- a) Date (long elapsed Time)
- b) Date()
- c) To String()
- d) Get Time()

Answer: Date()

Question: Method____constructs Date object using specified time in milliseconds elapsed since January 1, 1970 GMT.

- a) Date (long elapsed Time)
- b) Date()
- c) To String()
- d) Get Time()

Answer: Date (long elapsed Time)

Question: Method String_____returns a string representing date and time of invoking object.

- a) Date (long elapsed Time)
- b) Date()
- c) To String()
- d) Get Time()

Answer: To String()

Question: Method long____returns number of milliseconds since January 1,1970 GMT.

- a) Date (long elapsed Time)
- b) Date()
- c) ToString()
- d) Get Time()

Answer: Get Time()

Question: Method void set Time (long elapsed Time) sets new date and time of an object using elapsed time.

- a) Set Time (long elapsed Time)
- b) Date()
- c) ToString()
- d) Get Time()

Answer: Set Time (long elapsed Time)

Question: Like Date class _____class is also provided in java.util package.

- a) Data
- b) Calendar
- c) Time
- d) Date

Answer: Calendar

Question: ____class can be used to extract calendar information like year, month, date, hour, minute and second.

- a) Data
- b) Calendar
- c) Time
- d) Date

Answer: Calendar

Question: Like get methods, set methods are used to set the value of the field constants of____class.

- a) Data
- b) Calendar
- c) Time
- d) Date

Answer: Calendar

Question: Execution of call 'calendar.set (Calendar.DATE, 20)' will set the date to_____

- a) Today's date
- b) Yesterday's date
- c) 20th
- d) None of these

Answer: 20th

Question:	the	starting	index	of an	array

- a) 0
- b) 1
- c) Null
- d) All of these

Answer: 0

Question: Array elements are stored in_____

- a) Sequential memory locations.
- b) Scattered memory locations
- c) Direct memory locations
- d) Random memory locations

Answer: Sequential memory locations.

Question: Identify the incorrect declaration of arrays from the following.

- a) Int a[50];
- b) Float values[10] [20];
- c) Double a[50];
- d) Int score [10, 15];

Answer: Int score [10, 15];

Question: Array is used to represent the following.

- a) A list of data items of different data types
- b) A list of data items of real data type.
- c) A list of data items of same data type..
- d) A list of data items of integer data type

Answer: A list of data items of same data type..

Question: Array are passed to a function argument by_____

- a) Value
- b) Reference
- c) Both value and reference
- d) None of these

Answer: Reference

Question: An array a[8] will store how many values?

- a) 8
- b) 7
- c) 9
- d) 0

Answer: 8

Question: If an array is declared as a a[10], then its elements will be stored as

- a) a[l] to a[10]
- b) a[l] to a[9]
- c) a[0] to a[9]
- d) a[0] to a[10]

Answer: a[0] to a[9]

Question: The index or subscript value for an array of size n ranges from

- a) 1 to n-1
- b) 0 to n-1
- c) 1 to n
- d) 0 to n

Answer: 0 to n-1

Question: If a static array is not initialized, the elements will be set to_____

- a) 0
- b) A float number
- c) An undetermined value
- d) A character constant

Answer: 0

Question: If 'a' is the object of String class and its content is "AHMEDABAD", then what is the value of str.length()?

- a) 9
- b) 10
- c) 8
- d) 11

Answer: 9

Question: If 'a' is the object of String class and its content is "C IS A LANGUAGE", then what is the value of str.length()

- a) 14
- b) 15
- c) 12
- d) 11

Answer: 15

Question: What type of value is returned when we use get method of Calender class with constant MONTH?

- a) Char
- b) String
- c) Int
- d) Boolean!

Answer: Int

Question: Method to String() returns____data type.

- a) Char
- b) String
- c) Int
- d) Boolean

Answer: String

Question: Method getTime() returns____data type.

- a) Long
- b) String
- c) Void
- d) Date

Answer: Long

Question: Method concat(String str) returns____datatype,

- a) Long
- b) String
- c) Void
- d) Date

Answer: String

Question: What is the full form of GMT?

- a) Greenwich Median Time
- b) Greenwich Mode Time
- c) Greenwich Modern Time
- d) Greenwich Mean Time

Answer: Greenwich Mean Time

Question: In Java, characters are stored using____bytes.

- a) Four
- b) Three
- c) Two
- d) Five

Answer: Two

Question: To save space, if the characters are_____an array of bytes should be used instead of array of characters.

- a) ASCII
- b) Coded
- c) ACSII
- d) ACIIS

Answer: ASCII

Question: A____can be used with array of bytes as an argument.

- a) Method
- b) Destructor
- c) Variable
- d) Constructor

Answer: Constructor

Question: When two String objects are created using same string literals, memory space is not allocated for_____object.

- a) First
- b) Second
- c) Both (A) and (B)
- d) None of these

Answer: Second

Question: Separate memory is allocated when string objects are created using _____operator even if strings are identical.

- a) New
- b) new
- c) int
- d) Float

Answer: new

Question: Method boolean equals(String str) returns_____if invoking string is same as str.

- a) True
- b) False
- c) Can't say
- d) None of these

Answer: True

Question: A____contains both data and program code (functions referred to as methods).

- a) Function
- b) Class
- c) Attribute
- d) Code

Answer: Class

Question: When the class is executed, the _____method is called and the application runs as a normal program.

- a) Main
- b) Sub
- c) Super
- d) Super Main

Answer: Main

Question: In earlier programs no data____were used.

- a) Codes
- b) Classes
- c) Members
- d) Applications

Answer: Members

Question: While it is possible to use only a single class in a_____project, this is not a good practice for large applications.

- a) Java
- b) C++
- c) PHP
- d) C

Answer: Java

Question: When designing software, the entire____should be divided into simpler components that perform logically related tasks.

- a) Code
- b) Class
- c) Program
- d) Application

Answer: Application

Question: For each above mentioned component or module, a can be created.

- a) Function
- b) Class
- c) Attribute
- d) Code

Answer: Class

Question: When a program contains two or more classes, only one class can cantain the _____method.

- a) Main()
- b) Major
- c) Main()
- d) Minor

Answer: Main()

Question: What is SciTE editor?

- a) SCintilla based Text Editor
- b) Scientific based Text Editor
- c) Sourceful Text Editor
- d) Syntax Text Editor

Answer: SCintilla based Text Editor

Question: A class is a template for multiple objects with similar features.

- a) Function
- b) Class
- c) Attribute
- d) Code

Answer: Class

Question:	embody	all the	features	of a	particular	set of
objects.						

- a) Codes
- b) Classes
- c) Members
- d) Applications

Answer: Classes

Question: For example, class 'Room' is a_____for all rooms with their common properties.

- a) Pattern
- b) Protocol
- c) Template
- d) Model

Answer: Template

Question: In Java, a class is defined using____keyword.

- a) Public
- b) Class
- c) Class
- d) Void

Answer: Class

Question: Every class the programmer writes in Java is generally made up of___components.

- a) Four
- b) Three
- c) Two
- d) One

Answer: Two

Question: _____and behavior are the components of every class.

- a) Properties
- b) Mannerism
- c) Patterns
- d) Attributes

Answer: Attributes

Question: _____are defined by variables in a class.

- a) Properties
- b) Mannerism
- c) Patterns
- d) Attributes

Answer: Attributes

Question:	is defined by methods in a class.
a) Behaviorb) Mannerism	
c) Patternsd) Properties	
Answer: Behavior	
Question:	_are used to access or modify attributes.
a) Behavior b) Mathada	
b) Methodsc) Modifiers	
• d) Attributes	
Answer: Methods	
	_means a reference variable name of type class.
a) Instantiationb) Initialization	
• c) Declaration	
• d) Modification	
Answer: Declaration	
	is declared with syntax.
a) Instantiationb) Initialization	
• c) Declaration	
• d) Modification	
Answer: Declaration	
Question:	means creating the object by allocating the memory.
• a) Instantiation	means creating the object by anocating the memory.
• b) Initialization	
c) Declarationd) Modification	
Answer: Instantiation	
•	wordis used to create the object by allocating
memory.	
a) Oldb) old	
• c) New	
• d) new	
Answer: new	

https://www.studiestoday.com/mcq-computer-science-cbse-class-12-computer-science-classes-and-objects-java-mcqs-set-312647.html

• a) Initialization

Question: _____means to initialize the newly created object.

- b) Instantiation
- c) Declaration
- d) Modification

Answer: Initialization

Question: A_____is called to initialize the newly created object.

- a) Variable
- b) Constructor
- c) Class
- d) Method

Answer: Constructor

Question: A_____is a special type of method.

- a) Variable
- b) Constructor
- c) Class
- d) Method

Answer: Constructor

Question: In Java, a class is a_____

- a) Brand
- b) Kind
- c) Type
- d) Form

Answer: Type

Question: In Java, the ____examples are int and Boolean.

- a) Brand types
- b) Form types
- c) Built-in types
- d) None of these

Answer: Built-in types

Question: A____can be used to specify the type of a variable in a declaration statement, the type of a formal parameter, or the return type of a function.

- a) Class declaration
- b) Class name
- c) Class types
- d) All of these

Answer: Class name

Question: Declaring a variable does not create a_____

- a) Object
- b) Memory space
- c) Class
- d) Boolean

Answer: Object

Question: In Java, no____can ever store an object.

- a) Variable
- b) Constructor
- c) Class
- d) Method

Answer: Variable

Question: A variable declared using class type can only store a____to an object.

- a) Orientation
- b) Position
- c) Reference
- d) Indication

Answer: Reference

CBSE Class 12 Computer Science Classes and Objects In Java MCQs Set B with answers available in Pdf for free download. The MCQ Questions for Class 12 Computer Science with answers have been prepared as per the latest syllabus, NCERT books and examination pattern suggested in Standard 12 by CBSE, NCERT and KVS. Multiple Choice Questions are an important part of Term 1 and Term 2 exams for Grade 12 Computer Science and if practiced properly can help you to get higher marks. Refer to more Chapter-wise MCQs for NCERT Class 12 Computer Science and also download more latest study material for all subjects

Classes and Objects In Java Class 12 Computer Science MCQ

Class 12 Computer Science students should refer to the following multiple-choice questions with answers for Classes and Objects In Java in standard 12. These MCQ questions with answers for Grade 12 Computer Science will come in exams and help you to score good marks

Classes and Objects In Java MCQ Questions Class 12 Computer Science with Answers

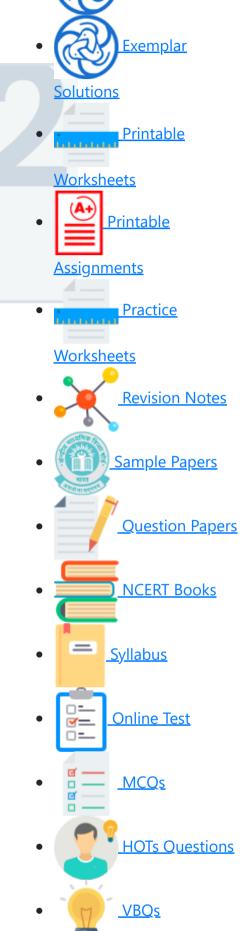

Question: Variable of class type are also referred to as variables.

- a) Orientation
- b) Position
- c) Reference
- d) Indication

Answer: Reference

Question: Using____keyword, an object can be created.

- a) Int
- b) Float

Answer: Constructor

Question: An object can be created of type Room and assign its address to variable rl as_

- a) rl = new Room();
- b) rl = Room() new;
- c) rl = Class Room();
- d) None of these

Answer: rl = new Room();

Question: With empty parentheses without arguments, a default_____is called.

- a) Function
- b) Constructor
- c) Class
- d) Method

Answer: Constructor

Question: A____initializes the attributes (variables) of the object using default values.

- a) Function
- b) Constructor
- c) Class
- d) Method

Answer: Constructor

Question: The____can contain arguments that determine the initial values of variables.

- a) Room
- b) Brackets
- c) Parentheses
- d) Class

Answer: Parentheses

Question: Observe the following Room r2 = new RoomO: - Variable r2 contains a_____or address of memory location where a new object is created.

- a) Memory
- b) Variable
- c) Reference
- d) None of these

Answer: Reference

Question: The class determines only the ______ of the variables.

- a) Types
- b) Collection
- c) Location
- d) Set

Answer: Types

Question: The actual_____is contained inside the individual objects and not in the class.

- a) Information
- b) Data
- c) Collection
- d) Variables

Answer: Data

Question:	Every	has its	own	set	of	data

- a) Class
- b) Variable
- c) Operator
- d) Object

Answer: Object

Question: _____allocated different memory space to hold their data values.

- a) Classes
- b) Variables
- c) Operators
- d) Objects

Answer: Objects

Question: In Java, when____are no more needed, the memory is claimed back for reuse.

- a) Classes
- b) Variables
- c) Operators
- d) Objects

Answer: Objects

Question: Java has a garbage collector that looks for unused____and reclaims the memory that those objects are using.

- a) Objects
- b) Variables
- c) Cells
- d) Memory spaces

Answer: Objects

Question: In Java, there is no requirement to do any explicit freeing of____

- a) Cells
- b) Variables
- c) Memory
- d) Class

Answer: Memory

Question: In Object-oriented programming (OOP) languages, creating an object is also called____instantiation.

- a) Class
- b) Object
- c) Inheritance
- d) Polymorphism

Answer: Object

Question: An_____for an object is created by allocating memory to store data for that object.

- a) Instance
- b) Example
- c) Illustration
- d) None of these

Answer: Instance

Question: An object that belongs to a____is said to be an instance of that class.

- a) Cells
- b) Variables
- c) Memory
- d) Class

Answer: Class

Question: An_____of a class is another word for an actual object.

- a) Instance
- b) Example
- c) Memory
- d) None of these

Answer: Instance

Question: _____is an abstract representation of an object, whereas an instance is its concrete representation.

- a) Cells
- b) Variables
- c) Memory
- d) Class

Answer: Class

Question: The terms instance and object are often used interchangeably in____languages.

- a) Programming
- b) OOP
- c) All
- d) None of these

Answer: OOP

Question: Each_____of a class can hold different values for its attributes in variables declared in a class.

- a) Instance
- b) Example
- c) Illustration
- d) None of these

Answer: Instance

Question:	_variables are	created at the	e time of	creating an	object
and stay through	phout the life	of the object.			

- a) Program
- b) Instance
- c) Inherited
- d) Duplicate

Answer: Instance

Question: ____variables define the attributes of an object.

- a) Program
- b) Instance
- c) Inherited
- d) Duplicate

Answer: Instance

Question: The_____defines the kind of attribute.

- a) Program
- b) Variables
- c) Property
- d) Class

Answer: Class

Question: Each____stores its own value for that attributes.

- a) Program
- b) Instance
- c) Inherited
- d) Duplicate

Answer: Instance

Question: To define an object's behaviour_____are created.

- a) Instances
- b) Programs
- c) Methods
- d) Functions

Answer: Methods

Question: In Java____can be defined inside a class only.

- a) Instances
- b) Programs
- c) Methods
- d) Functions

Answer: Methods

Question: The____can be invoked using the objects to access or modify the instance variables.

- a) Instances
- b) Programs
- c) Methods
- d) Functions

Answer: Methods

Question: The___invoked using the objects are known as instance methods.

- a) Instances
- b) Programs
- c) Methods
- d) Functions

Answer: Methods

Question: _____methods are used to define behaviour of an object.

- a) Program
- b) Instance
- c) Inherited
- d) Duplicate

Answer: Instance

Question: Invoking a_____is to ask the object to perform some task.

- a) Instance
- b) Program
- c) Method
- d) Function

Answer: Method

Question: Objects are created with the ____keyword.

- a) new
- b) New
- c) NEW
- d) nEW

Answer: new

Question: The____keyword returns a reference to an object that represents an instance of the class.

- a) new
- b) New
- c) NEW
- d) nEW

Answer: new

Question: All instances of class are allocated memory in data structure called_____

- a) Pile
- b) Heap

- c) Mound
- d) New

Answer: Heap

Question: Each object____has its own set of data.

- a) Example
- b) Instance
- c) Function
- d) Method

Answer: Instance

Question: Instance variables and instance methods are accessed via

- a) Classes
- b) Variables
- c) Operators
- d) Objects

Answer: Objects

Question: Objects can be referred by using____operator.

- a) Colon (:)
- b) Underscore(_)
- c) Dot (.)
- d) Angle Bracket(<)

Answer: Dot (.)

Question: The____is an operator.

- a) Colon (:)
- b) Underscore(_)
- c) Dot (.)
- d) Angle Bracket(<)

Answer: Dot (.)

Question: Associatively of____operator is from left to right.

- a) Colon (:)
- b) Underscore()
- c) Dot (.)
- d) Angle Bracket(<)

Answer: Dot (.)

Question: Protection of data is possible with the use of access_____

- a) Modifiers
- b) Operators
- c) Methods
- d) None of these

Answer: Modifiers

Question: When the instance variables are referred within the methods of the same class, there is no need to use____operator.

- a) Colon (:)
- b) Underscore(_)
- c) Dot (.)
- d) Angle Bracket(<)

Answer: Dot (.)

Question: When the programmer declares an object_____object is not created.

- a) Class
- b) Variable
- c) Operator
- d) Method

Answer: Class

Question: Reference variable does not refer to any object and its initial value is____by default.

- a) Zero
- b) One
- c) Null
- d) Minus one

Answer: Null

Question: Use of null reference or null pointer is illegal and may raise an

- a) Exception
- b) Negative value
- c) Reference value
- d) None of these

Answer: Exception

Question: Referring instance variable or invoking method with null reference will give an_____

- a) Example
- b) Error
- c) Mistake
- d) Inaccurate result

Answer: Error

Question: The following code is_____System.out.println(rl.length);

- a) Legal
- b) Illegal
- c) Both (A) and (B)
- d) None of these

Answer: Illegal

Question: When	an object is created using new keyword, memory is	5
allocated from	area to store the value of its attributes.	

- a) Pile
- b) Heap
- c) Mound
- d) New

Answer: Heap

Question: Every object has its own_____variables occupying different space in memory.

- a) Example
- b) Instance
- c) Function
- d) Method

Answer: Instance

Question: To store the value, it requires only one_____per class.

- a) Class
- b) Variable
- c) Operator
- d) Method

Answer: Variable

Question: Variables can be declared within a class using____keyword before data type.

- a) Public
- b) New
- c) Static
- d) PrintIn

Answer: Static

Question: variables are called class variables.

- a) Public
- b) New
- c) Static
- d) Private

Answer: Static

Question: Values of instance variables are stored in____(memory allocated for the object).

- a) Memory
- b) Instance
- c) Property
- d) Method

Answer: Instance

	Question:	Values of	variables	are stored	in	class	itself.
--	-----------	-----------	-----------	------------	----	-------	---------

- a) Class
- b) Variable
- c) Operator
- d) Method

Answer: Class

Question: _____variables can be accessed without creating an instance of a class.

- a) Public
- b) New
- c) Static
- d) Private

Answer: Static

Question: Just like class variable, class____can be defined using static keyword in front of the method definition.

- a) Class
- b) Variable
- c) Operator
- d) Method

Answer: Method

Question: _____variables and class methods can be accessed outside the class.

- a) Class
- b) Variable
- c) Operator
- d) Method

Answer: Class

Question: If the requirement is there that private data has to be modified by others, then__methods have to be written.

- a) Accessor
- b) Mutator
- c) Restricted
- d) Prefixed

Answer: Mutator

Question: Conventionally, naming of accessor and mutator methods is to capitalize the first letter of variable name and then prepend the variable name with the prefixes_____respectively.

- a) Set and get
- b) Get and setter
- c) Getter and set
- d) Get and set

Answer: Get and set

	Q	uestion:	methods	are	also	known	as	"getter"	
--	---	----------	---------	-----	------	-------	----	----------	--

- a) Accessor
- b) Mutator
- c) Restricted
- d) Prefixed

Answer: Accessor

Question: _____methods are also known as "setter".

- a) Accessor
- b) Mutator
- c) Restricted
- d) Prefixed

Answer: Mutator

Question: _____methods should be used to allow other methods to read only the data value.

- a) Get
- b) Set
- c) Getter
- d) Setter

Answer: Getter

Question: ____methods should be used to allow other methods to modify the data value.

- a) Get
- b) Set
- c) Getter
- d) Setter

Answer: Setter

Question: Just like variables of primitive data types and available built-in data types, objects can also be passed as_____in a method.

- a) Parameters
- b) Limit
- c) Protocols
- d) None of these

Answer: Parameters

Question: _____of primitive types are passed by value.

- a) Parameters
- b) Limit
- c) Protocols
- d) None of these

Answer: Parameters

Question: The values of actual_____are copied to formal parameters and then function is executed.

- a) Parameters
- b) Limit
- c) Protocols
- d) None of these

Answer: Parameters

Question: Object parameters are passed by_____

- a) Memory value
- b) Memory reference
- c) Variable value
- d) Reference

Answer: Reference

Question: An address (and not value) of the actual_____is copied to formal parameter.

- a) Protocol
- b) Parameter
- c) Value
- d) All of these

Answer: Parameter

Question: Object-oriented programming languages provide reusability feature using_____

- a) Polymorphism
- b) Parameters
- c) Inheritance
- d) All of these

Answer: Inheritance

Question: ____allows us to build new class with added capabilities by extending existing class.

- a) Polymorphism
- b) Parameters
- c) Inheritance
- d) All of these

Answer: Inheritance

Question: Inheritance models_____relationship between two classes.

- a) 'is-a'
- b) 'its-a'
- c) 'has-a'
- d) 'is-at'

Answer: 'is-a'

Question: class is also referred to	o as sup	per class or	base class.
-------------------------------------	----------	--------------	-------------

- a) Child
- b) Parent
- c) Sub
- d) None of these

Answer: Parent

Question: In the same way; child class is also referred to derived class or extended class.

- a) Inherited Class
- b) Parent Class
- c) Sub Class
- d) Super class

Answer: Sub Class

Question: Whenever two classes have_____relationship, inheritance is used.

- a) 'is-a'
- b) 'its-a'
- c) 'has-a'
- d) 'is-at'

Answer: 'is-a'

Question: A_____inherits all instance variables and methods from super class and it may have its own added variables and methods.

- a) Inherited Class
- b) Parent Class
- c) Sub Class
- d) Super class

Answer: Sub Class

Question: Constructors are not inherited in_____

- a) Inherited Class
- b) Parent Class
- c) Sub Class
- d) Super class

Answer: Sub Class

Question: _____inherits all methods of super class and it may have additional methods.

- a) Inherited Class
- b) Parent Class
- c) Sub Class
- d) Super class

Answer: Sub Class

Question: A sub class is not a subset of_____In fact, sub class usually contains more information and methods than its super class.

- a) Inherited Class
- b) Parent Class
- c) Sub Class
- d) Super class

Answer: Super class

Question: When an object of____is instantiated, memory is allocated for all its attributes including inherited ones.

- a) Inherited Class
- b) Parent Class
- c) Sub Class
- d) Super class

Answer: Sub Class

Question: In Java, to create a sub class, keyword '____' is used in the class definition.

- a) Extends
- b) Int
- c) Float
- d) Create

Answer: Extends

Question: If the visibility of instance variables of_____is changed to private, the variables are not directly accessible outside the class.

- a) Inherited Class
- b) Parent Class
- c) Sub Class
- d) Super class

Answer: Super class

Question: _____members are directly available only in the class in which they are defined and nowhere else.

- a) Public
- b) Private
- c) Protected
- d) Packaged

Answer: Private

Question: _____members are available as 'private' members in the inherited sub class.

- a) Public
- b) Private
- c) Protected
- d) Packaged

Answer: Protected

Question: Java does not support multiple_____

- a) Polymorphism
- b) Parameters
- c) Inheritance
- d) All of these

Answer: Inheritance

Question: A sub class can be derived from only one_____

- a) Inherited Class
- b) Parent Class
- c) Sub Class
- d) Super class

Answer: Sub Class

Question: Which of the following defines attributes and methods?

- a) Class
- b) Object
- c) Instance
- d) Variable

Answer: Class

Question: Which of the following keyword is used to declare Class variables and class methods?

- a) Static
- b) Private
- c) Public
- d) Package

Answer: Static

Question: Which of the following operator creates an object and returns its reference?

- a) Dot (.)
- b) New
- c) Colon (:)
- d) Assignment (=)

Answer: New

Question: Which of the following method can be called without creating an instance of a class?

- a) Instance method
- b) Class method
- c) Constructor method
- d) All of the above

Answer: Class method

Question: Which of the following refers more than one method having same name but different parameters?

- a) Overloaded methods
- b) Overridden methods
- c) Duplicate methods
- d) All of the above

Answer: Overloaded methods

Question: Which method is invoked automatically with creation of an object ?

- a) Instance method
- b) Constructor
- c) Class method
- d) All of the above

Answer: Constructor

Question: Which of the following is the keyword used to refer a superclass constructor in sub class constructor?

- a) Extends
- b) Super
- c) Name of the superclass
- d) New

Answer: Extends

Question: Which of the following is used to invoke an instance method in Java?

- a) The name of the object, colon(:) and the name of the method
- b) The name of the object, dot(.) and the name of the method
- c) The name of the class, colon(:) and the name of the method
- d) The name of the class, dot(.) and the name of the method

Answer: The name of the object, dot(.) and the name of the method

Question: _____members are directly available only in the class in which they are defined and nowhere else.

- a) Public
- b) Private
- c) Protected
- d) Packaged

Answer: Private

Question: _____members are available as 'private' members in the inherited sub class.

- a) Public
- b) Private
- c) Protected
- d) Packaged

Answer: Protected

Question: Java does not support multiple	
--	--

- a) Polymorphism
- b) Parameters
- c) Inheritance
- d) All of these

Answer: Inheritance

Question: A sub class can be derived from only one_____

- a) Inherited Class
- b) Parent Class
- c) Sub Class
- d) Super class

Answer: Sub Class

Question: _____methods are global to the class itself and available to any other classes or objects.

- a) Class
- b) Variable
- c) Operator
- d) Method

Answer: Class

Question: Class methods can be used anywhere regardless of whether an_____of the class exists or not.

- a) Example
- b) Instance
- c) Illustration
- d) Method

Answer: Instance

Question: The methods that operate on a particular object, or affect that object, should be defined as____methods.

- a) Example
- b) Instance
- c) Illustration
- d) Method

Answer: Instance

Question: _____that provide some general utility but do not directly affect an instance of the class are better declared as class methods.

- a) Methods
- b) Functions
- c) Instances
- d) Examples

Answer: Methods

Question: The designers of Java have already provided a large number of____classes with such class methods.

- a) Programmed
- b) Internal
- c) Built-in
- d) Built-out

Answer: Built-in

Question: The _____definitions in the source code specify the things that are part of the class itself.

- a) Public
- b) Non-static
- c) Static
- d) Private

Answer: Static

Question: The_____definitions in the source code specify the things that will become part of every instance object belonging to a class.

- a) Public
- b) Non-static
- c) Static
- d) Private

Answer: Non-static

Question: Class variables and class methods can be accessed using a class name or____variable.

- a) Reference
- b) Instance
- c) New
- d) Private

Answer: Reference

Question: Class variables and class methods can be accessed from____methods also.

- a) Reference
- b) Instance
- c) New
- d) Private

Answer: Instance

Question: Instance variables and _____methods can't be accessed from class methods, as class methods do not belong to any object.

- a) Reference
- b) Instance
- c) New

• d) Private

Answer: Instance

Question: Variables defined inside methods or blocks are called____variables.

- a) Public
- b) Global
- c) Private
- d) Local

Answer: Local

Question: Formal parameters of the methods are also____variables.

- a) Public
- b) Global
- c) Private
- d) Local

Answer: Local

Question: ____variables are not initialized by default values.

- a) Public
- b) Global
- c) Private
- d) Local

Answer: Local

Question: _____variables are variables defined within a class but outside any method.

- a) Instance
- b) Private
- c) Local
- d) Global

Answer: Instance

Question: _____variables are allocated memory from heap area when an object is instantiated (created).

- a) Class
- b) Instance
- c) Local
- d) Global

Answer: Instance

Question: ____variables are initialized by default values.

- a) Class
- b) Instance
- c) Local
- d) Global

Answer: Instance

Question:	variables are variables defined within a class	, outside
any method,	with the static keyword.	

- a) Class
- b) Instance
- c) Local
- d) Global

Answer: Class

Question: _____variables are allocated memory only once per class and is shared by all its objects.

- a) Class
- b) Instance
- c) Local
- d) Global

Answer: Class

Question: ____variables are initialized with default values.

- a) Class
- b) Instance
- c) Local
- d) Global

Answer: Class

Question: ____requires the use of constructors.

- a) Declaration
- b) Instantiation
- c) Initialization
- d) Inheritance

Answer: Initialization

Question: The word_____means "many forms"; different forms of methods with same name.

- a) Declaration
- b) Instantiation
- c) Polymorphism
- d) Inheritance

Answer: Polymorphism

Question: In Java, there can be different methods that have the same name but different_____

- a) Variables
- b) Declarations
- c) Programs
- d) Signature

Answer: Signature

Question: The above feature of Java is called_____

- a) Method Overloading
- b) Method Offloading
- c) Variable Overloading
- d) Program Overloading

Answer: Method Overloading

Question: The methods_____is a combination of the method name, the type of return value (object or base type), a list of parameters.

- a) Variables
- b) Declarations
- c) Programs
- d) Signature

Answer: Signature

Question: The example given below is an example of: static int max(int x, int y) {...} static int max(int x, int y, int z) {...} static double max(double x, double y, double z)

- a) Method Overloading
- b) Method Offloading
- c) Variable Overloading
- d) Program Overloading

Answer: Method Overloading

Question: _____is a special kind of method that is invoked when a new object is created.

- a) Destructor
- b) Constructor
- c) Invoker
- d) Creator

Answer: Constructor

Question: can perform any action; but it is mainly designed to perform initializing actions.

- a) Destructor
- b) Constructor
- c) Invoker
- d) Creator

Answer: Constructor

Question: Every class is having its default constructor; sometimes referred to as no-argument_____

- a) Destructor
- b) Constructor
- c) Invoker

• d) Creator

Answer: Constructor

Question: Default____does not take any argument.

- a) Destructor
- b) Invoker
- c) Constructor
- d) Creator

Answer: Constructor

Question: _____initializes the attributes of a newly created object using default values based on their data types.

- a) Destructor
- b) Invoker
- c) Constructor
- d) Creator

Answer: Constructor

Question: Constructor must have the same____as class name.

- a) Name
- b) Style
- c) Format
- d) Arrangement

Answer: Name

Question: Constructor user not have____type.

- a) Data
- b) Return
- c) Operator
- d) All of these

Answer: Return

Question: Constructor is invoked implicitly only when an object is constructed using____operator.

- a) new
- b) New
- c) NEW
- d) nEW

Answer: new

Question: ____cannot be invoked explicitly elsewhere in the program.

- a) Destructor
- b) Invoker
- c) Constructor
- d) Creator

Answer: Constructor

Question: Like other methods, constructor ca	n also	so be	overloa	ded.
--	--------	-------	---------	------

- a) Destructor
- b) Invoker
- c) Constructor
- d) Creator

Answer: Constructor

Question: In absence of _____constructors in a class, objects are constructed using default no-arument constructor.

- a) Denned
- b) User-defined
- c) Built in
- d) Ready-made

Answer: User-defined

Question: A no-argument____initializes the attributes using default values.

- a) Destructor
- b) Invoker
- c) Constructor
- d) Creator

Answer: Constructor

Question: The syntax of a no-argument constructor is_____

- a)[]
- b){ };
- c)() {}
- d)() { };

Answer: () { };

Question: ____control is about controlling visibility.

- a) Access
- b) Modifier
- c) Visibility
- d) Entrance

Answer: Access

Question: _____modifiers are also known as visibility modifiers.

- a) Access
- b) Modifier
- c) Visibility
- d) Entrance

Answer: Access

Question: If a method	l or variable is	visible to	another	class,	then	only
it can be referred in a	nother					

- a) Class
- b) Method
- c) Program
- d) Application

Answer: Class

Question: The Four P's of protection are

- a) Public
- b) Package (default protection)
- c) Protected and Private
- d) All of these

Answer: All of these

Question: _____modifiers public, protected and private are used before the type of variable or method.

- a) Access
- b) Modifier
- c) Visibility
- d) Entrance

Answer: Access

Question: _____is used to organize classes.

- a) Public
- b) Package
- c) Protected
- d) Private

Answer: Package

Question: _____statement should be added as the first non-comment or non-blank line in the source file.

- a) Public
- b) Package
- c) Protected
- d) Private

Answer: Package

Question: When a file does not have package statement, the classes defined in the file are placed in _____package.

- a) Public
- b) File
- c) Default
- d) Private

Answer: Default

Question: Package statement has _____syntax.

- a) Package < packageName>;
- b) Package < packageName>
- c) Package < Name>;
- d) Package packageName;

Answer: Package < packageName>;

Question: Any_____or variable is visible to the class in which it is defined.

- a) Data type
- b) Method
- c) File
- d) Information

Answer: Method

Question: To provide_____access, use access modifier public before type of variable or method.

- a) Public
- b) File
- c) Default
- d) Private

Answer: Public

Question: _____keyword has been used with main() method to make it available to everyone.

- a) Public
- b) File
- c) Default
- d) Private

Answer: Public

Question: _____keyword is used to allow the access only to sub classes or to share with the methods declared as "friend".

- a) Public
- b) Private
- c) Protected
- d) Default

Answer: Protected

Question: Use of _____protection becomes more relevant when inheritance concept is used in object-oriented programming.

- a) Public
- b) Private
- c) Protected
- d) Default

Answer: Protected

Question: Highest	level of	protection	can be	achieved	by using
"" protection	ı level.				

- a) Public
- b) Private
- c) Protected
- d) Default

Answer: Private

Question: _____provides the narrowest visibility.

- a) Public
- b) Private
- c) Protected
- d) Default

Answer: Private

Question: The_____methods and variables are directly accessible only by the methods defined within a class.

- a) Public
- b) Private
- c) Protected
- d) Default

Answer: Private

Question: _____methods may seem extremely restrictive, but it is, in fact, a commonly used level of protection.

- a) Public
- b) Private
- c) Protected
- d) Default

Answer: Private

Question: Private provides____encapsulation; hiding data from the world's sight and limiting its manipulation.

- a) Information
- b) Variable
- c) Data
- d) Data type

Answer: Data

Question: Anything that shouldn't be directly shared with anyone including its sub class is_____

- a) Public
- b) Private
- c) Protected
- d) Default

Answer: Private

Question: When access to data is restricted by declaring them as ______the purpose is to protect them from getting directly accessed or modified by methods of other class.

- a) Public
- b) Default
- c) Protected
- d) Private

Answer: Private

Question: If the requirement is there that private data has to be used by others, then____methods have to be written.

- a) Accessor
- b) Mutator
- c) Restricted
- d) Prefixed

Answer: Accessor

Question: Which of the following is the tag used to implement form element?

- a) <frm>... </frm>
- b) </form>...</form>
- c) <form>... <form>
- d) <form>...</form>

Answer: <form>...</form>

Question: Which of the following attribute of form is used to specify where to send the form data when the form is submitted?

- a) Method
- b) Action
- c) Submit
- d) Input

Answer: Action

Question: Which of the following attribute of form specifies the HTTP method to be used when sending the data?

- a) Submit
- b) Action
- c) Method
- d) Input

Answer: Method

Question: Which of the following method allows only a limited amount of information to be seen at a time?

- a) GET
- b) POST
- c) SET
- d) PUT

Answer: GET

Question: Which of the following values are used by method attribute?

- a) GET and POST
- b) GET and SET
- c) GET and PUT
- d) SET and POST

Answer: GET and POST

Question: Which of the following method sends the data as a block through the HTTP transaction?

- a) GET
- b) SET
- c) PUT
- d) POST

Answer: POST

Question: Which of the following attribute of the input element specifies the field that is to be created in the form?

- a) Input
- b) Type
- c) Name
- d) Value

Answer: Type

Question: Which of the following element allow multi-line text input?

- a) Text area
- b) Input
- c) Select and Option
- d) Form

Answer: Text area

Question: Which of the following element is used to create a drop down list or menu in a form?

- a) Input
- b) Text area
- c) Select
- d) Form

Answer: Select

Question: Which of the following is a free open source web development IDE?

- a) HTML
- b) KompoZer
- c) S Cite
- d) Base

Answer: KompoZer

Question: Which of the following stands for "WYSIWYG"?

- a) When You See Is When You Get
- b) What You See Is When You Get
- c) What You See Is What You Get
- d) When You See Is What You Get

Answer: What You See Is What You Get

Question: Whose increase in the use has resulted in many activities becoming online?

- a) Internet
- b) Mobile
- c) GPS
- d) Social Networking

Answer: Internet

Question: What is used to fill information about various product?

- a) Server Page
- b) Home Page
- c) Web Page
- d) Master Page

Answer: Web Page

Question: What is used to help the visitors of the website to input data?

- a) Table
- b) Form
- c) Database
- d) File

Answer: Form

Question: What is well organized structure designed to input the required data and information of website is called?

- a) Database
- b) Table
- c) Form
- d) Report

Answer: Form

Question: Which of the following option is true with respect to form ?

- a) Required information are filled in the form
- b) Well organized input of information is done using form
- c) Form contains well organized structure.
- d) NONE OF THESE

Answer: NONE OF THESE

Question: The method of adding information in the form of the web page is similar to which type of form?

- a) Printed form
- b) Hand written form
- c) Online form
- d) Offline form

Answer: Printed form

Question: What does the form allow?

- a) Interactivity
- b) Control in data entry
- c) Both (A) and (B)
- d) None of these

Answer: Both (A) and (B)

Question: What is form?

- a) Source Code
- b) Object
- c) Container
- d) Edit

Answer: Container

Question: From the list given below what is used to collect different kinds of inputs from the user?

- a) Table
- b) Report
- c) Form
- d) Query

Answer: Form

Question: Which of the following element does the form contain?

- a) Label, Check box
- b) Text input field, Radio button
- c) Submit button, Reset button
- d) All of these

Answer: All of these

Question: What is the use of various element of form?

- a) Enter the data
- b) Validate the data
- c) Both (A) and (B)
- d) None of these

Answer: Both (A) and (B)

Question: Using which of the following a form can be designed easily

- a) HTML
- b) Word Pad
- c) XML
- d) Form Liner

Answer: HTML

Question: What is the full form of HTML?

• a) Hyper Text Manage Language

- b) Hyper Text Markup Language
- c) Hyper Text Marker Language
- d) Hyper Text Marking Language

Answer: Hyper Text Markup Language

Question: How many parts are elements of form divided into?

- a) Two
- b) Three
- c) Four
- d) Five

Answer: Four

Question: Which from the given below are the elements of form?

- a) Form, Input
- b) Text area
- c) Select and Option
- d) All of these

Answer: All of these

Question: Which container is used to collect different kinds of inputs from the user?

- a) Table
- b) Form
- c) Report
- d) Query

Answer: Form

Question: Which element is used to create an HTML form?

- a) Form
- b) Frm
- c) Frmsrc
- d) Formset

Answer: Form

Question: What acts as a container for all the elements used in the form?

- a) Table
- b) Report
- c) Form
- d) Frame

Answer: Form

Question: Which of the following is the tag used to implement form element?

- a) <frm>... </frm>
- b) </form>...</form>
- c) <form>... <form>

• d) <form>...</form>

Answer: <form>...</form>

Question: Which from the given below shows the example of use of the form element?

- a) Input elements
- b) Input-elements
- c) Input elements
- d) Input elements

Answer: Input elements

Question: How many attributes does form tag have?

- a) Two
- b) Three
- c) Four
- d) Five

Answer: Two

Question: Which of the given below are the attributes of the form tag?

- a) Action
- b) Method
- c) Both (A) and (B)
- d) None of these

Answer: Both (A) and (B)

Question: Which attribute of form element is used to specify where to send the form data when the form is submitted?

- a) Method
- b) Action
- c) (A) or (B)
- d) None of these

Answer: Action

Question: Which attribute of tag is used to control the processes executing after the form is submitted?

- a) Action
- b) Method
- c) (A) or (B)
- d) None of these

Answer: Action

Question: What does action attribute take as value?

- a) Website name
- b) Name of web server
- c) File name

• d) Name of folder

Answer: File name

Question: After filling the data in the form, the file specified in action attribute is opened when the user clicks on which button?

- a) Finish button
- b) OK button
- c) Reset button
- d) Submit button

Answer: Submit button

Question: Which attribute of form element specifies the HTTP method to be used when sending the data?

- a) Action
- b) Method
- c) (A) or (B)
- d) None of these

Answer: Method

Question: What is the full form of HTTP?

- a) Hyper Text Taged Protocol
- b) Hyper Text Timeline Protocol
- c) Hyper Text Transfer Protocol
- d) Hyper Text Terminal Protocol

Answer: Hyper Text Transfer Protocol

Question: Which attribute decides how to submit the information of form on specified address?

- a) Method
- b) Action
- c) (A) or (B)
- d) None of these

Answer: Method

Question: How many values can method attribute of form element

- a) Two
- b) Three
- c) Four
- d) Five

Answer: Two

Question: Which values can method attribute of form element take?

- a) HTML, HTTP
- b) Get, Post
- c) Action, Method

• d) Any of these

Answer: Get, Post

Question: Which is the default value of method attribute of form element?

- a) Get
- b) Post
- c) Action
- d) (A) or (B)

Answer: Get

Question: Which value of method attribute adds the retrieved data from the form to the end of URL and sends to the server?

- a) Post
- b) Get
- c) Action
- d) All of these

Answer: Get

Question: What is the full form of URL?

- a) Uniform Redefine Locator
- b) Uniform Rearrange Locator
- c) Uniform Reform Locator
- d) Uniform Resource Locator

Answer: Uniform Resource Locator

Question: Which of the following shows the use of action attribute?

- a) To specify the address where the information has to be sent when form is submitted.
- b) To specify the specifications of HTTP
- c) Both (A) and (B)
- d) None of these

Answer: To specify the address where the information has to be sent when form is submitted.

Question: Which value of method attribute provides facility of sending limited information at one time?

- a) Get
- b) Post
- c) Action
- d) (A) or (B)

Answer: Get

Question: Which value of method attribute sends information in form of blocks using HTTP transaction?

- a) Post
- b) Get
- c) Action

• d) All of these

Answer: Post

Question: Which of the following term provides facility of sending information in form of blocks using HTTP transaction?

- a) Get
- b) Action
- c) Post
- d) Any of these

Answer: Post

Question: Which of the following specifies the use of method attribute?

- a) Specifies the address where the information has to be sent after submitting the form.
- b) Specifies the HTTP method.
- c) Both (A) and (B)
- d) None of these

Answer: Specifies the HTTP method.

Question: Which value of method attribute sends information in the form of request?

- a) Get
- b) Post
- c) Action
- d) (A) or (B)

Answer: Post

Question: Which value of method attribute does not have any restriction of length of information?

- a) Post
- b) Get
- c) Action
- d) All of these

Answer: Post

Question: Which elements are used in form?

- a) Input objects
- b) Output objects
- c) Process objects
- d) All of these

Answer: Input objects

Question: Which of the given below is an example of Input element?

- a) Text box, Password
- b) Radio button, Check box
- c) Submit button, Reset button

• d) All of these

Answer: All of these

Question: Which tag is used to implement input element in the form?

- a) <input>
- b) <input>....</input>
- c) (A) or (B)
- d) None of these

Answer: (A) or (B)

Question: Which attribute is used along with <input> tag?

- a) Type
- b) Name
- c) Value
- d) All of these

Answer: All of these

Question: Which attribute of the input element specifies the Held that is to be created in the form?

- a) Type
- b) Name
- c) Value
- d) All of these

Answer: Type

Question: What is the use of type attribute?

- a) To specify the field that is to be created.
- b) To specify the name to be used for the field,
- c) To specify the default value of the field.
- d) All of these

Answer: To specify the field that is to be created.

Question: Which attribute of the input element specifies the name to be used for the field in the form?

- a) Type
- b) Name
- c) Value
- d) Any of these

Answer: Name

Question: What is the use of name attribute?

- a) To specify the field that is to be created.
- b) To specify the name to be used for the field.
- c) To specify the default value of the field.
- d) All of these

Answer: To specify the name to be used for the field.

Question: Which attribute of the input element specifies the default value of the field in the form?

- a) Type
- b) Name
- c) Value
- d) Any of these

Answer: Value

Question: What is the use of value attribute?

- a) To specify the field that is to be created
- b) To specify the name to be used for the field
- c) To specify the default value of the field
- d) All of these

Answer: To specify the name to be used for the field

Question: Which are the various input elements that can be created using type attribute of <input> tag?

- a) Submit button, Reset button
- b) Text box
- c) Radio button, check box, drop down menu
- d) All of these

Answer: All of these

Question: Which input element is used to enter text in the form?

- a) Password
- b) Text box
- c) Radio button
- d) Check box

Answer: Text box

Question: From the given options below, what is the text box used for ?

- a) Title of the web page
- b) User's name
- c) E-mail address
- d) All of these

Answer: All of these

Question: Which element is used to create text box in form?

- a) Text
- b) Box
- c) Text Box
- d) Text Line

Answer: Text

Question: Which type of data can be entered in the text box?

- a) Text
- b) Numeric
- c) Symbolic
- d) All of these

Answer: All of these

Question: What is the syntax of creating text box in the form?

- a) <input type = text name=var value=txt>
- b) <input type = "text" name="var" value="txt">
- c) <input type = 'text' name='var' value='txt'>
- d) {<input type = "text" name="var" value="txt">}

Answer: <input type = "text" name="var" value="txt">

Question: Which element is used to create password field in form?

- a) Password
- b) Text box
- c) Radio button
- d) Check box

Answer: Password

Question: Password field is similar to which of the following?

- a) Drop down menu
- b) Text box
- c) Radio button
- d) Check box

Answer: Text box

Question: Characters are not displayed to the user in which of the following?

- a) Radio button
- b) Checkbox
- c) Text box
- d) Password

Answer: Password

Question: In which of the following the characters typed are converted into non readable format?

- a) Password
- b) Text box
- c) Radio button
- d) Check box

Answer: Password

Question: In which form are the characters typed in the password field displayed?

- a) Dots
- b) Asterisk
- c) Square
- d) All of these

Answer: All of these

Question: Which of the following does not let any one read the typed text when user does login?

- a) Password
- b) Text box
- c) Radio button
- d) Check box

Answer: Password

Question: What is the syntax of creating password box in the form?

- a) <input = "password" name="var" >
- b) <input value = "password" name="var" >
- c) <input type = "password" name="var" >
- d) <input type = "password" value="var" >

Answer: <input type = "password" name="var" >

Question: What is used to select only one option from the given many options in the form?

- a) Radio button
- b) Check box
- c) Text box
- d) Password

Answer: Radio button

Question: Which element is used to create radio button in form?

- a) Button
- b) Radio
- c) Button_radio
- d) Radio_button

Answer: Radio

Question: How many radio buttons can be selected from many radio buttons available in a single group?

- a) 1
- b) 2
- c) 3
- d) 4

Answer: 1

Question: It is possible to select more than one radio button. Select correct option for this statement?

- a) This statement is true
- b) This statement is false
- c) We cannot be sure of this statement
- d) None of these

Answer: This statement is false

Question: What is the shape of radio button?

- a) Circle
- b) Square
- c) Triangle
- d) Rectangle

Answer: Circle

Question: What appears in the circle of radio button which is selected?

- a) Line
- b) Arrow
- c) Dot
- d) Tick

Answer: Dot

Question: Generally what is used to select a single item from a given group of item?

- a) Radio button
- b) Checkbox
- c) Text box
- d) Password

Answer: Radio button

Question: Which attribute is used to display a radio button selected by default?

- a) Check
- b) Select
- c) Checked
- d) Selected

Answer: Checked

Question: What is true from the following for the checked attribute of radio button?

- a) Compulsory
- b) Optional
- c) Sometimes compulsory
- d) Sometimes optional

Answer: Optional

Question: What is the syntax of creating radio button in the form?

- a) < input = "radio" name = "var" value = "txt" >
- b)<input="radio" name="var" type=,,txt">
- c) <input ="radio" type="var" value="txt">
- d)<inputtype="radio" name="var" value="txt">

Answer: <inputtype="radio" name="var" value="txt">

Question: What is used to select only one option from the given many options in the form?

- a) Radio button
- b) Check box
- c) Text box
- d) Password

Answer: Check box

Question: Which element is used to create check box field in form?

- a) Check box
- b) Checkjbox
- c) Box
- d) Box_check

Answer: Check box

Question: When one radio button is selected than what happens to the other radio buttons of the same group?

- a) Active
- b) Deactivate
- c) Special
- d) Normal

Answer: Deactivate

Question: It is possible to select more than one check box. Select correct option for this statement?

- a) This statement is true
- b) This statement is false
- c) We cannot be sure of this statement
- d) None of these

Answer: This statement is true

Question: What is the shape of check box?

- a) Circle
- b) Square
- c) Triangle
- d) Rectangle

Answer: Square

Question: What appears in the square of check box which is selected ?

- a) Line
- b) Arrow
- c) Dot
- d) Tick

Answer: Tick

Question: What is used to select a more than one item from a given group of item?

- a) Radio button
- b) Check box
- c) Text box
- d) Password

Answer: Check box

Question: Which attribute is used to display a check box selected by default?

- a) Check
- b) Select
- c) Checked
- d) Selected

Answer: Checked

Question: What is true from the following for the checked attribute of check box?

- a) Compulsory
- b) Optional
- c) Sometimes compulsory
- d) Sometimes optional

Answer: Optional

Question: What is the syntax of creating check box in the form?

- a) <input type = "checkbox" name="var" value="txt">
- b) <input name = "checkbox" name="var" value="txt">
- c) <input name = "checkbox" type='var' name='txt'> (
- d) <input type = "checkbox" value="var" name="txt">

Answer: <input type = "checkbox" name="var" value="txt">

Question: Which button is used to send the values of data entered in the form?

- a) Send Button
- b) Enter Button
- c) Submit Button
- d) Reset Button

Answer: Submit Button

Question: Which button is used to send the values of data entered in the form to the server?

- a) Reset Button
- b) Submit Button
- c) Enter Button
- d) Send Button

Answer: Submit Button

Question: On clicking which button, the values of data entered in the form is submitted to the file specified in the action attribute of the form element?

- a) Enter Button
- b) Send Button
- c) Reset Button
- d) Submit Button

Answer: Submit Button

Question: What is the syntax of creating submit button in the form?

- a) <input type="submit" value="label">
- b) <input ="submit" valuer "label ">
- c) <input value= "submit" type="label">
- d) <inputname="submit" value="label">

Answer: <input type="submit" value="label">

Question: On clicking which button, the values of data entered in the form are cleared and set back to default values?

- a) Send Button
- b) Enter Button
- c) Submit Button
- d) Reset Button

Answer: Reset Button

Question: What is the use of reset button?

- a) Replace the data values entered in the form by its default values.
- b) Replace the data values entered in the form by blank spaces.
- c) (A) or (B)
- d) To change all the values filled in the form with the values present on the web server

Answer: (A) or (B)

Question: The values of data entered in the form are set to which values when reset button is clicked?

- a) Set back to default value
- b) Null
- c) New
- d) Old

Answer: Set back to default value

Question: What happens when reset button is clicked?

- a) The values of data entered in the form are cleared.
- b) The values of data entered in the form are set back to default values.
- c) Both (A) and (B)
- d) The values of data entered in the form can be modified.

Answer: Both (A) and (B)

Question: What to the syntax oi creating ies, et YsuWaw vsv the form?

- a) <input="reset" value="label">
- b) <input type="reset" value="label">
- c) <inputvalue="reset" name="label">
- d) <input value="reset" type="label">

Answer: <input type="reset" value="label">

Question: Match the following:

(A) (B)

- (1) Radio (A) The values of data entered in the form is submitted to the file specified in the action attribute of the form element using it.

- (6) Reset (F) Is used to select one or more than one options at a time.
 - a) (1- C),(2 F), (3 B), (4 D), (5 -E), (6 A)
 - b) (1- C),(2 F), (3 D), (4 B), (5 A), (6 E)
 - c) (1-C),(2-F), (3-B), (4-A), (5-D), (6-E)
 - d) (D) (1- C),(2 F), (3 B), (4 D), (5 A), (6 E)

Answer: (D) (1-C),(2-F), (3-B), (4-D), (5-A), (6-E)

Question: Which element allows multi line text input in form?

- a) Text box
- b) Text area
- c) Text Line
- d) Text Object

Answer: Text area

Question: Which element is used to implement text area element?

- a) <textarea>.....< / textarea>
- b) <text>....</text>
- c) </textarea>..</textarea>
- d) </text>...<text>

Answer: <textarea>.....< / textarea>

Question: Which tag is used to create drop down menu in the form?

- a) Drop down
- b) Pull down
- c) Select
- d) List

Answer: Select

Question: What is used when displaying all the options on the screen is not required?

- a) Radio Button
- b) Drop down Menu
- c) Check box
- d) Text area

Answer: Drop down Menu

Question: Which tag is used to create a drop down menu?

- a) <option>...</option>
- b) <dropdown>...</dropdown>
- c) t>...</list>
- d) <select>...</select>

Answer: <select>...</select>

Question: Which element is used to specify the values that are to be displayed in the menu?

- a) <select>
- b) <list>
- c) <option>
- d) <value>

Answer: <option>

Question: Which tag is used to create the elements within the menu?

- a) <option>...</option>
- b) <dropdown>...</dropdown>
- c) <list>...</list>
- d) <select>...</select>

Answer: <option>...</option>

Question: Which attribute is used to display specific option to be selected by default?

- a) Check
- b) Select
- c) Checked
- d) Selected

Answer: Selected

Question: What is true from the following for the selected attribute of radio button?

- a) Compulsory
- b) Optional
- c) Sometimes compulsory
- d) Sometimes optional

Answer: Optional

Question: Which of the following specifies the correct code to create text area element?

- a) <option> <select value="Ahmedabad"> Ahmedabad </select> <select value="Rajkot"> Rajkot </select> </option>
- b) <select> <option type="Ahmedabad"> Ahmedabad </option> <option type="Rajkot"> Rajkot </option> </select>
- c) <select> <option value="Ahmedabad"> Ahmedabad </option> <option value="Rajkot"> Rajkot</option> </select>
- d) <select> <option value="Ahmedabad"> <option value="Rajkot"> </select>

Answer: <select> <option value="Ahmedabad"> Ahmedabad </option> <option value="Rajkot"> Rajkot </option> </select>

Question: How is designing a form using HTML tags?

- a) Tedious
- b) Very Easy
- c) Motivating
- d) All of these

Answer: Tedious

Question: Form can be created easily with which of the following?

- a) IED
- b) ILD
- c) IDE
- d) IDL

Answer: IDE

Question: What is the full form of IDE?

- a) Integrated Database Environment
- b) Integrated Development Environment
- c) Integrated Document Environment
- d) Integrated Declaration Environment

Answer: Integrated Development Environment

Question: What is IDE?

- a) Software application
- b) Hardware application
- c) Database
- d) Source Code

Answer: Software application

Question: What is true for Integrated Development Environment (IDE) from the following?

- a) It provides facility to make form easily.
- b) It is software application.
- c) It provides facility to programmers to make software.
- d) All of these

Answer: All of these

Question: Which facility is provided for Integrated Development Environment (IDE) from the following?

- a) GUI (Graphical User Interface)
- b) Text/Code editor
- c) Compiler/interpreter, Debugger
- d) All of these

Answer: All of these

Question: What is full form of GUI?

- a) Graphical User Interface
- b) Graphical Useful Interface
- c) Graphical Useful Integration
- d) Graphical Universal Interface

Answer: Graphical User Interface

Question: Which is the example of open source IDE from the following?

- a) KompoZer
- b) Eclipse
- c) JBuilder, Netbeans
- d) All of these

Answer: All of these

Question: Which option is true for KompoZer?

- a) It is IDE software for web development
- b) It is free of cost
- c) It is open source
- d) All of these

Answer: All of these

Question: From which website can KompoZer be downloaded?

- a) http://www.KompoZer.com
- b) http://www.KompoZer.net
- c) http://www.KompoZer.co.in
- d) http://www.KompoZer.org

Answer: http://www.KompoZer.com

Question: What is a simple graphical interface which provides web page editor in KompoZer?

- a) WYSIWYG
- b) WYSIWGY
- c) WYSIWGY
- d) WYSIYWG

Answer: WYSIWYG

Question: What is full form of WYSIWYG?

- a) What You Saw Is What You Get
- b) What You Say Is What You Get
- c) What You See Is What You Get
- d) What You Said is What You Get

Answer: What You See Is What You Get

Question: How is "What You See Is What You Get (WYSIWYG)" interface?

- a) What you can see, the same you get in the result.
- b) You can see and also modification can be done.

- d) None of these

Answer: What you can see, the same you get in the result.

Question: Which type of software is KompoZer?

- a) Web Source System
- b) Web Database System
- c) Web Authoring System
- d) Web Development System

Answer: Web Authoring System

Question: What does KompoZer integrate?

- a) Web page development
- b) Web file management
- c) Web server development
- d) Both (A) and (B)

Answer: Both (A) and (B)

Question: How can a web page be created using KompoZer?

- a) Easy
- b) Quick
- c) Both (A) and (B)
- d) Difficult

Answer: Both (A) and (B)

Question: What is used by user to edit a web page?

a) Database

- b) Source Code
- c) Master File
- d) Master Code

Answer: Source Code

Question: In KompoZer who gives rapid access to the files on both local machines and remote servers?

- a) Site Manager
- b) Server Manager
- c) Source Code Manager
- d) Section Manager

Answer: Site Manager

Question: In KompoZer, Site Manager gives rapid access to the files located on which servers?

- a) Local
- b) Remote
- c) Both (A) and (B)
- d) None of these

Answer: Both (A) and (B)

Question: What can be done to the web pages and associated files on a remote server from within KompoZer?

- a) Download
- b) Upload
- c) Both (A) and (B)
- d) None of these

Answer: Upload

Question: What is used to support styles in KompoZer?

- a) CSS
- b) CSC
- c) SCC
- d) SCS

Answer: CSS

Question: What is the full form of CSS?

- a) Cascading Section Sheet
- b) Cascading Sheet Style
- c) Cascading Sheet Section
- d) Cascading Style Sheet

Answer: Cascading Style Sheet

Question: Which menu - option is used to open KompoZer?

- a) Applications -> Programming -> KompoZer
- b) Applications -> Program -> KompoZer
- c) Applications -> Place -> KompoZer

• d) Applications -> System -> KompoZer

Answer: Applications -> Programming -> KompoZer

Question: Under which option is KompoZer displayed?

- a) Accessories
- b) Office
- c) Programming
- d) Graphics

Answer: Programming

Question: Which menu - option is used to view the different toolbars and status bar?

- a) Show -> Show/Hide
- b) View -> Show/Hide
- c) Display -» Show/Hide
- d) Format -> Show/Hide

Answer: View -> Show/Hide

Question: Which option is listed in Show/Hide option of View menu in KompoZer?

- a) Composition Toolbar, Edit Mode Toolbar
- b) Format Toolbar 1, Format Toolbar 2
- c) Status Bar, Sidebar (Site Manager), Rulers
- d) All of these

Answer: All of these

CBSE Class 12 Computer Science Exception Handling In Java MCQs

Download PDF

Computer Science

CBSE Class 12 Computer Science Exception Handling In Java MCQs with answers available in Pdf for free download. The MCQ Questions for Class 12 Computer Science with answers have been prepared as per the latest syllabus, NCERT books and examination pattern suggested in Standard 12 by CBSE, NCERT and KVS. Multiple Choice Questions are an important part of Term 1 and Term 2 exams for Grade 12 Computer Science and if practiced properly can help you to get higher marks. Refer to more Chapter-wise MCQs for NCERT Class 12 Computer Science and also download more latest study material for all subjects

Exception Handling In Java Class 12 Computer Science MCQ

Class 12 Computer Science students should refer to the following multiple-choice questions with answers for Exception Handling In Java in standard 12. These MCQ questions with answers for Grade 12 Computer Science will come in exams and help you to score good marks

Exception Handling In Java MCQ Questions Class 12 Computer Science with Answers

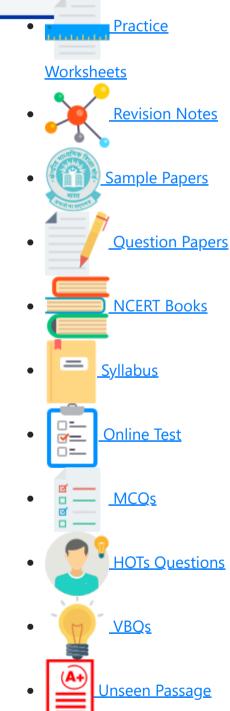

Question: It is usually understood that a compiled program is error free and will always____successfully.

- a) Complete
- b) Execute
- c) Perform
- d) Accomplish

Answer: Execute

Question: In few cases a compiled program can____while it its executing.

• a) Terminate

Subjects

- Accountancy
- Biology
- Bio Technology
- Business Studies
- Chemistry
- Computer Science
- Economics
- Engineering Drawing

handling allows a program to continue executing Question: ____ as if no problem had been encountered or it may notify the user of the problem before terminating in an uncontrolled manner.

- a) Data
- b) Program
- c) Error
- d) Exception

Answer: Exception

Question: There are few standard____available in Java, a technique to guarantee that a particular I block of code will always be executed,

even if I exceptions are present in our program.

- a) Data info
- b) Programs
- c) Errors
- d) Exceptions

Answer: Exceptions

Question: In Java, all kinds of error conditions are called_____

- a) Methods
- b) Programs
- c) Errors
- d) Exceptions

Answer: Exceptions

Question: Errors can be broadly classified into____categories.

- a) Four
- b) Three
- c) Two
- d) Five

Answer: Two

Question: _____is a type of error produced in java programs.

- a) Compile-time errors
- b) Run-time errors
- c) Both (A) and (B)
- d) None of these

Answer: Both (A) and (B)

Question: A_____is used to convert source code into object code.

- a) Compiler
- b) Interpreter
- c) Translator
- d) Decoder

Answer: Compiler

Question: A compiler is used to convert____code into object code.

- a) Home
- b) Source
- c) Beginning
- d) Program

Answer: Source

Question: If there is a syntax error in the program, a compilation error is displayed and_____file is not created.

- a) .Source
- b) .Dat
- c) .Class

• d) .Obj

Answer: .Class

Question:	Examples	of some	common	syntax	errors	are	missing	like
а								

- a) Semicolon
- b) Use of undeclared variable
- c) Wrong spellings of identifier or keyword
- d) All of these

Answer: All of these

Question: The Java____suggests in an output, the type of error, along with the line number where the error has occurred.

- a) Compiler
- b) Interpreter
- c) Translator
- d) Decoder

Answer: Compiler

Question: Compile-time____are usually the mistake of a programmer and it does not allow the program to compile unless they are solved.

- a) Methods
- b) Programs
- c) Errors
- d) Exceptions

Answer: Errors

Question: In the field of Computer Science, "Exit code" or "Exit status" indicates whether the command or a____executed successfully or not.

- a) Data type
- b) Program
- c) error
- d) Method

Answer: Program

Question: Code_____indicates that the command executed successfully.

- a) 1
- b) -1
- c) 0.0
- d) 0

Answer: 0

Question: Code_____indicates that some problem occurred while executing the command.

• a) 1

- b) -1
- c) 0.0
- d) 0

Answer: 1

Question: If there are no syntax errors in the source code then the program will compile successfully and will get a_____file.

- a) .source
- b) .dat
- c) .class
- d) .obj

Answer: .class

Question: The array "_____ citylist [] = {"Ahmedabad", "Baroda", "Rajkot", "Surat"};" contains name of four different cities.

- a) String
- b) Int
- c) Long
- d) Boolean

Answer: String

Question: For each type of exception, there are corresponding____classes in Java.

- a) Programs
- b) Exceptions
- c) Java.lang
- d) Java.io

Answer: Exceptions

Question: The _____contains a hierarchy of classes dealing with various exceptions.

- a) Java.lang package
- b) Java.io package
- c) Both (A) and (B)
- d) None of these

Answer: Both (A) and (B)

Question: An attempt to access the array element with an index value that is outside the range of array uses_____Exception class.

- a) Array Index Out Of Bounds Exception
- b) Arithmetic Exception
- c) File Not Found Exception
- d) All of these

Answer: Array Index Out Of Bounds Exception

Question: An attempt to divide any number by 0 uses_____Exception class.

- a) Array Index Out Of Bounds Exception
- b) Arithmetic Exception
- c) File Not Found Exception
- d) All of these

Answer: Arithmetic Exception

Question: An attempt to divide any number by 0 uses_____Exception class.

- a) Array Index Out Of Bounds Exception
- b) Arithmetic Exception
- c) File Not Found Exception
- d) All of these

Answer: File Not Found Exception

Question: An attempt to use null in a case where an object is required uses____Exception class.

- a) PrinterlOException
- b) NullPointerException
- c) NumberFormatException
- d) None of these

Answer: NullPointerException

Question: An attempt to convert string to a number type uses_____Exception class.

- a) PrinterlOException
- b) NullPointerException
- c) NumberFormatException
- d) None of these

Answer: NumberFormatException

Question: An I/O error has occurred while printing uses Exception class.

- a) Printer IO Exception
- b) Null Pointer Exception
- c) Number Format Exception
- d) None of these

Answer: Printer IO Exception

Question: The following code will result in Exception. int numerator = 15; int denominator = 0; answer; answer = numerator / denominator;

- a) Array Index Out Of Bounds Exception
- b) Arithmetic Exception
- c) File Not Found Exception
- d) All of these

Answer: Arithmetic Exception

Question: What is the full form of JVM?

- a) Java Virtual Mechanism
- b) Java Virtual Method
- c) Java Virtual Machine
- d) Java Virtual Manner

Answer: Java Virtual Machine

Question: An_____is an error condition.

- a) Allowance
- b) Exclusion
- c) Error
- d) Exception

Answer: Exception

Question: _____handling is an object-oriented technique for managing errors.

- a) Allowance
- b) Exclusion
- c) Error
- d) Exception

Answer: Exception

Question: While performing exception handling, one has to try to ensure that the program does not____abruptly nor does it generate unexpected output.

- a) Terminate
- b) Finish
- c) Dismiss
- d) Discharge

Answer: Terminate

Question: Java uses keywords like_____to write an exception handler.

- a) Try
- b) Catch
- c) Finally
- d) All of these

Answer: All of these

Question: The keywords____are used in the presence of exceptions, these keywords represent block of statements.

- a) Try
- b) Catch
- c) Finally
- d) All of these

Answer: All of these

Question: A____contains the code that may give rise to one or more exceptions.

- a) Try block
- b) Catch block
- c) Finally block
- d) All of these

Answer: Try block

Question: A_____contains the code that is intended to handle exceptions of a particular type that were created in the associated try block.

- a) Try block
- b) Catch block
- c) Finally block
- d) All of these

Answer: Catch block

Question: A_____is always executed before the program ends, regardless of whether any exceptions are generated in the try block or not.

- a) Try block
- b) Catch block
- c) Finally block
- d) All of these

Answer: Finally block

Question: The_____statement contains a block of statements within the braces.

- a) Try
- b) Catch
- c) Finally
- d) None of these

Answer: Try

Question: A____block may give rise to one or more exceptions.

- a) Try
- b) Catch
- c) Finally
- d) None of these

Answer: Try

Question: The code between a try block creates a...... exception.

- a) Double
- b) Single
- c) Triple
- d) None of these

Answer: Single

Question: Themust immediately follow	, tne	try	DIOCK.
--------------------------------------	-------	-----	--------

- a) Try block
- b) Catch block
- c) Finally block
- d) All of these

Answer: Catch block

Question: ____contains the code that is to be created to handle an exception.

- a) Try block
- b) Catch block
- c) Finally block
- d) All of these

Answer: Catch block

Question: The_____is an exception handler.

- a) Try block
- b) Catch block
- c) Finally block
- d) All of these

Answer: Catch block

Question: For a____try block there can be one or more catch blocks.

- a) Single
- b) Double
- c) Tirple
- d) None of these

Answer: Single

Question: A catch block consists of the keyword catch followed by a single____

- a) Operator
- b) Method
- c) Block
- d) Parameter

Answer: Parameter

Question: The catch code to handle exception has to be written between____

- a) Codes
- b) Blocks
- c) Parentheses
- d) Parameters

Answer: Parentheses

Question: The_____identifies the type of exception that the block is to deal with.

- a) Operator
- b) Method
- c) Block
- d) Parameter

Answer: Parameter

Question: Java supports____types of exceptions

- a) Various
- b) Single
- c) Multiple
- d) Some

Answer: Various

Question: Any program which tries to access array element by specifying index position that is outside the range leads to an_____

- a) Illegal message
- b) Exclusion
- c) Error
- d) Exception

Answer: Exception

Question: When above kind of exception occurs, an object of type is created and is thrown.

- a) Array Index Out Of Bounds Exception
- b) Arithmetic Exception
- c) File Not Found Exception
- d) All of these

Answer: Array Index Out Of Bounds Exception

Question: A corresponding____handles the above exception and does not allow the program to terminate unexpectedly.

- a) Try block
- b) Catch block
- c) Finally block
- d) All of these

Answer: Catch block

Question: The catch block contains a_____to object "eobj" which is created and thrown by the try block.

- a) Space
- b) Cell
- c) Memory
- d) Reference

Answer: Reference

Question: In a single program____exceptions can occur.

- a) Various
- b) Single
- c) Multiple
- d) Some

Answer: Multiple

Question: If a particular file has to be uploaded to a remote computer, it may lead to ______distinct exceptions.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Two

Question: If a particular file has to be uploaded to a remote computer, an exception may occur if the file is not present in the_____

- a) Computer
- b) Network
- c) Internet
- d) System

Answer: Computer

Question: If a particular file has to be uploaded to a remote computer, another exception may occur if the computer is not connected to the_____

- a) Computer
- b) Network
- c) Internet
- d) System

Answer: Network

Question: There is a provision in Java to support____exceptions.

- a) Various
- b) Single
- c) Multiple
- d) Some

Answer: Multiple

Question: The code that generates exception should be written within the_____

- a) Try block
- b) Catch block
- c) Finally block
- d) All of these

Answer: Try block

Question: There can be multiple	to handle each type of
exception separately.	

- a) Try blocks
- b) Catch blocks
- c) Finally blocks
- d) All of these

Answer: Catch blocks

Question: The last____can handle any type of exception.

- a) Try block
- b) Catch block
- c) Finally block
- d) None of these

Answer: Catch block

Question: The catch block, must be the last block when there are multiple catch blocks.

- a) First
- b) Second
- c) Third
- d) Default

Answer: Default

Question: While writing the program, the order of the specific catch blocks does not matter but the _____block has to be placed at the end of all catch blocks.

- a) First
- b) Second
- c) Third
- d) Default

Answer: Default

Question: _____try blocks can be nested together, but care must be taken to write a corresponding catch block for each try block.

- a) Various
- b) Single
- c) Multiple
- d) Some

Answer: Multiple

Question: The_____is generally used to clean up the end of executing a try block.

- a) Try block
- b) Catch block
- c) Finally block
- d) All of these

Answer: Finally block

Question: A	is used when the programmer wants to be sure
that some particula	ar code is to be run, no matter what exceptions are
thrown within the a	associated try block.

- a) Try block
- b) Catch block
- c) Finally block
- d) All of these

Answer: Finally block

Question: A_____is always executed, regardless of whether or not exceptions are thrown during the execution of the associated try block.

- a) Try block
- b) Catch block
- c) Finally block
- d) All of these

Answer: Finally block

Question: A_____is widely used if a file needs to be closed or a critical resource is to be released at the completion of the program.

- a) Try block
- b) Catch block
- c) Finally block
- d) All of these

Answer: Finally block

Question: Each try block must always be followed by at least_____that is either a catch block or a finally block.

- a) One block
- b) Two blocks
- c) Three blocks
- d) None of these

Answer: One block

Question: However, in the presence of _____the program executes the statements within the finally block before it gets terminated.

- a) Try block
- b) Catch block
- c) Finally block
- d) All of these

Answer: Finally block

Question: A_____is associated with a particular try block and it must be located immediately following any catch blocks for the corresponding try block.

- a) Finally block
- b) Catch block
- c) Try block
- d) None of these

Answer: Finally block

Question: If there are no_____then the finally block can be positioned immediately after the try block.

- a) Try blocks
- b) Catch blocks
- c) Finally blocks
- d) None of these

Answer: Catch blocks

Question: If the finally block or catch blocks are not positioned correctly, then the program will not

- a) Compile
- b) Interpret
- c) Translate
- d) Decode

Answer: Compile

Question: The_____keyword is used to explicitly throw an Exception object.

- a) Throws
- b) Throws
- c) Throw
- d) Try

Answer: Throw

Question: For example, an object of____was created when one tries to perform a divide by zero operation.

- a) Array Index Out Of Bounds Exception
- b) Arithmetic Exception
- c) File Not Found Exception
- d) None of these

Answer: Arithmetic Exception

Question: Java does provide mechanism to create an____object and throw it explicitly.

- a) Illusion
- b) Exclusion
- c) Error
- d) Exception

Answer: Exception

Question: The object that one throws, must be of type of java.lang_____, otherwise a compile error occurs.

- a) Throwable
- b) Throws
- c) Throw
- d) Throws

Answer: Throwable

Question: The syntax to throw an exception object is

- a) Throw exception_object;
- b) Throws exception_object;
- c) Throws exception_object
- d) Throw object;

Answer: Throw exception_object;

Question: When a_____statement is encountered, a search for matching catch block begins.

- a) Throwable
- b) Throws
- c) throw
- d) Throws

Answer: throw

Question: Any subsequent statements in the_____are not executed.

- a) Try block
- b) Try or catch block
- c) Catch block
- d) Try or finally block

Answer: Try or catch block

Question: There are _____alternative approaches to handle, when an exception occurs in a method or a constructor.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Two

Question: A_____clause can be used in a method declaration or constructor declaration to inform that the code within the constructor or method may throw an Exception.

- a) Throwable
- b) Throws
- c) throw
- d) throws

Answer: throws

Question: When a_____or a method that can throw exceptions is written to its caller, it is useful to document that fact.

- a) Constructor
- b) Variable
- c) Operator
- d) Compiler

Answer: Constructor

Question: The_____keyword is used with the declaration of method.

- a) Throwable
- b) Throws
- c) throw
- d) throws

Answer: Throwable

Question: A____can throw multiple exceptions.

- a) Method
- b) Variable
- c) Operator
- d) Compiler

Answer: Method

Question: Each type of_____that a method can throw must be stated in the method header.

- a) Declaration
- b) Variable
- c) Error
- d) Exception

Answer: Exception

Question: _____allows creating own exception classes according to application-specific problems.

- a) C ++
- b) C
- c) Java
- d) PHP

Answer: Java

Question: _____does not provide built-in exception classes for application specific exceptions.

- a) C ++
- b) C
- c) Java
- d) PHP

Answer: Java

Question: User-defined exceptions can be created by creating a subclass of ____class.

- a) Declaration
- b) Input
- c) Method
- d) Exception

Answer: Exception

Question: If the____accepts data from the keyboard, it is advisable to execute the program at command prompt.

- a) Program
- b) Application
- c) User
- d) Compiler

Answer: Program

Question: A good program must always handle_____rather than the program being terminated abruptly.

- a) Declarations
- b) Inputs
- c) Methods
- d) Exceptions

Answer: Exceptions

Question: Advantage of using exception-handling in Java programs is

- a) It allows maintaining normal flow of program. In the absence of exception handling, the flow of program is disturbed.
- b) It allows writing separate error handling code from the normal code.
- c) Error types can be grouped and differentiated within the program.
- d) All of these

Answer: All of these

Question: Advantage of using exception-handling in Java programs is_____

- a) Assertions can be used to debug the program before deploying it to the clients.
- b) It provides an easy mechanism to log various run-time errors while executing the program.
- c) Both (A) and (B)
- d) None of these

Answer: Both (A) and (B)

Question: Which of the following is the correct syntax in a user defined exception?

- a) Catch (InvalidMarksException eobj)
- b) Catch(AritmeticException eobj)
- c) Catch (ArrayIndexOutOfBounds e)
- d) All of these

Answer: Catch (InvalidMarksException eobj)

Question: A throws clause can be used in the following manner:

- a) MethodJVfodifiers methodJVame (parameters) throws Exception list...{......// body of the method......}
- b) MethodJVIodifiers return_type method_Name (parameters) throws Exception list... {...... / / body of the method......}
- c) Return_type method_Name (parameters) throws Exception list...{...... // body of the method......}
- d) None of these

Answer: MethodJVIodifiers return_type method_Name (parameters) throws Exception list... {...... / / body of the method......}

Question: A method header can be like_____

- a) Perform Division throws Arithmetic Exception, Array Index Out Of Bounds Exception { // body of the method }
- b) Perform Division() throws Arithmetic Exception, Array Index Out Of Bounds Exception
- c) Perform Division O throws Arithmetic Exception! ... // body of the method }
- d) Perform Division O throws Arithmetic Exception, Array Index Out Of Bounds Exception { // body of the method }

Answer: Perform Division O throws Arithmetic Exception, Array Index Out Of Bounds Exception { // body of the method }

Question: The statement "throw myobject;"_____

- a) Throws the exception object implicitly
- b) Throws the exception object explicitly
- c) Throws the object implicitly
- d) None of these

Answer: Throws the exception object explicitly

Question: Which of these keywords must be used to monitor for exceptions?

- a) Try
- b) Finally
- c) Throw
- d) Catch

Answer: Try

Question: The finally block is executed when an exception is thrown, even if no catch matches it. Choose the correct option.

- a) True
- b) False
- c) Can't say
- d) None of these

Answer: True

Question: Exceptions can be caught or re-thrown to a calling method. Choose the correct option.

- a) True
- b) False
- c) Can't say
- d) None of these

Answer: True

Question: The throw keyword in a program are not executed. Choose the correct option.

- a) True
- b) False
- c) Can't say
- d) None of these

Answer: True

Question: Which of these keywords is not a part of exception handling?

- a) Try
- b) Finally
- c) Thrown
- d) Catch

Answer: Thrown

Question: Which of the following is true about try/catch blocks in Java? (I) All try/catch blocks must have a finally block. (II) A try/catch block is limited to two or less catch blocks. (III) Barring the Java virtual machine from exiting, the finally block will always be executed.

- a) (I) and (III)
- b) (l) only
- c) (III) only
- d) (I) and (II)

Answer: (I) and (III)

Question: What will be the output of the program ? public class Test { public static void main(String [] args) { try { return; } finally { System.out.println("Finally");} }

- a) Finally
- b) Compilation fails
- c) The code runs with no output
- d) An exception is thrown at run time

Answer: Finally

Question: The key words used with exception handling are

- a) Generate, handled, conclude
- b) Generate, catch, finally
- c) Throw, catch, conclude
- d) Try, catch, finally

Answer: Try, catch, finally

Question: What happen behind the code int a=50/0?

• a) Object of exception class thrown

- b) Error in Code
- c) Error message
- d) None of these

Answer: Object of exception class thrown

Question: When an array is accessed beyond the array size____exception is thrown.

- a) Array Element Out Of Limit
- b) Array Index Out Of Bounds Exception
- c) Array Index Out Of Bounds
- d) Array Element Out Of Bounds

Answer: Array Index Out Of Bounds Exception

Question: What is the output of this program? class exception_handling { public static void main(String args[]) try { int a, b; b = 0; a = 5 / b; System.out.print("A"); } catch (Arithmetic Exception e) { System.out.print("B"); } }

- a) A
- b) B
- c) Compilation error
- d) Run time error

Answer: B

CBSE Class 12 Computer Science File Handling MCQs Set A

Download PDF

Computer Science

CBSE Class 12 Computer Science File Handling MCQs Set A with answers available in Pdf for free download. The MCQ Questions for Class 12 Computer Science with answers have been prepared as per the latest syllabus, NCERT books and examination pattern suggested in Standard 12 by CBSE, NCERT and KVS. Multiple Choice Questions are an important part of Term 1 and Term 2 exams for Grade 12 Computer Science and if practiced properly can help you to get higher marks. Refer to more Chapter-wise MCQs for NCERT Class 12 Computer Science and also download more latest study material for all subjects

File Handling Class 12 Computer Science MCQ

Class 12 Computer Science students should refer to the following multiple-choice questions with answers for File Handling in standard 12. These MCQ questions with answers for Grade 12 Computer Science will come in exams and help you to score good marks

File Handling MCQ Questions Class 12 Computer Science with Answers

Question: Storage devices of a computer can be broadly classified into____categories.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Two

Question: _____storage is temporary.

- a) Volatile
- b) Non-volatile
- c) Movable
- d) Immovable

volatile storage.a) Stored

- b) Lost
- c) Available
- d) Accessible

Question: Data is not_____when a computer loses power in a Non-

Answer: Lost

Question:	When a Java program is saved on a disk, it is	S
using	_storage.	

- a) Temporary
- b) Provisional
- c) Conditional
- d) Permanent

Answer: Permanent

Question: A computer_____is a collection of data stored on a non-volatile device.

- a) File
- b) Desktop
- c) Directory
- d) Device

Answer: File

Question: _____exist on permanent storage devices, such as hard disks, USB drives, optical disks and compact discs.

- a) Files
- b) Manuals
- c) Directories
- d) Devices

Answer: Files

Question: Data stored in files is often called_____data.

- a) Text
- b) Persistent
- c) Informative
- d) Binary

Answer: Persistent

Question: Files can be further classified broadly into____categories.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Two

Question: _____files contain data that can be read in a text editor.

- a) Text
- b) Manuscript
- c) Memo
- d) Binary

Answer: Text

Question: In the	_files	the	data	has	been	encoded	using	a
scheme such as ASCII	or Ui	nico	de.					

- a) Text
- b) Memo
- c) Informative
- d) Binary

Answer: Text

Question: _____files can be data files that contain facts, such as payroll file that contains employee numbers, names and salaries.

- a) Binary
- b) Memo
- c) Program
- d) Text

Answer: Text

Question: Some_____files can be program files or application files mat store software instructions.

- a) Binary
- b) Memo
- c) Program
- d) Text

Answer: Text

Question: are examples of editors through which text files can be created.

- a) G edit
- b) vi
- c) pico
- d) All of these

Answer: All of these

Question: The extensions of the files created through the above editor can have an extension like_____

- a) Text
- b) Java
- c) C
- d) All of these

Answer: All of these

Question: ____files contain data that has not been encoded as text.

- a) Binary
- b) Memo
- c) Informative
- d) Text

Answer: Binary

Question: The cont	ents of a	file are in	binary 1	format,	which
means the data is a	access terms o	of bytes.			

- a) Binary
- b) Memo
- c) Informative
- d) Text

Answer: Binary

Question: The Binary files extensions examples are_____

- a) Jpeg
- b) Mp3
- c) Class
- d) All of these

Answer: All of these

Question: Java language supports various operations that can be performed on file or on_____

- a) Programs
- b) Attributes
- c) Directories
- d) Queries

Answer: Directories

Question: ____operations that can be performed on files using Java programs.

- a) Determining the path of a file or a directory
- b) Opening a file
- c) Writing to a file
- d) All of these

Answer: All of these

Question: ____operations that can be performed on files using Java programs.

- a) Reading from a file
- b) Closing or deleting a file
- c) Querying the attributes of a file
- d) All of these

Answer: All of these

Question: Java provides built-in_____that contains methods to help with the tasks related to file.

- a) Variables
- b) Packages
- c) Classes
- d) Devices

Answer: Classes

Question: The Java classes are present in package.

- a) Java, bytes
- b) Java.io
- c) Java.util
- d) Java.method

Answer: Java.io

Question: Java uses the concepts of____in file handling.

- a) File systems
- b) Streams
- c) Packages
- d) Classes

Answer: Streams

Question: Java provides____different categories of java classes to perform I/O operations on bytes and characters.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Two

Question: Which of the following is not a Binary file extension?

- a) Jpeg
- b) Mp3
- c) Class
- d) txt

Answer: txt

Question: Which of the following is not a Text file extension?

- a) Txt
- b) Java
- c) Jpeg
- d) C

Answer: Jpeg

Question: The____class encapsulates information about the properties of a file or a directory.

- a) Java.io.file
- b) Java.oi.file
- c) Java.util.io
- d) Java.io.util

Answer: Java.io.file

Question: _____class can be used to access attributes of files and directions.

- a) File
- b) I/O
- c) Java
- d) util

Answer: File

Question: A programmer can do_____a file or a directory.

- a) Create
- b) Rename
- c) Delete
- d) All of these

Answer: All of these

Question: The creation of a file Object that belongs to____class does not imply that the file or directory exists.

- a) File
- b) I/O
- c) Java
- d) Util

Answer: File

Question: The_____of a file can also be accessed like its permissions, length of a file or last modification time.

- a) Features
- b) Attributes
- c) Qualities
- d) Traits

Answer: Attributes

Question: A file_____encapsulates a path name or reference to a physical file or a directory on the hard disk.

- a) Method
- b) Class
- c) Object
- d) Handler

Answer: Object

Question: There are nearly_____that can be used to perform various operations on a file or a directory.

- a) 25 methods
- b) 30 methods
- c) 35 methods
- d) 20 methods

Answer: 30 methods

Question: _____does not provide any method to read from a file or write into a file.

- a) File class
- b) File method
- c) File object
- d) File operator

Answer: File class

Question: There are several____classes to perform to read from a file or write into a file.

- a) File
- b) Stream
- c) Package
- d) Object

Answer: Stream

Question: By using the file class, one can create a_____to any file by providing its absolute path in string format or by providing the relative path.

- a) Location
- b) Reference
- c) Stream
- d) Object

Answer: Reference

Question: The file class provides_____constructors to refer a file or a directory.

- a) File (String path)
- b) File (String directory_path, String file_name)
- c) File (File directory, String file_name)
- d) All of these

Answer: All of these

Question: In Linux, "password" file is present in_____directory stores the information of the users existing in the system.

- a) "/etc"
- b) "/pwd"
- c) "/file"
- d) "/dir"

Answer: "/etc"

Question: Suppose one wants to display its attributes, then its Java file object can be created using____ways.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Three

Question: _____method of file class returns true if the file or directory exists, otherwise returns false.

- a) Boolean exists()
- b) Boolean is File()
- c) Boolean is Directory()
- d) Boolean is Hidden()

Answer: Boolean exists()

Question: _____method of file class returns true if the file exists, otherwise returns false.

- a) Boolean exists ()
- b) Boolean is File()
- c) Boolean is Directory()
- d) Boolean is Hidden()

Answer: Boolean is File()

Question: ____method of file class returns true if the directory exists, otherwise returns false.

- a) Boolean exists()
- b) Boolean is File()
- c) Boolean is Directory()
- d) Boolean is Hidden()

Answer: Boolean is Directory()

Question: _____method of file class returns true if the file or directory is hidden.

- a) Boolean exists ()
- b) Boolean is File()
- c) Boolean is Directory()
- d) Boolean is Hidden()

Answer: Boolean is Hidden()

Question: ____method of file class returns the absolute path of the file exists or directory.

- a) String[] list()
- b) String get Path()
- c) String get Name()
- d) String get Absolute Path()

Answer: String get Absolute Path()

Question: _____method of file class returns the name of the file or directory referred by the object.

- a) String[] list()
- b) String get Path()
- c) String get Name()
- d) String get Absolute Path()

Answer: String get Name()

Question:	method of file class returns the path to the file or
directory.	

- a) String[] Hst()
- b) String get Path()
- c) String get Name()
- d) String get Absolute Path()

Answer: String get Path()

Question: _____method of file class returns the name of the files and directories in a directory.

- a) String[] list()
- b) String get Path()
- c) String get Name()
- d) String get Absolute Path()

Answer: String[] list()

Question: _____method of file class returns the number of bytes in that file.

- a) Long length()
- b) File[] list Files()
- c) Both (A) and (B)
- d) None of these

Answer: Long length()

Question: _____method of file class returns an array of abstract path names denoting the files in the directory.

- a) Long length ()
- b) File[] list Files()
- c) Both (A) and (B)
- d) None of these

Answer: File[] list Files()

Question: _____method to list all the files present in a directory.

- a) Display()
- b) List()
- c) Dir()
- d) Files()

Answer: List()

Question: To modify a file or display the contents of a file, the concept of____has to be understood.

- a) Files
- b) Streams
- c) Packages
- d) Objects

Answer: Streams

Question: Java uses	_classes to carry out read and writ	e
operations on files.		

- a) Files
- b) Streams
- c) Packages
- d) Objects

Answer: Streams

Question: _____is an input device.

- a) Monitor
- b) Speaker
- c) Keyboard
- d) Plotter

Answer: Keyboard

Question: _____is an output device.

- a) Monitor
- b) Speaker
- c) Keyboard
- d) Plotter

Answer: Monitor

Question: _____can be classified as both input and output device as data can be stored and read from the files.

- a) Monitor
- b) Speaker
- c) Keyboard
- d) Hard disk

Answer: Hard disk

Question: _____are manufactured by various companies and come with different storage capacities like 500GB or 1 TB.

- a) Monitor
- b) Speaker
- c) Keyboard
- d) Hard disk

Answer: Hard disk

Question: ____can be connected using different cables like USB or SATA.

- a) Hard disk
- b) Scanner
- c) Printer
- d) Mouse

Answer: Hard disk

Question: A Java programmer does not need to worry about the technical details like type of _____or its capacity while developing a program to perform read / write operations over the files

- a) Hard disk
- b) Scanner
- c) Printer
- d) Mouse

Answer: Hard disk

Question: The above point is possible because Java language provides functionality of_____

- a) Files
- b) Streams
- c) Directories
- d) Objects

Answer: Streams

Question: A_____is an abstract representation of an input or output device that is used as a source or destination for data.

- a) File
- b) Directory
- c) Stream
- d) Disk

Answer: Stream

Question: Visualize a_____as a sequence of bytes that flows into the program or that flows out of the program.

- a) File
- b) Directory
- c) Stream
- d) Disk

Answer: Stream

Question: One can write data or read data using_____

- a) Files
- b) Streams
- c) Directories
- d) Objects

Answer: Streams

Question: When data is written to stream, the stream is called an

- a) Output stream
- b) Input stream
- c) I/O stream
- d) Both (A) and (B)

Answer: Output stream

Question: The____can transfer data from the program to a file on a hard disk or a monitor or to some other computer over the network.

- a) Output stream
- b) Input stream
- c) I/O stream
- d) Both (A) and (B)

Answer: Output stream

Question: An_____is used to read data from an external device to the program.

- a) Output stream
- b) Input stream
- c) I/O stream
- d) Both (A) and (B)

Answer: Input stream

Question: ____can transfer data from keyboard or from the file on a hard disk to the program.

- a) Output stream
- b) Input stream
- c) I/O stream
- d) Both (A) and (B)

Answer: Input stream

Question: The main reason for using streams for input or output operations is to make our program independent of the involved.

- a) Hard Disks
- b) Keyboards
- c) Printers
- d) Devices

Answer: Devices

Question: _____is advantage of using streams.

- a) Programmer does not need to worry about the technical details of the device.
- b) The program can work for a variety of input/ output devices without any changes to the source code.
- c) Both (A) and (B)
- d) None of these

Answer: Both (A) and (B)

Question: To understand byte streams and character streams, one needs to differentiate between character and byte_____

- a) Representation
- b) Collection

- c) Numbers
- d) Particulars

Answer: Representation

Question: If '5' is represented as a Character, its ASCII value will be_____

- a) 51
- b) 52
- c) 53
- d) 54

Answer: 53

Question: If 5 is represented as a character, its binary representation will be_____

- a) 53
- b) 5
- c) 101
- d) 00110101

Answer: 00110101

Question: If '5' is represented as a binary number, then its value will be_____

- a) 53
- b) 5
- c) Five
- d) 101

Answer: 5

Question: If '5* is represented as a binary number, then its binary representation will be_____

- a) 00000101
- b) 11001100
- c) 10101100
- d) 11111000

Answer: 00000101

Question: A character is generally stored using ASCII or Unicode format but when it is used for calculation purpose and then it's_____value is meaningful.

- a) Binary
- b) Actual
- c) Objective
- d) Text

Answer: Binary

Question: In the statement int i = 32, the____is true.

- a) Declares 'i' as an integer type variable
- b) That T stores number 32.
- c) Both (A) and (B)
- d) None of these

Answer: Both (A) and (B)

Question: The number 32 can be represented as two separate_____'3' and '2'.

- a) Numbers
- b) Values
- c) Characters
- d) All of these

Answer: Characters

Question: For numerical calculations, data types like int, float or double are used, that allows storing the numbers in_____format.

- a) Actual
- b) Text
- c) Character
- d) Binary

Answer: Binary

Question: Java supports two types of streams____stream and___stream.

- a) Byte
- b) Character
- c) Both (A) and (B)
- d) None of these

Answer: Both (A) and (B)

Question: _____transfer data in the form of bytes to the file or devices are known as byte stream or binary stream.

- a) Streams
- b) Files
- c) Data Flow
- d) Commands

Answer: Streams

Question: The files that are created using____stream are known as binary files.

- a) Byte
- b) Character
- c) Both (A) and (B)
- d) None of these

Answer: Byte

Question: If variables are to be stores like integer, double or boolean into a file, then_____files should be used.

- a) Byte
- b) Text
- c) Character
- d) Binary

Answer: Binary

Question: _____files can also be used to store arrays or objects.

- a) Byte
- b) Text
- c) Character
- d) Binary

Answer: Binary

Question: Similarly text files and program codes are created using____stream.

- a) Byte
- b) Character
- c) Both (A) and (B)
- d) None of these

Answer: Character

Question: Text files and program codes can be opened in text editors like vi and SciTE.

- a) SciTE
- b) vi
- c) Both (A) & (B)
- d) None of these

Answer: Both (A) & (B)

Question: Java provides____set of classes, character stream class and binary stream class.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Two

CBSE Class 12 Computer Science File Handling MCQs Set B

Download PDF

Computer Science

CBSE Class 12 Computer Science File Handling MCQs Set B with answers available in Pdf for free download. The MCQ Questions for Class 12 Computer Science with answers have been prepared as per the latest syllabus, NCERT books and examination pattern suggested in Standard 12 by CBSE, NCERT and KVS. Multiple Choice Questions are an important part of Term 1 and Term 2 exams for Grade 12 Computer Science and if practiced properly can help you to get higher marks. Refer to more Chapter-wise MCQs for NCERT Class 12 Computer Science and also download more latest study material for all subjects

File Handling Class 12 Computer Science MCQ

Class 12 Computer Science students should refer to the following multiple-choice questions with answers for File Handling in standard 12. These MCQ questions with answers for Grade 12 Computer Science will come in exams and help you to score good marks

File Handling MCQ Questions Class 12 Computer Science with Answers

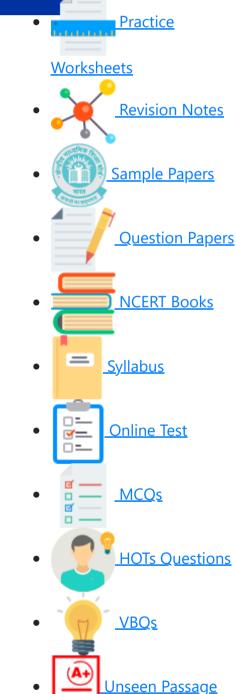

Question: Character Stream classes are present in java.io package deal with the_____/ text data.

- a) Byte
- b) Character
- c) Both (A) and (B)
- d) None of these

Answer: Character

Question: _____stream classes present in java.io package deal with binary data.

a) Byte

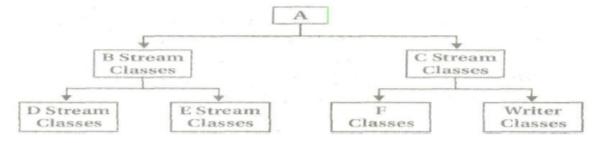

Subjects

- Accountancy
- Biology
- Bio Technology
- Business Studies
- Chemistry
- Computer Science
- Economics
- Engineering Drawing

- b) Character
- c) Both (A) and (B)
- d) None of these

Answer: Byte

Question:

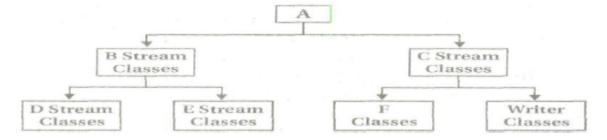

In the box A, the answer will be_____

- a) Stream
- b) Byte
- c) Output
- d) Input

Answer: Stream

Question:

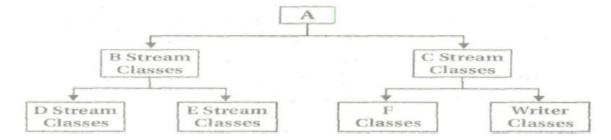

In the box B, the answer will be_____

- a) Stream
- b) Byte
- c) Output
- d) Input

Answer: Byte

Question:

In the box C, the answer will be_____

- a) Stream
- b) Byte
- c) Output
- d) Character

Answer: Character

Question:

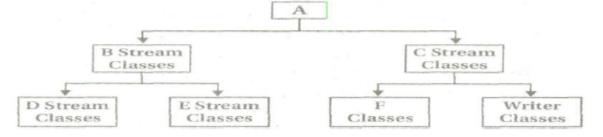

- Entrepreneurship
- Marketing
- Painting and Sculpture
- Physical Education
- English
- Graphics Design
- Geography
- Hindi
- Home Science
- History
- Informatics Practices
- Languages
- Mathematics
- Other Subjects
- Physics
- Political Science
- Psychology
- Sanskrit
- Sociology
- <u>Urdu</u>

- Class XII
- Class XI
- Class X
- Class IX
- Class VIII
- Class VII
- Class VIClass V
- Class IV
- Class III
- Class II
- Class I

Search keywords

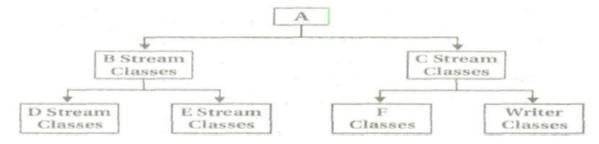

In the box D, the answer will be_____

- a) Stream
- b) Input
- c) Output
- d) Character

Answer: Input

Question:

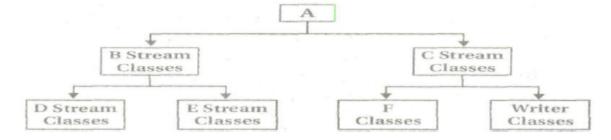

In the box E, the answer will be____

- a) Stream
- b) Byte
- c) Output
- d) Character

Answer: Output

Question:

In the box F, the answer will be_____

- a) Reader
- b) Byte
- c) Output
- d) Input

Answer: Reader

Question: Java streams can be classified into_____basic types.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Two

Question: Java streams are namely input stream and _____stream.

• a) Stream

- b) Byte
- c) Output
- d) Character

Answer: Output

Question: The_____stream reads data from the source (file, keyboard).

- a) Stream
- b) Input
- c) Output
- d) Character

Answer: Input

Question: The_____stream writes data to the destination (file, output device).

- a) Stream
- b) Byte
- c) Output
- d) Character

Answer: Output

Question: The_____package contains a collection of stream classes that support reading and writing in a file.

- a) Java.io
- b) Java.util
- c) Java.package
- d) All of these

Answer: Java.io

Question: _____stream classes are a group of classes available in java.io package.

- a) Input
- b) Byte
- c) Output
- d) Character

Answer: Character

Question: Character stream classes can be used to read and write Unicode characters.

- a) 8 bit
- b) 16 bit
- c) 32 bit
- d) 64 bit

Answer: 16 bit

Question: _____stream classes can be further classified into reader and writer classes.

- a) Input
- b) Byte
- c) Output
- d) Character

Answer: Character

Question: _____classes are a group of classes designed to read characters from files.

- a) Writer
- b) Reader
- c) Output
- d) Input

Answer: Reader

Question: The____classes are a group of classes designed to write characters into a file.

- a) Writer
- b) Reader
- c) Character
- d) Byte

Answer: Writer

Question: Writer classes are inherited from the____class.

- a) Object
- b) Writer
- c) Reader
- d) Character

Answer: Object

Question: Writer classes are ____classes (classes that cannot be used to create an object) and come with set of methods to be implemented by its sub classes.

- a) Intellectual
- b) Abstract
- c) Byte
- d) Java.io

Answer: Abstract

Question: Input Stream Reader and Buffered Reader are the subclass of____class.

- a) Object
- b) Writer
- c) Reader
- d) Character

Answer: Reader

Question: ____class is the subclass of Input Stream Reader class.

- a) File Reader
- b) File Writer
- c) File java
- d) Java File

Answer: File Reader

Question: Output Stream Writer, Buffered Writer and Print Writer are the sub classes of _____class.

- a) Object
- b) Writer
- c) Reader
- d) Character

Answer: Writer

Question: File Writer class is the _____of Output Stream Writer class.

- a) Super class
- b) Sub.io
- c) Sub class
- d) Base class

Answer: Sub class

Question: Writer class is the _____for writing a character stream.

- a) Super class
- b) Sub.io
- c) Subclass
- d) Baseclass

Answer: Baseclass

Question: The abstract____class defines the functionality that is available for all character output streams.

- a) Object
- b) Writer
- c) Reader
- d) Character

Answer: Writer

Question: Methods of _____class are used by its sub classes.

- a) Writer
- b) Object
- c) Reader
- d) Character

Answer: Writer

Question: The writer method____ closes the stream.

- a) Void write (int)
- b) Void close ()
- c) Void write (Strings)
- d) All of these

Answer: Void close ()

Question: The writer method____writes string 's' to the stream.

- a) Void write (int C)
- b) Void close ()
- c) Void write(String s)
- d) All of these

Answer: Void write(String s)

Question: The writer method_____writes the lower 16 bits of 'c' to the stream.

- a) Void write (int C)
- b) Void close 0
- c) Void write(String s)
- d) All of these

Answer: Void write (int C)

Question: The Output Stream____class extends Writer class.

- a) Writer
- b) Object
- c) Reader
- d) Character

Answer: Writer

Question: The____converts stream of characters to a stream of bytes.

- a) Input Stream
- b) Output Stream
- c) Reader Stream
- d) Writer Stream

Answer: Output Stream

Question: The File Writer class extends_____Writer and outputs characters to a file.

- a) Input Stream
- b) Output Stream
- c) Reader Stream
- d) Writer Stream

Answer: Output Stream

Question: The File Writer class has _____constructor which throws IO Exception

- a) File Writer (String file path)
- b) File Writer (File file obj)
- c) File Writer (String file path, Boolean append)
- d) All of these

Answer: All of these

Question: Which of the following constructor is of File Writer Class?

- a) File Writer (String file path)
- b) File Reader (File file obj)
- c) File Writer constructor
- d) All of these

Answer: File Writer (String file path)

Question: In the constructor "______", if append is true, characters are appended to the end of file, otherwise the existing contents of the file are overwritten.

- a) File Writer (String file path)
- b) File Writer (File file obj)
- c) File Writer (String file path, Boolean append)
- d) None of these

Answer: File Writer (String file path, Boolean append)

Question: In the following example - an object of____can be created. File Writerfwobject = new File Writer ("/Java/files/Charfilel.txt");

- a) File Stream
- b) File Writer
- c) File Reader
- d) File Demo

Answer: File Writer

Question: It is important to close the stream____after writing to a file is accomplished.

- a) Object
- b) Reader
- c) File
- d) Directory

Answer: Object

Question: _____files consume system resources and depending on the file mode.

- a) Closed
- b) Large
- c) Small
- d) Open

Answer: Open

Question: _____class is the base class for reading a character stream.

- a) Object
- b) Reader
- c) File
- d) Directory

Answer: Reader

Question: The abstract	class defines	the functionality	that is
available for all character inp	ut streams.		

- a) Object
- b) Reader
- c) File
- d) Directory

Answer: Reader

Question: ____class should be used in program to perform read operations.

- a) File Stream
- b) File Writer
- c) File Reader
- d) File Demo

Answer: File Reader

Question: _____method of Reader class closes the stream.

- a) Void close()
- b) Int read()
- c) Void read()
- d) None of these

Answer: Void close()

Question: _____method of Reader class, reads next available character from the stream, it returns "-1" to indicate the end of stream.

- a) Void close 0
- b) Int read()
- c) Void read()
- d) None of these

Answer: Int read()

Question: The Input Stream Reader class extends____class.

- a) Stream
- b) Writer
- c) Reader
- d) Demo

Answer: Reader

Question: ____class converts a stream of bytes to a stream of characters.

- a) Stream
- b) Writer
- c) Reader
- d) Demo

Answer: Reader

Question: The____class extends Input Stream Reader class and reads characters from a file.

- a) File Stream
- b) File Writer
- c) File Reader
- d) File Demo

Answer: File Reader

Question: Which of the following is a File Reader constructor?

- a) File Reader (String file path)
- b) File Reader (File file obj)
- c) Both (A) and (B)
- d) None of these

Answer: Both (A) and (B)

Question: Which of the following is not a File Reader constructor?

- a) File Reader (String file path)
- b) File Reader (File file obj)
- c) Both (A) and (B)
- d) File Reader(int i, int j)

Answer: File Reader(int i, int j)

Question: In the following example - an object of____can be created. File Reader frobject = new File Reader ("/Java/flles/Charfflel.txt");

- a) File Reader
- b) File Writer
- c) Both (A) and (B)
- d) File Demo

Answer: File Reader

Question: While reading from a file,____must identify that the file has ended.

- a) Program
- b) Code
- c) Class
- d) Method

Answer: Program

Question: The Java_____method returns "-1" to identify the end of data in the stream.

- a) Close()
- b) Read()
- c) Print()
- d) Write()

Answer: Read()

Questio	n: The	and	_classes ir	the	java.io	package,	gives	the
ability to	o read and	I write fron	n and into	files	in the	disk.		

- a) File Input Stream
- b) File Output Stream
- c) File Reader Stream
- d) Both (A) and (B)

Answer: Both (A) and (B)

Question: The above mentioned streams are the sub classes of ____ and ___ classes.

- a) Reader Stream
- b) Input Stream
- c) Output Stream
- d) Both (B) and (C)

Answer: Both (B) and (C)

Question: The file_____is a subclass of Output Stream and is used to write bytes to the file or some output stream.

- a) Reader Stream
- b) Input Stream
- c) Output Stream
- d) Both (B) and (Q

Answer: Output Stream

Question: _____method of File Output Stream class closes the file output stream and releases any system resources associated with the stream.

- a) Void write (int b)
- b) Void close ()
- c) Void write (byte [] b)
- d) Void read()

Answer: Void close ()

Question: _____method of File Output Stream class writes the specified byte to this file output stream.

- a) Void write (int b)
- b) Void close ()
- c) Void write (byte [] b)
- d) Voidread()

Answer: Void write (int b)

Question: _____method of File Output Stream class writes b.length bytes from the specified byte array to this file output stream.

- a) Void write(int b)
- b) Void close()

- c) Void write (byte [] b)
- d) Voidread()

Answer: Void write (byte [] b)

Question: The constructors of _____can accept either a string containing the path to the file location or an object of the file class.

- a) File Output Stream
- b) File Input Stream
- c) File Reader Stream
- d) File Constructor

Answer: File Output Stream

Question: The constructor File Output Stream (String name) throws

- a) File Out of Bounds Exception
- b) File Not Found Exception
- c) File Found Exception
- d) None of these

Answer: File Not Found Exception

Question: The constructor File Output Stream (File file) throws_____

- a) File Not Found Exception
- b) File Out of Bounds Exception
- c) File Found Exception
- d) None of these

Answer: File Not Found Exception

Question: The following example will create an instance of _____FileOutputStreamfosobject = new File Output Stream ("/home/Akash/myflle.txt");

- a) File Output Stream
- b) File Input Stream
- c) File Reader Stream
- d) File Constructor

Answer: File Output Stream

Question: The_____is a subclass of Input Stream and is generally used to read byte data from the files.

- a) File Input Stream
- b) File Reader Stream
- c) File Writer Stream
- d) File Output Stream

Answer: File Output Stream

Question: _____method of File Input Stream class reads a byte of data from this input stream.

• a) Void close()

- b) Int read(byte[] b)
- c) Int read()
- d) Void write()

Answer: Int read()

Question: _____method of File Input Stream class closes the file input stream and releases any system resources associated with the stream.

- a) Void close()
- b) Int read(byte[] b)
- c) Int read()
- d) Void write()

Answer: Void close()

Question: ____method of FileInputStream class reads up to b.length bytes of data from this input stream into an array of bytes.

- a) Void close()
- b) Int read(byte[] b)
- c) Int read()
- d) Void write()

Answer: Int read(byte[] b)

Question: A____can get input from live interaction through keyboard / GUI or it may take input as command line arguments or from the files.

- a) Program
- b) Code
- c) Class
- d) Method

Answer: Program

Question: ____class belongs to the java.util package.

- a) Printer
- b) Console
- c) Scanner
- d) Keyboard

Answer: Keyboard

Question: It provides various methods to read input from the _____or from the file.

- a) Printer
- b) Console
- c) Scanner
- d) Keyboard

Answer: Scanner

Question: A special feature of this class is that it breaks the input string into tokens (words) using a_____

- a) Delimiter
- b) Printer
- c) Console
- d) White space

Answer: Delimiter

Question: ____is the default delimiter.

- a) Delimiter
- b) Printer
- c) Console
- d) White space

Answer: White space

Question: Each____can be of different type, for example a string like "India-1947" can also be read as "String-int" values.

- a) Symbol
- b) Token
- c) Word
- d) Mark

Answer: Token

Question: Which of the following is not a Scanner related constructor or method?

- a) Scanner (String str)
- b) Scanner (Input Stream isobject)
- c) Scanner (File fobject)
- d) Scanner(Files i)

Answer: Scanner(Files i)

Question: A____object can be created from a string, file object or Input Stream object.

- a) Printer
- b) Console
- c) Scanner
- d) Keyboard

Answer: Scanner

Question: The method of Scanner class closes the Scanner.

- a) Void close ()
- b) String next()
- c) Boolean has Next()
- d) int nextInt()

Answer: Void close ()

Question: The method____of Scanner class returns the next token.

- a) Void close()
- b) String next()
- c) Boolean hasNext()
- d) int nextInt()

Answer: String next()

Question: The method_____of Scanner class returns true if there is a token in input.

- a) Void close()
- b) String next()
- c) Boolean has Next()
- d) int nextInt()

Answer: Boolean has Next()

Question: The method_____of Scanner class scans the next token of the input as Int.

- a) Void close 0
- b) String next()
- c) Boolean has Next()
- d) int nextInt()

Answer: int nextInt()

Question: The method_____of Scanner class scans the next token of the input as Float.

- a) Float next Float()
- b) String next()
- c) Boolean has Next()
- d) int nextInt()

Answer: Float next Float()

Question: The method_____of Scanner class scans the next token of the input as Line.

- a) Float next Float()
- b) String next()
- c) Boolean has Next()
- d) String next Line()

Answer: String next Line()

Question: _____class can also be used to read from a file.

- a) Printer
- b) Console
- c) Scanner
- d) Keyboard

Answer: Scanner

Question: The____class is especially used when the input is to be types in hidden form (characters must not be echoed on the screen).

- a) Printer
- b) Console
- c) Scanner
- d) Keyboard

Answer: Console

Question: The____class provides a method for reading password.

- a) Printer
- b) Console
- c) Scanner
- d) Keyboard

Answer: Console

Question: The Console class belongs to _____package.

- a) Java.io
- b) Java.util
- c) Java.class
- d) Java.console

Answer: Java.io

Question: _____method of Console class is used to write a formatted string to this console's output stream using the specified format string and arguments.

- a) String read Line()
- b) Char[] read Password()
- c) Console printf(String format, Object args)
- d) None of these

Answer: Console printf(String format, Object args)

Question: _____method of Console class reads a single line of text from the console.

- a) String readLine()
- b) Char[] readPassword()
- c) Console printf(String format, Object args)
- d) None of these

Answer: String readLine()

Question: _____method of Console class reads a password or passphrase from the console with echoing disabled.

- a) String read Line()
- b) Char[] read Password()
- c) Console printf(String format, Object args)
- d) None of these

Answer: Char[] read Password()

Question: Scanner class is used for performing which of the following operations?

- a) Read from a file
- b) Navigate through a file
- c) Scan a file
- d) All of these

Answer: Read from a file

Question: Which of the following is correct syntax?

- a) Public static void main (String args[])
- b) Public static void main (String args)
- c) Public static void main(String args[])
- d) Public static void main(String args[]);

Answer: Public static void main(String args[])

Question: The____class provides a method for reading password.

- a) Printer
- b) Console
- c) Scanner
- d) Keyboard

Answer: Console

- a) System
- b) Computer
- c) CPU
- d) Workstation

Answer: Computer

Question: If the _____ is used for file transfers, more time may be taken in the transfer due to slow Internet speed.

- a) Hard disk
- b) Directory structure
- c) Internet
- d) RAM

Answer: Internet

Question: Heavy file transfers put load on the usually clogged____connection.

- a) HTML
- b) Structure
- c) Broadband
- d) Internet

Answer: Internet

Question: Unless the user or organization has unlimited____plan, higher amount of data may result in higher cost as well.

- a) Usage
- b) Structure
- c) Broadband
- d) Internet

Answer: Internet

Question: There is a need to reduce the amount of storage space occupied by_____files (and entire directory structures), whenever possible.

- a) System
- b) Computer
- c) CPU
- d) Workstation

Answer: Computer

Question: From a convenience point of view, in many cases it is also desirable to have a single file to handle rather than a large bunch of files or a complex____structure.

Answer: Directory

Question: _____scientists have developed techniques to place a whole directory structure into a single file for convenience.

- a) Peripheral
- b) Computer
- c) Expert
- d) Research

Answer: Computer

Question: Computer scientists have developed techniques to place a whole directory structure into a single file for convenience. Such a file is called an_____

- a) Library
- b) Archive
- c) Collection
- d) File

Answer: Archive

Question: The computer scientists have also developed a number of ______for reducing the storage requirements of computer files and directory structures.

- a) Methods
- b) Systems
- c) Procedures
- d) Techniques

Answer: Techniques

Question: The above techniques (of Q 11) are called data

- a) Solidarity
- b) Firmness
- c) Compression
- d) Resolution

Answer: Compression

Question: Data_____generally works by identifying repetition in the data and encoding the data in a way that reduces or eliminates such repetition.

- a) Solidarity
- b) Firmness
- c) Compression
- d) Resolution

Answer: Compression

Question: Actual	data compression programs use
sophisticated	based on information theory to achieve even
greater reduction	n in size.

- a) Algorithm
- b) Instruction
- c) Flowchart
- d) Method

Answer: Algorithm

Question: Linux provides ready-made free and open source software for managing_____files.

- a) Library
- b) Archive
- c) Collection
- d) File

Answer: Archive

Question: The ready-made free open-source software for managing archive files is called_____

- a) Archive manager
- b) Library manager
- c) File manager
- d) Directory explorer

Answer: Archive manager

Question: The_____permits the user to combine may files or an entire directory tree into a single file known as an archive.

- a) Archive manager
- b) Library manager
- c) File manager
- d) Directory explorer

Answer: Archive manager

Question: On Linux systems_____is the most common archive format.

- a) zip
- b) rar
- c) tar
- d) gz

Answer: tar

Question: Full form of tar is_____

- a) Tap achiever
- b) Tape archiver
- c) Tape archive resolution
- d) None of these

Answer: Tape archiver

Question: formats. • a) zip • b) rar • c) tar • d) zar	_also provides the facility of compressing file
Answer: tar	
Question: The m thefile fo • a) zip • b) tar.zip • c) Both (A) and (B) • d) None of these	ost common compressed file formats are rmats.
Answer: Both (A) and (E	3)
Question: The zipsingle zip file, or a) Unix b) Linux c) Windows d) Android Answer: Unix	p file format supports storing multiple files in a
files into a single	systems the common practice is to combine the uncompressed file in the tar format and then e in the zip format using gzip.
Answer: Linux	
Question: In Linu a) GNU b) gzip c) zip d) zip. rar	uxis an open source archiving program.

Answer: gzip

Question: A gzip file commonly has the extension_____

- a) Tar.zip
- b) tar.rar
- c) tar.gz
- d) tar.gzip

Answer: tar.gz

 Question: The gzip file is called a a) tar ball b) rar ball c) gar ball
d) zip ball Answer: tar ball
Question: Theis a very common format for distributing software or bundles of files on the Linux platform. • a) Tar ball • b) Rar ball • c) Gar ball • d) Zip ball
Answer: Tar ball
Question: Theformat is also used by different applications under different names. • a) GNU • b) gzip • c) zip • d) zip.rar
Answer: zip
Question: The JAR files used in Java and the OpenOffice.org office suite file formats usecompression. • a) GNU • b) Gzip • c) Zip • d) Zip.rar
Answer: Zip
Question:uses the extension part of the filename to identify the file format when opening an archive and to select the file format when creating a new archive. • a) Archive Manager • b) Library Manager • c) File Manager • d) Directory Explorer
Answer: Archive Manager
Question:can also be used to explore the contents of archives, to extract files from the archives, to add new files to the archive, to delete files from the archive, and perform other such

- a) Archive Manager
- b) Library Manager
- c) File Manager

operations.

• d) Directory Explorer

Answer: Archive Manager

Question: There is no menu item to start the archive manager by_____

- a) Menu
- b) Default
- c) Simple steps
- d) Stages

Answer: Default

Question: One can double-click on an archive file in the_____file browser to start the archive manager.

- a) Chrome
- b) Explorer
- c) Nautilus
- d) Firefox

Answer: Nautilus

Question: A new____can be created by right-clicking a file or directory and selecting the Compress option from the context menu.

- a) Library
- b) Archive
- c) Collection
- d) File

Answer: Archive

Question: By right-clicking a file or directory and selecting the Compress option from the context menu, creates a new____with that file or directory as its contents.

- a) Library
- b) Archive
- c) Collection
- d) File

Answer: Archive

Question: Archive Manager can be added to the ____sub menu of the Application menu.

- a) Programs
- b) Application
- c) Panel
- d) Accessories

Answer: Accessories

Question: When an archive is open in the _____the view is similar to a directory open in the Nautilus file browser.

- a) Archive manager
- b) Library manager
- c) File manager
- d) Directory explorer

Answer: Archive manager

Question: Double-clicking a____opens that directory and shows its contents.

- a) Directory
- b) Menu
- c) Icon
- d) File

Answer: Directory

Question: The Up and Back buttons in the toolbar can be used to go to the parent____(if it exists the archive) and the previous directory (if any) respectively.

- a) Directory
- b) Menu
- c) Icon
- d) File

Answer: Directory

Question: The_____helps us in creating and using archive files for backup for transfer via external storage device, for transfer via network for saving disk space, etc.

- a) Archive manager
- b) Library manager
- c) File manager
- d) Directory explorer

Answer: Archive manager

Question: ____has many built-in tools to play multimedia content like audio, video, etc.

- a) Linux
- b) Unix
- c) Ubuntu
- d) Archive Manager

Answer: Ubuntu

Question: _____media player is great open source tool,

- a) Windows Media Player
- b) VLC
- c) VCL
- d) QuickTime

Answer: VCL

Question: _____is a short form of Video LAN client.

- a) Windows Media Player
- b) VLC
- c) VCL
- d) QuickTime

Answer: VLC

Question: _____is popular because of its versatility and features.

- a) Windows Media Player
- b) VLC
- c) VCL
- d) QuickTime

Answer: VLC

Question: Started as an academic project by the music-loving students of a university in Paris, ____ is now a community project available under multiple operating systems and has been downloaded over a billion times.

- a) Windows Media Player
- b) VLC
- c) VCL
- d) QuickTime

Answer: VLC

Question: One of the issues faced with ____content is that there are a variety of ways of converting multimedia information coming from hardware devices (audio / video streams) into computer data and then converting the computer data back into audio / video streams for playing on the hardware devices.

- a) Multimedia
- b) Hypermedia
- c) Software
- d) Interactive program

Answer: Multimedia

Question: The conversion (coding) and reverse conversion (decoding) is performed by a software component called______

- a) Coder
- b) Decoder
- c) Code decoder
- d) Codec

Answer: Codec

Question: The full form of_____is coder decoder.

- a) Coder
- b) Decoder
- c) Code decoder
- d) Codec

Answer: Codec

Question: Each multimedia data format requires its own_____

- a) Coder
- b) Decoder
- c) Codec
- d) Code decoder

Answer: Codec

Question: The advantage of VLC is that it supports all the popular codecs and hence all the popular_____

- a) Set-ups
- b) Formats
- c) Presentations
- d) Plans

Answer: Formats

Question: ____also supports all the major types of devices including web cameras, HD monitors, speakers of all types, microphones, headphones.

- a) Windows Media Player
- b) VLC
- c) VCL
- d) QuickTime

Answer: VLC

Question: ____can convert multimedia files from one format to another.

- a) Windows Media Player
- b) VLC
- c) VCL
- d) QuickTime

Answer: VLC

Question: ____can also stream (send) audio / video to and receive audio / video from another computer (s) over the network.

- a) Windows Media Player
- b) VCL
- c) VLC
- d) QuickTime

Answer: VLC

Question: An entire directory can be opened using the Media Open____option.

- a) Directory
- b) Menu
- c) Icon

• d) File

Answer: Directory

Question: If a directory is opened_____will actually open all media flies in that directory playable by it.

- a) Windows Media Player
- b) VCL
- c) VLC
- d) QuickTime

Answer: VLC

Question: When one or more flies are opened, they are added to the ______ of the media player.

- a) Filelist
- b) Quicklist
- c) Medialist
- d) Playlist

Answer: Playlist

Question: The_____is a list of media files (tracks) to be played.

- a) Filelist
- b) Quicklist
- c) Medialist
- d) Playlist

Answer: Playlist

Question: One can play the media in the_____in sequence, or in random order.

- a) Filelist
- b) Quicklist
- c) Media list
- d) Playlist

Answer: Playlist

Question: The_____can be opened using the View Playlist option and saved using the Media Save Playlist to File option.

- a) Filelist
- b) Playlist
- c) Quicklist
- d) Medialist

Answer: Playlist

Question: VLC supports multiple file formats for playlist, but_____is more common.

- a) M3U
- b) MU3
- c) UM3

• d) MP3

Answer: M3U

Question: At the bottom of the window, VLC displays a____bar showing how much of the current track has been played and what is its total duration.

- a) Growth
- b) Progress
- c) Development
- d) Improvement

Answer: Progress

Question: In VLC Player, when the track is playing, the play button turns into a____button.

- a) Still
- b) Progress
- c) Pause
- d) Stop

Answer: Pause

Question: The____button on the player has two parallel bars on it.

- a) Play
- b) Progress
- c) Pause
- d) Stop

Answer: Pause

Question: In the VLC player, if the playback is paused, the button reverts back to mode.

- a) Play
- b) Progress
- c) Pause
- d) Stop

Answer: Play

Question: In full screen mode of VLC player, the____like play / pause, stop is hidden.

- a) Panels
- b) Controls
- c) Switches
- d) Buttons

Answer: Controls

Question: The_____of the VLC player can be displayed in a temporary floating window by moving the mouse cursor over the video.

- a) Panels
- b) Controls
- c) Switches
- d) Buttons

Answer: Controls

Question: VLC can also be used to _____multimedia files from one format to another.

- a) Alter
- b) Change
- c) Convert
- d) Transform

Answer: Convert

Question: The____button can be used to start the conversion process of the multimedia files from one format to another.

- a) Convert / Save
- b) Convert / Open
- c) Convert / File
- d) Convert / Format

Answer: Convert / Save

Question: Google maps is a free Internet-based service provided by_____

- a) Microsoft
- b) Netscape
- c) Apple, Inc
- d) Google, Inc

Answer: Google, Inc

Question: _____has, over a period of years, collected extensive map data for the whole earth through various means like satellite imagery, cars with cameras mounted on them, data purchased from other organizations and data provided by millions of individual users around the world.

- a) Microsoft
- b) Google
- c) Apple
- d) Htc

Answer: Google

Question: _____allows anybody to edit the maps and identify landmarks, buildings, etc.

- a) Google
- b) Google watch
- c) Google maps
- d) Google games

Answer: Google maps

Question:	also al	lows	users	to u	pload	pho	otograp	hs	of	the
place and	post reviews	of th	e plac	e.						

- a) Google
- b) Google watch
- c) Google maps
- d) Google games

Answer: Google maps

Question: The service is also heavily used on_____devices like smartphones and tablets.

- a) Mobile
- b) Desktop
- c) Computer
- d) All of these

Answer: Mobile

Question: The Google maps service can be accessed from the web browser by opening the web site http://www.google.co.in and selecting the _____option from the top menu.

- a) Games
- b) Maps
- c) Tools
- d) Bookmarks

Answer: Maps

Question: The Google maps service can be directly visited by entering the http://maps.google.co.in.

- a) URL
- b) Address
- c) Resource
- d) Locator

Answer: URL

Question: The____service can be accessed from the mobile phone's web browser as well as from the Google maps application.

- a) Google
- b) Google watch
- c) Google maps
- d) Google games

Answer: Google maps

Question: On a mobile phone, the user's location can be known with very high accuracy if the_____facility is used.

- a) GPRS
- b) 2G
- c) 3G
- d) GPS

Answer: GPS

Question: Full form of GPS is_____

- a) Global Placing System
- b) Global Positioning System
- c) Global Putting System
- d) Global Positioning Scheme

Answer: Global Positioning System

Question: The____finds a user's location with an estimated error of only few meters using satellite signals.

- a) GPRS
- b) 2G
- c) 3G
- d) GPS

Answer: GPS

Question: _____allow the user to correct the location, if it is inaccurate.

- a) Google
- b) Google watch
- c) Google maps
- d) Google games

Answer: Google maps

Question: The map can be scrolled (pan) by dragging it in different directions or by clicking on the arrows in a_____on the left hand side.

- a) Circle
- b) Scroll
- c) Bar
- d) Box

Answer: Circle

Question: A vertical slider____on the left allows us to zoom in and out on the map.

- a) Circle
- b) Scroll
- c) Bar
- d) Box

Answer: Bar

Question: By clicking on the Satellite_____the view can be switched to the satellite image.

- a) Panel
- b) Control
- c) Switch
- d) Button

Answer: Button

Question: In the Satellite view, the images taken by_____in the sky are shown.

- a) Satellites
- b) Digital camera
- c) Hybrid camera
- d) Planets

Answer: Satellites

Question: On a highway or in a crowded city area, walking or driving, the _____service decides the route based on the current location and destination and guides with on-screen as well as voice (spoken) instructions.

- a) Google tools
- b) Google watch
- c) Google maps
- d) Google games

Answer: Google maps

Question: The Google maps service even provides turn-by-turn guidance while travelling if a mobile phone device is equipped with_____receiver.

- a) GPRS
- b) 2G
- c) 3G
- d) GPS

Answer: GPS

Question: Government organizations and businesses use the Google maps service to provide people_____on how to reach their offices.

- a) Information
- b) Data
- c) Facts
- d) Documents

Answer: Information

Question: The service also has a facility using which anyone can display a map of any place on one's_____

- a) Books
- b) Website
- c) Office
- d) Files

Answer: Website

Question: Tourist information websites and Tourism departments of _____also make use of this service.

- a) Groups
- b) Businesses
- c) Governments
- d) Organizations

Answer: Governments

Question: Google maps can also be used to_____-bus routes, current location of running trains, etc.

- a) Display
- b) Exhibit
- c) Present
- d) Demonstrate

Answer: Display

- c) Barplot
- d) Bar-plot

Answer: Barplot

Question: Related to R commands: >barplot (no_students, main="Faculty wise students", xlab= "faculty", + ylab= "Number of students", names. arg=faculty_names, +ylim=c (0, 1000), border= "blue") Ques: The first argument (no_students) specifies the_____list.

- a) Data
- b) Info
- c) Student
- d) Variable

Answer: Data

Question: Related to R commands: >barplot (no_students, main="Faculty wise students", xlab= "faculty", + ylab= "Number of

students", names. arg=faculty_names, +ylim=c (0, 1000), border= "blue") Ques: All other arguments have the form_____

- a) Name=variable
- b) Value^name
- c) Name=value
- d) Variable=name

Answer: Name=value

Question: Related to R commands: >barplot (no_students, main="Faculty wise students", xlab= "faculty", + ylab= "Number of students", names. arg=faculty_names, +ylim=c (0, 1000), border= "blue") Ques: The argument_____is used to specify the main title in the plot.

- a) Main
- b) Xlab
- c) Ylab
- d) Ylim

Answer: Main

Question: Related to R commands: >barplot (no_students, main="Faculty wise students", xlab= "faculty", + ylab= "Number of students", names. arg=faculty_names, +ylim=c (0, 1000), border= "blue") Ques: The argument_____is used to specify the X-axis label in the plot.

- a) Main
- b) Xlab
- c) Ylab
- d) Ylim

Answer: Xlab

Question: Related to R commands: >barplot (no_students, main="Faculty wise students", xlab= "faculty", + ylab= "Number of students", names. arg=faculty_names, +ylim=c (0, 1000), border= "blue") Ques: The argument______is used to specify the Y-axis label in the plot.

- a) Main
- b) Xlab
- c) Ylab
- d) Ylim

Answer: Ylab

Question: Related to R commands: >barplot (no_students, main="Faculty wise students", xlab= "faculty", + ylab= "Number of students", names. arg=faculty_names, +ylim=c (0, 1000), border= "blue") Ques: The argument_____is used to specify the values to be displayed for the bars of the plot.

- a) Names.arg
- b) Names.org

- c) Names.list
- d) Names.ylim

Answer: Names.arg

Question: Related to R commands: >barplot (no_students, main="Faculty wise students", xlab= "faculty", + ylab= "Number of students", names. arg=faculty_names, +ylim=c (0, 1000), border= "blue") Ques: The argument____is used to specify the range of values to be plotted on the Y-axis in the plot.

- a) Main
- b) Xlab
- c) Ylab
- d) Ylim

Answer: Ylim

Question: Related to R commands: >barplot (no_students, main="Faculty wise students", xlab= "faculty", + ylab= "Number of students", names. arg=faculty_names, +ylim=c (0, 1000), border= "blue") Ques: The argument_____is used to specify the border color in the plot.

- a) Main
- b) Xlab
- c) Ylab
- d) Border

Answer: Border

Question: In R software, for long commands, when Enter is pressed before the command is complete, R issues the____prompt until the command is completed.

- a) #
- b) *
- c) >
- d) +

Answer: +

Question: In R software, by_____the graph does not have grid lines.

- a) Default
- b) Command
- c) Argument
- d) None of these

Answer: Default

Question: Using R software____can also be produced.

- a) Diagrams
- b) Histograms
- c) Figures
- d) Flowcharts

Answer: Histograms

Question:	is one such open source software designed to
assist project man	agers in preparing, maintaining and following a
well-defined proje	ct plan.

- a) Rational_Plan
- b) Rational-Plan
- c) Rational Plan
- d) Plan Rational

Answer: Rational Plan

Question: ____assists the project managers throughout the life cycle of their projects.

- a) Rational Plan
- b) Rational-Plan
- c) Rational Plan
- d) Plan Rational

Answer: Rational Plan

Question: ____comprises three different desktops products.

- a) Rational Plan
- b) Rational-Plan
- c) Rational Plan
- d) Plan Rational

Answer: Rational Plan

Question: Rational Plan comprises of the_____desktop product.

- a) Single
- b) Multi
- c) Viewer
- d) All of these

Answer: All of these

Question: Rational Plan_____.allows the users to manage independent projects that do not have common resources and has no interrelations between different projects.

- a) Single
- b) Multi
- c) Viewer
- d) All of these

Answer: Single

Question: Rational n Plan____allows the manager to associate general project information like name, notes, links, assumptions, constraints or risks.

- a) Single
- b) Multi

- c) Viewer
- d) All of these

Answer: Single

Question: Rational Plan____allows creating, editing and deleting calendars, building schedules.

- a) Single
- b) Multi
- c) Viewer
- d) All of these

Answer: Single

Question: Rational Plan_____provides project tracking tools such as critical path, mark completion value for tasks, work and cost time phased information.

- a) Single
- b) Multi
- c) Viewer
- d) All of these

Answer: Single

Question: Using_____a printable report can be generated as well as data can be imported from other project management tool or data can be exported into other formats.

- a) Rational Plan
- b) Rational-Plan
- c) Rational Plan
- d) Plan Rational

Answer: Rational Plan

Question: Rational Plan____allows the user to manage projects that share company resources across projects.

- a) Single
- b) Multi
- c) Viewer
- d) All of these

Answer: Multi

Question: Rational Plan____also manages interdependence's between projects.

- a) Single
- b) Multi
- c) Viewer
- d) All of these

Answer: Multi

Question: Rational Plan	_includes all the f	features of	f Rational
Plan Single Project.			

- a) Single
- b) Multi
- c) Viewer
- d) All of these

Answer: Multi

Question: Rational Plan____calculates the resources data (work, cost, over allocation) considering their assignments in all projects.

- a) Single
- b) Multi
- c) Viewer
- d) All of these

Answer: Multi

Question: Rational Plan_____allows links between tasks pertaining to different projects, analyzes all our projects data and creates a project Portfolio view.

- a) Single
- b) Multi
- c) Viewer
- d) All of these

Answer: Multi

Question: Rational Plan_____is an additional tool developed to share the project in its original file format (.xrp), but it can be used as well to open Microsoft Project files.

- a) Single
- b) Multi
- c) Viewer
- d) All of these

Answer: Viewer

Question: Rational Plan_____is useful to anybody who needs to check and overview the project's evolution without making changes to the schedule, and for resources to see their assignments.

- a) Single
- b) Multi
- c) Viewer
- d) All of these

Answer: Viewer

Question: As of today, the support of _____on Ubuntu 10.04 has been removed; it is available for Ubuntu 12.04 and later versions.

- a) Rational Plan
- b) Rational-Plan

- c) RationalPlan
- d) PlanRational

Answer: RationalPlan

Question: Today_____instant messaging service is being used.

- a) Yahoo Messenger
- b) Google Talk
- c) Rediff Bol
- d) All of these

Answer: All of these

Question: The instant messaging services are used for real time like_____

- a) Chatting with text
- b) Audio
- c) Video
- d) All of these

Answer: All of these

Question: _____is one such software that allows the users to make calls over the Internet using computer systems.

- a) Skype
- b) Word
- c) Excel
- d) R software

Answer: Skype

Question: The_____service allows users to communicate with peers using voice, video as well as text.

- a) HTML
- b) Media Player
- c) VLC
- d) Skype

Answer: Media Player

Question: _____also provides additional features like file transfer and videoconferencing.

- a) Skype
- b) Internet
- c) VLC
- d) R software

Answer: Skype

Question: The Skype software can be downloaded free of cost, though its source code is____and not available for modification.

• a) Viewable

- b) Proprietary
- c) Open-source
- d) Branded

Answer: Branded

Question: To use____a working sound input and output configuration is needed.

- a) Rational Plan
- b) Skype
- c) Word
- d) R software

Answer: Skype

Question: To start Skype, choose Application → Internet

- a) Skype
- b) Java
- c) Ubuntu
- d) R software

Answer: Skype

Question: If Skype is being opened for the first time, it will open an end User License____window.

- a) Arrangement
- b) Treaty
- c) Agreement
- d) Contract

Answer: Agreement

Question: To use Skype service, a____user account is needed.

- a) Skype
- b) Ubuntu
- c) Rational Plan
- d) R software

Answer: Skype

Question: The_____service also provides the facility of finding the nearest ATM Centre, Bank, Restaurant, Bus-stop or any other such essential place.

- a) Google Tools
- b) Google Watch
- c) Google Maps
- d) Character Maps

Answer: Google Maps

Question: The_____program can be used to enter Unicode characters into any application.

- a) Character Symbol
- b) Character Map
- c) Character Code
- d) Character Application

Answer: Character Map

Question: From the _____program Script has to be selected from the left pane first and then double click characters to insert them into the Test to copy area below.

- a) Character Symbol
- b) Character Map
- c) Character Code
- d) Character Application

Answer: Character Map

Question: While using _____program, spaces and punctuation can be entered by the user from the keyboard directly into the area after clicking in it.

- a) Character Map
- b) Character Codes
- c) Google Maps
- d) Character Selection

Answer: Character Map

Question: Brief details of the character currently selected with singleclick or entered with double-click are shown in the status line at the bottom, while more details on the character is available in the tab.

- a) Character Details
- b) Character Map
- c) Character Tools
- d) Google Maps

Answer: Character Details

Question: A_____is good solution if one has to type a few characters in another script occasionally.

- a) Character Details
- b) Character Map
- c) Character Tools
- d) Google Maps

Answer: Character Details

Question: _____is a free software environment for statistical computing.

- a) P
- b) Q
- c) R
- d) GNU

Answer: R

Question: R software is a	aproject
---------------------------	----------

- a) P
- b) Q
- c) R
- d) GNU

Answer: GNU

Question: _____software is widely used for statistical analysis.

- a) P
- b) Q
- c) R
- d) GNU

Answer: R

Question: R software has its own____language.

- a) Scripting
- b) Object-oriented
- c) Simple
- d) Programming

Answer: Scripting

Question: _____software has a case-sensitive language.

- a) P
- b) Q
- c) R
- d) GNU

Answer: R

Question: R software has _____work environments namely Command Line and Graphical.

- a) one
- b) Two
- c) Three
- d) Four

Answer: Two

Question: To use R software in a_____environment, it has to be installed with graphic editors.

- a) DOS
- b) Windows
- c) GUI
- d) All of these

Answer: GUI

Question: Examples of Graphic Editors are_____

- a) R Commander
- b) R Studio
- c) Both (A) and (B)
- d) None of these

Answer: Both (A) and (B)

Question: The above named Graphic Editors are from____Software Center.

- a) Linux
- b) Unix
- c) Ubuntu
- d) Archive Manager

Answer: Ubuntu

Question: To install R software on the machines, give the ____command.

- a) Sudo apt-get install r-base r-base-devlop
- b) Studio apt-get install r-base r-base-dev
- c) Sudo apt-get install r-base r-base-dev
- d) None of these

Answer: Sudo apt-get install r-base r-base-dev

Question: To invoke the _____scripts from terminal window, open terminal and type on the command prompt.

- a) Unix
- b) Linux
- c) R
- d) Shell

Answer: R

Question: Just like the Linux shell, R uses_____as the comment marker.

- a) #
- b) //
- c) /* */
- d)?

Answer: #

Question: Any text following ____up to the end of the line, is treated as a comment.

- a) #
- b) //
- c) /* */
- d) ?

Answer: #

Question: In R software, number and string are the basic_____

- a) Method Types
- b) Declaration Types
- c) Data Types
- d) Variable Types

Answer: Data Types

Question: In R software_____are enclosed in single quotes or double quotes.

- a) Numbers
- b) Strings
- c) Characters
- d) Commands

Answer: Strings

Question: In R software, common_____and functions are available, just like other programming languages.

- a) Commands
- b) Operators
- c) Numerals
- d) Characters

Answer: Operators

Question: Ordered lists of items (arrays or lists) are commonly used and are also referred to as_____

- a) Vectors
- b) Paths
- c) Routes
- d) Directions

Answer: Vectors

Question: Lists are created using the_____function to combine several numbers into a single list.

- a) C++
- b) Basic
- c) c
- d) ls

Answer: c

Question: Most operators in R software, like +, -, *, /, and others work equally well on single_____as well as on lists.

- a) Number
- b) String
- c) Character
- d) Operand

Answer: Number

Question: However, in R software, when both_____of binary operators are lists, their lengths (number of elements in them) should ordinarily be same.

- a) Numbers
- b) Strings
- c) Characters
- d) Operands

Answer: Operands

Question:

```
kumar@kumarAtUbuntu kumar@kumarAtUbuntu :-$ R

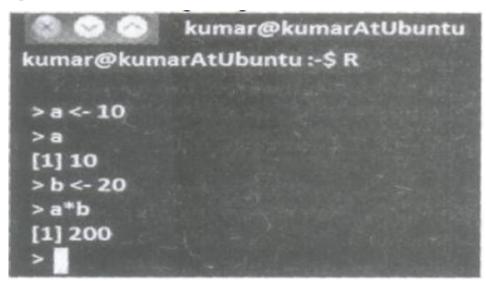

> a <- 10
> a
[1] 10
> b <- 20
> a*b
[1] 200
> |
```

The statement > a <-- 10 defines a_____'a' and assigns it a value 10.

- a) Numeral
- b) Letter
- c) String
- d) Variable

Answer: Variable

Question:

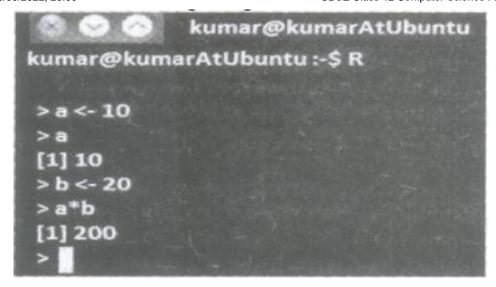

The statement > a followed by.....key press displays the value of a.

- a) ENTER
- b) TAB
- c) SHIFT
- d) F2

Answer: ENTER

Question:

The statement > a*b followed by ____key press multiplies the value of variable 'a' and 'b' and displays the result on the prompt.

- a) ENTER
- b) TAB
- c) SHIFT
- d) F2

Answer: ENTER

Question: R command to quitting is_____

- a) Quit()
- b) q()
- c) Exit
- d) All of these

Answer: q()

- d) All of these

Answer: All of these

Question: A_____looks like credit card but works by transferring fund directly from the consumer's bank.

- a) Credit Card
- b) Smart Card
- c) Debit Card
- d) Payment Card

Answer: Debit Card

Question: The ____can keep the consumer purchases under a limit and do not allow him to exceed beyond his/her budget.

- a) Credit Card
- b) Smart Card
- c) Debit Card
- d) Payment Card

Answer: Debit Card

Question: also looks like a credit card but have a microchip embedded in their surface.

- a) Credit Card
- b) Smart Card
- c) Debit Card
- d) Charge Card

Answer: Smart Card

Question: A____contains user's private information, such as account information, health information etc.

- a) Credit Card
- b) Smart Card
- c) Debit Card
- d) Payment Card

Answer: Smart Card

Question: _____are popular in countries like US, Europe, Japan and some parts of Asia.

- a) Debit Card
- b) Credit Card
- c) Charge Card
- d) Smart Card

Answer: Smart Card

Question: A_____is another form of payment mechanism wherein the customer can pay through the card and it does not have a credit limit.

- a) Debit Card
- b) Credit Card
- c) Charge Card
- d) Smart Card

Answer: Charge Card

Question: _____does not involve any type of card for online transaction.

- a) Net-Banking
- b) Credit-Card
- c) Smart-Banking
- d) All of these

Answer: Net-Banking

Question: means transferring money from one bank to another electronically.

- a) Net-Banking
- b) EFT
- c) ATM
- d) Net-Transaction

Answer: EFT

Question: Full form of EFT is_____

- a) Electronic Funds Transfer.
- b) Electronic Finance Transfer
- c) Electronic Funds Transaction.
- d) None of these

Answer: Electronic Funds Transfer.

Question: is an electronic card for making secure online payments towards a merchant.

- a) E-Wallet
- b) M-Wallet
- c) L-Wallet
- d) Card-Wallet

Answer: E-Wallet

Question: The term_____is coined from two terms Rupee and Payment.

- a) RupeeP
- b) RuPay
- c) Rupees Payment
- d) None of these

Answer: RuPay

Question: is a new card payment mechanism launched by NPCI.

- a) RupeeP
- b) RuPay
- c) Rupees Payment
- d) None of these

Answer: RuPay

Question: Full form of NPCI is_____

- a) Nation's Payment Cost of India
- b) National Payments Company of India.
- c) National Payments Corporation of India.
- d) Nationalized Payments Corporation of India.

Answer: National Payments Corporation of India.

Question: Anybody can create new programs and run them on remote computers causing it to_____

- a) Improve
- b) Malfunction
- c) Break down
- d) Recover

Answer: Malfunction

Question: A firewall_____from any type of network attack.

- a) Blocks
- b) Unprotect
- c) Protects
- d) Saves

Answer: Protects

Question: Digital____are used for proving our identity in electronic transactions.

- a) Certificates
- b) ID
- c) Both (A) and (B)
- d) Authority

Answer: Both (A) and (B)

Question: A____is issued by a trusted third party to establish the identity of the holder.

- a) Digital Certificate
- b) Digital Data
- c) Digital Signature
- d) Digital Service

Answer: Digital Certificate

Question: _____is the third party who issues the Digital Certificates.

- a) Certification Authority
- b) Certification Owner
- c) Certification holder
- d) Certification key

Answer: Certification Authority

Computer Science

CBSE Class 12 Computer Science Java Basics MCQs Set A with answers available in Pdf for free download. The MCQ Questions for Class 12 Computer Science with answers have been prepared as per the latest syllabus, NCERT books and examination pattern suggested in Standard 12 by CBSE, NCERT and KVS. Multiple Choice Questions are an important part of Term 1 and Term 2 exams for Grade 12 Computer Science and if practiced properly can help you to get higher marks. Refer to more Chapter-wise MCQs for NCERT Class 12 Computer Science and also download more latest study material for all subjects

Java Basics Class 12 Computer Science MCQ

Class 12 Computer Science students should refer to the following multiple-choice questions with answers for Java Basics in standard 12. These MCQ questions with answers for Grade 12 Computer Science will come in exams and help you to score good marks

Java Basics MCQ Questions Class 12 Computer Science with Answers

Question: Java is an object-oriented programming language developed by .

- a) Oracle
- b) Sun Micro systems
- c) Unix
- d) Netscape

Answer: Sun Micro systems

Question: _____ is a company best known for its high-end Unix workstations.

- a) Oracle
- b) Sun Micro systems
- c) Unix

d) Netscape

Answer: Sun Micro systems

Question: Modeled after C++, the ____ language was designed to be small, simple and portable across platforms and operating systems both at the source and at the binary level.

- a) Java
- b) C
- c) Basic
- d) PHP

Answer: Java

Question: Java language was developed at Sun Micro systems in _____

- a) 1993
- b) 1992
- c) 1991
- d) 1990

Answer: 1992

Question: _____ is small, fast, efficient and easily portable to a wide range of hardware devices.

- a) Java
- b) C
- c) Basic
- d) PHP

Answer: Java

Question: _____ language is considered as one of the ideal language for distributing executable programs via the World Wide Web.

- a) Java
- b) C
- c) Basic
- d) PHP

Answer: Java

Question: Java is also a general-purpose programming language for developing programs that are \ easily usable and portable across different.

- a) Tables
- b) Stands
- c) Libraries
- d) Platforms

Answer: Platforms

Question: Java is an _____ language and here it differs from C.

a) Procedure-oriented

- Entrepreneurship
- Marketing
- Painting and Sculpture

- b) Structure-oriented
- c) Object-oriented
- d) Executable-oriented

Answer: Object-oriented

Question: Using _____one can take full advantage of object-oriented methodology and its capabilities of creating flexible, modular and reusable code.

- a) Java
- b) C
- c) Basic
- d) PHP

Answer: Java

Question: Java includes a set of _____that provide basic data types, system input and output capabilities and other utility functions.

- a) Class libraries
- b) Class functions
- c) Class methods
- d) All of these

Answer: Class libraries

Question: These basic classes are part of the ______.

- a) KDJ
- b) JDK
- c) DKJ
- d) DJK

Answer: JDK

Question: _____ has classes to support networking, common Internet protocols and user interface toolkit functions.

- a) KDJ
- b) JDK
- c) DKJ
- d) DJK

Answer: JDK

Question: _____ is platform-independent at both the source and binary level.

- a) Java
- b) C
- c) Basic
- d) PHP

Answer: Java

Question:	independence is a program's capability of being
moved easily	from one computer system to another.

- a) Table
- b) Program
- c) Library
- d) Platform

Answer: Platform

Question: At the _____ level, Java's primitive data types have consistent sizes across all development platforms.

- a) Beginning
- b) Destination
- c) Source
- d) Binary

Answer: Source

Question: At _____ level, platform-independence is possible due to byte code interpreter.

- a) Beginning
- b) Destination
- c) Source
- d) Binary

Answer: Binary

Question: The designers of Java chose to use a combination of _____ and interpretation.

- a) Assembling
- b) Compilation
- c) Togetherness
- d) All of these

Answer: Compilation

Question: Full form of JDK is_____

- a) Java Developing Kit
- b) Java Development Kit
- c) Both (A) and (B)
- d) None of these

Answer: Java Development Kit

Question: Programs written in Java are compiled into_____language for a computer that doesn't really exist.

- a) Machine
- b) Assembly
- c) C++
- d) Java

Answer: Machine

Question: The so-called "virtual" computer is known as

- a) JMV
- b) VMJ
- c) JVM
- d) MVJ 21)

Answer: JVM

Question: The full form of JVM is_____

- a) Java Virtual Machine
- b) Java Visible Machine
- c) Java Viable Machine
- d) None of these

Answer: Java Virtual Machine

Question: The machine language for the Java Virtual Machine is called Java_____

- a) byte
- b) byte numbers
- c) byte code
- d) bytes

Answer: byte code

Question: Different Java byte code______is needed for each type of computer.

- a) Compiler
- b) Interpreter
- c) Translator
- d) None of these

Answer: Interpreter

Question: Java binary files are actually in a form called_____that is not specific to any one processor or any operating system.

- a) bytes
- b) binary numbers
- c) byte codes
- d) byte

Answer: byte codes

Question: A disadvantage of using______is its slow execution speed.

- a) ASCII codes
- b) binary numbers
- c) byte codes
- d) bytes

Answer: byte codes

Question: There are tools available tools to convert____into native code.

- a) Java Byte codes
- b) Java Language
- c) Java Complies
- d) All of these

Answer: Java Byte codes

Question: _____code is faster to execute, but then it does not remain machine independent.

- a) Native
- b) Original
- c) ASCII
- d) Binary

Answer: Native

Question: A Java Program should have at least one_____and it must have main____in it

- a) Class, procedure
- b) Class, variable
- c) Class, method
- d) Class, code

Answer: Class, method

Question: A Java program is composed of_____

- a) Functions
- b) Classes
- c) Programs
- d) Variables

Answer: Classes

Question: C programmers can think of a class as a sort of creating a new composite data type by using_____and____

- a) Structures, type
- b) Functions, define
- c) Classes, type def
- d) Struct, type def

Answer: Struct, type def

Question: _____can provide much more than just a collection of data.

- a) Functions
- b) Classes
- c) Programs
- d) Variables

Answer: Classes

Question: Note that ______ is not available in Java.

- a) Type def
- b) Struct
- c) Both (A) and (B)
- d) All of these

Answer: Both (A) and (B)

Question: Java source file can be created using any plain____text editor.

- a) Native
- b) Original
- c) ASCII
- d) Binary

Answer: ASCII

Question: Java____files are given the same name as the class defined with an extension of Java.

- a) Beginning
- b) Destination
- c) Source
- d) Binary

Answer: Source

Question: In Java the____name is case sensitive.

- a) Folder
- b) Class
- c) First
- d) Last

Answer: Class

Question: In Java the____name is case sensitive.

- a) File
- b) Folder
- c) First
- d) Last

Answer: File

Question: If class name is CallCost, filename should be

- a) callcost
- b) callcost.java
- c) callCost.java
- d) callcosT.java

Answer: callCost.java

Question: The source file is compiled using the____compiler.

- a) S Cite
- b) C++

- c) Basic
- d) Java

Answer: Java

Question: To compile the Java program, type_____followed by the name the source file

- a) javac
- b) JavaC
- c) Java
- d) cjava

Answer: javac

Question: When the program gets compiled without errors, compiler created a file with extension_____in the same directory as the source file

- a) .Java
- b) .javac
- c) .class
- d) .javaclass

Answer: .class

Question: The programmer can run the application using Java____

- a) Compiler
- b) Translator
- c) Interpreter
- d) None of these

Answer: Interpreter

Question: In_____the Java interpreter is called by simply using Java

- a) JDK
- b) JKD
- c) JDD
- d) JKK

Answer: JDK

Question: Which of the following variable declarations is correct?

- a) Double balance
- b) Double rate
- c) Double duration
- d) Double cost

Answer: Double rate

Question: Java source program file should have extension

- a) Java
- b) .javac
- c) .class
- d) .javaclass

Answer: Java

Question: The name of ______ is same as the class name containing main method and it has an extension .class.

- a) Interpreted file
- b) Code file
- c) Compiled file
- d) byte code file

Answer: byte code file

Question: A_____'Java' interprets byte code and excuses it.

- a) Compiler
- b) Translator
- c) Interpreter
- d) None of these

Answer: Interpreter

Question: The texts after_____are comments.

- a) //
- b) \\
- c) // //
- d) \\ \\

Answer: //

Question: The text enclosed within_____are comments.

- a) /& and &/
- b) /* and */
- c) /* and *\
- d) //* and *//

Answer: /* and */

Question: Comments are not compiled or interpreted

- a) Codes
- b) Classes
- c) Comments
- d) Methods

Answer: Comments

Question: Variables are declared using_____followed by variable name

- a) Data type
- b) Int
- c) Char
- d) Float

Answer: Data type

Question: Several______(also called function or method in Java) call statements are used to display information to the user of the program

- a) Super routine
- b) Subroutine
- c) Sub program
- d) None of these

Answer: Subroutine

Question: Computation part contains expressions including assignment_____

- a) Sentences
- b) Numerical
- c) Operators
- d) Statements

Answer: Statements

Question: _____are used to display results.

- a) Methods
- b) Classes
- c) Outputs
- d) Prints

Answer: Methods

Question: System.out.print and System.out.println are_____which take a value to be displayed as an argument.

- a) Methods
- b) Classes
- c) Outputs
- d) Prints

Answer: Methods

Question: _____adds a line feed after the end of the information that it displays.

- a) out.print
- b) out.prindnt
- c) output.print
- d) output.println

Answer: out.prindnt

Question: When the program is run, the Java interpreter calls the _____method and the statements that it contains are executed.

- a) Main()
- b) String[]
- c) string[] args
- d) main()

Answer: main()

Question: Theroutine can call other subroutines that are defined in the same class or even in other classes. • a) Main() • b) String[] • c) string[] args • d) main()
Answer: main()
Question: It is theroutine that determines how and in what the other subroutines are used. • a) Main() • b) String[] • c) string[] args • d) main()
Answer: main()
Question: The word in the first line of main() means that this routine can be called from outside the program • a) private • b) Public • c) public
• d) Private Answer: public
Answer: public
Question: This is essential because the main() routine is called by the Java interpreter, which isto the program • a) External • b) Internal • c) Outside • d) Inside
Answer: External
Question: Start S Cite application. Select File -> • a) Save • b) New • c) Open • d) Start Answer: New
Question: To save the file, select Filecommand. • a) Save • b) New

Answer: Save

c) Opend) Start

Question: To compile a source program use_____Compile command.

- a) File
- b) Edit
- c) Tools
- d) Buffers

Answer: Tools

Question: If the program is compiled without any error, execute it using_____Go command

- a) File
- b) Edit
- c) Tools
- d) Buffers

Answer: Tools

Question: Programming______differ from ordinary human languages in being completely unambiguous and very strict about what is and is not allowed in a program

- a) Rules
- b) Methods
- c) Files
- d) Languages

Answer: Languages

Question: The rules that determine what is allowed to be used in a language are called the_____of the language

- a) Protocols
- b) Syntax
- c) Methodology
- d) Regulations

Answer: Syntax

Question: _____rules specify the basic vocabulary of the language and how programs can be constructed using things like variables, expressions, statements, branches, loops and methods

- a) Protocol
- b) Syntax
- c) Methodology
- d) Regulation

Answer: Syntax

Question: A	syntactically correct program is one that can be	•
successfully	or interpreted	

- a) Compiled
- b) Understood
- c) Executed
- d) Put together

Answer: Compiled

Question: In a Java program, text in_____bracket is used as a placeholder that describes something actual we need to type while writing actual program

- a) Curly
- b) Square
- c) Angle
- d) Round

Answer: Angle

Question: Which of the following is an Angle bracket

- a) <>
- b) { }
- c)()
- d) []

Answer: <>

Question: As Java is an object-oriented language. Everything is defined as part of_____

- a) Program
- b) Procedure
- c) List
- d) Class

Answer: Class

Question: The definition of the method (function) in Java consists of function header and the sequence of statements enclosed between braces_____

- a) <>
- b) { }
- c)()
- d) []

Answer: { }

Question: A method in Java program cannot exist by itself. It has to be a part of a_____

- a) Program
- b) Procedure

- c) List
- d) Class

Answer: Class

Question: Based on the structure of a Java program_____in the first line is the name of the class having main method in it

- a) Class-name
- b) Public
- c) Class
- d) Name

Answer: class-name

Question: Class file, CallCost.class, contains the translation of the program into Java_____which can be executed by a Java interpreter

- a) bytes
- b) binary number
- c) bytecode
- d) byte

Answer: bytecode

Question: If the name of the class is CallCost, then the program should conventionally be saved in a Java source file with a name

- a) CallCost.class
- b) CallCost.java
- c) callcost.java
- d) CallCost

Answer: CallCost.java

Question: When this file is compiled, another file named_____is generated

- a) CallCost.class
- b) CallCost.java
- c) callcost.java
- d) CallCost

Answer: CallCost.class

Question: Variable and method declaration after and before____method is optional

- a) main{}
- b) string[]
- c) string[] args
- d) main()

Answer: main()

Question: Each program must have one____that contains public method main()

- a) Program
- b) Procedure
- c) List
- d) Class

Answer: Class

Question: The entire Java program can be written together on single line but_____is important to make it more readable

- a) Display
- b) Layout
- c) Plan
- d) Design

Answer: Layout

Question: Java is a_____format language.

- a) Free
- b) Busy
- c) Object
- d) Class

Answer: Free

Question: The entire Java program can be written together on single line but_____is important to make it more readable.

- a) Display
- b) Layout
- c) Plan
- d) Design

Answer: Layout

Question: A program can contain other methods besides_____as well as other variables.

- a) Main()
- b) String[]
- c) string[] args
- d) main()

Answer: main()

Question: Which of the following are the basic java statements used within a method definition such as main()?

- a) Data Types
- b) Variables
- c) Literals
- d) All of these

Answer: All of these

Question: Which of the following are the basic Java statements used within a method definition such as main()?

- a) Comments
- b) Java statements and expressions
- c) Arithmetic operators
- d) All of these

Answer: All of these

Question: Which of the following are the basic java statements used within a method definition such as main()?

- a) Comparisons
- b) Logical operators
- c) Both (A) and (B)
- d) None of these

Answer: Both (A) and (B)

Question: _____determines the required memory size, type of values, range of values and type of operations that can be performed.

- a) Data Types
- b) Variables
- c) Literals
- d) All of these

Answer: Data Types

Question: Java supports_____primitive data types that handle common types for integers, floating point numbers, characters and Boolean values (true or false).

- a) Seven
- b) Eight
- c) Nine
- d) Ten

Answer: Eight

Question: The primitive_____are named byte, short, int, long, float, double, char, Boolean.

- a) Data types
- b) Variables
- c) Literals
- d) All of these

Answer: Data types

Question: T&E first four data types hold_____

- a) Real numbers
- b) Integers
- c) Single character
- d) True or False

Answer: Integers

Question: The next two data types hold____

- a) Real numbers
- b) Integers
- c) Single character
- d) True or False

Answer: Real numbers

Question: Char data type holds a single character from the Unicode character set.

- a) Real numbers
- b) Integers
- c) Single character
- d) True or False

Answer: Single character

Question: The Boolean data type holds one of the two logical values true or false.

- a) Real numbers
- b) Integers
- c) Single character
- d) True or False

Answer: True or False

Question: The data types in Java are called_____as they are built into the system.

- a) Fixed
- b) Ancient
- c) Primitive
- d) New

Answer: Primitive

Question: In Java the _____are machine-independent, this means that they can be relied on their sizes and characteristics to be consistent across all Java programs on all machines.

- a) Data Types
- b) Variables
- c) Literals
- d) All of these

Answer: Data Types

Question: ____in Java are complaint with IEEE 754 (an international standard for defining floating point numbers and arithmetic).

- a) Real numbers
- b) Integers
- c) Single character
- d) True or False

Answer: Real numbers

Question: Integer numbers with b bits____store signed values in the range of $(-2^{b_1} - 1, 2^{b_1})$.

- a) Accuracy
- b) Precision
- c) Exactness
- d) Vagueness

Answer: Precision

Question: When the Integer numbers are preceded with keyword____the values are in the range of $(0, 2^{b_{-1}})$.

- a) Signed
- b) Unsigned
- c) Boolean
- d) Byte

Answer: Unsigned

Question: Java uses the Unicode____set.

- a) Numerical
- b) IEEE
- c) Character
- d) None of these

Answer: Character

Question: The char type has____bits of precision and is unsigned.

- a) 13
- b) 14
- c) 15
- d) 16

Answer: 16

Question: Data type____is not a number, nor can it be treated as one.

- a) Char
- b) Real
- c) Boolean
- d) Integer

Answer: Boolean

Question: If anything is to be remembered by the computer, there will be a requirement of ____during program execution. It needs to be stored in the memory of the computer.

- a) Variables
- b) Literals
- c) Comments
- d) Operators

Answer: Variables

Question: _____manipulates the data that is stored in memory.

- a) Information
- b) Programs
- c) Comments
- d) Characters

Answer: Programs

Question: In machine language, data can only be referred to by giving the _____address of the location in memory where it is stored.

- a) Numerical
- b) Alphanumeric
- c) Alphabetical
- d) Real

Answer: Numerical

Question: In a____language such as Java, names are used instead of numeric address of memory location to refer to data.

- a) Low-level
- b) Middle-level
- c) High-level
- d) Top-level

Answer: High-level

Question: A name is used to refer to the data stored in memory and it is called a____

- a) Variable
- b) Literal
- c) Comment
- d) Operator

Answer: Variable

Question: A____can take different data values at different times during the execution of the program, but it always refers to the same memory location.

- a) Variable
- b) Literal
- c) Comment
- d) Operator

Answer: Variable

Question: A____can be used in a Java program only if it has been declared.

- a) Variable
- b) Literal
- c) Comment
- d) Operator

Answer: Variable

Question: One or more variables can be declared in Java using____statement.

- a) Beginning
- b) Initial
- c) Declaration
- d) Comment

Answer: Declaration

Question: In Java, the conventional syntax of____denote the item to be specified by user.

- a) Curly brackets
- b) Square brackets
- c) Angle brackets
- d) Round brackets

Answer: Angle brackets

Question: In Java, the conventional syntax of____denote the list of items separated by commas.

- a) Curly brackets
- b) Square brackets
- c) Angle brackets
- d) Round brackets

Answer: Curly brackets

Question: In syntax: {variable names}, it denote the list of___names.

- a) Variable
- b) Literal
- c) Comment
- d) Operator

Answer: Variable

Question: When the list contains more than one item, items should be separated by____

- a) Semi colon
- b) Commas
- c) Full stop
- d) Colon

Answer: Commas

Question: In typical Java syntax, the is to be replaced with the keyword denoting the____of the variables.

- a) Data types
- b) Variables
- c) Literals
- d) Comments

Answer: Data types

Question: _____is used to determine the size of variable, the values it can hold and the operations that can be performed on it.

- a) Real numbers
- b) Variables
- c) Data Types
- d) Floats

Answer: Data Types

Question: When the compute executes a variable___statement, it sets aside memory for the variable and associates the variable's name with that memory.

- a) Data type
- b) Initial
- c) Declaration
- d) Comment

Answer: Declaration

Question: Which of the following examples of variables is correct?

- a) Int marks;
- b) Double amount, interest;
- c) Float rate;
- d) All of these

Answer: All of these

Question: Which of the following rule is incorrect while defining a variable name?

- a) It must begin with an alphabet, underscore (_)
- b) It must begin with a percentage sign (%)
- c) No spaces are allowed in variables
- d) It cannot be a reserved word

Answer: It must begin with a percentage sign (%)

Question: Which of the following is true?

- a) Java is case-sensitive
- b) Java is not case-sensitive
- c) Both (A) and (B)
- d) None of these

Answer: Java is case-sensitive

CBSE Class 12 Computer Science Java Basics MCQs Set B with answers available in Pdf for free download. The MCQ Questions for Class 12 Computer Science with answers have been prepared as per the latest syllabus, NCERT books and examination pattern suggested in Standard 12 by CBSE, NCERT and KVS. Multiple Choice Questions are an important part of Term 1 and Term 2 exams for Grade 12 Computer Science and if practiced properly can help you to get higher marks. Refer to more Chapter-wise MCQs for NCERT Class 12 Computer Science and also download more latest study material for all subjects

Java Basics Class 12 Computer Science MCQ

Class 12 Computer Science students should refer to the following multiple-choice questions with answers for Java Basics in standard 12. These MCQ questions with answers for Grade 12 Computer Science will come in exams and help you to score good marks

Java Basics MCQ Questions Class 12 Computer Science with Answers

Question: Upper case and lower case letters are considered to be____

- a) Same
- b) Similar
- c) Different
- d) Related

Answer: Different

Question: In Java, it is customary for names of____to begin with upper case letters.

- a) Variables
- b) Methods
- c) Comments
- d) Classes

Answer: Classes

Question: In Java, it is customary for names of____to begin with lower case letters.

- a) Variables
- b) Methods
- c) Comments
- d) Both (A) and (B)

Answer: Both (A) and (B)

Question: Which of the following is not a good programming style for declaring variables?

- a) Declare ten variables in a declaration statement
- b) Include a comment with each variable declaration to explain its purpose
- c) Declare important variables at the beginning of the function
- d) None of these

Answer: Declare ten variables in a declaration statement

Question: In Java, there are____kinds of variables.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Three

Question: Which of the following is a kind of variable in Java?

- a) Instance variable
- b) Class variable
- c) Local variable
- d) All of these

Answer: All of these

Question: Function parameters and variables declared in the function are considered as variables.

- a) External
- b) Internal
- c) Local
- d) Limited

Answer: Local

- Question: Each variable can be given a___value while declaring.
 - a) Initial
 - b) Last
 - c) Cumulative
 - d) Opening

Answer: Initial

- Entrepreneurship
- Marketing
- Painting and Sculpture
- Physical Education
- English
- Graphics Design
- Geography
- Hindi
- Home Science
- History
- Informatics Practices
- Languages
- Mathematics
- Other Subjects

Question: In general, syntax of declaring variables is_____

- a){variable =,};
- b){variable [=,]};
- c) type name {variable [=,]};
- d){variable [=,]}

Answer: {variable [=,]};

Question: In variable declaration syntax, the _____denotes optional item.

- a) Curly brackets {}
- b) Square brackets []
- c) Angle brackets < >
- d) Round brackets ()

Answer: Square brackets []

Question: It is programmer's responsibility to assign value to____before their first use.

- a) Variables
- b) Methods
- c) Comments
- d) Both (A) and (B)

Answer: Variables

Question: A name used for a constant value is known as

- a) Data types
- b) Variables
- c) Literals
- d) Comments

Answer: Literals

Question: There are some different kinds of____in Java for number, character, string and Boolean values.

- a) Data types
- b) Variables
- c) Literals
- d) Comments

Answer: Literals

Question: ____are used to represent integer or real numbers; for example, 157 and 17.42.

- a) Numeric Variables
- b) Numeric Literals
- c) Integer Literals
- d) Character Literals

Answer: Numeric Literals

Question: Java	allows Unicode	integer literals	called	Decimal w	hose
base is					

- a) 10
- b) 8
- c) 16
- d) 32

Answer: 10

Question: Java allows Unicode integer literals called Octal whose base is_____.

- a) 10
- b) 8
- c) 16
- d) 32

Answer: 8

Question: A decimal integer larger than int is automatically of type____

- a) Short
- b) Long
- c) Float
- d) Mixed

Answer: Long

Question: ____integers such as 4, 157, 17777 and -32 are decimal integer literals of type byte, short or int depending on their size.

- a) Ordinary
- b) Simple
- c) Complicated
- d) Real

Answer: Ordinary

Question: _____integers such as 4, 157, 17777 and -32 are decimal integer literals of type byte, short or int depending on their size.

- a) Ordinary
- b) Simple
- c) Complicated
- d) Real

Answer: Ordinary

Question: Java allows Unicode integer literals called Hexadecimal whose base is_____

- a) 10
- b) 8
- c) 16
- d) 32

Answer: 16

Question: Tl	he user can t	force a sm	aller numl	ber to b	e long	by
appending a	anas a s	uffix to th	at numbe	r.		

- a) S or s
- b) A or a
- c) L or l
- d) M or m

Answer: L or I

Question: ____integers are preceded by a minus (-) sign,for example, -45.

- a) Positive
- b) Real
- c) Large
- d) Negative

Answer: Negative

Question: ____numbers use only the digits 0 through 7. In Java, a numeric literal with a leading 0 (zero) is interpreted as an octal number.

- a) Hexadecimal
- b) Octal
- c) Decimal
- d) Real

Answer: Octal

Question: ____numbers use 16 digits, the usual digits 0 to 9 and the letters A, B, C, D, E, and F.

- a) Hexadecimal
- b) Octal
- c) Decimal
- d) Real

Answer: Hexadecimal

Question: In Hexadecimal, the letters _____ represent the numbers 10 to 15 respectively.

- a) A to E
- b) A to G
- c) A to F
- d) A to D

Answer: A to F

Question: In Java, a____literal begins with Ox or OX.

- a) Hexadecimal
- b) Octal
- c) Decimal
- d) Real

Answer: Hexadecimal

Question: Examples of_____literals are 0x45 or 0xFF7A.

- a) Hexadecimal
- b) Octal
- c) Decimal
- d) Real

Answer: Hexadecimal

Question: ____numbers are also used in character literals to represent arbitrary Unicode characters.

- a) Hexadecimal
- b) Octal
- c) Decimal
- d) Real

Answer: Hexadecimal

Question: A____literal consists of \u followed by four hexadecimal digits.

- a) Hexacode
- b) Unicode
- c) Byte code
- d) None of these

Answer: Unicode

Question: Which of the following is error free?

- a) For(;;) { int i=10 };
- b) While (1) { int i=10 };
- c) While (True) { int i=10 };
- d) All of these

Answer: All of these

Question: The_____statement makes use of branchinj decision making.

- a) While
- b) For
- c) If
- d) Do...While

Answer: If

Question: _____literals are called floating point literals.

- a) Real integer
- b) Real point
- c) Real float
- d) Real number

Answer: Real number

Question: notations : star	numbers can be represented using two types of ndard and scientific.
• a) Real integer	
 b) Real point 	
 c) Real float 	
• d) Real number	

Question: hi standard notations, the integer part and the fractional part are separated with_____for example 12.37.

- a) Decimal point (.)
- b) Comma (,)
- c) Colon (:)
- d) Semi-colon (;)

Answer: Decimal point (.)

Question: In scientific notation a number is followed by letter_____and a signed integer exponent, for example 1.3el2 and 12.3737e-108.

- a) X or x
- b) S or s
- c) E or e
- d) Both (A) and (C)

Answer: E or e

Question: _____format can be used to express very large and very small numbers.

- a) Scientific
- b) Unicode
- c) ASCII
- d) Binary

Answer: Scientific

Question: In Java, floating point literal by default is of the type_

- a) Long
- b) Float
- c) Double
- d) Single

Answer: Double

Question: The suffix____can be written in either lower or upper case.

- a) F
- b) R
- c) X
- d) OX

Answer: F

Question: For the type	_there are	precisely two	literal	s : t	true
and false					

- a) Integer
- b) Real
- c) Character
- d) Boolean

Answer: Boolean

Question: _____literals are to be types without quotes.

- a) Integer
- b) Real
- c) Character
- d) Boolean

Answer: Boolean

Question: _____literals represent values, not variables.

- a) Integer
- b) Real
- c) Character
- d) Boolean

Answer: Boolean

Question: Boolean values occur most often as the values of conditional_____

- a) Expressions
- b) Statements
- c) Methods
- d) True or false

Answer: Expressions

Question: In C language, 0 is treated as false and____value is treated as true.

- a) Number
- b) Non-zero
- c) Character
- d) None of these

Answer: Non-zero

Question: In Java, literals true and false are not associated with any____value.

- a) ASCII
- b) Real
- c) Numeric
- d) Expression

Answer: Numeric

Question: literals are expressed by a single character surrounded by single quotes.

- a) Integer
- b) Real
- c) Character
- d) Boolean

Answer: Character

Question: Characters are stored as_____Unicode characters.

- a) 16-bit
- b) 8-bit
- c) 32-bit
- d) 64-bit

Answer: 16-bit

Question: Certain special characters have special literals that use a_____as an "escape character".

- a) Slash (/)
- b) Back slash (\)
- c) Both (A) and (B)
- d) None of these

Answer: Back slash (\)

Question: '\n' Escape code means_____

- a) Tab
- b) Line
- c) New Line
- d) Backspace

Answer: New Line

Question: '\t' Escape code means____

- a) Tab
- b) Line
- c) New Line
- d) Backspace

Answer: Tab

Question: A_____is used when a conversion of a value has to be forced.

- a) Fun cast
- b) Cast
- c) Operator Cast
- d) Type Cast

Answer: Type Cast

Question: In Java, operators are evaluated as per their precedence.

a) Order

- b) Continuity
- c) Precedence
- d) Evaluation

Answer: Precedence

Question: When two operators with the same precedence appear in the expression, the expression is evaluated according to its_____

- a) Order
- b) Associatively
- c) Precedence
- d) Evaluation

Answer: Associatively

Question: The Associativity of Unary operators is from:

- a) Left-to-Right
- b) Right-to-Left
- c) Both (A) and (B)
- d) None of these

Answer: Right-to-Left

Question: The Associativity of Logical operators is from:

- a) Left-to-Right
- b) Right-to-Left
- c) Both (A) and (B)
- d) None of these

Answer: Left-to-Right

Question: The Associativity of Conditional operators is from:

- a) Left-to-Right
- b) Right-to-Left
- c) Both (A) and (B)
- d) None of these

Answer: Right-to-Left

Question: The Associativity of Relational operators is from:

- a) Left-to-Right
- b) Right-to-Left
- c) Both (A) and (B)
- d) None of these

Answer: Left-to-Right

Question: The statements that enable the flow of ^execution are considered as

- a) Blocks
- b) Structures
- c) Control structures
- d) Logical structures

Answer: Control structures

 Question: There aretypes of control structures. a) One b) Two c) Three d) Four
Answer: Two
Question:are used to repeat a sequence of statements over and over until some condition occurs. • a) Structures • b) Charts • c) Branches • d) Loops
Answer: Loops
Question:are used to choose among two or more possible courses of action, so also called selective structure. • a) Structures • b) Blocks • c) Branches • d) Loops
Answer: Branches
Question: A block statement is a group of statement enclosed between a pair ofbraces. • a) { and } • b) < and > • c) (and) • d) [and]
Answer: { and }
Question: Adeclared inside a block is completely inaccessible and invisible from OUtSIde that block. • a) Variable • b) Name • c) Integer • d) Number
Answer: Variable
Question: Theof a variable defined inside a block is limited to that block only. • a) Area

- b) Localityc) Scope
- d) Range

Answer: Scope

Question: The____when used in a program enables to take one of two alternative courses of action, depending on whether the value of a given Boolean-valued expression is true or false.

- a) Else Statement
- b) If Statement
- c) While
- d) Do....while

Answer: If Statement

Question: _____is an example of a "branching" or "decision" or "selective" control structure.

- a) Switch statement
- b) If statement
- c) While
- d) Do....while

Answer: If statement

Question: A____is used when there are many alternative actions to be taken depending upon the value of a variable or expression.

- a) Switch Statement
- b) If Statement
- c) While
- d) Do....while

Answer: Switch Statement

Question: In the _____the test expression should be of the type byte, char, short or int. It can also be of enum data type.

- a) Switch Statement
- b) If Statement
- c) While
- d) Do....while

Answer: Switch Statement

Question: Java supports____Types of looping constructs.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Three

Question: Which of the following is a type of looping construct in Java?

- a) For
- b) While
- c) Do...while

• d) All of these

Answer: All of these

Question: The_____statement is used to transfer the control outside switch or loop structure.

- a) For
- b) While
- c) Continue
- d) Break

Answer: Break

Question: In a loop_____statement is used to exit the loop.

- a) For
- b) While
- c) Continue
- d) Break

Answer: Break

Question: Use of_____statement is used to skip the following statements in a loop and continue with the next iteration.

- a) For
- b) While
- c) Continue
- d) Break

Answer: Continue

Question: _____of same or different types can be nested in Java.

- a) Loops
- b) Controls
- c) Charts
- d) Structures

Answer: Loops

Question: If the programmer wants to control which loop to break and which loop to reiterate____can be used.

- a) Labeled Controls
- b) Labelled Loops
- c) Named Controls
- d) Named Loops

Answer: Labelled Loops

Question: To use a labelled loop, add the label followed by____before the loop.

- a) Semi Colon (;)
- b) Colon (:)
- c) Full stop (.)
- d) All of these

Answer: Colon (:)

Question: The default value of Boolean type data is_____

- a) True
- b) False
- c) 0
- d) 1

Answer: False

Question: What will be the result of arithmetic expression 11/2?

- a) 5
- b) 5.5
- c) 1
- d) 0

Answer: 5.5

Question: 11%2 will give the output as_____

- a) 5
- b) 5.5
- c) 1
- d) 0

Answer: 1

Question: ____character set is used for char data type in Javj

- a) Unicode
- b) EBCIDIC
- c) ASCII
- d) All of these

Answer: Unicode

Question: What will be the output of the expressio 5*(6+2) 11?

- a) 19
- b) 20
- c) 21
- d) 22

Answer: 20

CBSE Class 12 Computer Science Object Oriented Concepts MCQs

Download PDF

Computer Science

CBSE Class 12 Computer Science Object Oriented Concepts MCQs with answers available in Pdf for free download. The MCQ Questions for Class 12 Computer Science with answers have been prepared as per the latest syllabus, NCERT books and examination pattern suggested in Standard 12 by CBSE, NCERT and KVS. Multiple Choice Questions are an important part of Term 1 and Term 2 exams for Grade 12 Computer Science and if practiced properly can help you to get higher marks. Refer to more Chapter-wise MCQs for NCERT Class 12 Computer Science and also download more latest study material for all subjects

Object Oriented Concepts Class 12 Computer Science MCQ

Class 12 Computer Science students should refer to the following multiple-choice questions with answers for Object Oriented Concepts in standard 12. These MCQ questions with answers for Grade 12 Computer Science will come in exams and help you to score good marks

Object Oriented Concepts MCQ Questions Class 12 Computer Science with Answers

Question: In Object-oriented methodology, the focus is on which of the following entities?

- a) Data
- b) Functions
- c) Objects
- d) All of the above

Answer: Objects

Question: Which of the following best suits to Java?

- a) A procedural programming language
- b) An object oriented programming language

Answer: An object oriented programming language

Question: Which of the following is used to distinguish objects from each other?

- a) Attributes
- b) State
- c) Behavior
- d) All of the above

Answer: State

Question: Which of the following is used to define common features of similar objects?

- a) Class
- b) Object
- c) Methods
- d) All of the above

Answer: Class

Question: Which of the following is not a visibility symbol?

- a) ~
- b) *
- c) #
- d) -

Answer: *

Question: Which of the following is provided using encapsulation?

- a) Data protection
- b) Data sharing
- c) Separation of data and methods
- d) All of these

Answer: Data protection

Question: Which of the following is enabled by data abstraction?

- a) Data protection
- b) Data hiding
- c) To hide implementation details of method manipulating the data
- d) All of these

Answer: To hide implementation details of method manipulating the data

Question: With which of the following options polymorphism cannot be achieved?

- a) Method overloading
- b) Operator overloading
- c) Data hiding
- d) All of these

Answer: Data hiding

Question: An aggregation model refers to which of the following relationships?

- a) 'is-a' relationship
- b) 'is-like' relationship
- c) 'a-part-of relationship
- d) All of these

Answer: 'is-a' relationship

Question: An inheritance model refers to which of the following relationships?

- a) 'is-a' relationship
- b) 'has-a' relationship
- c) 'a-part-of relationship
- d) All of these

Answer: 'is-a' relationship

Question: In class diagram, composition is represented using which of the following symbols?

- a) Empty diamond symbol
- b) Filled diamond symbol
- c) Empty triangle symbol
- d) All of these

Answer: Filled diamond symbol

Question: Object-oriented programming concepts started originating in the

- a) 1950s
- b) 1960s
- c) 1970s
- d) 1980s

Answer: 1960s

Question: Since mid_____object-oriented programming had become the main programming paradigm used in the creation of new software.

- a) 1950s
- b) 1960s
- c) 1970s
- d) 1980s

Answer: 1980s

Question: Some of the popular programming languages that support____programming are C++, Java, C#, VB.net, ASP.net and PHP.

• a) Object-oriented

- b) Structural
- c) Modular
- d) Procedural

Answer: Object-oriented

Question: The way of programming can be divided into____categories.

- a) Four
- b) Three
- c) Two
- d) One

Answer: Two

Question: Java is a _____programming language.

- a) Object-oriented
- b) Structural
- c) Modular
- d) Procedural

Answer: Object-oriented

Question: The categories are____and object-oriented.

- a) Objective
- b) Structure/procedural
- c) Modular
- d) Functional

Answer: Structure/procedural

Question: In_____programming, the focus is on writing functions or procedures which operate on data.

- a) Procedural
- b) Modular
- c) Functional
- d) None of these

Answer: Procedural

Question: In object-oriented____the focus is on objects which contain data and functionality together.

- a) Pattern
- b) Prototype
- c) Paradigm
- d) Example

Answer: Paradigm

Question: The power of object-oriented programming language enables the programmer to create modular, reusable and ____code.

- a) Complete
- b) Accomplished

- c) Perfect
- d) Executable

Answer: Executable

Question: Flexibility is gained by being able to change or replace____without disturbing other parts of code.

- a) Modules
- b) Parts
- c) Functions
- d) Methods

Answer: Modules

Question: Object-oriented programming uses____as its fundamental building block.

- a) Method
- b) Class
- c) Object
- d) Procedure

Answer: Object

Question: A computer language is object-oriented if they support four specific object properties called

- a) Abstraction
- b) Encapsulation
- c) Polymorphism and Inheritance
- d) All of these

Answer: All of these

Question: C# is a_____programming language.

- a) Object-oriented
- b) Structural
- c) Modular
- d) Procedural

Answer: Object-oriented

Question: In the real world____are the entities of which the world is comprised.

- a) Methods
- b) Classes
- c) Objects
- d) Procedures

Answer: Objects

Question: Some objects can be_____things like person, car or a cup of coffee.

- a) Abstract
- b) Concrete

- c) Real
- d) Solid

Answer: Concrete

Question: Some objects may be_____that do not represent things which can be touched or seen.

- a) Abstract
- b) Concrete
- c) Real
- d) Solid

Answer: Abstract

Question: All objects have unique____and are distinguishable from each other.

- a) Personality
- b) Objects
- c) Procedures
- d) Identity

Answer: Identity

Question: In object-oriented terminology characteristics are known as properties or_____

- a) Features
- b) Attributes
- c) Values
- d) States

Answer: Attributes

Question: To uniquely distinguish one person from other, the _____ of its characteristics is used.

- a) Worth
- b) Cost
- c) Value
- d) Property

Answer: Value

Question: When two people have same name, they can be distinguished using other attributes like____

- a) Color
- b) Name
- c) Birth-date
- d) Behavior

Answer: Birth-date

Question: To identifythe value of the attributes is used.

- a) Personality
- b) Objects

- c) Procedures
- d) Identity

Answer: Objects

Question: There is always a behavior associated with

- a) Personality
- b) Objects
- c) Procedures
- d) Identity

Answer: Objects

Question: The behavior of objects is also known as

- a) Method
- b) Technique
- c) Process
- d) Procedure

Answer: Method

Question: The_____of the object can change due to its behavior.

- a) State
- b) Method
- c) Status
- d) Class

Answer: State

Question: Object can be described in terms of

- a) What it is called (identity)
- b) What it is (its state)
- c) What it does (behavior)
- d) All of these

Answer: All of these

Question: In object-oriented programming, attributes that describe the object are also referred to as____fields.

- a) Information
- b) Method
- c) Data
- d) Name

Answer: Data

Question: The data attributes and behavioral methods associated with an object are collectively referred to as its____or features.

- a) Component
- b) Associate
- c) Part
- d) Member

Answer: Member

Question:	system uses the concept of class that enables to
•	of objects that are abstractly equivalent, differing
only in the value	es of their attributes.

- a) Object-oriented
- b) Value-oriented
- c) Data-oriented
- d) All of these

Answer: Object-oriented

Question: ____can be considered as a blueprint for various objects.

- a) Method
- b) Class
- c) Object
- d) Member

Answer: Class

Question: A class is a_____for multiple objects with similar features.

- a) Image
- b) Representation
- c) Template
- d) Guide

Answer: Template

Question: A class describes a group of objects with similar____and common behaviour.

- a) Features
- b) Attributes
- c) Values
- d) States

Answer: Attributes

Question: _____in the same class share a common semantic purpose.

- a) Methods
- b) Classes
- c) Objects
- d) Members

Answer: Objects

Question: _____is a general concept used to embody all the common features of a particular set of objects.

- a) Method
- b) Class
- c) Object
- d) Member

Answer: Class

Question: The class	presents	a collection	of classes,	constraints
and relationship among	classes.			

- a) Diagram
- b) Map
- c) Drawing
- d) Figure

Answer: Diagram

Question: _____can be used to create models of object-oriented software to help with design of an application.

- a) ULM
- b) UML
- c) LUM
- d) MUL

Answer: UML

Question: _____is a visual modeling language defined and maintained by the Object Management Group.

- a) ULM
- b) UML
- c) LUM
- d) MUL

Answer: UML

Question: _____specifies several diagrams for representing different aspects of a software application.

- a) ULM
- b) UML
- c) LUM
- d) MUL

Answer: UML

Question: The purpose of the class_____is to model the static view of an application.

- a) Diagram
- b) Map
- c) Drawing
- d) Figure

Answer: Diagram

Question: The class's diagrams are only diagrams which can be directly mapped with object-oriented.

- a) Methods
- b) Procedures
- c) Languages
- d) Attributes

Answer: Languages

Question: In class diagram, a class is represented with an icon using a rectangle split into_____sections to present name, attributes and behaviour.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Three

Question: In the class diagram, the name is in the____section.

- a) Top
- b) Middle
- c) Centre
- d) Bottom

Answer: Top

Question: In the class diagram, the attributes or methods are in the____section.

- a) Top
- b) Middle
- c) Centre
- d) Bottom

Answer: Middle

Question: In the class diagram, the behaviour or operations are in the section.

- a) Top
- b) Middle
- c) Centre
- d) Bottom

Answer: Bottom

Question: Full form of UML is_____

- a) Unified Modelling Language
- b) United Modelling Language
- c) United Model of Languages
- d) None of these

Answer: Unified Modelling Language

Question: Full form of OMG is_____

- a) Oriented Management Group
- b) Oriented Managing Group
- c) Object Management Group
- d) Object Management Grouping

Answer: Object Management Group

Question: In UML notation, an attribute is declared using the following syntax:

- a) [][:[=]]
- b) [][:]]
- c) [][:]]
- d)[:[=]]

Answer: [] [:]]

Question: In an attribute declaration, the_____brackets are optional.

- a) Round
- b) Chain
- c) Angle
- d) Square

Answer: Square

Question: In an attribute declaration, the values should be specified in the____brackets.

- a) Round
- b) Chain
- c) Angle
- d) Square

Answer: Angle

Question: In an attribute declaration, the____can be private, protected, public or package.

- a) Visibility
- b) Invisible
- c) Evident
- d) Obvious

Answer: Visibility

Question: In an attribute declaration, the private visibility is represented by _____symbol.

- a) -
- b) #
- c) +
- d) ~

Answer: -

Question: In an attribute declaration, the protected visibility is represented by____symbol.

- a) -
- b) #
- c) +
- d) ~

Answer: #

13/09/2022, 20:10 CBSE Class 12 Computer Science Object Oriented Concepts MCQs, Multiple Choice Questions for Question: In an attribute declaration, the public visibility is represented bysymbol.	r C
 a) - b) # c) + d) ~ 	
Answer: +	
Question: In an attribute declaration, the package visibility is represented bysymbol. • a) - • b) # • c) + • d) ~	
Answer: ~	
Question: Attribute generally refers to a	
 a) Variable b) Property c) Value d) Class 	
Answer: Variable	
Question:type and initial value identify the type of data stored and its value at the start of the program. • a) Data • b) Date • c) Value • d) Class	
Answer: Data	
 Question:is an example of declaring attribute. a) Name:- string; b) Name: string c) Name ++string d) Name = string 	
Answer: Name : string	
 Question: In UML notation, an operation is declared usingsyntax: a) [](parameter list separated by comma): b) [](parameter list separated by comma): c) [](parameter list separated by comma): d) None of these. 	
Answer: [](parameter list separated by comma):	
Question:diagrams are independent of the programming	

https://www.studiestoday.com/mcq-computer-science-cbse-class-12-computer-science-object-oriented-concepts-mcqs-set-311042.html

language used for coding an application.

- a) ULM
- b) UML
- c) LUM
- d) MUL

Answer: UML

Question: _____are presented using their state during execution of an application.

- a) Methods
- b) Procedures
- c) Classes
- d) Objects

Answer: Objects

Question: Objects are_____

- a) Dynamic
- b) Vibrant
- c) Colorful
- d) All of these

Answer: Dynamic

Question: An object is also called an_____

- a) Image
- b) Illustration
- c) Instance
- d) Occurrence

Answer: Instance

Question: For any computer program, two or more elements are data and

- a) Method
- b) Function
- c) Information
- d) Procedure

Answer: Function

Question: Structured/Procedural programming views the two core elements as_____separate entities.

- a) One
- b) Two
- c) Three
- d) None of these

Answer: Two

Question: _____programming views the two coreentities as single entity.

• a) Object-oriented

- b) Structured
- c) Procedural
- d) Instance

Answer: Object-oriented

Question: In_____programming, data can be altered by any component of the program.

- a) Object-oriented
- b) Structured
- c) Procedural
- d) Instance

Answer: Procedural

Question: In object-oriented programming, the problem of modification can be solved using____

- a) Polymorphism
- b) Abstraction
- c) Messaging
- d) Encapsulation

Answer: Encapsulation

Question: Data and the methods that _____data are guarded against modification or misuse by other components of the program.

- a) Change
- b) Modify
- c) Manipulate
- d) Imitate

Answer: Manipulate

Question: The mechanism of providing protection to data and methods of a program is called_____

- a) Polymorphism
- b) Abstraction
- c) Messaging
- d) Encapsulation

Answer: Encapsulation

Question: _____is possible by wrapping data and methods into a single unit known as class and declaring them as private.

- a) Encapsulation
- b) Abstraction
- c) Messaging
- d) Polymorphism

Answer: Encapsulation

Question: _____members of the class are not available directly to outside world.

- a) Private
- b) Public
- c) Void
- d) Static

Answer: Private

Question: Data can be made available via public____to the outside world.

- a) Messages
- b) Methods
- c) Function
- d) Declarations

Answer: Methods

Question: Encapsulation provides____hiding capability.

- a) Information
- b) Data
- c) Code
- d) Class

Answer: Data

Question: ____keeps the data safe from unintended actions and inadvertent access by outside objects.

- a) Polymorphism
- b) Abstraction
- c) Messaging
- d) Encapsulation

Answer: Encapsulation

Question: _____programming discourages direct access to common data by other programs.

- a) Object-oriented
- b) Structured
- c) Procedural
- d) Instance

Answer: Object-oriented

Question: Only the object that_____the data can change its content.

- a) Holds
- b) Possesses
- c) Owns
- d) Creates

Answer: Owns

Question: Other objects can view or change this data by sending message to the "owner".

• a) Vendor

- b) Businessman
- c) Owner
- d) Viewer

Answer: Owner

Question: Data_____is a process of representing the essential features of the objects without including implementation detail.

- a) Polymorphism
- b) Abstraction
- c) Messaging
- d) Encapsulation

Answer: Abstraction

Question: _____is a concept that hides the complexity; it says what it does, but not how it is done.

- a) Polymorphism
- b) Abstraction
- c) Messaging
- d) Encapsulation

Answer: Abstraction

Question: Data____thus is a technique that relies on the separation of interface and implementation.

- a) Polymorphism
- b) Abstraction
- c) Messaging
- d) Encapsulation

Answer: Abstraction

Question: A user defined____with necessary input data parameters also provides data abstraction.

- a) Messages
- b) Methods
- c) Function
- d) Declarations

Answer: Function

Question: The signature of the function means the name of the function, number and type of parameters and the return type of

- a) Parameters
- b) Methods
- c) Parts
- d) Variables

Answer: Parameters

Question: Data____provides the skeleton or templates for the programmers use. The system hides certain details of how data is stored, created and maintained.

- a) Polymorphism
- b) Abstraction
- c) Messaging
- d) Encapsulation

Answer: Abstraction

Question: All that is_____to the rest of the world is the abstract behaviour of the data type.

- a) Invisible
- b) Hidden
- c) Seen
- d) Visible

Answer: Visible

Question: _____or structures (struct) in C/C++, classes / Java are examples for data abstraction.

- a) ADVT
- b) TDA
- c) DAT
- d) ADT

Answer: ADT

Question: Full form of ADT is_____

- a) Abstraction Date Type
- b) Abstract Date Type
- c) Abstract Data Type
- d) Abstract Data Template

Answer: Abstract Data Type

Question: In___it is simply defined a data type and a set of operations on it. The implementation of operations is not seen.

- a) ADVT
- b) TDA
- c) DAT
- d) ADT

Answer: ADT

Question: Encapsulation____data by making them inaccessible from outside.

- a) Hides
- b) Protects
- c) Displays
- d) Harms

Answer: Protects

Question:	enables to	represent	data	in which	the
implementation	details are	hidden.			

- a) Polymorphism
- b) Abstraction
- c) Messaging
- d) Encapsulation

Answer: Abstraction

Question: In object-oriented terminology, a call to a method is referred to as a_____

- a) Message
- b) Function
- c) Call
- d) Letter

Answer: Message

Question: _____represents 'has-a' or 'a-part-of relationship between classes.

- a) Aggregation
- b) Polymorphism
- c) Work
- d) Messaging

Answer: Aggregation

Question: _____represents non-exclusive relationship between two classes.

- a) Polymorphism
- b) Aggregation
- c) Inheritance
- d) Abstraction

Answer: Aggregation

Question: In____the class that forms part of the owner class can exist independently.

- a) Polymorphism
- b) Aggregation
- c) Inheritance
- d) Abstraction

Answer: Aggregation

Question: The life of an_____of the part class is not determined by the owner class.

- a) Variable
- b) Parameter
- c) Operator
- d) Object

Answer: Object

Question: Although the motherboard is part of the computer, it ca	n
exist as a separate item independent of the	

- a) Workstation
- b) System
- c) Computer
- d) Processor

Answer: Computer

Question: Basic aggregation is represented using an empty____symbol next to the whole class.

- a) Square
- b) Diamond
- c) Triangle
- d) Circle

Answer: Diamond

Question: _____represents exclusive relationship between two classes.

- a) Composition
- b) Aggregation
- c) Inheritance
- d) Abstraction

Answer: Composition

Question: _____is a strong type of aggregation where the lifetime of the part class depends on the existence of the owner class.

- a) Composition
- b) Aggregation
- c) Inheritance
- d) Abstraction

Answer: Composition

Question: If an object of aggregating class is deleted, its part_____object also gets deleted.

- a) Function
- b) Message
- c) Class
- d) Variable

Answer: Class

Question: When an object of class Person is deleted, the object of class Name is also_____

- a) Removed
- b) Deleted
- c) Detached
- d) Attached

Answer: Deleted

Question: _____property suits best with Java.

- a) A Structured Language
- b) An Object-oriented Language
- c) A Procedural Language
- d) An Interpreting Language

Answer: An Object-oriented Language

Question: is provided while using encapsulation.

- a) Data Protection
- b) Data Hiding
- c) Data Sharing
- d) Data and Methods Separation

Answer: Data Protection

Question: The focus is on____entity in an object-oriented methodology.

- a) Functions
- b) Data
- c) Classes
- d) Objects

Answer: Objects

Question: In class diagram, basic aggregation is represented using which of the following symbols?

- a) Empty triangle symbol
- b) Filled triangle symbol
- c) Filled diamond symbol
- d) Empty diamond symbol

Answer: Empty diamond symbol

Question: The data type for NAME variable should be_____

- a) String
- b) Char
- c) Date
- d) Int

Answer: String

Question: The data type for BIRTHDATE variable should be____

- a) String
- b) Char
- c) Date
- d) Int

Answer: Date

Question: The data type for GENDER variable should be

- a) String
- b) Char
- c) Double
- d) Int

Answer: Char

Question: The data type for NO_OF_STUDENTS variable should be

- a) String
- b) Char
- c) Double
- d) Int

Answer: Int

Question: _____is used to define common features of similar objects.

- a) Class
- b) Procedure
- c) Object
- d) Method

Answer: Method

Question: The output of the function sqrt(25) is_____

- a) 5
- b) 10
- c) 15
- d) 20

Answer: 5

Question: A user defined____with necessary input data parameters also provides data abstraction.

- a) Messages
- b) Methods
- c) Function
- d) Declarations

Answer: Function

Question: The signature of the function means the name of the function, number and type of parameters and the return type of

- a) Parameters
- b) Methods
- c) Parts
- d) Variables

Answer: Parameters

Question: Data____provides the skeleton or templates for the programmers use. The system hides certain details of how data is stored, created and maintained.

- a) Polymorphism
- b) Abstraction
- c) Messaging
- d) Encapsulation

Answer: Abstraction

Question: All that is_____to the rest of the world is the abstract behaviour of the data type.

- a) Invisible
- b) Hidden
- c) Seen
- d) Visible

Answer: Visible

Question: _____or structures (struct) in C/C++, classes / Java are examples for data abstraction.

- a) ADVT
- b) TDA
- c) DAT
- d) ADT

Answer: ADT

Question: Full form of ADT is_____

- a) Abstraction Date Type
- b) Abstract Date Type
- c) Abstract Data Type
- d) Abstract Data Template

Answer: Abstract Data Type

Question: In___it is simply defined a data type and a set of operations on it. The implementation of operations is not seen.

- a) ADVT
- b) TDA
- c) DAT
- d) ADT

Answer: ADT

Question: Encapsulation____data by making them inaccessible from outside.

- a) Hides
- b) Protects
- c) Displays
- d) Harms

Answer: Protects

Question:	enables to	represent	data	in which	the
implementation	details are	hidden.			

- a) Polymorphism
- b) Abstraction
- c) Messaging
- d) Encapsulation

Answer: Abstraction

Question: In object-oriented terminology, a call to a method is referred to as a_____

- a) Message
- b) Function
- c) Call
- d) Letter

Answer: Message

Question: _____represents 'has-a' or 'a-part-of relationship between classes.

- a) Aggregation
- b) Polymorphism
- c) Work
- d) Messaging

Answer: Aggregation

Question: _____represents non-exclusive relationship between two classes.

- a) Polymorphism
- b) Aggregation
- c) Inheritance
- d) Abstraction

Answer: Aggregation

Question: In____the class that forms part of the owner class can exist independently.

- a) Polymorphism
- b) Aggregation
- c) Inheritance
- d) Abstraction

Answer: Aggregation

Question: The life of an_____of the part class is not determined by the owner class.

- a) Variable
- b) Parameter
- c) Operator
- d) Object

Answer: Object

Question: Although the motherboard is part of the computer, it ca	n
exist as a separate item independent of the	

- a) Workstation
- b) System
- c) Computer
- d) Processor

Answer: Computer

Question: Basic aggregation is represented using an empty____symbol next to the whole class.

- a) Square
- b) Diamond
- c) Triangle
- d) Circle

Answer: Diamond

Question: _____represents exclusive relationship between two classes.

- a) Composition
- b) Aggregation
- c) Inheritance
- d) Abstraction

Answer: Composition

Question: _____is a strong type of aggregation where the lifetime of the part class depends on the existence of the owner class.

- a) Composition
- b) Aggregation
- c) Inheritance
- d) Abstraction

Answer: Composition

Question: If an object of aggregating class is deleted, its part_____object also gets deleted.

- a) Function
- b) Message
- c) Class
- d) Variable

Answer: Class

Question: When an object of class Person is deleted, the object of class Name is also_____

- a) Removed
- b) Deleted
- c) Detached
- d) Attached

Answer: Deleted

Question: _____property suits best with Java.

- a) A Structured Language
- b) An Object-oriented Language
- c) A Procedural Language
- d) An Interpreting Language

Answer: An Object-oriented Language

Question: is provided while using encapsulation.

- a) Data Protection
- b) Data Hiding
- c) Data Sharing
- d) Data and Methods Separation

Answer: Data Protection

Question: The focus is on____entity in an object-oriented methodology.

- a) Functions
- b) Data
- c) Classes
- d) Objects

Answer: Objects

Question: In class diagram, basic aggregation is represented using which of the following symbols?

- a) Empty triangle symbol
- b) Filled triangle symbol
- c) Filled diamond symbol
- d) Empty diamond symbol

Answer: Empty diamond symbol

Question: The data type for NAME variable should be_____

- a) String
- b) Char
- c) Date
- d) Int

Answer: String

Question: The data type for BIRTHDATE variable should be____

- a) String
- b) Char
- c) Date
- d) Int

Answer: Date

Question: The data type for GENDER variable should be

- a) String
- b) Char
- c) Double
- d) Int

Answer: Char

Question: The data type for NO_OF_STUDENTS variable should be

- a) String
- b) Char
- c) Double
- d) Int

Answer: Int

Question: _____is used to define common features of similar objects.

- a) Class
- b) Procedure
- c) Object
- d) Method

Answer: Method

Question: The output of the function sqrt(25) is_____

- a) 5
- b) 10
- c) 15
- d) 20

Answer: 5

Question: _____is generally referred to as 'is-a-kind-of relationship between two classes.

- a) Composition
- b) Aggregation
- c) Inheritance
- d) Abstraction

Answer: Inheritance

Question: _____refers to the capability of defining a new class of objects that inherits the characteristics of another existing class.

- a) Inheritance
- b) Composition
- c) Aggregation
- d) Messaging

Answer: Inheritance

Question: In object-oriented terminology____class is called sub class or child class or derived class.

- a) Latest
- b) New
- c) Old
- d) Super

Answer: New

Question: The existing class is called____class or parent class or base class.

- a) Sub
- b) New
- c) Super
- d) Child

Answer: Super

Question: The data_____and methods of the super class are available to objects in the sub class without rewriting their declarations.

- a) Attributes
- b) Properties
- c) Operators
- d) Features

Answer: Attributes

Question: The above feature (mention in above question provides) reusability where existing method can be reused without_____

- a) Introduction
- b) Availability
- c) Definition
- d) Redefining

Answer: Redefining

Question: Additionally new data and method members can be added to the____class as an extension.

- a) Sub
- b) New
- c) Super
- d) Child

Answer: Sub

Question: In a class diagram, inheritance is represented using an arrow pointing to____class.

- a) Sub
- b) New
- c) Super
- d) Child

Answer: Super

13	3/09/2022, 20:10	CBSE Class 12 Computer Science Object Oriented Concepts MCQs, Multiple Choice Questions
	Question: a'relationship. a) Aggregation b) Composition c) Inheritance d) Generalization Answer: Generalization	_is another name for inheritance or 'is
		refers to a relationship between two classes where cialized version of another.
	Answer: Generalization	
	a) Subb) Newc) Superd) Child	on attributes and methods are defined inclass.
	Answer: Super	
	Question: attributes and me • a) Sub • b) New • c) Super • d) Child	_class is a specialized version with additional ethods.
	Answer: Sub	

Question: A____can be derived using more than parent classes.

- a) Method
- b) Program
- c) Class
- d) Variable

Answer: Class

Question: When a class is derived from two or more classes, it is known as multiple_____

- a) Aggregation
- b) Composition
- c) Inheritance
- d) Generalization

Answer: Inheritance

Question: In____class inherits from other classes in order to share, reuse or extend functionality.

- a) Aggregation
- b) Composition
- c) Inheritance
- d) Generalization

Answer: Inheritance

Question: In____classes do not inherit from other classes, but are 'composed of other classes.

- a) Aggregation
- b) Composition
- c) Inheritance
- d) Generalization

Answer: Composition

Question: _____as methodology is playing a significant role in analysis, design and implementation of software system.

- a) Object-oriented
- b) Structure-oriented
- c) Procedure-oriented
- d) Aggregation-oriented

Answer: Object-oriented

Question: When a class contains objects of other class, the container class is called____class or whole class or aggregating class.

- a) Sub
- b) Owner
- c) Super
- d) Whole

Answer: Owner

Question: The class that is contained in owner class is known as____class or part class or aggregated class.

- a) Sub
- b) Owner
- c) Subject
- d) Super

Answer: Subject

Question: _____represents non-exclusive relationship between two classes.

- a) Aggregation
- b) Composition
- c) Inheritance
- d) Generalization

Answer: Aggregation

Question: represents exclusive relationship between two classes.

- a) Aggregation
- b) Composition
- c) Inheritance
- d) Generalization

Answer: Composition

Question: When there is 'is-a' or 'a-kind-of relationship between two classes, there is____relationship.

- a) Aggregation
- b) Composition
- c) Inheritance
- d) Generalization

Answer: Inheritance

Question: General features or common features of two classes are implemented in the____class.

- a) Sub
- b) Owner
- c) Subject
- d) Super

Answer: Super

Question: Special features of two classes are implemented in sub class.

- a) Sub
- b) Owner
- c) Subject
- d) Super

Answer: Sub

Question: In class diagram, composition is represented using which of the following symbols?

- a) Empty triangle symbol
- b) Filled triangle symbol
- c) Filled diamond symbol
- d) Empty diamond symbol

Answer: Filled diamond symbol

Question: An inheritance model refers to which of the following relationships?

- a) Has-a-relationship'
- b) A-part-of relationship
- c) Is-a-part-of relationship
- d) Is-a' relationship

Answer: Is-a' relationship

Question: Which of the following is enabled by data abstraction?

- a) Data protection
- b) Data hiding
- c) Hide implementation details
- d) Hide relationship details

Answer: Hide implementation details

Question: Polymorphism cannot be achieved by which of the following?

- a) Operator overloading
- b) Data hiding
- c) Method overloading
- d) None of these

Answer: Data hiding

Question: Which of the following model refers to an aggregation?

- a) A-part-of relationship
- b) Is-like' relationship
- c) Is-a' relationship
- d) Has-a' relationship

Answer: A-part-of relationship

Question: _____is used to distinguish objects from each other.

- a) Attributes
- b) Behaviour
- c) State
- d) All of these

Answer: State

Question: Most LaTeX distribution software includes_____and some additional software in them.

- a) TeX
- b) SciTE
- c) LaTeX
- d) Ubuntu

Answer: TeX

Question: TeX Live is a very popular LaTeX distribution software which is available in the standard_____repositories.

- a) TeX
- b) SciTE
- c) LaTeX
- d) Ubuntu

Answer: Ubuntu

Question: While using LaTeX, there is also a need for plain____editor and software to view the output file.

- a) Text
- b) Transcript
- c) Script
- d) Word

Answer: Text

Question: LaTeX can produce output in different file_____

- a) Arrangements
- b) Formats
- c) Editors
- d) Software's

Answer: Formats

Question: Depending on the output of file____corresponding viewer software is needed.

- a) Arrangement
- b) Format
- c) Editor
- d) Software

Answer: Format

Question: LaTeX documents are typically created using any plain____editor.

- a) Text

Answer: Both (A) and (B)

• d) None of these

Question: The different parts of the text are marked using _____commands that associate a meaning to them.

- a) LaTeX
- b) Simple
- c) TeX
- d) HTML

Answer: LaTeX

Question: ____command is used to define the document's title.

- a) \ title
- b) \author
- c) \date
- d) \document

Answer: \ title

Question: _____command is used to specify the author(s) of the document.

- a) \title
- b) \author
- c) \date
- d) \document

Answer: \author

Question: ____command is used to indicate the date the document was created.

- a) \title
- b) \author
- c) \date
- d) \document

Answer: \date

Question: ____command can be used to explicitly specify the logical structure of the document.

- a) \ chapter
- b) \ section
- c) \paragraph
- d) All of these

Answer: All of these

Question: LaTeX comes with _____ ways to format these document elements in a pleasant looking professional style.

- a) Integrated
- b) Built-in
- c) Many
- d) Incorporated

Answer: Integrated

Question: When typing the document, one can see it as plain____text with the built-in commands written as part of the text.

- a) Unformatted
- b) Formatted
- c) In-line
- d) None of these

Answer: Unformatted

Question: The document is compiled (processed) using the LaTeX____and an output file is produced.

- a) Organization
- b) Commands
- c) System
- d) Document

Answer: System

Question: While compilation, LaTeX can also produce some additional_____

- a) Records
- b) Archives
- c) Files
- d) Directories

Answer: Files

Question: The produced additional files can be____safely without losing any information.

- a) Read
- b) Deleted
- c) Saved
- d) Documented

Answer: Deleted

Question: When the output file is viewed using appropriate software or print it on a printer, one can see the____document.

- a) Unformatted
- b) Formatted
- c) In-line
- d) None of these

Answer: Formatted

Question: In the output file, if the looks of the document are not satisfactory, it can be further____with the help of built-in styles or own styles can be defined.

- a) Adapted
- b) Formatted
- c) Modified
- d) Customized

Answer: Customized

Question: Every time a modification is made in the _____text, there will be a need to compile it again for seeing the effect of the change in the output document.

- •
- a) Source
- b) Basic
- c) Beginning
- d) Main

Answer: Source

Question: Both TeX and LaTeX use the file extension_____

- a) .text
- b) .tex
- c) .txe
- d) .latex

Answer: .tex

Question: LaTeX has a command called_____that produces the popular PDF format files.

- a) PDFtex
- b) pdflatex
- c) PDF
- d) latexpdf

Answer: pdflatex

Question: Full form of PDF is_____

- a) Perfect Document Format
- b) Portable Double Format
- c) Portable Document Format
- d) Perfect Deed Format

Answer: Portable Document Format

Question: _____files can be viewed on screen as well as printed to printers and the printout looks exactly same as the monitor display.

- a) PDF
- b) LaTeX
- c) Text
- d) TeX

13/09/2022, 20:11

Answer: PDF

Question: PDF files are very popular for sharing_____documents on the Web.

- a) Producible
- b) Printable
- c) Printed
- d) Scanned

Answer: Printable

Question: PDF documents can be viewed in_____default viewer.

- a) TeX's
- b) SciTE's
- c) LaTeX's
- d) Ubuntu's

Answer: Ubuntu's

Question: Ubuntu's document default viewer is_____

- a) Evince
- b) LaTeX
- c) Evine
- d) All of these

Answer: Evince

Question: The edit-compile-view cycle has____steps.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Three

Question: The document can be edited by using any plain editor like

- a) Gedit
- b) Word
- c) Wordpad
- d) Getit

Answer: Gedit

Question: The LaTeX document can be compiled by issuing the command____at the command prompt.

- a) Pdflatex filename
- b) PDF filename
- c) latexpdf filename
- d) filename pdflatex

Answer: Pdflatex filename

Question:	The	generated	PDF	file	can	be	viewed	by	opening	g it	from
the											

- a) Desktop
- b) GUI
- c) Adobe
- d) LaTeX

Answer: GUI

Question: The generated PDF file can also be viewed by issuing the command____pdf filename at the command prompt.

- a) Evince
- b) LaTeX
- c) Evine
- d) All of these

Answer: Evince

Question: SciTE editor can also be used for editing_____files.

- a) Evince
- b) LaTeX
- c) Basic
- d) Gedit

Answer: LaTeX

Question: SciTE has one advantage over____one can compile and view the document from within the SciTE program itself.

- a) Evince
- b) LaTeX
- c) Basic
- d) Gedit

Answer: Gedit

Question: To use SciTE with pdflatex, there is a need to make changes in its_____file.

- a) Document
- b) PDF
- c) Configuration
- d) LaTeX

Answer: Configuration

Question: LaTeX is essentially a____language.

- a) Markup
- b) Highlighted
- c) Object oriented
- d) Simple

Answer: Markup

Question: The LaTeX source consists of plain text with some parts of the text marked up using markers known as_____

- a) Instructions
- b) Commands
- c) Guidelines
- d) Directions

Answer: Commands

Question: In LaTeX, some_____are independent commands - they do not mark any specific part of the text.

- a) Instructions
- b) Commands
- c) Guidelines
- d) Directions

Answer: Commands

Question: The LaTeX commands can perform a variety of tasks when the_____is processed by the LaTeX system.

- a) Organization
- b) File
- c) System
- d) Document

Answer: Document

Question: The LaTeX commands provide information about the text or the____

- a) Organization
- b) File
- c) System
- d) Document

Answer: Document

Question: The LaTeX commands indicate the role of the marked text in the overall structure of the_____

- a) Organization
- b) File
- c) System
- d) Document

Answer: Document

Question: The LaTeX commands directly specify_____

- a) Formatting
- b) Information
- c) Data
- d) File name

Answer: Formatting

Question: The LaTeX_____instruct LaTeX to process the document in a certain way, for example, use a certain page size, start a new chapter only on an odd-numbered page, etc.

- a) Instructions
- b) Commands
- c) Guidelines
- d) Directions

Answer: Commands

Question: LaTeX commands start with a____character followed by the command name.

- a) / (forward slash)
- b) % (percentage)
- c) \ (backslash)
- d) A (caret)

Answer: \ (backslash)

Question: The LaTeX command name can be a____of alphabetic letters only, or it can be a single non-letter.

- a) String
- b) Sequence
- c) Series
- d) Chain

Answer: String

Question: LaTeX commands are _____sensitive.

- a) Event
- b) Case
- c) Instance
- d) Example

Answer: Case

Question: Some commands accept additional information which is called

- a) Examples
- b) Data info
- c) Arguments
- d) Instances

Answer: Arguments

Question: There are two types of____optional and compulsory.

- a) Examples
- b) Data Info
- c) Arguments
- d) Instances

Answer: Arguments

Question: _____arguments are not mandatory.

- a) Optional
- b) Compulsory
- c) Instance
- d) Event

Answer: Optional

Question: If one or more optional arguments are to be provided, they have to be written after the command name, enclosed in_____

- a) [] (square brackets)
- b) ""(quotes)
- c) <>(angular brackets)
- d) {} (curly braces)

Answer: [] (square brackets)

Question: More than one optional argument has to be separated by_____

- a) (:) colon
- b) (,) comma
- c) (;) semi colon
- d) (A) caret

Answer: (,) comma

Question: Mandatory arguments (if there are any) have to be enclosed in in_____

- a) [] (square brackets)
- b) "" (quotes)
- c) <>(angular brackets)
- d) { } (curly braces)

Answer: { } (curly braces)

Question: Documentclass is the ______ of the command.

- a) Name
- b) Optional argument
- c) Compulsory argument
- d) None of these

Answer: Name

Question: 12pt is an____argument.

- a) Name
- b) Optional
- c) Compulsory
- d) All of these

Answer: Optional

Question: Article is a____argument.

- a) Name
- b) Optional
- c) Compulsory
- d) All of these

Answer: Compulsory

Question: LaTeX treats all____characters (the space, tab and newline characters) as the same.

- a) Special
- b) Space
- c) Line
- d) Whitespace

Answer: Whitespace

Question: LaTeX converts all occurrences of multiple consecutive_____into a single space character.

- a) Special
- b) Space
- c) Line
- d) Whitespace

Answer: Whitespace

Question: The_____at the beginning of a line are generally ignored and one or more consecutive blank lines are considered to mark the beginning of a new paragraph.

- a) Special
- b) Space
- c) Line
- d) Whitespace

Answer: Whitespace

Question: To insert a break in lines use____at the end of each line except the last line in the paragraph.

- a) \\
- b) ||
- c) //
- d) !!

Answer: \\

Question: _____is called the Line Break Command.

- a) \\
- b) ||
- c) //
- d) !!

Answer: \\

Question: Which of the following characters is not a reserved character in LaTeX?

- a) #
- b) &
- c)!
- d) \$

Answer:!

Question: Which of the following is a reserved character in LaTeX?

- a) #
- b) \$
- c) %
- d) All of these

Answer: All of these

Question: In LaTeX____quotes are produced by repeating them twice.

- a) Single
- b) Double
- c) Back
- d) None of these

Answer: Double

Question: LaTeX uses_____to mark portions of text.

- a) Clusters
- b) Groups
- c) Sets
- d) Collections

Answer: Groups

Question: A_____is enclosed between curly braces {and}.

- a) Cluster
- b) Group
- c) Set
- d) Collection

Answer: Group

Question: Any_____in a group applies only to text following the command within that group.

- a) Instruction
- b) Command
- c) Guideline
- d) Direction

Answer: Command

Question: _____are useful for applying few commands to a small amount of text such as a part of a line, few lines or a paragraph.

- a) Clusters
- b) Groups
- c) Sets
- d) Collections

Answer: Groups

Question: For the cases where a multitude of commands must be applied (for example, for formatting a table or mathematical equation properly) or where some command(s) have to be applied to large portions of the text (like several paragraphs, whole sections), LaTeX provides a facility called_____

- a) Grouping
- b) Printing
- c) Environments
- d) Sections

Answer: Environments

Question: An____begins with a \begin{environment-name} command and ends with a \end{environment-name} command.

- a) Area
- b) Extent
- c) Environment
- d) Section

Answer: Environment

Question: All the formatting characteristics of the _____are applied to the entire text inside the environment.

- a) Area
- b) Extent
- c) Environment
- d) Section

Answer: Environment

Question: Environments can be nested. One____can be nested inside another.

- a) Area
- b) Extent
- c) Environment
- d) Section

Answer: Environment

Question: LaTeX has several advanced features, including_____and automatically generating parts of the documents or multiple documents (mail merge).

- a) Programming
- b) Designing
- c) Planning
- d) All of these

Answer: Programming

Question: In LaTeX, theCharacter marks the beginning of a comment. • a) # • b) % • c) @ • d) \$
Answer: %
Question:are meant for the humans who read the LaTeX source code in a text editor for understanding and modifying it. • a) Comments • b) Notes • c) Explanations • d) Remarks
Answer: Comments
Question:are completely ignored by the compilation process and hence never make it into the output. • a) Comments • b) Notes • c) Explanations • d) Remarks
Answer: Comments
Question: A LaTeX document hasparts namely preamble and content. • a) One • b) Two • c) Three • d) Four
Answer: Two
Question: Thecontains metadata (data about data) • a) Main content • b) Information

- c) Preamble
- d) Remarks

Answer: Preamble

Question: The_____is information about the document and instructions on how LaTeX should process the document.

- a) Actual content
- b) Information
- c) Preamble
- d) Metadata

Answer: Metadata

Question: The actual content is always inside the _____document, written between \begin{document} and \end{document}.

- a) Area
- b) Extent
- c) Environment
- d) Section

Answer: Environment

Question: The very first element in the____must be \ document class {document-class- name} specifying the type of the document

- a) Main content
- b) Information
- c) Preamble
- d) Remarks

Answer: Preamble

Question: Option "article" in Document Class is used for writing individual

- a) Articles
- b) Books
- c) Slides
- d) Letters

Answer: Articles

Question: Option "book" in Document Class is used for writing entire_____

- a) Articles
- b) Books
- c) Slides
- d) Letters

Answer: Books

Question: Option "slides" in Document Class is used for creating presentation_____

- a) Articles
- b) Books
- c) Slides
- d) Letters

Answer: Slides

Question: Option "letter" in Document Class is used for writing_____

- a) Articles
- b) Books
- c) Slides
- d) Letter

Answer: Letter

Question: Option	_in Document Class is used for generating
presentations using I	eamer package.

- a) Articles
- b) Books
- c) Slides
- d) Letters

Answer: Books

Question: _____points is the default font size in the document.

- a) 12
- b) 11
- c) 10
- d) 14

Answer: 10

Question: The most common paper_____in regular office uses are A4, letter and legal.

- a) Sizes
- b) Dimensions
- c) Scopes
- d) Extent

Answer: Sizes

Question: With option_____displayed formulas and equations are flushed left (left-aligned).

- a) Fleq
- b) Fleqn
- c) Formula
- d) Forleft

Answer: Fleqn

Question: The default alignment of formulas and equations is_____

- a) Left
- b) Right
- c) Center
- d) Justified

Answer: Center

Question: The____option changes the layout of the document to print in landscape mode.

- a) Portrait
- b) Landscape
- c) Vertical
- d) Horizontal

Answer: Landscape

Question:	The document class	ss decl	aration	is fo	llowed	by
optional_	declaration.					

- a) Package
- b) Class
- c) Variable
- d) Formula

Answer: Package

Question: LaTeX allows users to write____that provide additional functionality.

- a) Classes
- b) Packages
- c) Variables
- d) Formulas

Answer: Packages

Question: There is a large community of LaTeX users who develop new LaTeX packages or enhance existing ones to cater to their own needs and then share them with others over the_____

- a) Comparative TeX Archive Network (CTAN)
- b) Comprehensive TeX Archive Network (CTAN)
- c) Complete TeX Archive Network (CTAN)
- d) Comprehensive TeX Archive Net (CTAN)

Answer: Comprehensive TeX Archive Network (CTAN)

Question: LaTeX distributions themselves usually come with a large number of preinstalled_____

- a) Classes
- b) Packages
- c) Variables
- d) Formulas

Answer: Packages

Question: To use one or more packages in our document, there is a need to declare them in the_____as \usepackage{package-name}.

- a) Main content
- b) File
- c) Preamble
- d) Comments

Answer: Preamble

Question: If the user is not using options for any packages, multiple package names can be declared in a single \use package command, separated by_____

- a) (:) colon
- b) (,) comma
- c) (;) semi colon

• d) (A) caret

Answer: (comma
Allowell (σ	Commu

Question: _____package contains the advanced math extensions for LaTeX originally developed for the American Mathematical Society.

- a) Geometry
- b) Amsmath
- c) Setspace
- d) Color

Answer: Amsmath

Question: _____package adds support for colored text.

- a) Easylist
- b) Listings
- c) Setspace
- d) Color

Answer: Color

Question: _____package adds support for multilevel text.

- a) Geometry
- b) Easylist
- c) Setspace
- d) Color

Answer: Easylist

Question: _____package is used for page layout tasks.

- a) Geometry
- b) Listings
- c) Setspace
- d) Color

Answer: Geometry

Question: _____package has special features for including programming code within the document.

- a) Geometry
- b) Listings
- c) Setspace
- d) Color

Answer: Listings

Question: _____package helps in changing line spacing.

- a) Geometry
- b) Listings
- c) Setspace
- d) Easylist

Answer: Setspace

Question	It is necessary to provide the title and the author
if	as to create an automatic title.

- a) TeX
- b) SciTE
- c) LaTeX
- d) Ubuntu

Answer: LaTeX

Question: Providing date is_____If is omitted then the date of compilation is used in the title.

- a) By choice
- b) Optional
- c) Compulsory
- d) Important

Answer: Optional

Question: _____piece of information can be supplied in the preamble or as the first thing in the document environment also.

- a) \title
- b) \author
- c) \date
- d) All of these

Answer: All of these

Question: The document environments for articles and slides will only have a title followed by the_____of the document.

- a) Main content
- b) Information
- c) Preamble
- d) Remarks

Answer: Main content

Question: A title is automatically generated by LaTeX when it sees that____command.

- a) \ title
- b) Vmaketitle
- c) \marktitle
- d) \spotitle

Answer: Vmaketitle

Question: The \title, \author and \date commands must precede the _____command because their information is used in creating the title.

- a) \title
- b) \maketitle
- c) \marktitle
- d) \spotitle

13/09/2022, 20:11

Answer: \maketitle

Question: The document environment of a book is divided into_____main parts.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Three

Question: The document environment of a book has_____main parts.

- a) The front matter
- b) The main matter
- c) The back matter
- d) All of these

Answer: All of these

Question: The main content of a book has a hierarchical structure, where a book is divided into_____

- a) Chapters
- b) Sections
- c) Parts
- d) Subsections

Answer: Parts

Question: The parts are divided into_____

- a) Chapters
- b) Sections
- c) Parts
- d) Subsections

Answer: Chapters

Question: The chapters are divided into_____

- a) Chapters
- b) Sections
- c) Parts
- d) Subsections

Answer: Sections

Question: The sections are divided into_____

- a) Chapters
- b) Sections
- c) Parts
- d) Subsections

Answer: Subsections

Question: The subsections are divided into_____

- a) Chapters
- b) Paragraphs
- c) Parts
- d) Sub subsections

Answer: Sub subsections

Question: The sub subsections are divided into_____

- a) Chapters
- b) Paragraphs
- c) Parts
- d) Subsections

Answer: Paragraphs

Question: The paragraphs are divided into_____

- a) Chapters
- b) Subparagraphs
- c) Parts
- d) Subsections

Answer: Subparagraphs

Question: Each of the above division (of the main content)____one compulsory argument, the title; and one optional argument.

- a) Accepts
- b) Acknowledges
- c) Receives
- d) Agrees

Answer: Accepts

Question: The title has to be displayed in the table of_____

- a) Lists
- b) Details
- c) Contents
- d) Elements

Answer: Contents

- a) Period (.)
- b) Colon (:)
- c) Semi colon (;)
- d) Hash (-)

Answer: Period (.)

Question: _____are an exception as their assigned number does not have a part number and period in front of them.

- a) Chapters
- b) Sections
- c) Parts
- d) Subsections

Answer: Chapters

Question: _____are assigned simple Arabic numeral numbers.

- a) Chapters
- b) Sections
- c) Parts
- d) Subsections

Answer: Chapters

Question: A well-formatted table of contents (TOC) is generated automatically from the elements titles by LaTeX when it encounters the command_____

- a) \TOC
- b) \tableofcontents
- c) \tableOC
- d) \toContents

Answer: \tableofcontents

Question: By default a____has entries up to level 2 (subsection).

- a) \TOC
- b) \tableofcontents
- c) \tableOC
- d) \toContents

Answer: \TOC

Question: TOC default entries can be changed by altering the value of another built-in counter_____

- a) Todepth
- b) Tocdepth
- c) Counterdepth
- d) Setdepth

Answer: Tocdepth

Question: LaTeX processes the source file......from the beginning to end in a single pass.

- a) Randomly
- b) In line
- c) Sequentially
- d) Cautiously

Answer: Sequentially

Question: LaTeX produces the output file_____

- a) Randomly
- b) In line
- c) Sequentially
- d) Cautiously

Answer: Sequentially

Question: In the first run LaTeX collects information about the document structure and stores it in_____files.

- a) Extra
- b) Complementary
- c) Additional
- d) Supplementary

Answer: Supplementary

Question: In the second run, LaTeX picks up the correct information from the supplementary files in the beginning to produce the correct

- a) TOC
- b) Table of content
- c) Table
- d) Content

Answer: TOC

Question: Just like the____LaTeX can also maintain list of figures, list of tables, cross references, bibliography, and glossary or index automatically.

- a) TOC
- b) Table of content
- c) Table
- d) Content

Answer: TOC

Question: In the SciTE editor, the file can be saved using____menu option.

- a) File → Build
- b) File → Save
- c) File → Save as
- d) File → Edit

Answer: File → **Save**

Question: In the SciTE editor, the file can be compiled using _____menu option.

- a) Tools → Build
- b) File → Save
- c) File → Save as
- d) Tools → Edit

Answer: Tools → **Build**

Question:	In the	SciTE	editor,	the	shortcut	key 1	for c	ompi	ation
is									

- a) F8
- b) F4
- c) F7
- d) F5

Answer: F7

Question: In the SciTE editor, the last line "Exit code: 0" is_____in color.

- a) Yellow
- b) Black
- c) Red
- d) Blue

Answer: Blue

Question: In the SciTE editor, the file can be viewed in the default document viewer by selecting____menu option.

- a) Tools → Edit
- b) Tools → New
- c) Tools → Build
- d) Tools → Go

Answer: Tools → **Go**

Question: In the SciTE editor, the shortcut key for viewing in the default document is_____

- a) F8
- b) F4
- c) F7
- d) F5

Answer: F5

Question: In LaTeX documents, a paragraph is typed in a continuous flow without pressing_____key.

- a) Tab
- b) Enter
- c) Shift
- d) Delete

Answer: Enter

Question: LaTeX usually avoids breaking a word in____parts.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Two

Question: LaTeX has a hyphenation algorithm to decide the most appropriate way of breaking the word with a
 a) Hyphen (-) b) Tilde(~) c) Underscore(_) d) Colon(:)
Answer: Hyphen (-)

Question: LaTeX uses the _____character to denote a non-breaking space.

- a) Hyphen .(-)
- b) Tilde(~)
- c) Underscore(_)
- d) Colon(:)

Answer: Tilde(~)

Question: LaTeX divides font families into____categories.

- a) One
- b) Two
- c) Three
- d) Four

Answer: Three

Question: _____(also called serif) font have a tiny line or curve called serif at the end of the strokes lines.

- a) Roman
- b) Monospace
- c) Script
- d) Sans serif

Answer: Roman

Question: _____fonts do not have serifs.

- a) Roman
- b) Monospace
- c) Script
- d) Sans serif

Answer: Sans serif

Question: _____fonts use equal width for all characters.

- a) Roman
- b) Monospace
- c) Script
- d) Sans serif

Answer: Monospace

Question: _____fonts are typically used for computer code listings.

- a) Roman
- b) Monospace
- c) Script
- d) Sans serif

Answer: Monospace

Question: The default font is_____

- a) Roman
- b) Monospace
- c) Script
- d) Sans serif

Answer: Roman

Question: Roman font can be used for any text by employing the____command.

- a) \textrm{text}
- b) \textsf{text}
- c) \texttt{text}
- d) None of these

Answer: \textrm{text}

Question: Sans serif font can be used for any text by employing the____command.

- a) \textrm{text}
- b) \textsf{text}
- c) \texttt{text}
- d) None of these

Answer: \textsf{text}

Question: Monospace font can be used for any text by employing the_____command.

- a) \textrm{text}
- b) \textsf{text}
- c) \texttt{text}
- d) None of these

Answer: \textt{text}

Question: The font size can be changed using the command_____

- a) \tiny
- b) \scriptsize
- c) \footnotesize
- d) All of these

Answer: All of these

Question: The font size can be changed using the command_____

- a) \ small
- b) \normalsize

- c) Marge
- d) All of these

Answer: All of these

Question: The font size can be changed using the command_____

- a) \LARGE
- b) \huge
- c) \Huge
- d) All of these

Answer: All of these

Question: The command____can be used to add the bold effect to the text.

- a) \textbf
- b) \textit
- c) \emph
- d) All of these

Answer: \textbf

Question: The command____can be used to add the italic effect to the text.

- a) \textbf
- b) \textit
- c) \emph
- d) All of these

Answer: \textit

Question: The command____can be used to add the emphasis effect to the text.

- a) \textbf
- b) \textit
- c) \emph
- d) All of these

Answer: \emph

Question: ____command provides small capital letters.

- a) \textbf
- b) \textit
- c) \emph
- d) \textsc

Answer: \textsc

Question: Superscripts can be created in text mode using the command

- a) \text super script
- b) \text sub script

- c) fixltx2e
- d) None of these

Answer: \text super script

Question: Subscripts can be created in text mode using the command

- a) \text super script
- b) \text sub script
- c) fixltx2e
- d) None of these

Answer: \text sub script

Question: Superscripts and Subscripts can be created in the text using the package_____

- a) \text super script
- b) \text sub script
- c) fixltx2e
- d) None of these

Answer: fixltx2e

Question: In LaTeX, the _____package provides the single space, one half space, double space and spacing {amount-of-spacing} environments for setting the line spacing.

- a) Space set
- b) Set space
- c) Space out
- d) Space line

Answer: Set space

Question: By default, body text alignment is fully_____in LaTeX.

- a) Justified
- b) Left
- c) Right
- d) Centered

Answer: Justified

Question: To achieve left alignment, one has to use the environment_____

- a) Flushleft
- b) flushright
- c) Center
- d) Justify

Answer: Flushleft

Question: To achieve right alignment, one has to use the environment_____

- a) Flushleft
- b) Flushright
- c) Center
- d) Justify

Answer: Flushright

Question: To achieve center alignment, one has to use the environment_____

- a) Flushleft
- b) Flushright
- c) Center
- d) Flushcenter

Answer: Center

Question: The first line of a paragraph is _____except for the paragraphs immediately following a heading.

- a) Margined
- b) Indented
- c) Single spaced
- d) Tabbed

Answer: Indented

Question: The _____command is used immediately before a paragraph to explicitly make the first line indented.

- a) \tab
- b) \para
- c) \indent
- d) \noindent

Answer: \indent

Question: The_____command is used immediately before a paragraph to explicitly make the first line unindented.

- a) \tab
- b) \unindent
- c) \ indent
- d) \noindent

Answer: \noindent

Question: The_____environment outputs everything inside it (including special characters, spaces, newlines and LaTeX commands) as it is without any processing.

- a) Verbatim
- b) Moreverb
- c) Listing
- d) Newline

Answer: Verbatim

Question: The_____package provides a listing environment with one mandatory argument line-number-of-first-line for program code listing with line numbers.

- a) Verbatim
- b) More verb
- c) Listing
- d) Newline

Answer: More verb

Question: The paper size and margins can be passed as optional arguments with the _____command itself.

- a) \moreverb
- b) Verbatim
- c) \usepackage
- d) \usesize

Answer: \usepackage

Question: Page____have been standardized internationally.

- a) Sizes
- b) Length
- c) Width
- d) Dimension

Answer: Sizes

Question: The page_____commonly used with regular printers are A4, letter and legal.

- a) Sizes
- b) Length
- c) Width
- d) Dimension

Answer: Sizes

Question: The page size of 'A4' can be specified by_____

- a) Paper a4
- b) a4 paper
- c) Letter paper
- d) Legal paper

Answer: a4 paper

Question: The page size of 'letter' can be specified by_____

- a) Paper a4
- b) a4 paper
- c) Letter paper
- d) Paperletter

Answer: Letter paper

Question: The page size of 'legal' can be specified by_____

- a) Paper a4
- b) a4 paper
- c) Paperlegal
- d) Legal paper

Answer: Legal paper

Question: The default page orientation is the_____

- a) Landscape
- b) Portrait
- c) A4
- d) Legal

Answer: Portrait

Question: ____can be either one-sided or two-sided.

- a) Letters
- b) Files
- c) Documents
- d) Papers

Answer: Documents

Question: _____are by default one-sided while books are two-sided.

- a) Articles
- b) Files
- c) Documents
- d) Papers

Answer: Articles

Question: Ability of automatically laying out complex mathematical content is a major strength of

- a) TeX
- b) SciTE
- c) LaTeX
- d) Ubuntu

Answer: LaTeX

Question: The most common way of laying out mathematical content in LaTeX is using the package_____created by the American Mathematical Society.

- a) Amsmath
- b) Amssymb
- c) Amsfonts
- d) All of these

Answer: All of these

Question: A convenient way of embedding math environment in running text is to enclose the mathematical content between_____

• a) #...#

- b) %...%
- c) &...&
- d) \$...\$

Answer: \$...\$

Question: In mathematical environments, each letter is treated as a mathematical

- a) Value
- b) Number
- c) Variable
- d) Equation

Answer: Variable

Question: LaTeX commands and the mathematical symbols are produced by them using the _____packages.

- a) MAS
- b) AMS
- c) MATH
- d) GREEK

Answer: AMS

Question: LaTeX supports a large number of mathematical_____

- a) Operators
- b) Formulas
- c) Signs
- d) Text

Answer: Operators

Question: The subscript operator in LaTeX is_____

- a) (the underscore character)
- b) ^ (the caret character)
- c) % (the percentage character)
- d) ~ (tilde character)

Answer: (the underscore character)

Question: The superscript operator in LaTeX is the_____

- a) ^ (the caret character)
- b) _(the underscore character)
- c) % (the percentage character)
- d) ~ (tilde character)

Answer: ^ (the caret character)

Question: The superscript operator_____the text that follows it.

- a) Raises
- b) Lowers
- c) Underlines
- d) Strikes

Answer: Raises

Question: The subscri	pt operator	lowers the	text that	follows if	t.

- a) Raises
- b) Lowers
- c) Underlines
- d) Strikes

Answer: Lowers

Question: Absolute values can be denoted by enclosing the expression between two____symbols.

- a) \$ (dollar)
- b) | (vertical bar)
- c) % (percentage)
- d) " (quotes)

Answer: | (vertical bar)

Question: Fractions are created using the command_____{numeratorHdenominator}.

- a) \ fraction
- b) Fractions
- c) Frcs
- d) \frac

Answer: \frac

Question: Square root of a number x is denoted using the command_____{x}.

- a) \ square
- b) Squareroot
- c) \sqrt
- d) Sqroot

Answer: \sqrt

Question: LaTeX provides a special _____environment for typesetting equations.

- a) Math
- b) Displaymath
- c) Equation
- d) Math formula

Answer: Equation

Question: _____are numbered automatically and center-aligned.

- a) Values
- b) Numbers
- c) Variables
- d) Equations

Answer: Equations

Question: Just as	_was extended to	LaTeX,	LaTeX	itself	also	can
be extended.						

- a) TeX
- b) SciTE
- c) LaTeX
- d) Ubuntu

Answer: TeX

Question: Anyone can create additional packages to enhance the features provided in_____to add new features or to provide alternate implementations.

- a) TeX
- b) SciTE
- c) LaTeX
- d) Ubuntu

Answer: LaTeX

Question: Thousands of LaTeX____have been created by LaTeX users around the world to cater to different needs.

- a) Packages
- b) Softwares
- c) Programs
- d) Files

Answer: Packages

Question: Most of LaTeX packages are_____

- a) Charged
- b) Free
- c) Shareware
- d) Fined

Answer: Free

Question: The LaTeX packages are hosted on the_____

- a) Comparative TeX Archive Network (CTAN)
- b) Comprehensive TeX Archive Network (CTAN)
- c) Complete TeX Archive Network (CTAN)
- d) Comprehensive TeX Archive Net (CTAN)

Answer: Comprehensive TeX Archive Network (CTAN)

Question: CTAN website is at

- a) <u>www.ctan.com</u>
- b) www.ctan.in
- c) www.ctan.co.in
- d) www.ctan.org

Answer: www.ctan.org

Question: ______is quite popular among authors and publishers in mathematics, engineering, computer science and other technical areas.

- a) TeX
- b) SciTE
- c) LaTeX
- d) Ubuntu

Answer: LaTeX

Question: LaTeX is_____it is highly systematic and is developed in the academic spirit of knowledge sharing and collaboration.

- a) Open source
- b) Closed source
- c) Open foundation
- d) None of these

Answer: Open source

Question: _____is also getting popular among academicians and scholars.

- a) TeX
- b) SciTE
- c) LaTeX
- d) Ubuntu

Answer: LaTeX

Question: The output of ($\frac{x_l+x_2}{2}$, $\frac{y_l+y_2}{2}$) is_____

 $\frac{x_1+x_2}{2}$, $\frac{y_2}{2}$

$$\frac{x1}{2}$$
, $\frac{y1+y2}{2}$

• c)
$$\frac{x1+x2}{2}$$
, $\frac{y1+y2}{2}$

• d)
$$\frac{x1+x2}{2}$$
, $\frac{y1+y2}{2}$

Answer:

$$\frac{x1+x2}{2}$$
, $\frac{y1+y2}{2}$

Question: The subsections are divided int_____

- a) Chapters
- b) Paragraphs
- c) Parts
- d) Sub subsections

Answer: Sub subsections

Question: The sub subsections are divided into_____

- a) Chapters
- b) Paragraphs
- c) Parts
- d) Subsections

Answer: Paragraphs

Question: Each of the above division (of the main content)____one compulsory argument, the title; and one optional argument.

- a) Accepts
- b) Acknowledges
- c) Receives
- d) Agrees

Answer: Accepts

Question: The title has to be displayed in the table of_____

- a) Lists
- b) Details
- c) Contents
- d) Elements

Answer: Contents

Question: The paragraphs are divided into_____

- a) Chapters
- b) Sub paragraphs
- c) Parts
- d) Subsections

Answer: Sub paragraphs

Question: LaTeX has_____facilities to automatically update numbering and references and to automatically create table of contents, indexes, and other such needs, taking a major burden off the mind of the author.

- a) Integrated
- b) Built-in
- c) Many
- d) Incorporated

Answer: Built-in

Question: The output of \sqrt{b} \\[6pt] is_____

- a) 4b C
- b) 4b + 6
- c) 4b 16
- d) 4b pt

Answer: 4b C
